DEPUTY MINISTER—F. A. ACLAND.
EDITOR OF 'THE LABOUR GAZETTE'—BRYCE M. STEWART.

Volume 18 JANUARY, 1918. Number 1

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

In this Issue

Except in industrial establishments seasonally quiet, employment during December continued at a high level. In some cases slackness due to fuel shortage was reported and there was some quietness during the holiday season. The cost of the weekly budget of staple foods was $12.24 for December as compared with $12.10 for the previous month and $7.95 ... December, 1914. The Departmental index number of wholesale prices stood at 253.3 for December as compared with 247.3 for the previous month and 137.6 for December, 1914. Only four new strikes were recorded in December, as compared with six in the previous month. Three of the new and four of the old strikes were recorded as having terminated, leaving five unsettled strikes at the close of the year. Special articles deal with a report of the United States Employees Compensation Commision and with prices during the year 1917.

Proceedings under the Industrial Disputes Investigation Act

During December, majority and minority reports were received from the Board appointed to deal with a dispute between the Canadian Pacific Railway Company and its freight handlers at Vancouver. Two applications for Boards were received, one from conductors, trainmen and yardmen employed on the Canadian Northern Western lines and the other from employees of the Dominion Coal Company at Glace Bay. In the former case a Board was established and in the latter an investigation which was being conducted by the Government into the shortage of coal production, obviated the necssity for the establishment of the Board. No action was taken on the application for a Board received during November from maintenance-of-way employees of the Grand Trunk Pacific Railway as it was deemed advisable to await the outcome of the enquiry which had been made into a dispute affecting the same class of employees on the Canadian Pacific Railway. A further communication from Mr. D. Campbell, who was a member of a Board appointed to investigate a dispute between the Canadian Pacific Railway and its maintenance of way employees was received. Mr. Campbell had already made a minority report and his letter was in reply to a supplementary report of the Chairman of the Board. During December the International Transit Company accepted the award of the Board which had enquired into a dispute affecting the employees of the street railway at Sault Ste. Marie and Steelton; the employees had already accepted the award.

Workmen's Compensation in Quebec and New Brunswick

In December representatives of the Trades and Labour Congress of Canada, the Montreal Trades and Labour Council, the Labour Party of Montreal and the Brotherhoods of Railway Employees waited upon the Cabinet of the Quebec Government and presented a number of resolutions dealing with the high cost of living, home work in the garment industry, technical education, factory inspection and other matters. Perhaps the most important resolution was that which asked for better workmen's compensation in the province. (See also issue of September, 1917, p. 662.) It was pointed out that the provinces of Ontario, Nova Scotia and British Columbia had appointed special commissions which had studied the question of workmen's compensation, and in view of their recommendations new compensation acts had been passed in these three provinces. These new acts, it was asserted, were vastly superior to the legislation in force in the Province of Quebec, and it was urged that a special commission should be appointed to study the question with a view to having a new Workmen's Compensation legislation enacted at the next session of the Quebec Legislature. The Commission appointed by the Provincial Government of New Brunswick to inquire into the operation of the Workmen's Compensation Act of New Brunswick has been taking further evidence (see also issue of August, 1917, p. 572) and has held meetings in different parts of the province. It is reported that the general opinion of both employers and employees is that much improvement can be made in the present Workmen's Compensation Act.

The New York State Industrial Safety Congress

The December issue of the Bulletin of the Industrial Commission of New York State is given over almost entirely to a report of the deliberations of the Third New York State Industrial Safety Congress, held at Syracuse, N.Y., in the first week of December. Over one thousand representatives of manufacturing corporations, trade unions and safety organizations were in attendance. Six distinct features stood out in the deliberations:

1. Relative responsibilities of employers, employees and the public in promotion of safety and prevention of accidents.

2. What will be the effect upon individual safety and industry after the war?

3. What effect will maimed war veterans have upon industry after the war?

4. Concession upon the part of th manufacturers of the State as a whole that the inspection force of the New York State Department of Labour is an exceedingly high-class and efficient body of men and women.

5. Determination to maintain New York States high standard of industrial efficiency, war or no war.

6. That compulsory education of all foreigner workers would conduce to greater industrial safety.

President Carleton A. Chase of the Associated Manufacturers and Merchants of New York State emphasized the service the Congress might render in connection with the problem of maimed soldier workmen. Dr. Royal H. Meeker, United States Commissioner of Labour Statistics, said that workmen's compensation laws should be standardized, and

expressed the hope that the time of standardization and uniformity in compensation laws all over the United States was not far off. A paper on "The English for Safety Campaign by the State Industrial Commission" was given by Mrs. Marian K. Clark, Chief Investigator of the New York Industrial Commission's Bureau of Industry and Immigration. On Tuesday, Wednesday and Thursday, morning sessions were given over to set papers, while the afternoons were devoted to "round table discussions" led by practical experts. Tuesday was "employers' day." Wednesday was "employees' day," while Thursday was "State Industrial Commission day." At the morning session on Tuesday, Dr. Lucian W. Cheney, of the United States Bureau of Labour Statistics, read a paper on "The Engineering Factor in Safety Work." He said that safety men must recognize that they are dealing with two very different classes of things—the causes of minor injury and the causes of death.

The first is in a large measure a matter of the human factor, but in the second there is needed a re-examination of industry from the engineering standpoint, to the end that the lurking dangers which lead to death may be discovered and remedies devised and applied. James Eaton, of the General Electric Company of Schenectady, urged the extension of the anti-accident campaign, and Mr. F. S. Katura, Chief Engineer of the Department of Finance of the Imperial Government of Japan, gave an interesting talk on labour conditions in Japan. In the afternoon discussion on "employers' day," the subjects discussed were mechanical devices or education, shop conditions, and accident prevention in its relation to labour turnover. The evening was devoted to addresses on safety campaigns in the State of New Jersey and in the City of Rochester. On "employees' day," the first speaker was R. M. Little, Chairman of the United States Employees' Compensation Commission, who outlined safety conditions in governmental industrial establishments. John M. O'Hanlon, of Troy, read a paper on "Disciplining Careless Workmen." The Wednesday evening session was given over to "Women in Industry as a Result of the War." On "State Industrial Commission day," Charles B. Barnes, Director of the Industrial Commission's Employment Bureau, read a paper on "The Labour Market," and inspectors of the Commission discussed factory exits and fire hazards, the enforcement of labour laws, safeguards and safe practices, and co-operation between employer and employee and factory inspectors. The safety exhibit of practical safety devices and the exhibit of the work of the various bureaus of the State Industrial Commission attracted widespread attention.

* * *

Labour Committee, Maritime Board and Agricultural Wages Board in the United Kingdom

The December *Labour Gazette* of the Ministry of Labour of the United Kingdom reports that the War Cabinet have appointed a committee to co-ordinate the action of governmental departments on matters connected with industrial wages and disputes by laying down general principles for their guidance and settling questions of policy affecting more than one Department. The War Cabinet Labour Committee will not supersede Arbitration Tribunals set up under the Munitions of War Acts by the Ministry of Labour, and that administration will remain with the Government departments concerned. The chairman of the committee is the Right Honourable G. N. Barnes, M.P.

The Shipping Controller announced November 2 that shipowners and seamen had agreed to the formation of a National Maritime Board to settle the standard rates of pay for officers and men of the mercantile marine and to advise on all questions relative to the personnel of the mercantile marine. The chairman of the Board is Sir Leo Chiozza Money, M.D. There are six re-

presentatives of shipowners and separate panels of representatives of deck officers, engineers, seamen and firemen and men of the catering departments, respectively. Revised schedules of pay for various classes of seamen have already been agreed upon.

The Board of Agriculture and Fisheries have established the Agricultural Wages Board for England and Wales under Part II of the Corn Production Act, 1917. The Board consists of 39 members, of whom seven are appointed as impartial members and the remainder as representatives in equal numbers of the interests of employers and workers, respectively. Of the 16 representatives of employers, the Royal Agricultural Society, the National Farmers' Union, the Central and Associated Chambers of Agriculture, and the Welsh Agricultural Council were each invited to elect two members, and of the representatives of workers, the National Agricultural Labourers and Rural Workers' Union were invited to elect six, and the Workers' Union two. The remaining representative members have been nominated by the president of the Board of Agriculture and Fisheries after consultation in regard to the representatives of workers with the Minister of Labour.

* * *

Changes in the occcupations of women and girls in Great Britain during the war,

An interesting analysis of the pre-war occupations of some 524,000 female munition workers in the United Kingdom appears in the December issue of the *Labour Gazette* of the British Ministry of Labour. The workers whose occupations were investigated were those to whom unemployment books were issued up to January, 1917, under the National Insurance (Part II) Munition Workers Act of 1916. Of the total number, 444,137 (380,470 women and 63,667 girls) stated their occupations definitely enough to make tabulation possible, and the following table shows that of this number nearly 308,000 had changed their occupations:

Pre-War Occupations.	Occupations at January, 1917				
	Metal Trades (excluding Engineering)	Chemical Trades (including Small Arms)	Clothing Trades	Other Trades	All Insure Trades
Same Trade.....	53,249	14,634	38,256	30,399	136,538
Household Duties, and not previously occupied.....	18,927	52,407	9,334	17,843	98,511
Textile Trades....	3,408	6,226	1,000	4,374	15,008
Clothing Trades...	4,635	17,911	8,430	8,787	39,793
Other Industries...	12,458	20,879	5,745	10,065	49,147
Domestic Service..	12,502	44,438	4,970	12,062	73,992
Other non-industrial occupations	5,449	17,079	3,643	4,977	31,148
Total Insured...	110,628	173,604	71,378	88,527	444,137

In July, 1917, the latest date for which figures were available, the number of women drawn into industrial work (including Government establishments) was 720,000, or about double the number drawn into the trades here considered, and assuming that the whole of the increase of 720,000 can be accounted for in the same manner, it would mean that it is made up as follows: 231,000 women and girls who were previously unoccupied, 173,000 who were domestic servants, 243,000 who came from other industries, including 93,000 from the clothing trades, and 73,000 from non-industrial occupations other than domestic service. It is pointed out that the fact that so many persons have left a trade cannot be taken to indicate that the numbers employed have decreased by an equal amount, because these trades have in their turn drawn in workers from the outside.

The following table shows what percentage of the total classified for each group of insured trades had been previously employed in the same occupation, and what percentage had been drawn from the various other occupations. It will be seen that 48.1 per cent of the women and girls in the metal trades insured under the Act were previously employed in the same trade, while 51.9 per cent were drawn from other occupations. In the chemical

trade only 8.4 per cent were previously in this line, but it is pointed out that this is due to the great developments in the manufacture of explosives since the outbreak of the war. In the clothing trade 53.6 per cent were employed in this line before the war, while in the lines included in "other trades" 34.3 per cent of those now engaged are following their pre-war occupation. Taking all the insured trades together, about 31 per cent have not changed their occupations, 22 per cent were previously unoccupied or engaged in household duties, 23 per cent came from other industries, and 17 per cent from domestic service.

Pre-War Occupations.	Occupations at January, 1917				
	Metal Trades	Chemical Trades	Clothing Trades	Other Trades	All Insured Trades
Same Trade.....	48.1	8.4	53.6	34.3	30.7
Household Duties, and not previously occupied.....	17.1	30.2	13.1	20.2	22.2
Textile Trade.....	3 1	3.6	1.4	4.9	3.4
Clothing Trade...	4.2	10.3	11.8	9.9	9.0
Other Industries..	11.3	12.0	8.0	11.4	11.1
Domestic Service..	11.3	25.6	7.0	13.7	16.6
Other non-industrial occupations.....	4.9	9.9	5.1	5.6	7.0
Total Insured ..	100.0	100.0	100.0	100.0	100.0

Labour Jottings

On Christmas Eve the American Bank Note Company of Ottawa announced the inauguration of a system of life insurance for its employees. The amount of insurance is based on wages received and length of service. In the case of female employees the minimum policy is $500 and the maximum $1,000, and in the case of male employees the minimum is $1,000 and the maximum $4,000. The entire expense of the plan is borne by the company. Some five hundred male and female employees will be affected.

Under date of August 21, 1917, the Parliament of the United Kingdom passed "An Act to provide for an addition during the present war and a period of six months thereafter, to the amount of the compensation payable under the Workmen's Compensation Act of 1906, in cases of total incapacity."

It is reported that such members of the civil service of British Columbia as would be protected by the Workmen's Compensation Act of the province if engaged in private enterprise, will be brought under that measure in the near future.

At a recent meeting of the provincial labour executive and representatives of the Saskatchewan Government, the passing of legislation on alien labour, child labour and other labour subjects was discussed.

It is reported that the Housewives' League of the City of Quebec have undertaken with considerable success measures for reducing the cost of living. Potatoes, flour and other foods have been bought in quantities at reduced rates. The League also pointed out to the City Council that by local custom potatoes were sold in 80-pound bags while those brought in from outside points were sold in 90-pound bags. In view of their representations the municipal authorities fixed the weight of a bag of potatoes for sale in the city at 90 pounds.

Some account of the disruption of industry caused by the Halifax disaster is given on page 15.

According to the Firemen's Herald of December 8th, 1917, members of the police and fire departments in Cincinnati, Ohio, have been forbidden to join "any organization or society the objects or purpose of which shall, either directly or indirectly seek to interfere with the discipline and conduct of a member of the department and the exclusive control of the police department (or fire department) by the Director of Public Safety."

A Bill has been introduced into the United States Congress providing for organization of an employment service in the Department of Labour. The Bill, which is substantially the same as the one outlined in the October, 1917, *La-*

bour Gazette (page 768) calls for an appropriation of $1,000,000 for the fiscal year ending June 1, 1918, and $2,000,000 for each fiscal year thereafter for the assistance of public employ bureaus in the various states which conform to regulations laid down by the Federal Bureau.

The United States Compensation Commission recently announced the settlement of a claim of a railway postal clerk who had been thrown from a mail coach on the Baltimore and Ohio Railway and seriously injured. Instead of filing suit against the Company he assigned the right to the Compensation Commission as permitted under the Federal compensation act. The Commission paid compensation at the rate of $66.67 per month, settled the hospital and doctor bills and took up the question with the railroad. On the basis of the reports of impartial physicians a settlement was effected with the railway for the sum of $2,500.

A report of the Department of Labour on Strikes and Lockouts in Canada, 1901-1916, will be ready for distribution in the course of a few weeks.

The index of the 1917 volume of the *Labour Gazette* accompanies this issue.

INDUSTRIAL CONDITIONS DURING DECEMBER, 1917

I.—GENERAL REVIEW

The Labour Market

On the whole employment continued on the same high level in December, except in industries seasonally quiet. There was some quietness during the holiday season and in a few cases slackness due to fuel shortage was reported. Employment in the steel industry was very good and also in metals and machinery generally, except in a few establishments affected by shortage of materials. Employment in shipyards continued brisk and much of the unskilled labour released from 'longshore work was absorbed. At Montreal, munition workers were in demand and at Toronto munition workers and toolmakers were wanted. Fitters were required for Halifax and boilermakers and stove mounters were in demand at several points. In foods employment was very good. In most cases flour mills worked day and night and cereal mills were busier owing to some modification of the Food Controller's regulations. Bakers and confectioners were well employed with the Christmas trade and employment in sugar refineries was better than last month except at St. John N.B., and Kitchener, Ont. Meat packing houses also reported improvement and abattoir hands were in demand at Toronto. Brewery workers were slack at most points, and employment for cigarmakers was only fair. Employment in textiles was good and some overtime was worked. In clothing, workers on hats, caps, gloves and fur were generally busy, but some quietness was reported by clothing firms at Ottawa, Hull and Winnipeg, and there was slackness also in collar and button factories. Employment in pulp and paper mills was reported good except at Ottawa, where there was a falling off in the demand for newsprint and some difficulty in securing material. Printers on newspaper work continued fairly well employed and there was an improvement in job printing. The Christmas trade afforded an increase in the volume of employment for workers on paper bags and boxes. Reconstruction operations at Halifax set up an active demand for building materials and increased the volume of employment in sash, door and planing mills

in the maritime provinces and in parts of Ontario and Quebec. In the west planing mills continued quiet. Boot and shoe workers were on the whole well employed, and workers in tanneries had a good month. Employment for railway workers continued good and there was a demand for trackmen at Montreal, Fort William, Port Arthur and Edmonton. Employment in railway shops was very good. Employment for 'longshoremen was good at both Atlantic and Pacific ports. In the metal mines at Cobalt and Porcupine employment continued good and with the settlement of the strike at the Trail Smelter metal mining in British Columbia was more active. Coal miners in Nova Scotia and in Alberta and British Columbia were well employed, and miners were in demand at Edmonton. Employment in lumbering camps continued good, with a demand for bushmen at Montreal, Ottawa, Toronto, Fort William, Port Arthur, Winnipeg, Saskatoon, Edmonton and Calgary. Employment in the building trades as indicated by the value of building permits issued in 35 cities decreased 59.3 per cent as compared with November, and 81.6 per cent as compared with December, 1916. At points in the Maritime Provinces, Quebec and Ontario, there was a heavy demand for carpenters, glaziers and builders' labourers for reconstruction work at Halifax. In civic employment, reports from 15 cities indicated an increase of 17 per cent in the number of employees temporarily employed, and a decline of 15 per cent in the wages paid such employees in the first payroll period of two weeks, as compared with the same period in November. With the seasonal quietness in agriculture the demand for farm labourers declined, although at Winnipeg, Saskatoon and Edmonton, there was some demand for help on stock farms. The demand for workpeople at 110 employment offices showed a decline of 16 per cent compared with October and a gain of about 9 per cent as compared with November, 1916.

Strikes

There was a decline in the number of strikes in existence and in the number of strikes recorded in December, although there was a slight increase in the time loss due to industrial disputes. Four new strikes were recorded in the month as compared with six in November. In all there were 12 strikes, involving 25 firms and 3,209 employees, in existence at some time or other in December. The total time loss was estimated at 33,192 working days, as compared with 26,844 in November and 12,523 in December, 1916. There were eight disputes carried over from November, and three of these, together with three of the December strikes, terminated during the month, while one dispute was regarded as having ceased to affect conditions, leaving the five following unterminated strikes on record at the end of December: plumbers and steamfitters, St John, N.B.; moulders, Galt, Ont., and boilermakers, garment workers and cigarmakers at Montreal, Que.

Prices

In prices the greatest increases appeared in some grains, and in fodder, fresh fish, bananas, lemons and textiles, while there were smaller advances in many other commodities. In the retail prices of foods there were slight increases in many of the staples, but the more important increases appeared in salt pork, lard, eggs and potatoes. Coal and wood were also higher. The average cost of a family budget of staple foods was $12.24 for December as compared with $12.10 for the previous month, $10.10 for December, 1916, and $7.95 for December, 1914. The Departmental index number of wholesale prices, based on the average prices of 272 commodities during the decade 1890-99, was 253.5 for December, as compared with 247.3 for the previous month, 207.4 for December, 1916, and 137.6 for December, 1914.

II.—THE INDUSTRIES AND TRADES

Metals, machinery and conveyances.—The Sydney steel plant reported production for December as follows: pig iron 48,000 tons, ingots 32,000, blooms, billets and slabs 24,000, wire rods 5,000, wire and products of wire 12,000, as compared with a production in November of pig iron 29,000, ingots 34,000, blooms, billets and slabs 29,000, rods 7,000, wire and wire products 1,500. Four blast furnaces were in operation, and while the rail and merchant mills were idle all the men were well employed. At the Sydney Mines steel plant the production of iron was 6,200 tons and of steel 8,000 tons, as compared with 7,200 tons of iron and 9,700 tons of steel produced during the previous month. Halifax reported the rolling mills and skate factory of the Starr Manufacturing Company damaged, but it was expected operations would be resumed in January. The workshops of the drydock at Halifax were destroyed. Westville reported steel plants working at capacity, and at Amherst, machine shops and the Canada Car Company's plant were active. Truro reported steel works running full time in two shifts, and at St. John, rolling mills, shipyards and other metal industries were active. Moncton reported the Government railway shops active and normal conditions in foundries; machine shops were well supplied with work, but were short of skilled machinists. At Fredericton more hands were taken on at machine shops. Montreal reported the Lachine plant of the Dominion Bridge Company had orders which would keep the plant busy for several months. At Quebec, shipbuilding and repairing trades had a busy month. At Sherbrooke, metal industries were active, though not as busy as during the same period of last year. Three Rivers and Sorel reported iron foundries and machine shops active; employment in ship yards at Sorel was fairly good. Toronto reported the metal and machinery trades busy except where work was retarded by scarcity of material and working forces at some plants were decreased. At Hamilton all branches of the metals, machinery and conveyances group were active, with a demand for labour in the manufacture of locomotives and cars, stoves and furnaces and electrical apparatus. St. Catharines and Niagara Falls reported metal working plants busy, and at Niagara Falls skilled labour was in constant demand. Foundries and machine shops at Ottawa were busy, and there was a demand for boilermakers, machinists, stove mounters and pattern makers; one plant at Renfrew finished operations and released a small number of employees. Brockville reported a fair amount of activity on boilers, stoves and furnaces and hardware, but motor boat building was quiet. The Canadian Locomotive Works and the Shipbuilding Company at Kingston were active, and at Belleville and Peterborough all branches of the metal trades were busy. Galt reported stove and furnace foundries, engine and boiler factories and other branches of the metals group active, and at Brantford, agricultural implement plants were working overtime.

Manufacturing

Kitchener reported the various branches of the metals group normally engaged, and at Guelph there was a demand for skilled workmen in machine shops and foundries; Stratford also reported a demand for men in the metals group. At Woodstock the supply of labour in wagon factories was equal to the demand, but in stove and furnace foundries, moulders, mounters and polishers were required. London reported foundries and machine shops busy, and at St. Thomas, iron foundries and the railway shops were active. Chatham report-

ed the metals trade active, but owing to the low pressure of natural gas for fuel several factories closed down for a few days. Windsor also reported metal factories adversely affected by fuel shortage, but the bridge works and other iron plants were making parts for stock and expected to keep the greater part of their hands busy during the slack season. Machine shops and foundries at Owen Sound were busy, and Orillia reported the stove foundry and agricultural implement foundry active. At Port Arthur, iron working establishments and shipbuilding yards were short of machinists and iron workers. In Fort William, the car works, the foundry and the Northern Engineering Works were busy and short of mechanics, though there was a sufficient supply of ordinary labour owing to the release of 'longshoremen. Winnipeg reported all branches of the metal and machinery group well employed, and at Brandon, agricultural implement plants and machine shops were busy. Medicine Hat reported the metal working industries quiet, with the exception of a few shops engaged in special work. Calgary reported locomotive shops and iron works fully employed, but at Edmonton the Edmonton Iron and Machinery Company, having finished a number of its contracts, laid off some employees. Vancouver reported activity in engine works and in boat and shipbuilding yards; iron foundries and ship yards at Victoria were fairly brisk.

Food, tobacco and liquors.—Halifax reported that the Richmond plant of the Acadia Sugar Company was completely destroyed, but the company's refinery at Woodside continued busy, though closed for a short time awaiting shipments of raw sugar; bakers continued in operation, but two breweries were destroyed. St. John reported flour and feed mills busy, but the sugar refinery was working with a reduced staff; one brewery shut down and another was expected to close the first of the year. Moncton reported the biscuit factory running to capacity, and at Fredericton, meat packing houses and confectioneries were busy. At Montreal, manufactures of food, tobacco and liquors reported an increase of business during the holiday season. Quebec reported baking and confectionery establishments active, and Sherbrooke and Hull reported meat packing houses active. At Toronto, flour and feed mills, abattoirs and meat packing houses were busy, and two companies commenced the manufacture of oleomargarine; baking and confectionery establishments were busy and candy factories worked overtime; fruit canning and extract firms were active most of the month and a modification of the order of the Food Controller regarding the package of cereal products resulted in a renewal of activity in this industry. At Hamilton, flour mills, meat packing houses and fruit and vegetable canneries were active, and there was a demand for cigarmakers. Peterborough reported flour and cereal mills working overtime and meat packing houses very busy. At Brantford, milling companies were running full time and confectioneries were active. Kitchener reported flour mills active, meat and sausage plants, bakeries and confectioneries busy, but the sugar factory closed down; cigar factories had a fair month, but breweries were quieter. At Guelph and Stratford the various branches of the food group had an active month, and at Woodstock there was a demand for women in baking and confectionery establishments. London reported biscuit and confectionery factories working overtime and the Corn Flake Company, which had been quiet for some time, resumed active operations. Chatham reported flour mills and meat packing houses very active and the sugar factory working 24 hours a day, seven days a week. At Windsor, food and tobacco industries were busy, but breweries and distilleries were quiet. Oatmeal mills at Owen Sound were running day and night. Winnipeg reported confectioneries busy, with experienced chocolate dippers and bakers in demand; milling companies and abattoirs reported a fair month's business. At Brandon, flour mills were active, but cigar fac-

tories and breweries were dull. Regina and Prince Albert reported the foods group busy, and at Medicine Hat there was a scarcity of help in candy factories. At Lethbridge, flour mills were fairly busy and breweries were working overtime. Calgary reported flour mills running day and night shifts and abattoirs and meat packing houses steadily engaged. Cigar factories reported business good and breweries and soft drink establishments showed improvement. At Edmonton the Swift Canadian packing house increased the number of its employees. Vancouver reported flour and feed mills, the sugar refinery and abattoirs steadily employed; fruit and vegetable canneries were quiet and evaporating plants had completed contracts; cigar factories were dull.

Textiles, cordage and carpets.—Halifax reported that the Dominion Textile Company's cotton factory, which employed about 200 hands, was burned, but employees were being placed on other of the company's mills. About 50 women were thrown out of employment by damage to the Dartmouth rope works. Amherst reported woollen mills working full time, and at Truro, woollen mills were steadily employed. Cotton factories at St. John were active. At Moncton, woollen mills and underwear factories were in active operation, and at Fredericton, cotton factories were working full time. At Montreal, cotton mills made large deliveries of spring lines and still had heavy orders on hand. Cotton mills at Quebec worked overtime, and at Sherbrooke, cotton factories were busy. Three Rivers reported the Wabasso Cotton Company active. Toronto reported knitting mills busy, with night shifts during most of the month, but towards its close factories were quieter owing to stock-taking. The carpet factory was very active, but the rope and twine factory was quiet. At Hamilton, weavers were required in the cotton factory, and other branches of the textile group were busy. St. Catharines reported woollen and knitting mills busy, with orders ahead, but in silk mills there was a falling off in employment. Kingston reported cotton, woollen and knitting mills in need of more help, and at Galt, cotton and woollen mills were well employed. At Brantford, woollen and knitting mills were advertising for labour. The Guelph worsted spinning mills reported enough orders on hand to last for a year, and at Stratford, woollen, hosiery and knitting factories were very busy. Knitting factories at Woodstock reported a demand for women, and at London and St. Thomas, knitting companies were well employed. Chatham reported woollen mills and textile companies active, and at Owen Sound, while knitting mills were busy, woollen mills were closed down until spring. At Winnipeg, bag factories were well employed, and knitting mills, while reporting business quiet, maintained their usual staffs; some tent and awning factories laid off a few hands, but others kept staffs busy making up stock. Tent and sail factories at Vancouver were steadily employed.

Clothing and laundering.—Truro reported the cap factory steadily employed and ready-made clothing factories at St. John were well employed. Hat and cap factories at Moncton were in active operation. The garment making industry at Montreal was disturbed by a strike in one establishment. Quebec reported clothing trades active and fur workers very busy. Ready-made clothing establishments at Sherbrooke were well employed, but at Hull, clothing factories were not as well employed as in November. Toronto reported the different branches of the clothing industry fairly well employed; glove and fur manufacturers were busy, and whitewear firms advertised for experienced operators; steam laundries were active, but dyeing establishments were quiet. Hamilton reported clothing factories and shirt and collar factories and whitewear factories active and a demand for labour in steam laundries and dyeing and cleaning establishments. At Niagara Falls, hat, corset and suspender factories were busy, but at Ottawa, clothing factories reported

quieter conditions and a dyeing and cleaning establishment placed its staff on short time. At Brockville the Walthosen Hat Corporation was fairly busy, and manufacturers of gloves were active. Brantford, Kitchener, Stratford and London reported clothing factories active, and at Kitchener there was a demand for help in some departments of clothing and shirt and collar factories. Guelph reported the women's whitewear factory and the felt hat factory running full time. At Windsor, shirt, collar and button factories were quiet. Winnipeg reported ready-made clothing factories somewhat quieter and some of the shirt factories slightly reduced their working forces; cap manufacturers were fairly busy, and glove factories reported experienced help in demand; some inexperienced hands were laid off in fur factories, but whitewear factories were busy. Edmonton reported the Great Western Garment Company fairly busy, and at Vancouver garment workers were well employed, though dressmakers and milliners, owing to seasonal dullness, were not fully engaged. Shirt and overall factories at Victoria were normally employed.

Pulp, paper and fibre.—St. John reported pulp mills operating steadily, and at Newcastle, pulp and paper makers were very busy, with a shortage of unskilled labour. Sherbrooke and Three Rivers reported pulp and paper mills steadily employed. The beaver board company near Hull, owing to heavy orders from Halifax, worked considerable overtime. Manufacturers of roofing paper at Hamilton and pulp and paper mills at St. Catharines were active. Ottawa reported that the demand for newsprint fell off slightly and paper companies reported difficulty in securing some raw materials. Pulp and paper mills on the Pacific coast were active, and several hundred men were employed upon the construction of a new mill on the west coast of Vancouver Island.

Printing, publishing and paper. — One printing establishment at Halifax was totally destroyed by the explosion and 25 employees were killed. Other establishments, while damaged, were able to carry on business. St. John reported newspaper offices and paper box factories busy and job printing fair. Moncton and Newcastle reported printing establishments well employed, and at Newcastle printers worked considerable overtime. At Fredericton, employment in printing in newspaper and job printing offices was well maintained. Montreal and Quebec reported printers well employed, and at Toronto, printers, bookbinders, lithographers and allied trades were active. Hamilton reported newspaper and job printing offices fairly busy, and binderies, engraving and lithographing and paper box factories active. At Ottawa, newspapers, engraving and job printing companies had an active month, but paper bag and box companies reported some falling off after the completion of Christmas orders. St. Catharines, Brockville, Kingston, Belleville, Galt, Brantford, Guelph and St. Thomas reported the printing trades well employed. Woodstock and Chatham reported a demand for experienced men. Windsor reported newspaper and job printing establishments well employed, but paper box manufacturers quieter. At Winnipeg, printing and publishing establishments reported active conditions and there was a demand for experienced help. Regina, Medicine Hat, Lethbridge and Calgary reported newspaper and job printing offices and binderies busy. At Edmonton, newspaper offices employed all hands, but job printing was only fairly busy. Vancouver reported newspaper printing active and job printing improving. Victoria reported an improvement in printing offices and an increased demand for paper boxes.

Woodworking and furniture.—Reconstruction operations at Halifax created an active demand for the products of sash, door and planing mills, and these establishments in many Maritime Province centres were very active. Quebec reported sash, door and planing mills had a good month, but box factories were dull. Three Rivers also reported sash,

door and planing mills busy. At Toronto, wooden box makers, furniture workers and piano workers had plenty of employment, and at Hamilton all branches of the woodworking and furniture group were active. St. Catharines reported sash, door and planing mills fairly active, and at Ottawa, sash, door and planing mills were busy on boxes and on building material for Halifax. At Kingston, broom factories reported a fair amount of employment and piano factories were busy. Belleville, Galt and Brantford reported sash and door factories well employed, and at Kitchener, furniture factories and other branches of the woodworking group were busy. Guelph reported sash and door factories quiet, but the piano and organ factory was running full time. At Stratford, furniture factories and broom and cooperage works were active. At Woodstock, furniture factories and piano and organ factories reported a steady demand for skilled labour. The Sherlock Manning Piano and Organ Company at London was very busy. At Chatham and Windsor, sash and door factories and planing mills showed some slackening, but at Windsor, piano factories were running with full staffs. Owen Sound reported fair conditions in the woodworking and furniture group. Prince Albert reported planing mills quiet, but at Medicine Hat they continued fairly active. Victoria reported sash, door and planing mills dull, but cooperage establishments busy.

Leather, boots, shoes, rubber. — St. John reported the tannery working steadily and the boot and shoe factory busy. At Fredericton, boot and shoe workers were fairly well employed and larrigan factories were busy. Montreal reported fair activity among boot and shoe workers in the first part of the month, but a general closing down for a week or ten days at the end of the year. At Quebec, tanneries and boot and shoe factories continued quiet. At Sherbrooke, however, shoe factories had a good month. Three Rivers reported boot and shoe factories quiet. Toronto reported tanneries busy, but boot and shoe factories quiet and fair conditions in trunk and bag factories. Boot and shoe factories at Hamilton were fairly busy, and at St. Catharines, rubber footwear factories were well employed. Ottawa reported the S. H. Borbridge harness factory busy up until the last week of the month when its plant was destroyed by fire. Kingston reported tanneries active, and at Peterborough, boot and shoe workers were busy. Galt reported that the boot and shoe industry showed improvement, and at Brantford the Brandon Shoe Company was running full time. At Kitchener, tanneries worked full time, some shoe factories were quiet, but others were working overtime, and trunk factories had a good month. The Dominion Tire Company laid off a number of hands owing to seasonal slackening. Rubber factories continued very busy. Tanneries at London, Owen Sound and Orillia were steadily employed. Brandon reported tanneries and trunk and horse goods factory fairly active, and at Calgary, trunk, bag and harness workers were fully employed. Shoe workers at Vancouver were steadily engaged.

Clay, glass and stone.—Moncton reported that the Humphrey Glass Company, which formerly operated at Trenton, N.S., was erecting a new factory. Hamilton reported pottery and porcelain works required labour and that other branches of the clay, glass and stone group were active. Belleville reported the pottery active, but at Chatham, brick, tile and cement works were quieter owing to the extreme cold. Brick plants at Medicine Hat were quiet, but the Medalta stoneware company was fairly busy.

Paints, oils, chemicals, explosives.—Halifax reported that the buildings and plant of the Brandram-Henderson paint company were damaged, but at the end of the month the company was in a position to handle orders. Montreal reported paint and varnish manufacturers fairly busy, and at Hamilton, soap factories and manufactures of acids and drugs

were active. Brantford reported the starch and varnish factory well employed, and at Windsor, while paint and varnish works were quieter, drug manufacturers were active, with a good demand for woman help. Winnipeg reported soap factories normally employed. At Regina the oil works was running full time, but the soap factory reported employment only fair. Vancouver reported the petroleum refinery fairly busy.

Water, light and power.—Employment in water, light and power companies continued normal, except in some instances where additional working forces were necessary to make repairs occasioned by cold and stormy weather. Niagara Falls reported that the continuation of work on the Montrose-Chippewa power canal afforded employment for several hundred workmen.

Transportation

Earnings of the Canadian Pacific Railway during November were $15,191,162, as compared with $13,401,943 for the same month in the previous year. Sydney reported railway transportation active, and Westville reported very heavy shipments of freight, though there was still a shortage of cars. The shipment of supplies and building material to Halifax during the latter part of the month occasioned great activity on railway lines in the Maritime Provinces. Montreal and Quebec reported freight and passenger traffic heavy and other points in the Province of Quebec reported the volume of employment for railway workers well maintained. Toronto reported railway and street railway employees had a busy month, and teamsters and expressmen were greatly in demand. Railways and repair shops at Hamilton were active and freight traffic out of Niagara Falls was heavy on all lines. At Brockville the locomotive departments of the railways were advertising for labourers and firemen. Belleville reported railway passenger and freight traffic heavy and repair shops busy. Kitchener reported railway passenger traffic during the holidays heavier than during the previous year. Railway repair shops at Stratford were very busy, and at St. Thomas a number of new men were added to the railway service. Chatham reported railway freight traffic very heavy, but a shortage of cars. At Winnipeg, employment in railway repair shops was well maintained and traffic was brisk. Brandon reported transportation brisk and repair shops well employed. At Regina, railway passenger traffic was very heavy and freight traffic was fair; railway repair shops were busy. Medicine Hat reported normal conditions in all branches of railway transportation. At Calgary, railways reported activity and repair shops had plenty of work ahead.

Sydney reported some slackening in navigation and 'longshore work, but at St. John 'longshore work was very brisk. The ferry service between the New Brunswick mainland and Prince Edward Island commenced December 1, and passenger and freight traffic was heavy. Montreal reported the harbour clear of ocean-going craft by December 8, but canals were kept open for some time to allow lake steamers to reach port. Vancouver reported navigation and 'longshore work active, and at Victoria conditions were fairly brisk, though steamers were placed on winter schedules and a number of men were laid off.

Mining

Sherbrooke reported iron, copper and asbestos mines busy, and at the silver mines at Cobalt December was an active month, though as usual with winter weather, ore shipments fell off considerably, there being 31 cars containing 2,377,708 pounds of ore, as compared with 53 cars containing 4,071,284 pounds of ore in November. Bullion shipments totalled 426,710.69 fine ounces, as compared with 701,536.10 ounces in November. Gold mines in the Porcupine and Kirkland districts continued active. The yield for 1917 was esti-

mated at $9,000,000; milling facilities have been provided for a much greater production in 1918. A shortage of labour was preventing the full employment of milling equipment. During November the Alexo mine at Porquois Junction shipped 13 cars containing 1,066,900 pounds of nickel ore. With the settlement of the strike of smeltermen at Trail there was an improvement in British Columbia metal mines.

Sydney reported the coal output of the Dominion Coal Company 245,000 tons as against 284,000 tons last month, the falling off being due largely to the holiday season. The coke output was the same as last month, 49,000 tons. The output of coal at Sydney Mines was 8,000 tons less than in the previous month owing to the holiday season and the breaking down of one of the power plants. Amherst reported mining operations in the district active, and at Westville, coal mines operated fairly steadily. Towards the end of the month No. 1 slope of the Acadia Company's plant was closed owing to fire, the men thus released being employed in other collieries. Fredericton reported the coal mines at Minto were employed to the full capacity of the help available. Lethbridge reported coal mining very active, with a demand for more men; there were a few idle days as the result of a labour dispute. Calgary reported coal mines in the district working at full capacity. Fernie reported coal mines active the first three weeks of the month, but during the holidays many of the workers laid off and outputs were considerably reduced. Nanaimo reported coal mines in the city and district operating at capacity and new work being opened up as quickly as men could be secured.

Building and Construction

The disaster at Halifax caused a very active demand for building tradesmen, not only in the Maritime Provinces but in parts of Ontario and Quebec, and the reconstruction work afforded a large volume of employment during the month. Montreal reported that there was little building being done, but that many of the building contractors were taking part in reconstruction work at Halifax. Quebec reported outside building at an end, but some interior work under way. Other localities in Quebec reported building quiet. Nearly all Ontario localities, except Hamilton, where building was reported active, reported building quiet. Towards the end of the month the damage to water pipes caused by the extreme cold afforded a considerable volume of employment in the plumbing trade. Western provinces also reported building quiet, and on the Coast building was generally dull, although the extension of industrial plants afforded some employment. The value of building permits issued in 35 cities decreased from $2,149,223 in November to $874,689 in December, or 59.3 per cent. As compared with December, 1916, there was a decline of $3,890,624, or 81.6 per cent.

Lumbering

Amherst and Westville reported that lumbering operations were interrupted by heavy falls of snow. At St. John nearly all shingle and saw mills were closed down for the winter. Newcastle and Fredericton reported lumbering active, with a shortage of woodsmen. Sherbrooke reported lumber camps active and Hull reported a shortage of woodsmen. The J. R. Booth Company at Ottawa reported its lumbering forces in the woods about 50 per cent of the usual strength; it was expected that the operations would be mainly in taking out pulpwood. Peterborough reported lumbering camps very active and a large cut was expected. At Owen Sound, sawmills and lumber camps were busy. At Prince Albert, lumbering camps were very active, several thousand men being employed, and there was a demand for more help. Calgary reported a demand for men in lumbering camps, and on the Pacific coast lumbering was active.

Sydney reported little fishing was done owing to stormy weather. At Newcastle, smelt fishing was in progress and some 3,000 men and boys were employed. At Port Arthur, severe weather put a premature stop to herring fishing, which was very busy up till the twentieth of the month. Prince Albert reported fishing active in Northern lakes. Vancouver reported fishing good but impeded by rough weather. Victoria reported an increase of about a quarter of a million cases in the British Columbia salmon pack. Nanaimo reported whale fishing nearly finished on account of rough weather, but herring fishing was active.

Fishing

III.—LABOUR AND INDUSTRY IN THE PROVINCES

Nova Scotia

At Halifax, owing to a very disastrous explosion on December 6, which occasioned a loss of several hundred lives and destroyed a portion of the city, a great many industries were disrupted and thousands of men thrown out of employment. The damage done to the rolling mills and skate factory of the Starr Manufacturing Company disorganized the work, but temporary repairs were made and the company expected to have its plant operating to capacity about the middle of January. The dry dock suffered heavy loss, workshops and buildings were completely destroyed; about 200 men were employed at the time, and at the end of the month those who escaped injury were clearing up the debris. The Acadia Company's sugar refinery at Richmond was levelled to the ground and about 20 employees buried under the ruins, but the company's refinery at Woodside was not damaged and was running with its regular staff at the end of the month. While all the bakeries were damaged by the explosion with one exception, they were able to supply bread to meet requirements; one bakery located at Richmond was completely destroyed. Aerated water and soft drink establishments, while suffering a property loss, were able to resume operations, but two breweries were destroyed, several of the workingmen losing their lives. The Dominion Textile Company's cotton mill, which employed about 200 hands, was burned to the ground. No lives were lost and the company was endeavouring to have its employees accept work in its other mills. The Dartmouth Cordage Company's rope works were badly damaged and were not expected to resume operations until March; the company was using all its male employees and about 60 men from Montreal repairing buildings and plant; about 50 women were thrown out of employment. Printing and publishing establishments, while damaged, were with one exception able to resume normal conditions within a week; the Richmond Printing Company's plant was totally destroyed, about 25 employees being killed. Woodworking plants also suffered loss to buildings, but temporary repairs were made and all available help was working steadily at the end of the month. The buildings and plant of the Brandram-Henderson Paint Company were damaged, but by the end of the month the company was in position to handle orders. The machine shops and round-house of the Canadian Government railways suffered considerable damages and quite a number of passenger and freight cars were destroyed; piers 8 and 9, the Halifax passenger station and workshops, sheds and other buildings were destroyed; many railway employees were killed and the financial loss was very heavy. The street railway suffered heavy loss and several employees were killed and a number injured; several women conductors were employed, as the company found it difficult to secure help. About 1,400 men were employed in reconstruction work and there was a heavy demand for carpenters,

glaziers, handy men and unskilled labour.

Westville reported steel plants working at capacity. Railway companies were active, though there was still a shortage of cars. Coal mines operated fairly steadily; owing to fire in one slope of the Acadia Coal Company's colliery the mine was closed up and the men given employment in other mines. Lumbering during the first ten days of the month was very busy, but owing to heavy snowfalls very little was done during the latter half of the month.

Sydney reported an increased production of pig iron and a slight decrease in the production of ingots, blooms, billets and slabs at the Sydney steel plant. The rail and merchant mills of this plant were idle, but all men were well employed. Production at the Sydney Mines steel plant was slightly under that of the previous month. Other branches of the metal industry continued normally engaged. Railway transportation was active, but there was a falling off in navigation and 'longshore work. The Dominion collieries, owing to the holiday season, showed some falling off in output; production at Sydney Mines also showed a decrease, due to the holiday season and the breaking down for a time of one of the power plants. Limestone quarrying for the Dominion Steel Company at Port au Port, Newfoundland, ceased during the month; some of the men returned to their homes and others found employment at the Wabana iron mines. Little fishing was done owing to stormy weather.

Amherst reported the International Engineering Company working three shifts and the Canada Car Company's plant active in all branches. Woollen mills were working full time, and sash, door and planing mills were very busy, chiefly on Halifax orders. The piano factory was active. Lumbering was interfered with by heavy falls of snow. Mining in the district was fairly active, but was affected by a shortage of cars.

Truro reported steel works running full time in two shifts and woollen mills and the cap factory steadily employed.

Prince Edward Island

Charlottetown reported machine shops, canning factories and meat packing houses busy. Fishing was quiet except for some activity in smelt fishing.

New Brunswick

St. John reported rolling mills, shipyards and other metal industries active. Flour and feed mills were busy, but the sugar refinery was working with a reduced staff. One brewery shut down and another was expected to close the first of the year. Cotton factories were running steadily and ready-made clothing factories reported business good. The pulp mills operated steadily and newspaper printing and paper box factories were busy; job printing was fair. Sash, door and planing mills and the box factory were busy, but broom factories were quiet. Cooperage establishments were well employed, but one large shop was completely destroyed by fire. The tannery was working steadily and the boot and shoe factory was busy. Railway transportation was heavy and 'longshore work was very brisk. Saw and shingle mills were nearly all closed down for the winter.

Moncton reported the Government railway shops active and normal conditions in foundries. Machine shops were well supplied with work, but were short of skilled machinists. The biscuit factory was running to capacity, and woollen mills, underwear factories and hat and cap factories were in active operation. Printing establishments were well employed and planing mills and cooperage shops were busy. The Humphrey Glass Company, which formerly operated at Trenton, N.S., was erecting a new factory and expected to be ready for the manufacture of glass in

the spring. Railway passenger and freight traffic continued exceptionally heavy. The ferry service between the New Brunswick mainland and Prince Edward Island commenced the first of the month, and passenger and freight traffic was heavy.

Newcastle reported sash and door factories busy and the shipbuilding plant at Nordin active. Pulp and paper makers were very busy, with a shortage of unskilled labour, and newspapers and job printing offices worked considerable overtime. Railway transport workers were active, and lumbermen reported a shortage of woodsmen. Smelt fishing was in progress and some 3,000 men and boys were employed.

Fredericton reported that more hands were taken on at machine shops, and employment in newspaper and job printing offices was well maintained. Meat packing houses and confectioneries were busy and cotton factories were working full time. Boot and shoe workers were fairly well employed and larrigan factories were busy. Lumbermen reported a shortage of woodsmen. The coal mines at Minto were employed at the full capacity of the help available.

Quebec

Montreal reported the Dominion Bridge Company had orders which would keep its Lachine plant busy for several months, and manufacturers of food, tobacco and liquors reported an increase of business during the holiday season. Cotton mills made large deliveries of prints and other spring lines and still had heavy orders on hand. Printers were well employed. There was fair activity among boot and shoe manufactures in the first part of the month, but there was a general closing down for a week or ten days at the end of the year. Paint and varnish manufacturers were fairly busy. Railway and railway repair shops were very active. The harbour was clear of ocean-going craft by December 8, but canals were kept open longer to allow lake steamers to reach port.

Quebec reported shipbuilding and repairing trades had a busy month. Baking and confectionery establishments were active and cotton mills worked overtime. Clothing trades were active and fur workers were very busy. Sash, door and planing mills reported a good month, but box factories were dull. Tanneries and boot and shoe factories continued quiet. Steam railways reported freight and passenger traffic heavy; during the month the Quebec bridge was opened to freight traffic. The removal of snow afforded employment to a large number of labourers.

Sherbrooke reported metal industries busy, though not as active as during the same period of last year. Abattoirs and meat packing houses and baking and confectionery establishments were active and all branches of the textile group were busy. Ready-made clothing establishments were well employed and shoe factories had a good month. Railway employees and men employed in iron, copper and asbestos mines were busy. Lumbering camps were active and pulp and paper mills were steadily employed.

At St. Hyacinthe, the metal, machinery and conveyance group was fairly active, bakers and confectioners were very busy, and soft drink establishments and the distillery were active. The cotton and woollen industry had a very active month; the Penman Manufacturing Company worked day and night shifts, employing between eight and nine hundred hands. Clothing establishments and shirt, blouse, underwear, overall and corset factories and steam laundries were busy. Sash and door, wooden box and chair factories had an active month, and organ factories worked full time and boot and shoe factories showed considerable improvement over November; the new shoe mountings factory was in full operation.

Three Rivers reported iron foundries and machine shops active and the Wabasso Cotton Company, the Wayagamack Pulp and Paper Company and the St. Maurice Paper Company actively employed. Sash, door and planing mills were active, but boot and shoe factories were quiet.

Hull reported abattoirs and meat packing houses very active and woollen mills busy, but clothing factories and paper mills were not as well employed as in November. The Beaver Board Company, owing to heavy orders from Halifax, was exceptionally busy, and worked considerable overtime. Lumbering companies still reported a shortage of woodsmen.

St. Johns and Iberville reported all factories working full time. The Singer Manufacturing Company was reported seriously hampered by the United States Government's order prohibiting the exportation of iron and lumber.

Sorel reported machine shops and foundries active, and at the shipyards employment was fairly steady. About 500 women continued to be employed at the mica factory.

Ontario

Toronto reported the metal and machinery trades busy except where work was retarded by a scarcity of material, and working forces at some plants were decreased. A number of men and girls who were laid off some weeks ago were given employment, but at wages considerably less than those formerly paid and only the more capable women were being engaged. Architectural and structural steel plants were active and engine and boiler plants had plenty of work. Shipbuilding showed great activity, and automobile, bicycle, agricultural implement and motor tractor plants were active, with labour much in demand. Flour and feed mills, abattoirs and meat packing houses were active; two companies commenced the manufacture of oleomargarine. Baking and confectionery establishments were busy, candy factories working overtime. Fruit canning and extract firms were active most of the month and the modification of the order of the Food Controller regarding the package of cereal products resulted in a renewal of activity in this industry. Knitting mills continued busy with night shifts, but during the last week of the month were quieter owing to stock-taking. The rope and twine factory was quiet, but the carpet factory was very active. The different branches of the clothing industry were fairly well employed. Glove and fur manufacturers were busy, and whitewear firms advertised for experienced operators. Steam laundries were active, but dyeing establishments were quiet. Printers, bookbinders, lithographers and allied trades were active. Wooden box makers, furniture workers and piano workers had plenty of employment. Tanneries were busy, but boot and shoe factories remained quiet and fair conditions existed in trunk and bag factories. Railway and street railway employees had a busy month, and teamsters and express men were greatly in demand.

Hamilton reported all branches of the metals, machinery and conveyances group active, with a demand for labour on locomotives and cars, stoves and furnaces and electrical apparatus. Flour mills, meat packing houses and fruit and vegetable canneries were busy, and there was a demand for cigarmakers. Weavers were required in the cotton factory and other branches of the textile group were busy. Clothing factories, shirt and collar factories and whitewear factories were active, and there was a demand for labour in steam laundries and dyeing and cleaning establishments. Newspaper and job printing offices were fairly busy. All branches of the woodworking and furniture and leather groups were active except boot and shoe factories, which were only fair. Pottery and porcelain works reported a demand for labour, and other branches of the clay, glass and stone group were active. Soap factories and manufacturers of acids and drugs

had a good month. Railway repair shops were active.

Niagara Falls reported metal working plants busy and skilled labour in constant demand. Hat, corset and suspender factories were busy. Freight traffic was heavy on all railway lines, and the continuance of work on the Montrose-Chippewa power canal afforded employment for some hundreds of workmen. It was expected that 500 men would be employed at the shipyards of the Canadian Allis-Chalmers Company at Bridgeburg, which have been re-opened.

St. Catharines reported all branches of the metals group well employed; flour and feed mills continued active, but breweries were quiet. Woollen and knitting mills were busy, with orders ahead, but in the silk mills there was a falling off in employment. Pulp and paper mills were active, and manufacturers of beaver board and other pulp products were well employed. Sash, door and planing mills were fairly active, and newspaper and printing establishments continued busy. Rubber foot-wear factories had a good month.

Ottawa reported that extra machinists were taken on by the Victoria Foundry Company and more men were required; the P. J. Powers Company was exceptionally busy but short of boilermakers, and the Beach Furnace Company was active, with a demand for machinists, stove mounters and pattern makers; sheet metal workers reported a seasonal slackening; a plant at Renfrew engaged on special work finished operations and was closed down; a small number of employees were released. Clothing factories reported quieter conditions, and a dyeing and cleaning establishment placed its staff on short time owing to seasonal slackness. The demand for newsprint fell off slightly, and paper companies reported difficulty in securing some raw materials. Engraving and job printing companies had an active month; paper bag and box companies reported some falling off with the completion of Christmas orders. Sash, door and planing mills were busy on boxes and on building material for Halifax. The S. H. Borbridge Company was busy up till the last week of the month when its plant was destroyed by fire. Railways reported a heavy Christmas passenger traffic. The J. R. Booth Company reported its lumbering forces in the woods about 50 per cent of its usual strength; it was expected that the operations would be mainly in taking out pulp wood. Ice cutting was under way, but workmen were scarce.

Brockville reported a fair amount of activity on boilers, stoves and furnaces and hardware; motor boat building was quiet. Feed mills and the meat packing company were fairly active. The Walthosen Hat Corporation was fairly busy and manufacturers of gloves were active. The locomotive departments of the railways were advertising for labourers and firemen, and it was reported that passenger service would be curtailed on account of the shortage of coal.

Kingston reported the Canadian Locomotive Works and the Kingston Shipbuilding Company active and all branches of the foods group busy. Cotton, woollen and knitting mills required more help and newspaper and job printing offices were well employed. Broom factories reported business fair, piano factories were busy and tanneries were very active.

Belleville reported the iron industries very busy. In foods, flour and feed mills were active. Printing establishments were well employed, and sash and door mills were only fair. The pottery reported a good month.

Peterborough reported all branches of the metal trades active and flour and cereal mills working overtime. Machinery was being installed in the new plant of the Quaker Oats Company, and operations were expected to commence early in the New Year. Meat packing houses were very busy, and woollen mills were working overtime. Lumbering camps were very active and a large cut was expected.

Galt reported stove and furnace foundries, engine and boiler factories and

other branches of the metals group active. Cotton and woollen mills were busy and laundries were advertising for help. Newspaper and job plants worked overtime and the paper box factory was busy. Sash, door and planing mills were active and the boot and shoe industry showed improvement.

Brantford reported manufacturers of engines and boilers busy and agricultural implement plants working overtime. Milling companies were running full time and confectionery establishments were active. Woollen mills and knitting mills were advertising for labour. Clothing manufacturers were very busy. Printing establishments were active and the box factory had a very busy month. Sash, door and planing mills were well employed, and the Brandon Shoe Company was running full time.

Kitchener reported manufacturers of engines and threshers well employed, and other branches of the metals group normally engaged. Flour mills were active, but the sugar factory was closed down; meat and sausage plants and bakeries were busy, cigar factories had a fair month, but breweries were quieter; the Seagram distillery was advertising for men for the bottling department. Clothing and shirt and collar factories and button factories were busy, with a demand for help in some departments. Furniture factories were busy, and other branches of the woodworking group were well employed. Tanneries worked full time; some shoe factories were quiet, but others were working overtime; trunk factories had a good month. The Dominion Tire Company, while running full time, laid off some 40 hands, this being their slack season; rubber factories continued very busy. Railway passenger traffic during the holidays was heavier than in the previous year.

Guelph reported machine shops and foundries busy, with a continued demand for skilled workmen. Flour and feed mills were running to full capacity, and all provision trades had an active month. The Guelph Worsted spinning mills reported enough orders on hand to last for a year and the women's whitewear factory and the felt hat factory were running full time. Newspaper and job printing offices had an active month, and paper box factories were running to capacity. Sash and door factories were quiet, but the piano and organ factory was running full time. The White sewing machine factory had some departments working overtime. Rubber factories were active and short of woman help.

Stratford reported metal and machinery trades active, with a demand for men. Flour mills, meat packing houses and confectioneries were busy, cigar-makers were fairly busy, and the brewery was quiet. Woollen, hosiery and knitting factories were very busy. Ready-made clothing factories were fully employed. Sash and door factories were working full time and furniture factories, broom and cooperage factories were active. Railway repair shops were very busy.

Woodstock reported the supply of labour in wagon factories equal to the demand, but in stove and furnace foundries, moulders, mounters and polishers were required. Baking and confectionery establishments and knitting factories reported a demand for women, and in printing establishments there was a constant demand for job hands. Furniture factories and piano and organ factories reported a steady demand for skilled labour.

London reported foundries and machine shops busy and biscuit and confectionery manufacturers working overtime. The Corn Flake Company, which had been quiet for some time, secured a license from the Food Controller and resumed operations. Hosiery companies worked overtime and clothing manufacturers were busy. Newspaper and job printing establishments were working overtime and paper box companies had a good month. The Sherlock Manning Piano and Organ Company was very busy and the tannery was steadily employed.

St. Thomas reported the Canadian

Iron Corporation very busy, and labour more plentiful than during November. The Dominion Brake Shoe Company was quieter, but the Michigan Central and Pere Marquette shops were busy. The Norsworthy Foundry Company and the Erie Iron Works were active, and the St. Thomas Packing Company and the Monarch Knitting Company were well employed. Newspaper and job printers had a good month, but shoe factories were quieter. Railway employees were very busy, and a number of new men were added to working forces.

Chatham reported metal trades active, but owing to low pressure of natural gas several factories closed down for a few days. Flour mills were very active, and the sugar factory was working day and night seven days a week. Abattoir and meat packing houses were well employed, and woollen mills and textile companies were active. Sash and door factories and planing mills showed some slackening, and brick, tile and cement works were not as active owing to the extreme cold.

Windsor reported manufacturing establishments adversely affected by a shortage of fuel. The bridge works and other iron plants were making parts for stock and expected to keep the greater part of their men busy during the slack season. Automobile factories were normally engaged, though some of them had to shut down for two days owing to coal shortage. Other branches of the metals group were well employed. Food and tobacco industries were busy, but breweries and distilleries were quiet. Shirt, collar and button factories were quiet. Newspaper and job printing establishments had a good month, but paper box manufacturers were quieter. Piano manufacturers were running with full staffs, but sash, door and planing mills were quiet. Paint and varnish works were quieter, but drugs were active, with a good demand for women help. The electric light and gas companies employed additional working forces on repairs.

Owen Sound reported one machine shop working overtime, with a shortage of pattern makers; another shop was making some alterations and had ceased running overtime. The Canadian Malleable Company was working day and night in some departments. Other metal working establishments were steadily employed. Oatmeal mills were running day and night and the flour mill was normal. Other branches of the food group were fairly well employed. Knitting mills were busy, but woollen mills were closed down until the spring. Fair conditions were reported in the woodworking and furniture group. Tanneries were normally engaged and sawmills and lumber camps were active.

Orillia reported the stove foundry and agricultural implement foundry active, sash and door factories busy and the tannery working at full capacity. Newspaper and job printing offices worked considerable overtime.

Cobalt reported that as usual in winter weather ore shipments fell off considerably. The labour supply continued comparatively satisfactory. Gold mines in the Porcupine and Kirkland Lake district continued active, though a shortage of labour was preventing full employment of milling equipment.

Port Arthur reported iron working establishments and shipbuilding yards short of machinists and iron workers of all classes. The shipbuilding plant had material and work ahead to engage a large number of men for some time, and most of the resident carpenters and joiners formerly in the building trades were working at this plant. In Fort William the car works, the foundry and the Northern Engineering Works were busy and short of mechanics, though there was a sufficient supply of ordinary labour owing to the release of 'longshore workers. The elevators laid off a large number of men at the end of the month. Herring fishing was very busy until about the twentieth of the month when operations were brought to a close by severe weather.

Manitoba

Winnipeg reported all branches of metal and machinery trades well employed. Confectioneries were busy and experienced chocolate dippers and bakers were in demand. Milling companies and abattoirs reported a fair month's business. Bag factories were well employed, and knitting mills, while reporting business quiet, maintained their usual staffs. Some tent and awning factories laid off a few hands, but others kept staffs busy making up stock. Ready-made clothing factories reported business quieter, and one concern closed during part of the last week of December. Some of the shirt factories slightly reduced their working forces. Cap manufacturers were fairly busy, and glove factories reported experienced help in demand. Some inexperienced hands were laid off in fur factories, but whitewear factories were busy. Printing and publishing establishments reported business very active and there was a demand for experienced help. Employment in railway repair shops was well maintained. Soap factories were normally employed.

Brandon reported agricultural implement plants and machine shops busy, flour mills active, but cigar factories and breweries dull. Tanneries and manufacturers of trunks and horse goods were fairly active. Railway transportation was brisk and repair shops were well employed.

Saskatchewan

Regina reported the foods group steadily employed, newspaper and job printing establishments busy, and binderies working full time. The oil works was fully employed, but the soap works reported business only fair. Railway workers had a good month.

Prince Albert reported flour mills active and the abattoir and meat packing plant busy. Railway workers were very busy, chiefly on cordwood shipments to Southern points. Lumbering camps were active, several thousand men being employed, and there was a demand for more help. Fishing was being carried on extensively in Northern lakes.

Alberta

Medicine Hat reported metal working industries quiet, except those engaged upon special lines. Flour mills were busy and candy factories reported a scarcity of help. Newspaper and job printing establishments were very busy, and planing mills continued fairly active. Brick plants were quiet.

Lethbridge reported flour mills fairly busy and breweries working overtime. Newspaper and job printing was busy, and sash and door factories were active. Coal mining was very active, with a demand for more men; a dispute in regard to union recognition resulted in a few idle days.

Calgary reported locomotive shops and iron works fully employed, flour mills running day and night shifts and abattoirs and meat packing houses steadily engaged. Cigar factories reported business good and breweries and soft drink establishments showed improvement. Newspaper and job printing offices were busy, and trunk, bag and harness workers were fully employed. Railways reported activity and repair shops had plenty of work ahead. Coal mines in the district were working at full capacity and the demand for men in lumbering camps and mines continued.

Edmonton reported that the Edmonton Iron and Machinery Company, having finished a number of its contracts, laid off some employees. The Swift Canadian packing house, however, added to its staff. The Great Western Garment Company was fairly busy, and newspaper printing employed all hands; job printing, however, was only fair.

British Columbia

Fernie reported bakeries and confectioneries busier owing to the holiday season and breweries were fairly active. There was a slight falling off in job printing. Sash and door factories were dull, but planing mills were operating

to capacity. With the settlement of the strike at the Trail smelter, metalliferous mines were being re-opened, and shipments were expected to resume a normal basis within a short time. Coal mines were active during the first three weeks of the month, but during the holidays many of the workers laid off and outputs were considerably reduced. Logging operations were active and nearly all sawmills in the district were operating.

Vancouver reported activity in engine works and in boat and shipbuilding yards. Machine shops were busy and in the foods group, flour and feed mills, the sugar refinery and abattoirs were steadily employed. Fruit and vegetable canneries were quiet and evaporating plants had completed contracts. Cigar factories were dull and a number of women who were laid off found employment in stores during the Christmas season. Garment workers and shoe workers were well employed, but tailors, dressmakers and milliners, owing to seasonal dullness, were somewhat slack. Pulp and paper works up coast were running at capacity. Newspaper printing was good and job printing was improving. The petroleum refinery was fairly busy. Navigation and 'longshore work were active and lumber camps were busy, though snow interfered with operations to some extent. Saw and shingle mills were active; fishing was good, though hampered by rough weather.

Nanaimo reported sash and door factories working steadily, but transportation in all branches quiet. Coal mines in the city and district were being operated at capacity and new work was being opened up as fast as men could be obtained. Logging camps were employing all the men available, but reported a shortage of skilled workmen. Sawmills also were working steadily, but were short of men. Whale fishing was practically finished on account of the rough weather, but herring fishing was active.

Victoria reported iron foundries and shipyards fairly brisk, and shirt and overall factories, steam laundries and cleaning establishments were doing an average business. All pulp mills in British Columbia were working to capacity and several hundred men were employed upon the construction of a new mill being erected on the west coast of Vancouver Island. There was an improvement in the printing business and an increased demand for paper boxes. Sash, door and planing mills were dull, but cooperage establishments were busy. Navigation companies placed their steamers on winter schedules and laid off a number of men; 'longshore work, however, was fairly brisk. Lumbering was active.

PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT DURING DECEMBER, 1917

DURING the month of December the Department received the report of the Board of Conciliation and Investigation which had inquired into certain matters in dispute between the Canadian Pacific Railway Company and its freight handlers at Vancouver, B.C.; a minority report was also received.

Two applications for Boards were received in the Department during the month, one from the conductors, trainmen and yardmen employed on the Canadian Northern Western lines, and the other from employees of the Dominion Coal Company, Limited, at Glace Bay, N.S. In the former case a Board was established; in the latter, an investigation which was being conducted by the Government into the shortage of coal production obviated the necessity for the establishment of a Board.

Applications Received

On December 3, an application for a Board was received from the conductors,

trainmen and yardmen employed on the Western lines of the Canadian Northern Railway, members of the Order of Railway Conductors and the Brotherhood of Railroad Trainmen respectively. The application grew out of demands on the part of the employees for a revision of the schedules which would provide for increased wages and improved working conditions, and for compensation for time lost through alleged wrongful dismissals. The number affected was given as 1,300 directly and 600 indirectly. A Board was established by the Minister on December 7, Messrs. C. E. Dafoe and Thos. J. Murray, both of Winnipeg, being appointed members thereof on the recommendation of the employing company and the employees respectively. In the absence of any joint recommendation from the foregoing Board members, the Minister appointed the Honourable Mr. Chief Justice Mathers, Winnipeg, to the chairmanship.

On December 24, a telegraphic request for a Board to deal with a wages dispute was received from the employees of the Dominion Coal Company, Limited, engaged in the company's mines in the Glace Bay district, members of the Amalgamated Mine Workers of Nova Scotia. This was followed on December 28 by a formal application. It was stated that approximately 5,000 employees were affected by the dispute. Shortly after the close of the month the applicants were informed that, owing to a shortage in coal production, an investigation was being conducted by the Government which would include labour difficulties. No action was therefore taken by the Department.

Other Proceedings under Act

Reference has been made in the December number of the *Labour Gazette* to an application for a Board from the maintenance of way employees of the Grand Trunk Pacific Railway Company, members of the International Brotherhood of Maintenance of Way Employees, to deal with a dispute involving wages and working conditions and affecting 2,000 employees directly and 1,200 indirectly. No action on this application was taken during the month, as it was deemed advisable to await the outcome of the inquiry which had been made into a dispute affecting the same class of employees on the Canadian Pacific Railway.

On December 17, a communication was received in the Department from the International Transit Company signifying the company's acceptance of the award of the Board which had inquired into a dispute affecting the motormen and conductors engaged in the operation of the street railway at Sault Ste. Marie and Steelton. The employees concerned had, during the month of November, notified the Department of their acceptance of the award.

RE C.P.R. COMPANY AND ITS MAINTENANCE OF WAY EMPLOYEES

The report of the Board of Conciliation and Investigation in this matter was printed as a supplement to the issue of the *Labour Gazette* for November. The report proper was, it will be remembered, signed by Mr. E. L. Taylor, chairman, and Mr. W. Georgeson, member appointed on nomination of the employer. A minority report was presented by Mr. David Campbell, the member appointed on the nomination of the employees. Mr. Campbell's report contained some references to statements appearing in the Board's findings. The chairman (Mr. Taylor) made a supplementary report in answer to Mr. Campbell's remarks. These three documents were printed together in the supplement. Some time later a communication was received from Mr. Campbell replying to certain statements contained in the chairman's supplementary letter. Mr. Campbell's letter, which is addressed to the Deputy Minister under date of November 28, reads as follows:

David Campbell,
Barrister and Solicitor.
709 Electric Railway Chambers,
Winnipeg, Man.,
November 28, 1917.

Mr. F. A. Acland,
Deputy Minister of Labour and
Registrar of Boards of Conciliation,
Department of Labour,
Ottawa, Ontario.

Dear Sir,—

Re the Industrial Disputes Investigation Act and in the matter of a dispute between the Canadian Pacific Railway Company and its maintenance of way employees.

Your favor of November 23 is received, and I am indeed pleased to receive the copy of Mr. E. L. Taylor's supplementary report in the above matter. It is especially gratifying to receive same from you because I have not yet seen the majority report in the above matter. What I received from Mr. Taylor, after he and Mr. Georgeson had completed their report, was a copy of the schedules, and, as stated above, I have not yet seen the report itself.

I do not wish to enter into any controversy in regard to the matter, but I regret that Mr. Taylor's supplemental report is quite as confusing to me as the schedules prepared by him and Mr. Georgeson.

The explanatory paragraphs relating to some of the peculiarities of their proposed wage scale still leave me without any knowledge as to how or where he obtained the information contained therein. As stated in my report there was absolutely no evidence or suggestion by either of the parties at any of the sittings of the Board to make these distinctions, where then did Mr. Taylor obtain the material for making them and for his later explanations?

Regarding Mr. Taylor's denial of the attendance of an officer of the company with him and Mr. Georgeson while they were preparing their report on Sunday, October 28, I happen to know that Mr. McLeod was present part of the time, and when I asked Mr. Taylor on the following Monday where he got certain information relative to their proposed wage scale, he frankly admitted to me that Mr. McLeod was present and gave them the information.

I note what Mr. Taylor says regarding the preparation of my report. However, this was not on Thursday, but rather on Friday night, and after three days waiting for the company to instruct its representative what he should or must do in the matter, and Mr. Taylor waiting for the company's representatives to declare himself accordingly. On Saturday morning, October 27, I commenced compiling the schedule containing the working conditions as agreed upon by members of the Board, and had in mind as much the preparation of this for the entire Board as for myself, because up to that time, with the exception of two or three items, these matters had been agreed upon unanimously by the Board, and there had been no suggestion by the chairman to set them aside and revert to the company's position in these matters, and not until I received the chairman's report on Monday morning had I any intimation that the chairman had considered such a step. Mr. Georgeson, of course, had formerly stated that he reserved his final decision on the rules until the question of wages was settled. It might be noted, however, that Mr. Georgeson expressed himself on several occasions as being in favor of the rules agreed upon, and that they appeared to him to be fair.

Regarding Mr. Taylor's view that the rates of pay for these employees being higher than on roads South of the line, and that competing railways received substantially the same freight and passenger rates, and that it would be unjust to saddle the Canadian Pacific Railway with a further increase, the public should know and might fairly be informed that the Canadian Pacific rates of pay and working conditions to these employees are not in excess of those of any other important Canadian railways, nor were they as good as those on the Canadian Government railways, or of the Canadian Northern Eastern lines. As to whether or not the Canadian Pacific should be the first road in Canada to make a substantial increase, or whether it should be the last to do so in times like these, can perhaps better be answered by recalling to our minds that no railroad in Canada has, from its inception, enjoyed the public generosity, and, until recent years, the exclusive and perhaps excessive freight and passenger rates in great tracts of non-competitive territory in this country.

Yours truly,
(Sgd.) D. CAMPBELL.

Report of Board in Dispute between the Canadian Pacific Railway Company and Freight Handlers at Vancouver, B.C.

ON December 14, the Minister received the report of the Board of Conciliation and Investigation to which had been referred for adjustment certain differences between the Canadian Pacific Railway Company and freight handlers employed at Vancouver, B.C., members of Vancouver Freight Handlers' Association, No. 40. This was followed a few days later by a supplementary report, explanatory of some phases of the award. A minority report was presented by Mr. Midgley, the employees' nominee on the Board.

The application in this matter emanated from the employees, and stated that

the dispute related to the question of wages and affected 150 employees directly and from 500 to 1,000 indirectly. The Board which inquired into this dispute was established on October 25 and was composed as follows: the Honourable Mr. Justice D. Murphy, Vancouver, chairman, appointed on the joint recommendation of the other Board members; Mr. W. E. Burns, Vancouver, appointed by the Minister as for the company; and Mr. Victor R. Midgley, Vancouver, appointed on the recommendation of the employees. Mr. A. E. James, Vancouver, had been appointed a member of the Board on the company's recommendation, but shortly after the Board convened Mr. James resigned, a question having arisen as to the classes of workers to be included in the investigation.

The report is signed by the chairman and Mr. Burns, and contains recommendations as to wages and hours for the yard staff. The company, during the course of the inquiry, placed before the Board revised rates for the clerical staff, and, after due consideration, these rates were approved by the Board. In connection with this report a supplementary report was issued, explaining that in dealing with train clerks and car checkers the award was intended to apply to employees engaged in manual labour exclusively.

Mr. Midgley, in his minority report, states that he is unable to agree with the majority award as to the rates of pay and expresses the opinion that higher rates should be paid.

On December 31, the Department received a notification of the company's acceptance of the award, subject to the points named in the supplementary report, but at the time of writing the employees' position had not been stated.

Majority Report

In the matter of the "Industrial Disputes Investigation Act, 1907" and of a dispute between the Canadian Pacific Railway Company and its freight handlers at Vancouver.

To the Honourable
The Minister of Labour,
Ottawa, Ont.

The Board of Conciliation and Investigation originally appointed herein met on November 12, 1917, for the purpose of hearing evidence. The case for the men was opened when the company took the position that they had appointed their representative on the Board, Mr. E. A. James, on the understanding that the enquiry was to be confined to the freight shed staff as distinguished from the clerical staff. The Commission issued by the Department, in the opinion of the chairman, directed an investigation in reference to both classes of workers, and he so rules. The company thereupon announced, through their representative, Mr E. A. James, that he, Mr. James, would resign from the Board if this ruling were acted upon. The matter was referred by wire to your Department which confirmed the correctness of the chairman's ruling.

Thereupon on November 14, 1917, Mr. James, the company's representative, at a meeting of the Board tendered his resignation. Your Department was informed of the position, with the result that Mr. W. E. Burns was appointed by it to represent the company under the provisions of the Act.

The re-constituted Board, consisting of Mr. Justice Murphy, chairman, Mr. Victor R. Midgley, representative of the men, and Mr. W. E. Burns, so appointed to represent the company, met on November 19, 1917, to take evidence. Further meetings for the same purpose took place on November 20, 21, 23, 27 and 29. On December 1, 1917, the Board met to consider the evidence. Further meetings were held on December 3, 5, 6 and a final meeting on December 7, when the majority report was drawn up and approved. The men were represented by W. B. Sly, J. W. Hope and Jno. Brodie; the company by F. W. Peters.

As already pointed out, the disputed matters arrange themselves under two heads: 1st,—the yard staff; and 2nd, the clerical staff. Dealing first with the yard staff, two matters come up for consideration—the hours which constitute a day's work and the rate of wages. Most of the men in this class work by the hour but there are some who are employed at a monthly wage. Dealing first with the men on an hourly wage, the Board is unanimous in the opinion that nine hours should constitute a day's work. Hitherto these men have been working ten hours a day. There are, so far as the members of the Board are aware, no exceptional circumstances in connection with the work done by these men which would call for them putting in more hours than what is, the Board believes, generally considered at the present time a fair number to constitute a day's work. This demand, therefore, is conceded. The hour at which overtime is to begin is to remain as it is at present.

The next point is their rate of pay. These men, previous to May, received 25½ and 26½ cents per hour. Demands for increase were made at that time. Both parties agreed to refer the matter to arbitration with the result that the men were awarded 30 and 31 cents per hour with overtime at the rate of time and one-third. The men now demand 40, 43 and 45 cents per hour. The award in May was within half a cent per

hour of what the men asked. The company before the Board took the position that the increased cost of living since May could not possibly justify the increase in wage asked for by the men and contended that since the award in May was within half a cent of the men's demand that award should be regarded by the Board as a fair living wage in Vancouver at the date when it was made. The Board has given this matter very serious consideration and the majority is of the opinion that, under present conditions in Vancouver, these men should receive 37 and 36 cents per hour to enable them to earn a reasonable living wage. On this basis, their monthly earnings will be practically the same as the monthly earnings of the civic employees of the City of Vancouver. It is true that the civic employes receive a higher rate per hour as they only work an eight hour day with Saturday afternoons off. The cost of living problem, however, is in both cases identical. The men strongly urge that the company is paying a much higher rate for identical work done by the company's employees on the wharves in the city of Vancouver. To this the company replied that it is a recognized feature of this class of employment that the rates of pay for work on wharves is higher than the rates of pay in local freight offices situate up town and the evidence produced before the Board sustains this position. The cause of this is stated to be that the work at the wharves is more casual, depending on the amount of freight discharged from ships. The men contend that, under present conditions in Vancouver, so far as a great number of these wharf employees are concerned, at any rate, the work is in fact continuous. Whilst this may be so, it is obvious that there can be no assurance that such condition of affairs will continue in the future. Further, the company contend that the rate they are paying at the wharf is one which they were forced to grant as a result of a strike embracing not only these employees but most other employees on the water front which resulted in tieing up the shipping of the port and that in fact it is not a fair rate under existing circumstances. The majority of the Board have approached the question from the standpoint of the cost of living in Vancouver. They feel they must in settling a rate of wage regard the wage earner's family as consisting of himself, a wife and three children, that being the standard of the Labour Department. As stated, they believe that the rate awarded will solve the cost of living problem in a reasonable way for such employees, when the bread-winner is working on an hourly basis.

As to the rate of pay for overtime, the men contend that they do not desire to work overtime at all and in the opinion of the Board the rate for such work should be such as will insure no more overtime being asked for than is absolutely necessary. Therefore, the Board fixes the rate for overtime at time and a half. Under this head there remains to consider the men who are on a monthly wage. Without infringing the principle now prevailing that the company is not to pay overtime to such men, the Board decided that their normal working day should be nine hours as in the case of the men working by the hour. In fixing their wage it will be necessary to deal with positions seriatim. Clerks and car-checkers at present receive $65 and $70, the lower rate being paid to some clerks and some car-checkers and the higher to some clerks and some car-checkers. The difference in the rate that at present obtains, therefore, is not based on the distinction between clerks and car-checkers but on a distinction between individuals. No evidence was given before the Board that would justify it in the opinion of the majority in disturbing this distinction. The Board has here again approached the question from the standpoint of giving the men a fair living wage under existing conditions in Vancouver. This must necessarily result in men who are now receiving a lower rate of pay being awarded a higher increase than men who now receive a comparatively higher rate. The majority of the Board is of the opinion that the men who are now receiving $65 a month should receive $78 and those now receiving $70 should receive $80. This reduces the standard of differentiation, in the particular instance under discussion, from $5 a month to $2 a month, but so far as the Board is able to judge, from the evidence before it, the work done by these two classes is in the main identical, the differentiation being apparently introduced because it is desirous, from the company's standpoint, to have it exist. The rate of $78 a month has been arrived at, after much consideration, as being the minimum rate on which a typical family, in the employ of the company entitled to the benefits hereinafter set out which such employment gives them a right to receive, could maintain a reasonable degree of comfort under living conditions in Vancouver at the present time. It follows that weigh-men now receiving $65 a month should receive $78. The majority of the Board is of the opinion that it should disturb as little as possible the gradations of pay now existing, which have doubtless been established as a result of careful valuation of the relative importance of these positions. This has been done, as above stated, in the case of clerks and checkers because of the facts above set out, but with regard to all other monthly employees in this class, the Board thinks it advisable to retain the present differentiation. Therefore, it fixes the rate to be paid sealers, stock-inspectors and freight-checkers at $80 for the first year, $85 for the second, and $90 for the third. These men now get $77.50, $83.50 and $87.50. The majority awards to icing inspectors $90 per month. These men now get $85 per month. To train-clerks they award $85 per month—these men now get $75.

It will be observed that the minimum rate fixed for men on a monthly wage is lower than that which will be received under this award by the men working by the hour. Monthly wage men, however, are entitled to benefits which they evidently regard as of considerable value since at the hearing preference was expressed for remaining on a monthly wage basis rather than going on an hourly wage basis. These benefit

are that they became part of the permanent body of employees of the company. This entitles them to two weeks holidays with pay in each year and also brings them within the scope of the company's pension system, which provides, without cost to the employees, for pensions to be paid to employees in their old age provided that they have served the company a fixed number of years. The lower paid of these monthly wage men have also, to a limited extent at any rate, the prospect of advancement in the service to higher paid positions. All these things in the opinion of the majority of the Board fairly offset the difference of the minimum monthly wage hereby awarded as compared with the wage capable of being earned by hourly workers provided they put in full time every month.

In reference to the clerical staff, the Board had not the assistance at the hearings when evidence was taken of being informed of the aspects of the case from the company's point of view. The company adhered throughout the proceedings to the position taken originally that it would have nothing to do with an investigation by a Board under the Act into the matter of wages paid its clerical staff. The men in their demand desire to introduce into the pay of the staff the progressive principle. Their demand is so much for the first year with an increase the second year and a further increase the third year. The Board had devoted a considerable length of time to the consideration of this clerical staff matter when the company announced that they were posting a revised rate of pay for such clerical staff. A copy of this revised rate was placed before the Board and also a table giving to the Board considerable information from the company's standpoint of this aspect of the dispute inasmuch as such table showed the personnel of the clerical staff, their length of service with the company and other details. The Board went carefully into the increases awarded by the company and in so doing kept in mind their view of the basic wage that ought in fairness to be the minimum paid in Vancouver under present conditions. The majority has concluded that on the whole the increased rate so granted by the company is fair and they therefore approve of it.

There are obvious difficulties in the way of a Board of this character attempting to adjust differentiations in rate of pay for different positions of a staff such as the one under consideration and the majority has not attempted to do so but has been forced to content itself with being reasonably certain that a fair living wage has been awarded by the new increases.

All of which is respectfully submitted.

Vancouver, B.C., December 7, 1917.

(Sgd.) DENIS MURPHY,
Chairman.

(Sgd.) W. E. BURNS,
Representative of the Company.

Supplementary Report

Memorandum to the Honourable the Minister of Labour, Canadian Pacific Railway Company vs. Freight Handlers.

It has been drawn to the attention of the Board that some misunderstanding may arise under the Majority award forwarded to you a few days ago. This award in dealing with train clerks and carc-heckers, was intended to apply to people employed in manual labour exclusively. A statement has been laid before the Board showing that some, at any rate, of these positions are not positions of manual labour but are of a clerical nature. Nothing in the award is intended to apply to persons engaged in clerical work nor to unmarried females or young unmarried men, in these positions of car-checkers and train clerks.

Vancouver, B.C., Dec. 13, 1917.

(Sgd.) D. MURPHY,
Chairman.

(Sgd.) W. E. BURNS,
Representative of the Company.

To the Hon. the Minister of Labour,
Ottawa, Ont.

Minority Report

In the matter of the "Industrial Disputes Investigation Act, 1907" and of a dispute between the Canadian Pacific Railway Company and its Freight Handlers at Vancouver, B.C.

To the Honourable
the Minister of Labour,
Ottawa, Ont.

While agreeing with the majority of the Board that the demand of the men for a reduction of hours for the yard office and shed staff is justified and agreeing that overtime should be paid at the rate of time and one half, I am unable to agree with them as to the rates of pay.

The majority concede in their report that "they must in settling a rate of wage regard the wage-earner's family as consisting of himself, a wife and three children, that being the standard of the Labour Department," and they set the rate of pay for the shed staff at 36 cents and 37 cents per hour. This will give the men, on the basis of a nine hour day, a weekly wage $19.44 and $19.98, respectively.

The *Labour Gazette* for the month of November, 1917, gives the "Cost per week of a family budget of staple foods, fuel, lighting and rent," which shows that for a family of five the average cost throughout Canada for food, fuel, light and rent is eighteen dollars and eighty-two cents ($18.82) per week. A table is also given for the "Average cost of staple foods by Provinces" showing the average cost of staple foods in the province of British Columbia to be higher than in any other province in Canada.

The rate of pay fixed by the majority of the Board as a "reasonable living wage" only leaves a balance over and above the cost of food, fuel, light and rent of 62 cents and one dollar and 16 cents respectively, to provide for all the other commodities required to maintain the wage-earner and his family in the necessities of life.

I consider the demand of the men for a minimum of 40 cents per hour to be reasonable and justified by the present cost of living.

With reference to the clerical staff, while the company refused to participate in the investigation when the hearings were taking place, after the case had been closed and the Board was considering evidence, the company through its representative on the Board presented a schedule showing an increased rate of pay for the clerical staff, the revised rates giving most of the staff an increase of about five dollars per month, while some did not receive any increase.

Together with other increases that have been granted in the interim, this totals approximately 15 per cent increase over the 1914 pay-roll and this I do not consider sufficient to meet the increased cost of living, which is fully double the percentage of increase granted.

While agreeing with the other members of the Board that "there are obvious difficulties for a Board of this character to attempt to adjust differentiations in rates of pay for different positions of this character" still if the rates in effect in 1914 for the office staff were fair and equitable, then the increase granted should be equal to the increased cost of living, which is, according to the figures of the *Labour Gazette*, for a typical family, over 30 per cent during that time.

The majority report, in pointing out that the minimum rate fixed for men on a monthly wage is lower than that awarded to men working by the hour, mentions certain benefits that monthly wage men enjoy, which in the opinion of the majority offsets the lower rate of pay as compared with the hourly men.

These benefits consist of two weeks vacation with pay, old age pension and the prospect of advancement. However, none of these bnefits make easier the difficulties of the wage earner who is awarded in the majority report $78.00 or $80.00 per month to provide his family with the necessities of life.

Two weeks vacation a year is an important factor in maintaining the efficiency of the worker and therefore works out to the advantage of the employer, while the prospect of obtaining a pension in twenty or twenty-five years time is not of much comfort or assistance to the worker who finds it difficult to obtain the bare necessities of life in the immediate present, and the advancement to higher paid positions is of course contingent upon such vacancies as may occur after long years of service and satisfactory performance of duties.

All of which is respectfully submitted.

(Sgd.) VICTOR R. MIDGLEY,
Representative of the men.

Vancouver, B.C., December 21, 1917.

INDUSTRIAL DISPUTES DURING DECEMBER, 1917

FOUR strikes involving five firms and 1,575 employees were reported to the Department as having commenced during December. Altogether there were in existence at some time or other during the month 12 strikes involving 25 firms and 3,209 employees. The total time loss on account of industrial disputes was estimated at 33,192 working days, as compared with 26,844 days in November and 12,523 days in December, 1916. The time loss occasioned by the four strikes which began in December amounted to 7,392 working days, while a loss of 25,800 days is charged to the eight disputes which began prior to December. Termination of dispute was reported in the case of three of the old strikes and three of those which began in the month and another strike was regarded as having terminated, leaving the five following unterminated strikes on record December 31: plumbers and steamfitters, St. John, N.B.; garment workers, boilermakers and cigarmakers at Montreal, Que., and moulders at Galt, Ont.

The most important dispute in existence during the month from the standpoint of time loss was the strike of 1,600 smelter employees at Trail, B.C. The total time loss charged to this dispute was 48,000 working days, of which 25,600 occurred in December. Work was resumed on December 20. A strike of 875 steel workers at Trenton, N.S., caused a time loss of 4,812 days, and a strike of 664 coal mine employees at Lethbridge caused a time loss of 1,992 days; both of these strikes, however, were of short duration.

INDUSTRIAL DISPUTES IN DECEMBER, 1917.

Clothing workers	Toronto, Ont.	Protest against reduction in piece-work rates.	1	26	Dec. 3	Dec. 18	Firms proposed a reduction of 5 cents in rate for pant making and 2 cents for pressing. A reduction of 2½ cents for pant making and 1 cent for pressing was accepted by strikers after negotiations.
FOODS, TOBACCO AND LIQUOR—							
Cigar makers	Montreal, Que.	Demand for increased wages	1	10	Dec. 1	.....	Unsettled.

REPORTS OF EMPLOYMENT BUREAUS

THE decrease in the demand for workers continued in November. There was a decline of 16.2 per cent, as compared with October on the basis of the daily average of vacancies notified to 110 employment bureaus (80 commercial, 14 public and 16 philanthropic). As compared with the demand reported for November, 1916, by practically identical bureaus, there was a gain of about 9 per cent. The total number of vacancies notified to all offices in November was 37,956, a daily average of 1470.5 as compared with 1755.6 in October, 1917, and 1346.8 in November, 1916. The number of persons placed was 18,499, a daily average of 716.2, as compared with averages of 856.8 in October and 747.7 in November, 1916. The proportion of the total vacancies filled to the total vacancies notified was 48.7 per cent, as compared with 48.8 per cent in October, and with 55.5 per cent in November, 1916.

As to employment for woman and girl workers, the number of vacancies notified was 5,752, a daily average of 224.7, as compared with averages of 236.2 in the preceding month, and 241.6 in the corresponding month of 1916. The number of such workers placed was 2,175, a daily average of 84.5, as compared with 84.2 in October, 1917, and with 117.1 in November, 1916. Of the five principal centres of labour distribution — Montreal, Toronto, Winnipeg, Edmonton and Vancouver—Edmonton alone showed an increase in the demand for workers during November, as compared with October. In comparison with November, 1916, Toronto, Edmonton and Vancouver recorded larger demands. Of the smaller centres, Hamilton reported an increase, both as compared with the preceding month, and with the same month in 1916, while Brandon and Fort William and Port Arthur showed gains over November, 1916.

The number of persons who obtained casual employment through the Salvation Army, the Young Women's Christian Association and other agencies was 1,837, a daily average of 71.5, as compared with averages of 86.0 in October, 1917, and 75.9 in November, 1916. The number of casual jobs secured was 4,568, a daily average of 177.1, as compared with 185.5 in the preceding month, and with 161.8 in November, 1916.

EMPLOYMENT FOR CIVIC EMPLOYEES IN FIFTEEN CITIES

EMPLOYMENT for civic employees during the first payroll period of two weeks in December, as indicated by reports from 15 cities showing the number of workers temporarily employed and the wages paid these employees, showed an increase of about 17 per cent in the number of employees and a decline of about 15 per cent in the wages paid. In December, 9,067 persons were temporarily employed and the payrolls amounted to $222,227.18, as compared with 7,787 employees and an aggregate payroll of $263,590.36 in November. Larger numbers of employees and larger payrolls were reported at Regina, Edmonton and Vancouver, while smaller numbers of workers and smaller payrolls were reported at St. John, Ottawa, Hamilton, London, Winnipeg, Brandon, Moose Jaw, Calgary and Victoria. Montreal, Toronto and Saskatoon reported larger numbers of persons employed, with declines in the amounts of wages paid.

Reports from nine cities are available since July, 1916, and are summarized in the accompanying table. As regards the number of workers employed, the figures show a decline beginning in January, 1917, and continuing almost without interruption to November. In December a slight increase over the three preceding months is shown, but this increase in the number of employees is accompanied by a decrease in the wages paid, the total of the December payrolls being the smallest in the 18 months of the record. This gain in employees accompanied by falling off in wages shown in both tables is evidence of the volume of casual employment afforded in December in removing snow from the streets and in other casual work incident to winter weather.

EMPLOYMENT (BOTH CONTRACT AND MUNICIPAL WORK) AFFORDED WORKPEOPLE TEMPORARILY EMPLOYED BY FIFTEEN CITY CORPORATIONS, NOVEMBER AND DECEMBER, 1917

City.	Number of employees temporarily employed in first fortnight in:		Amount of wages paid employees temporarily employed in first fortnight in:

EMPLOYMENT IN THE BUILDING TRADES AS INDICATED BY BUILDING PERMITS

EMPLOYMENT in the building trades as indicated by the value of building permits issued in 35 cities, showed a decrease during December as compared with the previous month, the total value of permits falling from $2,149,223 in November to $874,689 in December, a decrease of $1,274,534, or 59.3 per cent. The only province to record an increase was British Columbia. As compared with the corresponding month of 1916, there was a decrease of 81.6 per cent, the value for December, 1916, being $4,765,313. In this comparison none of the provinces reported increases.

Of the larger cities—Montreal, Toronto, Winnipeg and Vancouver—the last named only showed an increase as compared with November, 1917, while each of the centres recorded a decrease in comparison with December, 1916. Of the smaller cities, Three Rivers, Westmount, Brantford and Kingston showed increases in both cases.

MIGRATION AND SETTLEMENT

OF persons other than citizens of the United States, 2,609 left the United States in October, 1917, to take up permanent residence in British North America, as compared with 2,330 in September, 1917; 3,132 persons (other than citizens of the United States) departed from British North America in October, 1917, to take up permanent residence in the United States, as compared with 3,309 in September, 1917, indicating for British North America an outward balance of 523 in October of this class of persons compared with 979 in September, 1917.

HOMESTEAD ENTRIES.—During November, 1917, there were 203 homestead entries in Manitoba, 275 in Saskatchewan, 331 in Alberta and 18 in British Columbia, a total of 827, as compared with a total of 895 in October, 1917, and 858 in November, 1916.

LANDS PATENTED.—According to the Department of the Interior's statement of letters patent covering Dominion lands in Manitoba, Saskatchewan, Alberta, British Columbia and the Yukon Territory for the month of November, 1917, the number of patents was 1,766 and the number of acres 288,108.78, as compared with 2,143 patents and 334,698.08 acres in October, 1917, and 1,359 patents and 229,267.80 acres in November, 1916.

PRICES, RETAIL AND WHOLESALE, IN CANADA, DECEMBER, 1917, AND IN OTHER COUNTRIES

THE chief movements in prices for the month were in bran, shorts, hay, oats, and barley, but among textiles, jute and flax products advanced steeply. There were slight increases in nearly all the groups except fruits and vegetables where prices were lower for potatoes, turnips, raisins and prunes. In retail prices the chief increases were in salt pork, lard, and eggs, but there were slight increases in many of the staple foods.

The average cost of a family budget of staple foods in terms of the average retail prices in some sixty cities was $12.24 as compared with $12.10 for November, $10.10 for December, 1916, and $7.95 for December, 1914. In fuel, prices were also higher for coal and wood. In foods, as compared with a year ago, the chief increases appeared in eggs, meats, milks, dairy products, bread, flour and beans.

In wholesale prices the index number, based on the average prices of 272 commodities in the decade 1890-99, rose to 253.5 as compared with 247.3 in November, and 207.4 in December, 1916. The chief increases for the month appeared in the groups: Grains and Fodder, Animals and Meats, Dairy Products, Fresh Fish, and Textiles, with slight increases in Breadstuffs, Hides, Metals, Fuel, Building Materials, Chemicals, and Miscellaneous.

The weekly budget for a family of five, including staple foods, laundry starch, coal wood and coal oil, and rent, is based upon the estimated importance of the various commodities included, these being slight modifications of those employed in similar calculations by various official bodies. For some articles comparatively large quantities are included, owing to the omission of other important foods of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. As market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly the relative propor-

tion of expenditure on the various foods therefore tends to be maintained. In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the difference in quality. It is estimated that these calculations represent from 60 to 80 per cent of the expenditure of an ordinary family, according to the total income.

The index number of wholesale prices is based upon the quotations of 271 commodities, one having been dropped in 1915, and is the simple average of the percentages which the current prices of the several commodities bear to their average prices for the base period, 1890-1899, these being therefore made equal to 100.

The accompanying tables and notes give details as to the prices movement during the month and as compared with the same month in previous year. The table of retail prices shows the prices of some 30 foods at the middle of the month in 60 localities in Canada having a population of 10,000 or over. Quotations are obtained by the correspondents of the *Labour Gazette* from dealers doing a considerable trade with workingmen. All prices are for delivered goods. The rates for rent are for six-roomed houses in districts inhabited by workingmen.

Retail Prices

Sirloin steak was slightly lower at St. Catharines, Port Arthur, Fort William, and Hamilton, but advanced in St. Thomas, Ont., and Fernie, B.C. Shoulder roast advanced at Ottawa, St. Thomas, and Winnipeg. Veal advanced at Hull, Que., Hamilton, but was lower at Port Arthur and Vancouver. Fresh pork advanced at Quebec, Ottawa, Brockville, Belleville Orillia, and St. Thomas. Salt pork advanced at Fredericton, Quebec, St. Hyacinthe, Montreal, Hamilton, Calgary, and Victoria. Bacon was higher at Sydney, St. John, Quebec, Sorel, Ottawa, St. Thomas, Edmonton, and Nanaimo. Lard was higher in many of the cities.

Fresh eggs were higher throughout the Dominion, reaching 75-80c. in some Western cities and being up to 65c. in several cities in Ontario, and to 70c in some localities in the Maritime provinces. Milk was higher at Sydney, Westville, Truro, Moncton, St. Hyacinthe, Hull, Brantford, Guelph, Windsor, Regina, New Westminster, and Victoria, but was lower at Vancouver. Butter was higher in several of the cities. Cheese was steady. Bread and flour were steady. Rolled oats, rice and tapioca were also unchanged in most of the cities.

Canned corn rose at Westville, Moncton, St. Hyacinthe, St. John's, Montreal, Brockville, Kingston, Niagara Falls, Woodstock, St. Thomas, New Westminster, and Victoria, but declined at St. John and St. Catharines. Beans were higher at St. John, St. Hyacinthe, Hull, Kingston, but declined at Brockville, St. Catharines, Woodstock, Vancouver, and Victoria. Evaporated apples rose in price to 20c and 25c per lb., in some of the cities as a result of the short crop. Prunes were higher in Amherst, St. Hyacinthe, St. John's Brockville, Belleville, Peterborough, Orillia, Guelph, Windsor, and Victoria, but declined at St. John, Woodstock, and New Westminster.

Sugar was higher at St. John, Three Rivers, Sherbrooke, Orillia, Windsor, but was down at Vancouver.

Potatoes were higher at Sydney, Ottawa, Kingston, Belleville, Peterborough, Hamilton, Brantford, Galt, Kitchener, Woodstock, Stratford, London, Owen Sound, Cobalt, Sault Ste. Marie, Port Arthur, Fort William, Regina, Moose Jaw, Medicine Hat, Calgary, and New Westminster, but declined at Fredericton, St. John's, Orillia, Lethbridge, and Vancouver.

Anthracite coal was higher in Nova Scotia, Quebec, Ontario, and Saskatchewan. Bituminous coal was lower in Nova Scotia, but was higher in Quebec, Ontario, and British Columbia. Wood

COST PER WEEK OF A FAMILY BUDGET OF STAPLE FOODS, FUEL AND LIGHTING, AND RENT, IN TERMS OF THE AVERAGE PRICES IN SIXTY CITIES IN CANADA.

*e*Including $1.00 for delivery. *g*Calculated from price per 100 lbs. §Halifax and Saskatoon omitted.
†In 20 lb. lots, 10¾c.

also advanced in several of the cities on account of the scarcity of coal.

Rent advanced in Sorel and Brockville for houses with sanitary conveniences, and for houses without sanitary conveniences in Sorel, Brockville, and Moose Jaw.

Wholesale Prices.

GRAINS AND FODDER.—The prices of oats were upward, Ontario oats rising from 74-75c per bush. to 79-80c. Western oats advanced at Winnipeg from 79c. to 82¾c, but were lower for a short time at the middle of the month. There was a good demand and receipts were not large. Western barley rose from $1.23 per bush. to $1.38 and Ontario barley from $1.23 to $1.34 at Toronto. A demand for the manufacture of barley flour was reported. Flaxseed declined, being down to $3.00 from $3.10, but recovered in the last week of the month. Peas at Toronto declined from $3.80 to $3.65. Rye advanced from $1.75 to $1.78. In wheat there was a shortage in supplies for millers in Ontario, and it was expected that the prices of No. 3 Ontario Winter wheat and lower grades would also be fixed by the Board of Grain Supervisors. Hay rose at Montreal from $13.50 to $15.50 and at Toronto the best hay rose to $16.50. Straw rose to $9.50 per ton, bran rose from $35.00 per ton to $38.00, and shorts from $42.00 to $44.00.

ANIMALS AND MEATS.—Best butchers' steers declined from $13.00 to $12.50 per hundred at Toronto, and at Winnipeg from $11.00 to $10.50. Beef, hindquarters, advanced from $18.00 per hundred at $20.00. Live hogs advanced at Toronto from $17.00 per hundred to $17.75. Dressed hogs eased off from $24.00 to $23.00. Ham declined from 32c per pound to 30c. Lard rose from 27½c per pound to 38¾c. Sheep advanced from $14.00 per hundred to $15.00. Turkeys rose from 31½c per pound to 35c. Fowl was down to 19c.-23c per pound.

DAIRY PRODUCTS. — Butter, finest creamery, rose at Montreal from 43c to 45c. Dairy butter at Toronto eased off from 38-42c to 35-42c. Eggs rose from 65-60c to 65-70c. Storage eggs were firmer, rising from 43-48c to 44-48c.

FISH.—Whitefish rose from 12-15c to 14-15c at Toronto and lake trout from 12-14c to 15-16c.

FRUITS AND VEGETABLES. — Lemons rose from $8.00 per case to $9.00. Oranges were down to $4.75 per case. Evaporated apples were firmer at 24½c. Currants were lower at 26-28c per pound. Prunes were easier at 11¾c to 12c. Raisins were down to 10-10½c. Potatoes declined at Toronto from $2.25 per bag to $2.10 and at Montreal to $2.00.

MISCELLANEOUS FOODS.—Oatmeal advanced from $4.00-5.40 to $5.40-6.25 per bag, and Patna rice was firmer at 14-15c per lb. Honey rose from 19-20c per lb. to 20-21c. Cream of tartar advanced to 70-75c per lb.

TEXTILES.—Woollen goods were higher, a line of beaver cloth being up to $3.60 per yard and a line of yarn to $1.65 per pound. Cotton, raw, rose to 30.10c per pound. Gray cottons averaged over 52c per pound. Coloured cottons were up to 70c per pound. Silk thread, machine, was slightly lower at $10.50c per pound. Hessians advanced to 27-35c per yard. Flax fibre advanced to 55.60c per pound and tow to 20-25c. Flax

*Preliminary figures. †Nine commodities off the market, fruits, vegetables, etc. One line of spelter was dropped in 1915. ‡Revised.
Leather unchanged from December, 1916, to November, 1917.

sewing twine, and rope were also higher. Floor oilcloth rose to 42c per yard.

HIDES, LEATHERS, BOOTS AND SHOES.—Horsehides advanced $1.00 per skin to $6.00-7.00. Harness leather rose to 68-70c per pound.

METALS AND IMPLEMENTS.—Wrought iron scrap rose to $26.00 per ton. Brass eased off to 35½c per pound and copper was lower at 30-32c per pound. Lead eased off to 8¾c per pound. Silver, quicksilver, solder and tin were higher.

FUEL AND LIGHTING.—Anthracite coal at Montreal rose to $8.85 per ton. Connellsville coke was still steady at the price fixed in October. Bituminous coal and coke in Western Canada were slightly upward.

BUILDING MATERIALS.—No. 1 pine rose to $53.00-55.00 per M. at Toronto. Pine shipping culls were higher at $42.00 per M. and box boards rose to $28.00. Spruce advanced to $27-28.00 at Ottawa and at St. John, N.B., spruce deals advanced to $25.00 per thousand. Lead pipe was easier at 14-15c per pound. Copper wire was lower at 27-29c. Wire fencing and coal tar were higher. Linseed oil was slightly higher but turpentine was easier at 70-72½c per gallon. Window glass rose from $7.65 to $9.18 per box.

HOUSE FURNISHINGS.—An advance in crockery of about 15 per cent was announced for the end of the year. Wooden pails and tubs were higher.

DRUGS AND CHEMICALS.—Carbolic acid crystals rose from 90c to $1.00 per pound. Glycerine rose from 80c to 86c. Quinine was up to $1.40 per ounce.

MISCELLANEOUS.—In raw furs, mink was up to $7.00-8.00 per skin, muskrat to 60-75c., and skunk to $4.00-4.75. Raw rubber advanced from 47c per pound to 48c.

Prices in Other Countries

In the United Kingdom the general level of retail prices of the principal articles of food at December 1st showed a very slight decline as compared with November 1st. There were decreases in the prices of salt butter, meat, potatoes, and margarine, but advances in fish, eggs, milk, bacon, and tea. In salt butter the decline was 13 per cent, being due to official restrictions on the price of Danish butter. Fish advanced 10 per cent and eggs nine per cent. In wholesale prices the index number of the *Economist* showed a slight decline in the miscellaneous foods group, tea, sugar, etc., but an advance in the cereals and meats group. The wholesale prices of tea and Danish butter were lower. In textiles, cotton advanced. Among miscellaneous coal and tin rose but raw rubber declined.

In the United States wholesale prices were higher at the first of December than a month before, according to *Bradstreet's* index number, the advance being over 4 per cent, and the level being 30 per cent higher than a year before, and 105 per cent higher than in July, 1914. Breadstuffs were higher owing to a rise in corn, oats, barley, and rye. There were also advances in pork products, fresh eggs, butter, lard, cheese, cod fish, tea, and beans. Textiles were up and tin advanced steeply. Coal also advanced as the Government allowed an increase of 35c per ton in anthracite coal. Glass, carbolic acid, and alcohol advanced, as well as tobacco and hay. Sheep, cattle, lemons, some leather and turpentine declined. The same index number for January 1 advanced to $17.9636, there being increases in grain, some leathers, textiles, and several other commodities, but decreases in beef, hogs, and hog products, while milk, butter and eggs were upward. The decrease in *Dun's* index number for December 1st, was due to declines in breadstuffs and metals.

a July of each year. *b*. Foods. *c*. 1901-1000—. *Quarter beginning that month.

PRICES DURING 1917

TOWARD the end of 1916 the rise in prices became steeper, especially in foods owing to the reduced production throughout the world for the 1916 season as a result of unfavourable weather in many countries and shortage of labour, fertilizers, etc. Supplies of materials also became gradually depleted in spite of increased production in many cases, but costs of production and transportation were rising with the increased cost of food, labour, materials, and manufactured goods. In all parts of the world measures were taken by governments to keep down prices, to secure supplies, and to provide for equitable distribution. As the year advanced, high prices and scarcity of supplies became more acute and such measures were taken to an increasing extent, and included within their scope most of the important necessities of life and industry as well as war materials. In some cases prices fixed by governments, based on costs of production and transportation, had to be advanced at intervals as these costs increased. The crops of 1917 were in most countries larger than in 1916 owing to increased acreage and efforts to provide good seed, fertilizers, labour, and to secure other conditions necessary for larger production. In wheat and other grains, the crops of 1916 had been supplemented by a large surplus from the bumper crop of 1915, and as no such surplus was available from the 1916 crops there was a shortage in the total supply as compared with the previous year. This shortage was increased by the difficulty in transporting supplies from Australia where there was a surplus. The wheat supply available for Europe was estimated to be half a billion bushels short, the oat and corn crops in America very large. Prices of wheat were America as well as in Europe. ur prices were regulated accord- In coal, coke, iron, copper, and other materials required in the production of minerals, prices had been fixed in European countries earlier in the war and in the United States were regulated under the authority of the government in the summer and autumn. The entry of the United States into the war had increased the demand for many commodities owing to the increased demand by the Government for supplies. During the closing months of the year the prices situation was marked by the stationary levels in those commodities for which the Government had fixed prices, but advances in other commodities, and in those for which the fixed prices were changed from time to time under Governmental authority caused the index numbers to rise.

In Great Britain, the index number of the London *Economist* shows the increases by groups since July, 1914. The least increase appeared in metals which had risen 82.5 per cent, and the greatest increase in textiles which rose 169.3 per cent. The cereal and meat group was up 113.8 per cent, and other foodstuffs 92.9 per cent. The *Statist*, in reporting on its index number for the end of November, pointed out that wholesale prices were 30 per cent higher than a year before, and 124 per cent higher than before the war, also that relatively few of the commodities included in the index number showed any movement recently as prices had been fixed by the Government. During recent months it was shown that there had been a constant rise in the index number for materials but that foods were lower in November than in June, but higher than in September.

In retail food prices the cost of a weekly budget of staple foods in terms of the average prices in 60 cities in Canada rose from $10.27 in January to $12.24 in December. In January, 1914, the same budget cost $7.73. The average cost of a supply of coal and wood rose from $2.13 in January to $2.64 in December as compared with $1.90 in January, 1914,

*Halifax omitted. †Saskatoon omitted. §Coal, wood and coal oil; no allowance is made for the varying extent to which these are used in the different provinces and localities.

and $1.85 in December, 1915. During the first year of the war the prices of coal and wood showed some declines but advanced considerably during 1916 and 1917. The greatest increases in the cost of food during the year were in meats, especially pork products, eggs, butter, bread, flour, beans, sugar and potatoes. As compared with prices of foods before the war all commodities were much higher except coffee, prunes, and rice. Milk showed relatively little advance until the autumn of 1917 when prices in most of the cities went above 10 cents per quart, and in several rose to 15 cents.

The British Labour Gazette reported on prices at the end of the year as follows, in part:—

..... After the recession from the higher prices of early August, 1914, to the level of the beginning of September, there was an almost continuous rise in the prices of food up to July, 1917. Twenty-five per cent. increase was first exceeded on 1 May, 1915, after nine months of war, 50 per cent. on May 1, 1916, a year later, 75 per cent. on November 1, 1916, after 27 months of war, and 100 per cent. on June 1, 1917. During June there was a rise of 2 per cent. in the increase over the normal of July, 1914, but a similar fall in July brought the increase in prices after three years of war to 102 per cent. In other words, prices had practically doubled during the three years. The figure for December 1, is not substantially different from that for July 1, 1917, and it is interesting to note that in the corresponding five months of 1916 an increase of 23 per cent. was recorded. It is noteworthy that the items which have shown a fall in price since July, 1917, are those of particular importance in the dietary of the poorer classes—viz., bread and flour, potatoes, cheese and margarine, as well as meat.

When the average percentage increases at December, 1 1917, as compared with July, 1914, for each of the foregoing articles of food are brought together, their arrangement in descending order of magnitude is as follows:—

	Per cent		Per cent
Fish	191	Eggs (see text)	95
Sugar (granulated)	188	Cheese	92
Meat, imported	115 to 161	Meat, British	75 to 100
Bacon	134	Margarine	65
Tea	107	Bread	54
Butter	99	Flour	52
Milk	96	Potatoes	39

For eggs, the percentage shown here relates to July, 1917, and not to December, 1917, as the seasonal change in prices of eggs is so great that the December percentage would be valueless for comparative purposes. With regard to meat it may be remarked that the diversity in percentages arises from the disparity in the prices of different cuts, and that the actual amount of average increase shows much less variation, the range 6½d. to 8¼d. per lb. covering six of the eight cuts included in the figures.

The foregoing particulars relating to the principal articles of food may usefully be supplemented by the following figures showing the approximate average percentage increase between July, 1914, and December 1, 1917, in the retail prices of a number of groceries of less importance in working-class dietaries:—

	Per cent.		Per cent
Lentils, split (red)	230	Milk, condensed	120
Peas, split (yellow)	210	Beans, butter	110
Sago	190	Jam	110
Tapioca	160	Rice, Rangoon	100
Syrup	160	Cocoa (loose)	95
Beans, Haricot	140	Coffee	30
Oatmeal, Scotch	140		

The average rise with these secondary items is clearly greater than with the principal foodstuffs. Excluding coffee, for which the advance is exceptionally small, it would appear that the average would be between 140 and 150 per cent; including coffee it would be less, but certainly above the 105 per cent shown as the average for the principal articles of food.

FOODS IN COLD STORAGE

THE Commissioner appointed by the Minister of Labour to administer Order in Council No. 2777, of November 10, 1916 (issue of December, 1916, p. 1848), has issued a statement of the quantities of certain food commodities in cold storage in Canada on the first day of each month beginning with July 1, 1917. The statement also gives quantities in storage on the same dates in the previous year. The figures, which are compiled from reports of approximately 99 per cent of the cold storage plants in Canada, include the entire stocks of the commodities in cold storage establishments whether technically in cold storage or not. The statement, which is summarized in the following tables does not cover goods in transit, which it is estimated, would increase the totals by about ten per cent.

QUANTITIES OF CERTAIN FOODS IN COLD STORAGE ON THE FIRST OF EACH MONTH, JULY, 1917, TO JANUARY, 1918

Commodity	July 1	August 1	September 1	October 1	November 1	December 1	January 1
	Lbs. or Doz.	Lbs. or Doz.	Lbs. or Doz.	Lbs. or Doz.	Lbs. or Doz.	Lbs. or Doz.	Lbs. or Doz.

FAIR WAGES CONTRACTS, DECEMBER, 1917

DURING December, 1917, the Department of Labour received for insertion in the *Labour Gazette* information relative to two fair wage contracts. Both of these contracts were awarded by the Department of Public Works and contained the usual fair wage clause.

DEPARTMENT OF PUBLIC WORKS. — Docking, cleaning, painting and repairs to Dredge No. 303, "Fruhling." Name of contractor, British Columbia Marine Company, Vancouver, B.C. Date of contract, December 6, 1917. Amount, $19,960 and $0.75 per sq. ft. for any extra cement work.

DEPARTMENT OF PUBLIC WORKS. — Alterations required for post office purposes in the old Royal Bank Building, Regina, Sask. Name of contractors, Wilson and Wilson, Limited, Regina, Sask. Date of contract, December 12, 1917. Amount, $7,900.

POST OFFICE DEPARTMENT.—The following is a statement of payments made in November for supplies ordered by the Post Office Department subject to the Regulations for the Suppression of the Sweating System, the securing of fair wages and the performance of work under sanitary conditions:

Nature of orders.	Amount of Orders
Making metal dating stamps and type and making other hand stamps and brass crown seals	$921.10
Making and repairing rubber dating stamps	192.24
Supplying stamping material and repairing stamping pads	841.44
Supplying new bags	6,754.02
Repairing mail bags	5,548.56
Supplying mail bag fittings	14,252.18
Making and supplying articles of official uniforms	543.25
Repairing mail clerk's tin boxes and steel portable boxes	87.35
Repairing post office scales	7.10
Repairing miscellaneous articles of postal stores	20.50

FATAL INDUSTRIAL ACCIDENTS DURING DECEMBER, 1917

DURING December the Department received reports of the occurrence in that month of 41 fatal accidents, as compared with 58 fatal accidents during November and 89 in the month of December, 1916. The Department is unable to secure reports of all fatal accidents, but reports are received monthly from all available sources.

FATAL INDUSTRIAL ACCIDENTS DURING DECEMBER, 1917

Trade or industry.	Locality	Date	Cause of fatality.
AGRICULTURE—			
Farmer	Virgil, Ont	Dec. 4	Kicked by a horse.
LUMBERING—			
Sawmill employee	Quebec, Que	" 6	Clothing caught in belting of machinery.
Logmaker	Massey, Ont	" 1	Falling tree.
MINES, METALLIFEROUS WORKS AND QUARRIES—			
Hoistman	New Liskeard, Ont	" 7	Struck by hoist cable.
Miner	Timmins, Ont	" 11	Fell down ore chute.
Miner	Crean Hill, Ont	" 4	Struck by flying piece of blasted rock.
Mucker	Silverton, B.C.	" 10	Fall.
Miner	Nanaimo, B.C.	" 31	Fall of rock.
BUILDING AND CONSTRUCTION—			
Bricklayer	Quebec, Que	" 8	Falling from chimney.
Derrick operator	Toronto, Ont	" 18	Falling derrick.
METAL, MACHINERY AND SHIPBUILDING—			
Steel worker	Hamilton, Ont	" 4	Contact with revolving shaft.
STEAM RAILWAY SERVICE—			
Engineer and fireman (2)	Stony Creek, Ont.	" 18	Collision of trains.
Engineer	Sarnia, Ont	" 18	Drowned—locomotive fell into river.
Engineer	Cabot, Man	" 11	Crushed by overturning of locomotive.
Brakeman	Tillsonburg, Ont	" 17	Collision of trains.
Brakeman	Mont Joli, Que	" 11	Fell from train.
Brakeman	Chambord, Jct., Que	" 22	Derailment of a car.
Brakeman	Rennie, Man	" 12	Run over by train.
Brakeman	Port Burwell, Ont	" 7	Collision of trains
Brakeman	Moose Jaw, Sask	" 11	Run over by cars
Yardman	Toronto, Ont	" 20	Run over by a train.
Yardman	Transcona, Man	" 7	Crushed between cars.
Section foreman	Collins' Bay, Ont	" 1	Struck by a locomotive.
Employee	Prince Albert, Sask	" 27	Mangled by gasoline engine.
Employee	Montreal, Que	" 18	Struck by a train.
NAVIGATION—			
Bargeman	Quebec, Que	" 8	Entangled in hawsers.
MISCELLANEOUS TRANSPORT—			
Driver	Toronto, Ont	" 5	Collision of wagon and street car.
Driver	Toronto, Ont	" 19	Collision of wagon and street car.
PUBLIC UTILITIES—			
Lineman	Toronto, Ont	" 6	Struck by elevator balance weight.
MISCELLANEOUS TRADES—			
Paper mill employee	Iroquois, Falls, Ont	" 8	Caught in machinery.
Chemical plant "	Victoria, B.C.	" 27	Burned—Fell into chemical tank.
Chemical plant "	Trenton, Ont	" 31	Crushed by falling weight.
Domestic servant	Montreal, Que	" 27	Fell into elevator shaft.
Hotel employee	Montreal, Que	" 29	Fell into elevator shaft.
Stableman	Montreal, Que	" 17	Burned—Stable caught fire.
UNSKILLED LABOUR—			
Labourer	Grand Falls, N.B.	" 13	Falling mass of frozen gravel.
Labourer	St. John, N.B.	" 21	Falling roll of paper.
Labourer	Tuxedo, Man	" 2	Crushed in clay crusher.
Labourer	Pinawa, Man	" 26	Drowned.
Labourer	Point Ann, Ont	" 18	Struck by a belt of machine.

REPORT OF THE UNITED STATES EMPLOYEES' COMPENSATION COMMISSION*

THAT the industry and not the employee ought to bear the larger part of the burden of cost resulting from injuries due to the employment has been recognized by the enactment of workmen's compensation laws in 37 American States, but until September 7, 1916, no comprehensive plan had been adopted by the United States for the protection of its half million employees, although certain groups had been protected by the provisions of several widely different acts, no one of which was at all adequate when tested by the standards of even the narrower State compensation laws.

The first annual report of the United States Employees' Compensation Commission upon the operations of the new Federal compensation act shows that, although the Commission was not organized until the end of March, 1917, nearly seven months after the law came into effect, yet during the three months to June 30 it made awards and paid compensation of $122,806 on account of 2,758 claims arising from injuries occurring during the period September 7, 1916, to June 30, 1917.

In the 2,669 cases in which disability had terminated, the average compensation was $40.53; in 87 cases, where the injured employee was still disabled and only part of the compensation had been paid, the average of compensation paid was $155.93; in death cases, one widow was awarded $35 per month, and one $27.65 per month during life or until re-marriage; in 27 cases payments for medical, surgical and hospital expenses amounted to $781.15. Among the Panama Canal employees, where the compensation act is separately administered by the Governor of the Panama Canal, 673 cases, 12 of which were deaths, resulted in compensation of $29,807, while among employees of the Alaskan Engineering Commission, where the compensation act is also separately administered, 65 cases received compensation of $7,317.

The number of cases settled is yet too small to permit any comparison of the relative cost of compensation under the old and new systems. Under the old system, $626,896 were paid as compensation for injuries occurring during the fiscal year ending June 30, 1916, and inclusion of certain additional groups of post office employees who had been provided for beginning with July 1, 1916, had called for an additional appropriation of approximately $100,000.

The injuries reported to the Commission up to June 30, 1917, numbered 7,832. Since that date a marked increase has occurred, so that during October the reports received were more than double the average number for the months prior to June 30, probably due in part to a better understanding of the law and better reporting, but mainly due to a rapid increase in the number of employees in many Government establishments.

Of the injuries reported to the Commission, 121, or 1.9 per cent, were deaths, and 20 per cent resulted in dis-

*For text of the United States Employees' Compensation Act, see issue of November, 1916, page 1786.

ability of over 28 days. Of the 121 deaths, 34 occurred in the engineering work of the War Department; 17 in the nine navy yards, 14 in the lighthouse service, 10 in the railway mail service and 8 among rural mail carriers.

Bruises, contusions and abrasions constituted about 30 per cent of the injuries, while cuts, punctures and lacerations made up 25 per cent. The great majority of these were not serious. Less numerous, but usually more serious, were the strains and sprains, amounting to 21 per cent of the injuries; fractures, 10.5 per cent; eye injuries, 4.5 per cent; and amputations, 1.5 per cent. Infection, probably due to delayed or inadequate first aid or to some defect in treatment or care, occurred in 7 per cent of the injuries, often greatly prolonging the disability. In several establishments, more than 10 per cent of the injuries became infected.

Under the terms of the new Federal compensation act, compensation is payable for personal injuries sustained in the performance of duty, and this the Commission has interpreted to mean not only accidents as ordinarily defined, but also any bodily injury or disease due to the performance of duties and causing incapacity for work. The Commission thus follows the precedent established by the Department of Labour in its interpretation of the act of 1908, by the Massachusetts Industrial Accident Board and the Massachusetts Supreme Court in their interpretation of the Massachusetts compensation act, and by the State of California in its amendment of its State compensation act. The cases which have come before the Commission thus far indicate that the use of the word "injury" in place of "accident" has not resulted in adding more than one per cent to the number of compensable cases. This is of special interest in view of the fact that where the inclusion of occupational diseases has been proposed, legislators have often hesitated, fearing that the inclusion of such injuries would introduce an element of great uncertainty and might extend the act so as to make it practically a sickness insurance law. It is clear, however, that these doubtful cases are not more numerous or costly than those where questions arise as to whether the injury was sustained while in the performance of duty in cases which must necessarily be left to the judgment of the administrative authority.

The many cases in which question arose as to whether the injury sustained occurred in the performance of duty have led the Commission to adopt the following ruling:

> A personal injury sustained by a civil employee of the United States while on the industrial premises of a navy yard, arsenal, or other place of employment, provided such employee is on such premises for the purpose of going to or returning from his work or performing duties connected with or incidental to his work, and is not on such premises merely for purposes of his own, shall be an injury sustained "while in the performance of his duty" within the meaning of that phrase as used in section 1 of the compensation act of September 7, 1916. This ruling is based upon the responsibility of the United States, as the employer, for the safe and sanitary condition of its premises.

This definition is in accord with the decisions of practically all of the State compensation commissions.

That independent contractors and employees of contractors are not employees of the United States in a sense entitling

them to compensation for injuries sustained while in the performance of work under their contracts has been held in recent decisions of the Commission. Thus the outside piece-worker who sustained an injury while carrying a heavy bundle of work to her home from the quartermaster's depot was denied compensation; as was also the widow of a workman who was drowned while engaged in certain river improvement work for the United States in the service of a contractor. Where, however, a construction firm was employed as agent, as distinguished from contractor, for the performance of certain work in France for the War Department, it was held that the men engaged in such work were civil employees of the United States and subject to compensation under the compensation act.

Where an injury occurs under circumstances creating liability upon a third party to pay damages on account of injury or death and compensation is also payable by the Commission, the law requires that whatever is recovered as personal damages (but not including property damages) must be applied as a credit against the payment of compensation by the Commission. The compensation is then paid only when the amount to which the injured employee would be entitled because of the duration of the disability exceeds the amount recovered. Settlements made up to November 15 by or on behalf of injured employees with third parties who were liable covered 36 cases, and the amount recovered exceeded $12,000.

RECENT LEGAL DECISIONS AFFECTING LABOUR

Failure to examine effect of explosion held negligence

A MAN was killed by a fall of earth and snow when working in a gravel pit. His father sued the company for whom the work was being done under the Fatal Accidents Act, and was awarded damages. The company appealed to the Second Divisional Court, but the appeal was dismissed with costs. The deceased was not employed directly by the company, but by a teamster who was removing the gravel under contract. In order that the gravel might be taken out, the surface earth and snow had to be removed, and by agreement with the teamsters, it was the duty of the company to have this done. In the evening before the accident took place a servant of the company had exploded three charges of dynamite in the frozen surface, and the next morning he had ordered the teamsters to load the gravel at that part of the pit where the explosion had taken place, without having examined the effect of the explosion. The fall of the earth loosened by the explosion was the direct cause of the accident, and the defendants were held by the Court to be liable because of the neglect of their servant to make a proper examination of the place of the explosion, which would have revealed the danger. Both teamster and teamster's servant were on a like footing in respect of a claim of that character, as there was a duty upon the defendant towards every one employed in removing gravel to take reasonable care that the frozen surface should not be a needless danger to them when so engaged. (*Ontario—Durant v. Ontario and Minnesota Power Company.*)

Defective machine held cause of accident when no eye witness

A workman was struck on the head and severely injured by a part of a shoddy picker machine, which he was feeding. He sued his employers and was awarded $4,000 damages upon the findings of a jury. Upon appeal by the defendants, the judgment of the lower court was sustained and the appeal was dismissed. There was no eye-witness to the accident and no one in a position to say what caused the blow. The plaintiff stated that he was struck on the head when picking felt out of the apron of the machine with his right hand, holding in his left a wrench with which he had just tightened some screws that had become loose. He claimed that the machine was not adapted for the picking of felt and that it was not in proper repair. Evidence was adduced in support of this claim. This contention was accepted by the jury, the theory of the defendants being rejected, that the accident was caused by the dropping of the wrench, or in some other way not attributable to any defect in the machine, but to the act of the plaintiff himself. Three questions were put to the jury, and their replies were as follows:

1. Was the accident sustained by the plaintiff caused by the negligence of the defendants? A. Yes.

2. If so, in what did such negligence consist? A. Machine not adapted for the work and not in proper repair.

3. Could the plaintiff, by the exercise of reasonable care, have avoided the accident? A. No.

On appeal, the counsel for the appellant argued that the jury's answers were not sufficient to entitle respondent to have judgment entered for him, and that there was an absence of a finding of causal connection between the defective condition of the machine and respondent's injury. This contention was held by the Court not to be well founded, as the jury's answers must be read in connection with the evidence and in the light of the charge to them. Having found that the accident was not caused or contributed to by the respondent, and that the machine was not adapted for the work and not in proper repair, it would seem to follow that the condition of the machine must have been the cause of the accident. (*Ontario—Toben v. Elmira Felt Company.*)

Appellant must show accident happened in course of employment

A workman, on his way to work, was killed by coming into contact with an electric wire, about 18 feet from a wagon road leading to the yard where he was employed. An application for compensation was made by his widow under the Workmen's Compensation Act of Manitoba. It was ruled by the County Court judge that the company was not liable to pay compensation. The case was taken to the Court of Appeal, which sustained the judgment of the lower court and the appeal was dismissed without costs. It was held by the court that there was no evidence to show why the deceased had left the wagon road, and there was nothing to indicate that his purpose in leaving the road and going to the spot where he was killed was in any way connected with his employment. The onus was clearly upon the appellant to show that the accident both arose out of and happened in the course of his employment. (*Manitoba—Gousick v. Canadian Pacific Railway Company.*)

REVIEWS

UNITED KINGDOM.—Weekly Hours of Employment. Ministry of Munitions. Health of Munition Workers' Committee. Memorandum No. 20. Supplementary to Memorandum No. 5. (Hours of Work.) London, 1917; 7 pp.*

Hours of Munition Workers

IN January, 1916, the Health of Munition Workers' Committee, appointed by the British Ministry of Munitions, issued Memorandum No. 5 on "Hours of Work," in which the following limits of the weekly hours of employment were suggested:

(a) For men, that the average weekly hours of employment should not exceed 65-67 (exclusive of meal times), *i.e.*, a 13-14 hour working day.

(b) That boys under 18 should be allowed to work the same hours as men, provided that—

(i) The hours of boys under 16 should be limited to 60, so far as possible;

(ii) Substantial relief at the week-ends should be insisted on;

(iii) Night work should be limited, as far as possible, to boys over 16.

(c) That for women and girls, employment should be restricted within the normal legal limit of 60, *i.e.*, a 12-hour working day, though within these limits moderate daily overtime might be allowed, and that the employment of girls under 18 at night should be limited as far as possible.

*A review of Memorandum No. 5 of the Health of Munition Workers' Committee, to which this Memorandum is supplementary, appeared in the *Labour Gazette* for June, 1917, p. 502. Memorandum No. 18, an Appendix to Memorandum No. 5, is reviewed in the *Labour Gazette* for August, 1917, p. 659.

Since then, exact data have been collected by the committee with regard to the relation of weekly hours of labour to output in various occupations, and it was shown that a reduction in the weekly hours of actual work, varying from 7 to 20, in no case resulted in more than an insignificant diminution of total output, while on the average it produced a substantial increase.

In Memorandum No. 20, this subject is discussed further, and it is pointed out that conditions are not the same as in the early days of the war. Not only have large numbers of the youngest and strongest workers been withdrawn for military service, but those who remain are suffering from the strain due to a continuous period of long hours of employment and to anxieties arising out of the war. While much has been done to improve conditions of employment, they are still in many cases far from ideal, notably as regards housing and transit. Large numbers of women are also now employed on work which was considered two years ago quite beyond their capacity. The committee are convinced that the maximum limits of weekly employment provisionally suggested are too high except for quite short periods, or perhaps where the work is light and the conditions of employment are exceptionally good. It is impossible to lay down a single rule as to the best hours in all cases, and the best scheme can only be determined after a careful consideration of the following factors:

(a) The strain involved in the work, its character (heavy or light, continuous

or intermittent) and the mental demand which it makes upon the worker;

(b) The extent to which the pace of the work is governed by the machine;

(c) The factory environment — temperature, ventilation, etc.;

(d) The individual physical capacity of the workers, and their age, sex and experience;

(e) The organization of the factory (including welfare supervision);

(f) The sufficiency and suitability of the workers' food, canteen accommodation, etc.;

(g) The arrangements of the hours of work (spells, breaks and pauses);

(h) Conditions outside the factory—*e.g.*, housing and transit.

UNITED KINGDOM.—Forty-sixth Annual Report of the Local Government Board, 1916-1917. Part I.—Administration of the Poor Law: Special Work Arising Out of the War. Part II.—Housing and Town Planning. Part III.—Public Health: Local Administration: Local Taxation and Valuation. 59 pp.

Work of the Local Government Board

The Report of the Local Government Board for 1916-1917 deals largely with conditions arising out of the war and the means taken to meet them. In the autumn of 1916, the Government decided to pay an additional allowance up to a maximum of 2s. 6d. a week to old age pensioners who were suffering hardships from the high prices of food caused by the war. At the beginning of November, 500,000 applications for this extra allowance had been made by old age pensioners in the United Kingdom. Each application is investigated in much the same way as claims for old age pensions. The special work arising out of the war consisted in the relief of distress among dependents of British civilians interned in Germany, victims of air raids, members of the professional classes, British and Belgian refugees, and lodging-house keepers on the East Coast. The scales of allowances for British-born wives of interned aliens were raised to a maximum of 12s. 6d. in London and 10s. outside London for the wife and 3s. for each child. Aid was continued to Belgian refugees in co-operation with the War Refugees Committee and the Comité Officiel Belge pour l'Angleterre. Up to March 31, 1917, accommodation had been provided for 119,739 refugees in institutions controlled by the Metropolitan Asylums Board and in other places.

On account of the war there has been a marked diminution in the activity of local authorities generally in housing matters, but during the past year the subject of the housing of the working classes has received much consideration with a view to proposals for dealing with some difficult problems which will arise on the conclusion of the war, especially in regard to the need of a very considerable number of houses to meet the large and growing deficiency in housing accommodation. The war has also had a deterrent effect on town planning, but local authorities are recommended to take every possible opportunity to advance their town-planning schemes in order that when the opportunity occurs progress with building operations may be made without delay.

UNITED STATES.—Proceedings of the Fourth Annual Meeting of the American Association of Public Employment Offices, Buffalo, N.Y., July 20 and 21, 1916. U. S. Bureau of Labour Statistics. Bulletin No. 220. 92 pp.

American Association of Public Employment Offices

The United States Bureau of Labour Statistics has issued a bulletin containing the proceedings of the fourth annual meeting of the American Association of Public Employment Offices, which was held at Buffalo in July, 1916. Among the subjects discussed at this meeting were the following: "How can co-operation among Federal, State and city employment bureaus be effected"; "A National system of employment offices"; "Juvenile placement depart-

ments, their connection with vocational guidance and trade schools''; ''Special problems in the women's departments,'' and ''Labour organizations and public employment offices: how they can be mutually helpful.''

In a letter from Dr. W. M. Leiserson, the retiring secretary-treasurer, a brief review is given of the work that has already been accomplished by the association, and mention is made of the things that yet remain to be done. As the result of the influence of this association, all the leading public employment offices of the country have adopted improved systems of records and methods of management that are substantially uniform. Public employment office laws recently enacted in the States of New York, New Jersey, Pennsylvania, Illinois and California have included provisions which had been advocated by the association, namely, advisory committees of employers and employees, and a measure of civil service. The work remaining to be done by the association includes the preparation of a standard set of forms for keeping records of employment offices, the drafting of a standard employment office law, and the working out of a plan for a national organization of employment offices.

SWEDEN.—Livsmedelsforbrukningen. Sveriges Officiella Statistik. Stockholm, 1917; pp. 77.

Cost of Living in Sweden, 1914-1916

The Swedish Labour Office has published a report on the cost of living, giving the result of an investigation into the expenditure of 600 families in 27 towns on the same basis as a previous investigation in 1913-14. Expenditures as obtained from household accounts were compared for May, 1914, and May, 1916. The average income per week in May, 1916, was 39 Kr. 32 ($10.538) as compared with 35 Kr. 92 ($9.627) in the same month of 1914. In many families, however, the children had grown up and the families were larger. The average income per member reduced to a common unit was 10 Kr. 84 ($2.905) as compared with 10 Kr. 67 ($2.860) in 1914. More than half of the families investigated lived in one room houses. The number using electricity and gas, however, had slightly increased, these now being used by one-half of the families. The average monthly rent for a one-roomed house increased from 16 Kr. 07 ($4.307) to 16 Kr. 94 ($4.540). In expenditure on food, etc., the cost of meat increased by 36 per cent and formed a slightly larger percentage of the budget in 1916 than two years before, namely 13.04 per cent, as compared with 12.32 per cent. Expenditure on fish bore a greater proportion to the total expenditure on food than before. The expenditure on butter decreased, but that on margarine increased. Rye bread and flour represented an increased percentage of the total budget for food; also sugar and molasses. The amount of meat used decreased four per cent, being greatest in preserved meat, especially pork. The use of fish increased considerably. There was a reduction in the consumption of unskimmed milk. The consumption of potatoes increased greatly, over 50 per cent. There was also an increase in the consumption of sugar and coffee.

The investigation sought, finally, to discover in what measure the 601 families in question succeeded in avoiding an increase in the cost of living by substituting certain foods for others. A comparison was made between the actual expenses for food shown in an average

family weekly budget in May, 1914, and May, 1916, and, on the other hand, the cost, in May, 1916, of a budget of the same foods as used in 1914. The average weekly budget of foods actually consumed in May, 1914, was 12 Kr. 06 ($3.232) and in 1916 the actual expenditure was 16 Kr. 13 ($4.323), that is, an increase of 33.7 per cent. The same expenditure calculated per unit of consumer stood at 3 Kr. 58 ($0.959) in 1914 and at 4 Kr. 45 ($1.193) two years later, showing an increase per unit of 24.3 per cent. The budget of the same foods consumed in the same quantities as in 1914 at the average prices in May, 1916, would be 16 Kr. 89 ($4.527), while the average cost per unit would be 4 Kr. 65 ($1.246), which would represent an increase of 40 per cent over the actual cost of foods in 1914 and an increase of 29.9 per cent over the cost per unit of consumer in 1914. Thus the consumer has been able to save about 6 per cent on his weekly budget by substituting cheaper foods for the more expensive.

Volume 18 FEBRUARY, 1918. Number 2

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

In January there was quietness in some lines after the Christmas trade and some temporary slackness on account of fuel shortage and adverse weather conditions was reported, but on the whole employment was well maintained. The cost of the weekly budget of staple foods was $12.42 in January, as compared with $12.24 for the previous month and $10.27 in January, 1917. The departmental index number of wholesale prices stood at 257.1 for January, as compared with 253.5 for the previous month and 208.1 for January, 1917. There were 11 strikes in existence at some time or other during the month, as compared with 12 in December; five of the new and two of the old strikes were reported as having terminated, leaving four unterminated strikes on record at the end of the month. A review of the report on strikes and lockouts in Canada, 1901-1916, just issued by the Department, and the annual review of strikes and lockouts, which also appears, afford a summary of industrial disputes in the 17 years of the departmental record. The present issue also contains the usual quarterly articles on wage changes, unemployment in trade unions and the annual review of employment in the building trades as indicated by building permits.

In this Issue

Proceedings under the Industrial Disputes Investigation Act

During January there were two applications for the establishment of Boards of Conciliation and Investigation, one from machinists, boilermakers and blacksmiths employed on the Grand Trunk Railway in Canada, and the other from conductors, trainmen and yardmen employed on the eastern lines of the Canadian Northern Railway and the Halifax and South Western Railway. In the former case a Board was established, and in the latter the dispute was referred by joint request of the parties to the Board established in connection with a dispute on the western lines of the Canadian Northern Railway and affecting the same class of workers. Reports of the Boards which dealt with the following disputes appear in this issue: (1) Michigan Central Railroad Company and passenger trainmen, baggagemen, flagmen and brakemen; (2) Port Arthur Shipbuilding Company, Limited, and boilermakers, etc.; (3) Corporation of Edmonton and firemen; and (4) Canadian Northern Railway Company and maintenance of way employees on western lines. Settlements were reported in connection with two applications which the Department had dealt with during previous months.

Government Conference with Labour Representatives

On the invitation of the Dominion Government a number of representative labour men from all parts of the Dominion came to Ottawa in the last week of January and conferred with the Government on many important problems and on those having to do with labour in particular. The railway situation was discussed and the labour men asked for the nationalization of all the roads, or failing this, a central control board which should operate the railways as one system during the war. As to shortage of labour for railway maintenance, the labour men were of the opinion that the difficulty was not caused by labour shortage, but rather by unequal distribution of labour. It is understood that the question of compulsory farm labour was not raised by the Dominion Government, but it was informally discussed with the labour representatives by some of the local representatives of agricultural departments of the provincial governments. The labour representatives took the position that conscription of farm labour was impracticable, and argued if this were granted it would be quite reasonable that labour should be conscripted for manufacturing farm machinery and the transportation of farm produce. It was conceded, however, that it might be advisable to make some statistical survey of the supply of labour available, and it was understood that the Government would take the matter into consideration and issue a statement shortly. The labour representatives also opposed the introduction of alien labour. As counter proposals to conscription of labour and the importation of aliens, the labour men suggested that efforts should be made to organize more efficiently the present supply of labour in the country. They approved the abolition of private employment agencies and the organization by the Dominion Government in co-operation with the provinces of a national system of employment exchanges. They also suggested that special railway rates should be granted to labourers going to employment at a distance. No opposition was expressed to the securing of farm labour from the United States or the exemption of farm labour from compulsory military service. The labour men urged the protection of women employed in industry and asked that they should be paid the wages previously paid to men for the same class of work.

Investigation of Operations of Manitoba Workmen's Compensation Board

The Manitoba Gazette of January 12 publishes a proclamation appointing a commission to inquire into the operations of the Manitoba Workmen's Compensation Act. The members of the commission are William S. Fallis, manager of the Sherwin-Williams Company of Canada, Limited; Andrew R. D. Paterson, adjuster of fire losses, and Arthur W. Puttee, vice-president and manager of the Winnipeg Printing and Engraving Company, Limited, all of the city of Winnipeg. The inquiry is to be made "into and concerning any administrative, executive or judicial acts of the Workmen's Compensation Board and of the officers, servants and employees thereof appointed under the Workmen's Compensation Act." The commissioners are specifically directed to inquire into the following: (a) any order respecting insurance rates made by the said Board and the reasons therefor; (b) the appointment of any officers and servants of the said Board, their salaries and duties, and the necessity for any or all of said appointments; (c) the offices, equipment and appliances, rented, purchased or procured or proposed to be procured by the said Board and the necessity therefor; (d) the work performed by the commissioner, assistant commissioner and other officers and servants of the said Board; (e) generally the nature of the staff and offices and equipment necessary for the proper administration of the said Act; (f) the forms prescribed by the said Board and

any regulations or rates laid down by the said Board in any way affecting employers, insurers or employees, and the reasons therefor.

* * *

Railway Wage Board in the United States

The Director General of Railways in the United States has announced the appointment of a railwage wage commission to investigate railroad wages. The members of the commission are: Franklin K. Lane, Secretary of the Interior; Charles C. McChord, member of the Interstate Commerce Commission; J. Harry Covington, Chief Justice of the Supreme Court of the District of Columbia, and William R. Wilcox, of New York. The commission is directed to make a general investigation of the compensation of persons in the railroad service, the relation of railroad wages to wages in other industries, the conditions respecting wages in different parts of the country, the special emergency respecting wages which exists at this time owing to war conditions and the high cost of living, as well as the relation between different classes of railroad labour. The commission is "not to sit as a body of judges in a contested case," but animated by a spirit of justice is to meet a present problem. The commission will begin work at once and will report to the Director General its recommendations in general terms as to changes in the existing compensations that should be made.

Wages of Farm Labour in Manitoba

Crop Bulletin No. 96, recently issued by the Department of Agriculture and Immigration of Manitoba has some interesting data with regard to the wages paid farm labourers in the province during 1917. The bulletin states that farm labourers were very scarce throughout the year and wages were unprecedentedly high. The gathering of the harvest was helped considerably by gangs of town dwellers who were organized and taken out to the fields for stooking purposes. A table is given showing the average monthly wage in the different agricultural seasons in the five districts of the province. With reference to autumn wages it is stated that it was impossible to secure an accurate statement as some hands are engaged by the month and a large number by the day. The figures of autumn wages quoted in the table are on the basis of day wages, estimated at 20 working days to the month.

District.	Employed during winter	Average wages (winter) per month	Employed during seeding	Average wages (seeding) per month
North Western....	2,429	$21.00	5,342	$47.00
South Western....	1,478	19.00	3,040	48.00
North Central.....	1,546	23.00	3,204	45.00
South Central.....	1,767	20.00	2,746	46.00
Eastern.....	1,469	22.00	2,583	41.00
Total.....	8,689		16,915	

	Employed during summer	Average wages summer per month	Employed harvest and fall	Wages harvest and fall per month
North Western....	4,582	$45.00	9,085	$65.00
South Western....	2,789	47.00	5,804	74.00
North Central.....	2,737	46.00	7,553	66.00
South Central.....	2,974	45.00	5,497	68.00
Eastern.....	3,740	42.00	8,952	59.00
Total.....	16,345		36,891	

As to women domestics on the farms there were some 4,919 employed in the first half year and 5,117 in the last half year. Average monthly wages in the period January to June varied from $18.00 in the North Western and Eastern districts to $19 in the North Central and South Central districts, and $21.00 in the South Western district. In the period from June to December the monthly wage ranged from $20.00 in the North Western district to $21.00 in the Eastern and South Central district, $22.00 in the North Central district, and $24.00 in the South Central district.

Annual Convention of Alberta Federation of Labour

The annual convention of the Alberta Federation of Labour was held at Lethbridge January 7-9, and a number of labour questions were discussed. The majority of the 26 delegates were representatives of local bodies in Lethbridge, Medicine Hat, Redcliff, Edmonton and Calgary. The convention urged the establishment of a provincial Department of Labour and the creation of a Fair Wage Board similar to the body created by the Manitoba Legislature in 1916. Rigid enforcement of the Factories Act and of the Coal Mines Act was urged, and the convention was in favour of legislation which would provide for the payment of wages to all employees in the province bi-monthly. The better control of contagious diseases, more stringent sanitary regulations for lumber camps, the better housing of employees at coal mines and changes in regard to the system of wash-houses at coal mines were also discussed. The convention expressed itself as in favour of proportional representation, the abolition of election deposits and legislation providing for one day's rest in seven. Resolutions were passed asking that the Dominion Government allow the brewing of a mild beer similar to the war beer of Great Britain; in favour of better wages for letter carriers, or, failing that, an investigation by commission into the question; that the Workmen's Compensation Act, when enacted, should provide compensation for industrial diseases; and that a provincial heating inspector and a board of examiners be appointed. A resolution was also brought forward recommending a system of compulsory health insurance, but it was left to the executive to collect data and report to the next convention on the subject. President J. A. Kinney and Secretary-Treasurer F. Wheatley were re-elected, and Medicine Hat was chosen as the place of meeting in 1919.

* * *

Annual Convention of the British Columbia Federation of Labour

The British Columbia Federation of Labour held its eighth annual convention at Vancouver during the last week of the month, upwards of 100 delegates representing local organizations at Vancouver, Victoria, Powell River, Trail and other places being present. The president's report urged amendments to the Workmen's Compensation Act, objected to the provincial poll tax, "company towns," and industrial conscription, and recommended the formation of a labour party. In addition to the resolutions covering the questions raised in the president's report, others were passed disapproving the importation of Oriental, negro or other indentured labour; in favour of the adoption of a general 44 hour week and of the principle of Government ownership of abattoirs and cold storage plants. The convention approved the appointment of a committee to meet returned soldiers and to discuss with them the future of returned men. The convention also urged that metal mining be made safer and that better conditions be brought about in regard to wash houses and sleeping accommodation at mines. Sanitary inspection of shipyards was advocated. The payment of wages by cash instead of by cheque and the prohibition of deductions from wages in company towns and in incorporated districts were approved. The convention also went on record as in favour of mother's pensions, a minimum wage for working women and equal pay to men

and women on the same work. Duncan McCallum was elected president and A. S. Wells was re-elected secretary-treasurer. Victoria was selected as the convention city for 1919.

Labour Jottings

A bill has been introduced into the Quebec Legislature to amend the workmen's compensation law of that province. The measure seeks to increase the maximum amount of compensation payable on account of fatal accidents from $2,000 to $2,500, and to raise the maximum amount upon which compensation for injury is calculated to $2,500. A bill entitled "An Act to provide for one day of rest each week for employees in certain industries" has also been presented. It proposes to empower the Governor in Council to order a weekly day of rest for employees in hotels, restaurants, clubs, etc.

The United States Food Administrator has suggested additional legislation widening the powers of the Food Administration. The Administration is "willing to go ahead on a voluntary basis," but asks to be relieved of the responsibility if that method should fail.

The Union of South Africa has passed an act "To amend the Workmen's Compensation Act, 1914, for the purpose of providing compensation in case of industrial diseases."

A special health insurance commission appointed in Massachusetts has reported against the establishment by the state of compulsory health insurance because of "the united opposition of employers and employees, and difficulties presented by the constitutional aspect of the question." The report, however, submits legislation for the extension of group insurance in industrial plants through the savings bank life insurance department. A minority of the commission favoured compulsory health insurance and recommended the appointment of a commission to study the subject.

British National Health Insurance Department reports total receipts for 1916, from employers and employees, £18,500,000; from the state, £5,000,000. Disbursements were: sickness and disablement benefits, £6,000,000; medical service, £4,800,000; maternity benefits, £1,250,000; sanatorium benefits, £750,000; administrative expenses, £2,250,000; balance invested, £8,500,000. Certain amendments in the financial scheme of the National Insurance Acts are proposed in a bill now before Parliament.

The amount of insurance applied for by soldiers and sailors of the United States under the Government's insurance scheme amounted to $3,633,213,000 up to January 12. Applications from 427,811 soldiers and sailors were received, the average amount being about $8,500. The cost of the insurance to the enlisted man is about $8 per thousand.

INDUSTRIAL CONDITIONS DURING JANUARY, 1918

I.—GENERAL REVIEW

The Labour Market

In January there was some falling off in employment in steel plants, the large works at the Sydneys reporting decreased production due mainly to transportation difficulties. Employment in the metals, machinery and conveyances group was generally good, although some instances of slackness on account of fuel shortage were reported, mainly in the Maritime Provinces. At Toronto, machinists and women munition workers were wanted, and machinists, moulders and stovemounters were in demand at many other points in Ontario. Workers in shipyards

were especially busy, both in the East and on the Pacific Coast, slackening being reported only from Sorel and Quebec City because of adverse weather conditions. In foods, employment in sugar refineries was well maintained in the East, except for dullness in beet sugar refineries in Western Ontario; in the West the refinery at Vancouver was operating steadily. Flour and feed mills were brisk, operations continuing day and night in most of the large mills in the West, and the only instances of slackness in cereal mills was reported from Niagara Falls. Employment in meat packing plants was generally good. In confectionery establishments there was some falling off in employment after the Christmas trade, and dullness in the tobacco trade continued in the West, but there was improvement in the East with workers in demand at the large cigar factories in Hamilton. In all branches of the textile industry employment was very good, staffs were increased and much overtime was worked. Seasonal quietness, however, was reported in some of the garment trades at Toronto, Ottawa, Hull, Windsor, Winnipeg, and Vancouver. Workers on caps and gloves were fairly busy. Employment in pulp and paper mills continued good, although the large mills at Ottawa were hampered by fuel shortage and freight congestion. In the East, workers on beaver board were well employed on orders for Halifax. Employment in printing was good. Many workers in sash, door and planing mills in the Maritime Provinces were well employed on material for re-construction at Halifax. Employment at woodwork and furniture was good on the whole in the rest of the country except in the prairie provinces where planing mills were quiet. Fairly active conditions prevailed in boot and shoe factories in the Maritime Provinces, but in Quebec there was quietness except at St. Hyacinthe and Sorel. There was also some improvement for shoe workers in Western Ontario, and leather workers in the West had a fair month. In chemicals there was a demand for nitrators and powder hands at Trenton. Lumbering was hampered by heavy snowfalls, especially in the Maritime Provinces. Bushmen were in demand at Montreal, Ottawa, Port Arthur and Fort William, Winnipeg, Saskatoon and Calgary. The lumber camps, sawmills and shingle mills in British Columbia were generally working to capacity. With the further curtailment of passenger traffic there was some transfer of passenger trainmen to freight service. Large forces were engaged in clearing the lines of snow, track labourers being reported in demand at Port Arthur and Fort William, Winnipeg and Edmonton. 'Longshoremen were well employed at Atlantic ports and were also fairly brisk on the Pacific Coast. In metalliferous mining, employment in the Cobalt, Porcupine and Kirkland Lake camps was well maintained except at one or two mines. Copper miners and muckers were in demand at Port Arthur and Fort William. Metal mining in British Columbia was again practically normal after the resumption of operations at the Trail smelter. In coal mines, employment was good in Nova Scotia and production increased, but at Westville there was dullness following a disastrous explosion in one of the mines. Coal miners in the Alberta and British Columbia fields were well employed and at many points miners were in demand. Employment in the building trades, as indicated by the value of building permits issued in 35 cities, increased 78.68 per cent, as compared with December, and 11.46 per cent as compared with January, 1917. At Montreal, Ottawa and Toronto, there was a demand for carpenters, bricklayers and electricians for work at Halifax. There was some demand for farm labour at the provincial employment bureau at Toronto, and workers for stock farms were wanted at several points in the West. In civic employment, reports from 15 cities indicated a decrease about one per cent in the number of employees temporarily employed and an increase of 22 per cent in the wages paid such employees in the

first payroll period of two weeks as compared with the same period in December. In December the demand for workpeople at 110 employment offices showed a decline of 15 per cent compared with November and a gain of about 15 per cent as compared with December, 1916. The percentage of unemployment in all occupations at the close of December, as reported by local trade unions, was 2.5, as compared with 1.7 at the close of September, 1917, and 2.2 at the end of December, 1916.

Strikes

The number of industrial disputes in existence in January, the number of workpeople affected and the time loss involved, were smaller than in December. There were in existence at some time or other during the month 11 strikes, affecting 976 workpeople and involving a time loss of 7,898 working days, as compared with 12 strikes, 3,209 employees and 33,540 days in December, and 14 strikes, 12,433 employees and 108,331 days in January, 1917. On January 1, there were on record four strikes, affecting 103 workpeople. Seven new strikes were reported as commencing during the month as compared with four in December. Five of these new strikes terminated and two of the disputes carried forward from December were also settled, leaving the four following unterminated disputes, involving 222 workpeople, on record at the end of January: plumbers and steamfitters, St. John, N.B.; clothing workers at Toronto; machinists at Hamilton, and moulders at Galt, Ont.

Prices

The prices movement continued upward, but in wholesale prices it was not as steep as during the autumn months. In retail prices the average cost of a weekly family food budget in some 60 cities rose from $12.24 in December to $12.42 in January, as compared with $10.27 in January, 1917, and $7.73 for January, 1914. The increase for the month was due to slight advances in all the commodities except butter and sugar, in which there were small declines, and flour and tea, which were steady. The greatest increase appeared in eggs. In wood and coal there were advances, especially in wood. In wholesale prices, the departmental index number reached 257.1 for January, as compared with 253.5 for December and 208.1 for January, 1917, and 136.5 for January, 1914. The chief increases for the month were in livestock and meats and in raw furs; there were slight increases in nearly all the groups, but in hides a decline was recorded.

II.—THE INDUSTRIES AND TRADES

Manufacturing

Metals, machinery and conveyances.—The production for January at the Sydney Steel plant in tons was as follows: pig iron, 24,000; blooms, billets and slabs, 21,500; merchant bars, 1,000; wire rods, 500; wire and products of wire, 900, as compared with the following production in December: pig iron, 48,000; ingots, 32,000; blooms, billets and slabs, 24,000; wire rods, 5,000; wire and products of wire, 12,000. At the Sydney Mines steel plant the production of iron was 5,500 tons and of steel 7,725 tons, compared with 6,200 tons of iron and 8,000 tons of steel produced during the previous month. Heavy snowstorms and the interruption of railway traffic accounted for the reduction in outputs. Halifax reported the Dartmouth rolling mills and the Starr Manufacturing Company busy, and at boat and shipbuilding plants all help was steadily employed. At Westville, some departments of steel plants were steadily engaged, but other departments, owing to fuel shortage, were closed down for several days. At Amherst, the International Engineering Company was busy on marine engines,

but was quiet in the boiler department on account of difficulty in securing material. The Canada Car and Foundry Company was also delayed in certain work on account of lack of material, but was well employed in the rolling mills. St. John reported rolling mills and ship yards active, and, at Moncton, employment in the government railway shops and in the various foundries and machine shops was steady. Fredericton reported a demand for machinists and tool makers in foundries and machine shops. At Montreal, steel plants and shipbuilding yards were active, but at Quebec there was some falling of in iron shipbuilding and repairing owing to cold weather. Sherbrooke reported all branches of the metals group active, and, at St. Hyacinthe, workers employed in the iron industry were well engaged. Three Rivers reported iron and steel plants steadily employed. At Sorel over 100 men were laid off from machine shops and ship yards, but secured work at Port Arthur. Toronto reported the metal and machinery group active and labour in demand in steel plants. Hamilton reported activity in all branches of the metals, machinery and conveyances group, with a demand for labour in the manufacture of locomotives, stoves and furnaces and electrical apparatus. At Niagara Falls, polishers and grinders on automobile parts were in demand, and, at St. Catharines, the various metal plants were well employed. Ottawa reported activity in the iron industry, and one company was advertising for moulders and stove mounters; help was laid off in one large sheet metal plant, but a foundry increased its staff considerably and reported machinists scarce. At Brockville, manufacturers of engines and boilers were fairly busy, and stove and furnace foundries were active; the automobile and carriage plant, however, was somewhat quiet. Kingston reported the Canadian Locomotive Works and shipyards busy, and, at Belleville, all branches of the metals group and shipbuilding yards were active. Tool makers were in demand at Peterborough, and there was a demand for moulders at Galt. Brantford reported engine works and stove foundries busy, and in farm implement factories there was a shortage of labour. Machinists were in demand at Kitchener, and, at Guelph and Stratford, iron foundries and machine shops were well employed. Woodstock reported a constant demand for moulders, mounters and finishers in stove and furnace foundries. At London, rolling mills were busy, but short of material. St. Thomas also reported iron works experienced difficulty in getting material owing to railroad congestion. Chatham reported foundries and machine shops fairly active, and, at, Windsor, the metals group continued fairly well employed. At Orillia the stove foundry was handicapped by a shortage of moulders, but the agricultural implement plant was well employed. Winnipeg reported manufacturers of rolling mill products fairly active, and, at Brandon, agricultural implement plants were busy. At Medicine Hat, rolling mills and other metal working establishments were active. Calgary reported iron works fully employed. New Westminster reported shipyards fully employed and machine shops very busy. At Victoria, iron shipyards and foundries were well employed, and wooden shipbuilding yards were working at full capacity.

Food, tobacco and liquors.—Halifax reported the Acadia Sugar Refinery normally employed and baking and confectionery establishments active. Canning factories at Charlottetown were fairly busy, and, at St. John, the sugar refinery was operating steadily, but with a reduced staff. Moncton reported biscuit factories active. At Montreal, sugar refineries were receiving enough raw material to meet demands; other branches of the foods group were well employed; there was some demand for cigar and cigarette workers. At Toronto, flour and feed mills, abattoirs and packing houses were working steadily; manufacturers of oleo-margarine were installing additional equipment and increasing

their staffs; biscuit factories were busy, but candy factories were quieter; fruit canneries were fairly active. At Hamilton, the various branches of the foods group continued busy, and there was a demand for cigarmakers in large factories. Niagara Falls reported the shredded wheat plant running at half capacity owing to lack of shipping facilities. Peterborough reported cereal mills and meat packing houses very busy, and, at Kitchener, flour mills and abattoirs, biscuit and candy factories were well employed; breweries were quiet, but distilleries were busy. At London, flour and cereal mills were active; biscuit and candy factories were very busy, and cigarmakers were fully employed. Chatham reported flour mills working 18 hours a day, but compelled to close down occasionally owing to lack of fuel and cars; the Dominion Sugar Company laid off between 350 and 400 hands, most of them temporarily, until raw material could be secured. Windsor reported the Postum cereal works active and that cigar factories required woman help. At Winnipeg, confectioners reported business fairly good, though some help was released; vegetable canneries were fairly well employed. At Brandon, flour mills and breweries were active, but cigar factories were dull. Regina reported flour mills operating day and night, but the abattoir was quiet. Moose Jaw, Medicine Hat, Prince Albert and Lethbridge reported flour mills busy. At Calgary, flour mills were running day and night shifts, abattoirs and meat packing houses were fully employed, and cigar factories reported employment good. Edmonton reported employment at the Swift Canadian packing house good, and, at New Westminster, meat packing and vegetable evaporating factories were working full time. At Vancouver, flour, feed and cereal mills, abattoirs and meat packing houses were busy, and the sugar refinery was running steadily; fruit and vegetable canneries and evaporators were quiet; a number of women laid off from cigar factories were absorbed in other industries.

Textiles, cordage and carpets.—Amherst reported woollen mills running full time, and, at Truro, the mattress factory was busy, but short of help and material. St. John reported cotton factories steadily employed, and, at Moncton, woollen mills and underwear factories were busy. Fredericton reported a demand for help in the cotton mills. At Montreal, cotton and woollen mills and knitting mills were busy, and, at Quebec and Sherbrooke, cotton mills were very active. St. Hyacinthe reported the Penman Company working day and night, and, at Three Rivers, all employees of the Wabasso Cotton Company were steadily engaged. St. Johns reported the Belding-Paul Corticelli Company working at capacity. At Toronto, textile and carpet factories were active, and knitting mills were busy, though there was less overtime in knitting mills than during the previous month. At Hamilton, weavers were in demand at the cotton factories, and other branches of the textile group were busy. St. Catharines reported manufacturers of knitted goods active, but silk factories only fairly busy. Kingston reported cotton, woollen and hosiery mills active, with a demand for help, and, at Peterborough, all branches of the textiles group were well employed. Galt reported cotton and woollen mills very active, and, at Peterborough, manufacturers of underwear reported a shortage of woman help. There was also a demand for help at the Brantford Cordage Company. Kitchener reported hosiery and felt factories and the twine factory active. At Guelph, cotton spinning mills and knitting factories were very active, and linen mills reported a shortage of woman labour. Woollen and knitting factories at Stratford were busy. Hosiery factories at London took on extra help and a full staff was employed at the Monarch Knitting Company, St. Thomas. Woollen knitting mills at Chatham were working overtime. Winnipeg reported bag manufacturers well employed, and that knitting companies were adding to staffs. Van-

couver reported tent, awning and sail manufacturers working to capacity.

Clothing and laundering. — Halifax reported all employees of Clayton and Sons, ready-made clothing manufacturers, at work, temporary repairs having been made to the factory. Hat and cap factories at Truro and Moncton were busy, and ready-made clothing factories at St. John were steadily employed. Fredericton reported employment in garment making well maintained. At Montreal, there was a demand for workers in clothing factories, and, at Sherbrooke, clothing factories were busy. St. Hyacinthe reported ready-made clothing factories and shirt factories active, but clothing manufacturers at Hull reported seasonal quietness. The Cluett-Peabody Company at St. Johns was working at capacity. Toronto reported garment workers not as active as in December owing to seasonal quietness, and suspender factories and fur factories were dull. Cap and glove firms were busy, and manufacturers of women's whitewear were taking on experienced operators and finishers. Hamilton reported a demand for labour in dyeing and cleaning establishments. At Ottawa, Grant, Holden and Graham laid off 150 workers owing to seasonal slackness and difficulty in obtaining material. Brockville reported hat and cap factories active and glove factories fairly busy. Galt also reported hat and glove factories active, and, at Kitchener, woman help was in demand in shirt and collar factories. Windsor reported the shirt factory busy, but that some clothing factories laid off their working forces on account of coal shortage and to take stock. At Winnipeg, clothing establishments and laundries were fairly active, shirt factories reported some falling off in employment, but glove makers and furriers were busy. At Edmonton, the Great Western Garment Company added 20 employees to its pay-roll, and, at Victoria, shirt and overall factories were steadily employed. At Vancouver, overall and shirt making establishments were not running full time, and dressmakers and milliners were somewhat slack.

Pulp, paper and fibre.—Halifax reported manufacturers of felt and tarred paper exceptionally busy, owing to the heavy local demand. St. John reported the sulphite pulp mill active, and, at Newcastle, pulp and paper mills were working steadily, with men in demand. At Sherbrooke and Three Rivers, pulp and paper mills were active and the beaver board factory at Hull continued busy on Halifax orders. St. Catharines reported pulp and paper mills well employed, but, at Ottawa, the J. R. Booth Company reported conditions in the pulp and paper industry complicated by coal shortage and freight congestion. Vancouver reported coast pulp and paper mills very busy.

Printing, publishing and paper. — Halifax reported newspaer and job printers well employed, job printers working overtime. Newspaper and job printing offices at St. John, Fredericton and Moncton were busy. Montreal reported employment in newspaper offices good, but lighter in job plants. Quebec and Sherbrooke reported the publishing group busy. At Toronto, printers, bookbinders and allied trades were active, and, at Hamilton, all branches of the printing and publishing group were busy. Woodstock reported a demand for job hands and other Ontario cities reported employment in the printing group was well maintained. Winnipeg reported newspaper and job printers steadily employed and experienced help in demand in binderies. Paper box factories reported business normal. At Brandon, newspaper and job printing offices were active, and, at Regina, were working full time; help was in demand in binderies. Moose Jaw reported that newspaper and job printing offices showed an improvement over the same month in 1917, and, at Medicine Hat, the printing group continued fairly busy. Calgary and Edmonton reported newspaper printing active, but, at Edmonton, job printing was only fair. At Vancouver, newspaper printing was fairly busy, but job work was somewhat quiet. All branches of the printing industry at Victoria were busy.

Woodworking and furniture. — Halifax reported employees of woodworking factories working day and night, and, at Westville, woodworking factories reported a fair month. Amherst reported sash, door and planing mills exceptionally busy on Halifax orders, and the Amherst Piano Company well employed. St. John reported sash, door and planing mills active, and box factories and brush and broom factories steadily engaged. At Moncton, sash, door and planing mills were well employed, but cooperage shops were running on short time. Newcastle reported sash and door factories quieter, but, at Fredericton, sash, door and planing mills were busier than usual at this season. Sherbrooke reported sash, door and planing mills fairly busy and chair factories active. At St. Hyacinthe, sash and door factories, planing mills, wooden box factories and the chair factory were busy and both organ factories were working full time. Three Rivers reported sash, door and planing mills very busy, but the chair factory was partly destroyed by fire. Toronto reported all branches of the woodworking trades, including piano makers, well employed, and, at Hamilton, the woodworking and furniture group was busy. At Ottawa, planing mills and sash and door factories were busy, and one company added to its working forces; the Parker broom factory was adversely affected by freight embargoes, but at the end of the month was normally engaged. Kingston reported sash, door and planing mills active, and broom factories and piano factories fairly busy. Woodworking factories at Peterborough reported a demand for men. At Kitchener, furniture and chair factories were working full time and interior hardwood factories were very busy; the piano and organ factory was running full time, but a woodenware and toy factory was obliged to close down for want of coal. Guelph reported sash, door and planing mills quiet, but piano makers steadily employed. Furniture and chair factories at Stratford were working steadily, and, at Woodstock, there was a demand for skilled hands in furniture, piano and organ factories. London reported planing mills, wooden box factories and the Sherlock-Manning Piano Company busy. Furniture factories at Owen Sound continued normally employed. Planing mills and sash and door factories throughout the Prairie Provinces were reported quiet at most points. At New Westminster, the sash and door factory was normally employed, and box factories were working full time. Vancouver reported sash, door and planing mills and wooden box factories busy, and, at Nanaimo, sash and door factories were working steadily.

Leather, boots, shoes, rubber. — St. John reported the boot and shoe factory steadily employed, and, at Fredericton, shoe factories and larrigan factories were fairly busy and employment in tanneries was good. At Montreal, slackness continued in shoe factories, with a consequent small demand for leather from the tanneries. Quebec reported that boot and shoe factories and tanneries had a poor month, but, at St. Hyacinthe, the leather industry showed considerable improvement over the preceding month, shoe factories having received large orders that were expected to keep employees busy for some time. At Three Rivers, shoe factories remained quiet. At Sorel, the tannery and shoe factory continued well employed. Toronto reported tanneries active, boot and shoe factories busier during the last half of the month, and rubber footwear firms busy. Hamilton reported boot and shoe factories fairly busy, and trunk and harness factories active. St. Catharines reported rubber footwear factories well employed, but shoe factories at Galt were quiet. Tanneries at Kitchener were well employed, with a demand for men; some boot and shoe factories were fairly busy and others were active. Trunk and bag factories reported a shortage of trunk makers and rubber footwear factories were very busy. London reported tanneries and shoe factories well employed, but, at St. Thomas, working forces in

one factory were below normal. Brandon reported tanneries fairly busy, and manufactures of trunks and harness very active. At Calgary, trunk, bag and harness makers were active, and, at New Westminster, the tannery was working at full capacity. Boot and shoe workers at Vancouver were busy.

Clay, glass and stone.—Hamilton reported all branches of the clay, glass and stone group active, with a demand for labour in potteries and porcelain works. Belleville reported the pottery well employed. At Kitchener, marble and monument works were steadily engaged, but manufacturers of brick, tile and sewer pipe were not very busy. Stone cutting yards and the Hobbs plate glass company at London were active. Medicine Hat reported brick and tile works somewhat quiet, but the stoneware industry was fairly active.

Paints, oils, chemicals, explosives.—Halifax reported that repairs had been made to the Brandram-Henderson paint works and that all available help was employed. Three Rivers reported paint factories fairly active, though handicapped by lack of cars and poor quality of coal. Toronto reported manufacturers of paints, oils and chemicals had a good month, and, at Hamilton, soap factories and acid and drug factories were busy. Brantford reported varnish and starch factories well employed. Windsor reported manufacturers of soaps, extracts and drugs had a good month. At Regina the oil works and soap factory were busy. Victoria reported the paint and soap factory active and the oil refinery running steadily.

Transportation

Earnings of the Canadian Pacific Railway during December, 1917, showed a decrease of $1,110,149, compared with the same month in 1916. Halifax reported railway traffic active, and the street railway company was employing women as conductors owing to difficulty in securing men. At Sydney, railway crews and men in repair shops were fairly active, but traffic was hindered by snow storms. St. John reported railways busy, though a number of trains were taken off. Moncton reported freight and passenger traffic on the Canadian Government railways steady and storms and snowfalls necessitated much extra work. Newcastle reported similar conditions. At Montreal, railway freight traffic was heavy; a number of passenger trains were taken off to assist in the movement of freight. Quebec also reported a reduction in the number of passenger trains and an expansion of freight service. Toronto reported railway workers busy, though traffic was much impeded by snowfalls and railway repair shops had much work on hand; street car employees had plenty of employment and men were in demand. Hamilton reported railway repair shops busy and traffic active. Electric lines at Niagara Falls were advertising for trainmen and car repairers were in demand. Brantford reported that steam railways had difficulty in operating on account of weather conditions and street and electric railways had to curtail their services owing to shortage of hydro power. Kitchener reported traffic on steam railways and street and radial railways interrupted for several days through heavy snowfalls. London reported railway transportation on some lines interrupted for several days and clearing the tracks required several thousand men; the cancellation of a number of trains in the district reduced the number of train crews employed, and a shortage of hydro power caused some temporary unemployment on the street railway. At St. Thomas, railway traffic men were busy, and employees of the Michigan Central and Pere Marquette shops were well employed. Chatham reported local freight traffic active, but the radial electric line was compelled to abandon the southern portion of its route on account of snowfalls, and later to give up all traffic owing to lack of coal. Windsor reported steam and street railways blocked for several days by

stormy weather. Winnipeg reported a shortage of men for street railway work during the early part of the month. At Brandon, all branches of the transportation group were busy, and, at Regina, steam railways were active; some crews were taken off for freight service. Calgary reported railways active, and, at New Westminster, employment on street and electric railways was good except for track maintenance employees.

Halifax reported 'longshoremen very active and shipping companies were finding difficulty in obtaining men. At St. John, 'longshoremen had all the work they could handle. Statistics of the Shipping Federation at Montreal showed that there was an average of 1,299 men at work every day of the 1917 season, twice the number employed in 1916. Vancouver and Victoria reported 'longshore work fairly busy, though coast navigation was seasonally quiet.

Mining

Sherbrooke reported chrome iron, copper and asbestos mines busy and mills and concentrators fairly active. At Cobalt, bullion shipments during January were exceptionally heavy, a total of 830,964.78 fine ounces being sent out as compared with 426,710.69 fine ounces in December, and 701,536.10 ounces in November. Ore shipments for the month aggregated 39 cars, containing 2,909,995 pounds, compared with 53 cars, containing 4,071,284 pounds, in November. The gold mines of Porcupine and Kirkland Lake were steadily employed, with the exception of the Dome Mine, the mine and mill of the Dome Company being closed down indefinitely. Fernie reported the various metal mining camps in the district were resuming activity following the re-opening of the Trail smelter. At Trail, two copper and two lead furnaces were operating. The Rossland mines were working steadily, but there was a shortage of men. It was expected that ore would soon be shipped from the Slocan and Kootenay Lake district. Nanaimo reported quartz mining quiet.

The coal output of the Dominion Coal Company was 275,000 tons, an increase of almost 30,000 tons over the previous month. The output at Sydney Mines was 48,900 tons, as compared with 42,000 tons in December. Westville reported that, owing to fire in one colliery and an explosion in another, in which 85 lives were lost, the production of the Acadia Coal Company had been greatly reduced. Amherst reported all coal mines in the district working steadily, and, at Minto, N.B., coal mines were being worked to capacity. Lethbridge reported coal mines very busy, but not working to capacity, owing to a shortage of men. Calgary reported the coal mines in the district working at full capacity, though outputs were delayed through lack of cars. At Fernie, coal mines were being worked to the capacity of the labour available, and coke ovens were operating steadily. Nanaimo reported coal mines active, and the Granby Smelting Company was making preparations to open up some new mines in the district from which to obtain coke for its smelter. Victoria reported that the output of coal at the Vancouver Island mines for 1917 was 1,698,235 tons, the largest in the history of the industry.

Building and Construction

Activity in building and construction in the Maritime Provinces was practically confined to the city of Halifax, where reconstruction operations continued to afford building tradesmen a large volume of employment. Cities in Quebec reported building very quiet, except Three Rivers and Sherbrooke, where a number of men were employed in the extension of industrial plants. At Montreal, building was quiet, but many building tradesmen of the city were employed at Halifax. Nearly all points in Ontario reported building seasonally dull, with a small amount of work on repairs and extensions to industrial plants. Hamilton and Galt reported some activity. The Prairie Provinces and British Colum-

bia reported building practically at a standstill. The value of building permits issued in 35 cities increased from $874,689 in December to $1,562,637 in January, or 78.68 per cent. As compared with January, 1917, there was an increase of $160,705, or 11.46 per cent.

Lumbering

At St. John, only one sawmill was operating, and Moncton reported lumbering operations less extensive than in previous winters owing to scarcity of help and heavy snowfalls. Newcastle reported lumbering operations interrupted by heavy snowfalls. Quebec and Sherbrooke reported lumbering active. At Peterborough, lumbering was busy, and the demand for woodsmen was heavy. Sault Ste. Marie reported lumbermen well supplied with labour. Calgary reported a continued demand for men in lumber camps and sawmills. At New Westminster, sawmills were busy, and shingle mills were working to full capacity. In the Nanaimo district, logging camps lost some time owing to wet weather; sawmills worked steadily, and shingle mills were fairly active, and, at Vancouver, saw and shingle mills were working to capacity. Victoria logging camps were working to capacity.

Fishing

Fishing on the Atlantic coast was interrupted by rough weather. Newcastle reported small catches of smelt, but good catches of tom-cods and flounders. Prince Albert reported little lake fishing, owing to severe weather. At New Westminster, practically no fishing was being done, but Vancouver reported halibut fishing fairly busy.

III.—LABOUR AND INDUSTRY IN THE PROVINCES

Nova Scotia

Halifax reported that employment in the Dartmouth rolling mills and the plant of the Starr Manufacturing Company was brisk, and in boat and shipbuilding plants all available help was engaged. Reconstruction of the workshops in connection with the Halifax graving dock was proceeding day and night. Employees of stove and furnace plants were very active, installing new stoves and ranges in the temporary houses built for those made homeless by the explosion, and upon repairs to furnaces and water pipes. Electrical workers were also working overtime. The plant of the Acadia Sugar Refinery continued normally engaged, and baking and confectionery establishments were active. All employees of Clayton and Sons, ready-made clothing manufacturers, were at work, temporary repairs having been made to the factory. Manufacturers of felt and tarred paper were exceptionally busy owing to the heavy local demand. Newspaper and job printers were well employed, job printers working overtime. Employees of woodworking factories were working day and night. Repairs were made to the Brandram-Henderson paint and varnish works and all available help was employed. The street railway company was employing women as conductors owing to difficulty in securing men. 'Longshoremen were very active.

Sydney reported reduced outputs in the steel industry owing to heavy snow storms, but there was an increase in coal outputs. There was no change from conditions of the previous month in shipyards and in stove and furnace foundries. Railway crews and men in repair shops were active, though traffic was greatly hindered by snow storms.

Westville reported that some departments of steel working plants were steadily engaged, but, owing to fuel shortage, other departments were closed down for several days. Flour mills worked at capacity, but feed and grinding mills reported a scarcity of material. Wood-

working plants reported a fair month's business. A scarcity of cars and fuel caused difficulty in the operation of steam railways. Freight traffic was very heavy, and some congestion prevailed. Owing to fire in one colliery and an explosion in another, in which 86 lives were lost, the output of the Acadia Coal Company was reduced 1,100 tons per day.

Amherst reported the International Engineering Company busy on marine engines, but quiet in the boiler department on account of difficulty in securing material. The Canada Car and Foundry Company was also delayed in certain work owing to lack of material, but was well employed in the rolling mills. Woollen mills were running full time, and sash, door and planing factories were exceptionally busy on Halifax orders; the Amherst Piano Company was well employed. All the coal mines in the district were working steadily, the only difficulty being a lack of cars, which was being overcome.

Truro reported woodworking factories employed full time on building material for Halifax. The cap factory was busy, but the mattress factory was somewhat short of help and material.

Prince Edward Island

Charlottetown reported machine shops, canning factories and woodworking plants fairly busy.

New Brunswick

St. John reported rolling mills and shipyards active, flour and feed mills busy, and the sugar refinery running steadily, but with a reduced staff. Cotton factories and ready-made clothing factories were steadily employed. The sulphite pulp mill continued active, and newspaper and job printing offices were well employed. Sash, door and planing mills had a good month, and box factories and brush and broom factories were steadily engaged. The boot and shoe factory reported business good. 'Longshoremen had all the work they could handle. Sawmills were closed down for the winter.

Moncton reported steady conditions in the Government railway shops and in foundries and machine shops. Flour and feed mills were quiet, but biscuit factories were active. Woollen mills and underwear factories were steadily employed. The Maritime Hat and Cap factory was busy, and newspaper and job printing offices were active. Sash, door and planing mills were well employed for the season, but cooperage shops were running on short time. Freight and passenger traffic on the Canadian Government railways continued steady and snow storms increased the volume of employment. Lumbering operations were slacker than in previous winters owing to scarcity of help and exceptional heavy snowfalls.

Newcastle reported pulp and paper mills working steadily and men in demand. Sash and door factories were quieter. Railway workers were very busy and many extra men were required in clearing snow from tracks. Lumbering operations were hampered by heavy snow. Smelt fishing was in progress, but catches were small. Good catches of tom-cods and flounders were reported.

Fredericton reported a demand for machinists and tool makers in foundries and machine shops. There was a demand for help at the cotton mill and employment in garment making was well maintained. Printing establishments were brisk, and sash, door and planing mills were busier than usual for the season. Employment in tanneries was good, and shoe factories and larrigan factories were fairly busy. Railway employees continued busy, and the coal mines at Minto were being worked to capacity.

Quebec

Montreal reported steel plants and shipbuilding companies active. Sugar refineries were receiving enough raw material to meet demands, and other branches of the foods group were well employed. Cigar and cigarette workers were in demand. Cotton mills, knitting

mills and woollen mills were busy. Newspaper offices were well employed, but in job plants employment was somewhat slack. In boots and shoes, quietness continued, and the demand for leather from the tanneries was small. Railway freight traffic was heavy, a number of passenger trains being taken off to assist in the better movement of freight.

At Quebec, employees in iron shipbuilding and repairing plants were laid off for a week owing to cold weather. The tobacco industry was quiet, but cotton mills and newspaper and job printing establishments were busy. Boot and shoe factories and tanneries had a dull month. Railways reduced the number of passenger trains, but increased the freight service. Lumbering continued active.

Sherbrooke reported all branches of the metals group active, and cotton and woollen factories and ready-made clothing factories busy. Pulp and paper mills and all branches of the printing group were well employed. Sash, door and planing mills were fairly busy and chair factories were active. Chrome iron, copper and asbestos miners were well employed, and mills and concentrators were fairly active.

St. Hyacinthe reported iron workers well employed. Cigar factories worked full time. The Penman Manufacturing Company was working day and night, and the clothing establishments had an active month. The paper box factory was fairly active. Sash and door factories, planing mills, wooden box factories and the chair factory were busy, and both organ factories were working full time. The leather industry showed considerable improvement over the preceding month, the boot and shoe factories having received large orders which will keep employees busy for some time. Railroads were very busy.

Three Rivers reported all iron and steel plants busy and employees of the Wabasso Cotton Company steadily employed. Pulp and paper mills were active, and sash, door and planing mills were very busy; the chair factory was partly destroyed by fire. Leather and boot and shoe factories remained quiet. Paint factories were fairly active, though handicapped by lack of cars and poor quality of coal.

At Hull, clothing manufacturers reported seasonal quietness, and E. B. Eddy's paper mills reported a fair demand for newsprint and an improvement in the supply of raw materials. Large orders for material needed in the rebuilding of Halifax increased employment at the Beaver Board Company.

At St. John's and Iberville a number of men were idle for a few days, owing to coal shortage. Foundries found it difficult to secure iron and steel. The Cluett-Peabody Company and the Belding Paul Corticelli Company worked at capacity. Unskilled labour was fairly well employed removing snow from the streets and in ice cutting.

Sorel reported that over 100 men were laid off from shops and shipyards, but most of these hands secured work at shipyards in Port Arthur. Foundries, the tannery and the shoe factory continued well employed.

Ontario

Toronto reported the metal and machinery industries active and labour was in demand in structural steel plants. Shipbuilders had extensive contracts on hand and automobile, bicycle and motor engine plants were active. Agricultural implement and sheet metal works were busy. Flour and feed mills, abattoirs and packing houses were working steadily. There was a heavy demand for oleo-margarine, and manufacturers were installing additional equipment and increasing staffs. Biscuit factories were busy, but candy factories were quieter. Fruit canneries were fairly active, and cigarmakers were fairly busy, but breweries had a quiet month. Textile and carpet factories were active, knitting mills were busy, but less night work was done than during the previous month. Garment workers were not as active as in December, trade being quieter be-

tween seasons. Suspender factories and fur factories were dull. Cap and glove firms were busy and manufacturers of women's whitewear and dresses were taking on experienced operators and finishers. Printers, bookbinders and allied trades were busy, and all branches of the woodworking trades, including piano makers, were well employed. Tanneries were active, and boot and shoe factories were busier in the last half of the month. Manufacturers of paints, oils and chemicals had a good month. Railway workers were busy; traffic was much impeded by heavy snowstorms and railway repair shops had a great deal of work on hand. Street car employees had plenty of employment and men were in demand.

Hamilton reported activity in all branches of the metals, machinery and conveyance group, with a demand for labour in the manufacture of locomotives, stoves and furnaces and electrical apparatus. The various branches of the foods group continued busy, and there was a demand for cigarmakers in the larger factories. Weavers were in demand at cotton factories, and other branches of the textile group were busy. Ready-made clothing factories, shirt, collar and button factories and women's whitewear factories were active, and there was a demand for labour in steam laundries and dyeing and cleaning establishments. The printing and publishing group was busy, and in woodwork and furniture nearly all branches were active. Manufacturers of boots and shoes were fairly busy, and trunk and harness factories were well employed. There was a demand for labour in potteries and porcelain works, and soap factories and acid and drug factories had a good month. Snow storms gave employment to a large number of men on the railroads.

Niagara Falls reported metal working plants busy, and polishers and grinders on automobile parts in demand. A new factory for the manufacture of electric cranes commenced operations. The Shredded Wheat plant was running at only half capacity owing to lack of shipping facilities. Planing mills were quieter, but the shoe parts factory was busy. Steam railways were active and electric lines were advertising for trainmen; car repairers also were in demand. Work on the refining plant of the International Nickel Company at Port Colborne was nearing completion.

St. Catharines reported the metals and machinery group active, flour mills busy, and breweries quiet. In textiles, manufacturers of knitted goods were active, but silk manufacturing was only fair. Pulp and paper mills were well employed and newspaper and job printing establishments continued busy.

Ottawa reported activity in the iron trades and one firm was advertising for moulders and stove mounters. Help was laid off in one large sheet metal plant. The Victoria Foundry Company increased its staff considerably, but reported machinists scarce. Grant, Holden and Graham, clothing manufacturers, laid off 150 workers on account of the usual seasonal slackness and difficulty in securing materials. The J. R. Booth Company reported conditions in the pulp and paper industry complicated by a threatened coal shortage, freight congestion and railway embargoes. Planing mills and sash and door factories were busy, and the W. C. Edwards Company added to its working forces. The Parker broom factory was adversely affected during the month by freight embargoes, but at the end of the month was normally engaged. The Martin-Orme Piano Company abandoned its experiment of placing women in men's places. The Hugh Carson harness and leather goods factory took on additional skilled help.

Brockville reported engine and boiler works fairly busy, but the Briscoe Motor Car Company and the Canada Carriage Company somewhat quiet. Stove and furnace foundries were busy. Hat and cap factories were brisk and glove factories were fairly busy.

Kingston reported the Canadian Locomotive works and the shipyards busy. All branches of the foods group were

active, and at cotton, woollen and hosiery mills there was a demand for help. Sash, door and planing mills were active and broom factories and piano factories were fairly busy.

Belleville reported all branches of metal manufacturing active and boat and shipbuilding yards busy on repairs. Flour and feed mills were active and the cigar factory had a good month. The shirt factory and steam laundries were well employed and printing was brisk. Sash, door and planing mills and furniture and chair factories were only fairly busy, but the pottery was active.

Peterborough reported metal trades active and toolmakers in demand. Flour, feed and cereal mills and meat packing houses were very busy. All branches of the textiles group were well employed, and woodworking factories reported a demand for men. Lumbering was active, with a heavy demand for woodsmen.

Galt reported activity in the metals group, and moulders in demand. Cotton and woollen mills were very active, but shoe factories were quiet.

Brantford reported manufacturers of engines, tractors and stoves very busy. Farm implement plants were active and reported a shortage of labour and cars. Flour mills and other branches of the foods group were well employed. Woollen mills were busy, and manufacturers of underwear were short of woman help. The Brantford Cordage Company reported a demand for unskilled labour. Newspaper and job printing establishments and paper box companies were busy, and sash, door and planing mills were well employed. The Brandon Shoe Company was active, and varnish and starch factories had a good month. Steam railways had difficulty in operating on account of weather conditions, and the street and electric railways had to curtail their services owing to shortage of hydro power.

Kitchener reported manufacturers of engines and threshers steadily employed and the clock works and bicycle factory busy. Machinists were well employed, and a number of jobs were open. Flour mills and abattoirs and biscuit and candy factories were well employed. Employees of one cigar factory were laid off owing to shortage of stock, but others were busy. Breweries were quiet, but distilleries were active, with a demand for help in bottling departments. Hosiery and felt factories were busy, the twine factory was active, and there was a demand for woman help in shirt and collar factories. Help was also required in button and glove factories. Furniture and chair factories were working full time and interior hardwood factories were very busy; the piano and organ factory was running full time, and a woodenware and toy factory was obliged to close down for want of coal. Tanneries were well employed with a demand for more men; some boot and shoe factories were fairly busy and others were active; trunk and bag factories reported a shortage of trunk makers. Rubber footwear factories were very busy. Marble and monument works were steadily employed, but manufacturers of brick, tile and sewer pipe were not very busy.

Guelph reported iron foundries and machine shops active. Flour and feed mills were running to capacity, and cotton spinning mills and knitting factories were very active; linen mills reported a shortage of women weavers, and steam laundries were short of help. Sash, door and planing mills were quiet, but piano makers had a steady month.

Stratford reported iron working industries steadily employed and flour mills, meat packing houses and bakeries active. Woollen and knitting factories were very busy, some factories running night shifts. Furniture and chair factories were working steadily.

Woodstock reported the supply of labour in wagon factories equal to the demand, but that in stove and furnace foundries there was a constant demand for moulders, mounters and finishers. In printing establishments there was a demand for job hands, and furniture and piano and organ factories reported a demand for skilled men.

London reported rolling mills busy but short of material. Flour and cereal mills were active and biscuit and candy factories were very busy. Cigarmakers were fully employed and extra help was taken on in hosiery factories. All branches of the printing, publishing and paper goods group were busy, and planing mills, wooden box factories and the Sherlock-Manning Piano and Organ Company were busy. Tanneries and shoe factories were well employed, and stone cutting yards and the Hobbs Plate Glass Company were active. Railway transportation was seriously interrupted for several days by heavy snow storms and work in clearing the lines required several thousand men. Several trains in the district were cancelled by order of the railway commission and the number of train crews was reduced. Owing to shortage of hydro power the street railway company took off eight cars, which left 32 men out of employment temporarily.

St. Thomas reported the Canadian Iron Corporation very busy, though some difficulty was experienced in getting coke and material owing to railroad congestion. The Dominion Brake Shoe Company reported business normal, but at the Norsworthy Foundry Company business was quieter. The Erie Iron Works reported business brisk. The St. Thomas Meat Packing Company reported employment satisfactory and a full staff was employed at the Monarch Knitting Company. Employment in newspaper and job printing offices was well maintained. The Just Wright Shoe Company reported working forces below normal. Railway traffic men were busy and employees of the Michigan Central and Pere Marquette shops were well employed.

Chatham reported all foundries and machine shops fairly active. The automobile factory laid off a number of hands for a short time owing to a shortage of material. Flour mills were working 18 hours a day, but were compelled to close down occasionally owing to lack of fuel and cars. The Dominion Sugar Company finished work on the 1917 crop of beets and laid off between 350 and 400 hands, most of them, however, only temporarily. Woollen mills were working overtime, box factories were active, and cement and tile works were fully employed. The radial electric line was compelled to abandon the southern portion of its route on account of snowfalls and later to give up all traffic owing to lack of coal.

Windsor reported steel works fairly busy and men were in demand at the Trussed Concrete and Steel Company. Automobile factories were fairly busy, but had no demand for men. Machine shops were busy. The flour mill had ceased operations, but the Postum cereal works were active. Candy manufacturers were busy, but creameries and dairies were quieter owing to difficulty in making deliveries on account of rough weather. Cigar manufacturers required woman help, but breweries and distilleries were very quiet. The shirt factory was busy, but some clothing factories laid off their working forces for several weeks on account of stock-taking and coal shortage. Steam laundries and dyeing and cleaning establishments were very busy. Newspaper and job printing offices were active, and planing mills were working full time. Manufacturers of paints and varnish were quiet and had difficulty in securing materials. Manufacturers of soaps, extracts and drugs were well employed. The hydro-electric system cut off half the street lighting and the gas works were endeavouring to shut off fuel from the large manufacturers in order to furnish a sufficient supply to householders. Steam and street railways were blocked for several days by stormy weather. Work was commenced on the docks of the steel corporation's plant at Ojibway and a large force of men was employed.

Owen Sound reported normal conditions in the metal industries, skilled mechanics scarce, but unskilled labour fairly plentiful. Furniture factories continued normally employed.

Orillia reported the stove works

handicapped by a lack of moulders, but the agricultural implement plant working almost to capacity. The tannery had a good month. The molybdenum smelter was closed down but was expected to resume operations in the near future.

Cobalt reported silver mines active and an increase in bullion shipments. Gold mines at Porcupine and Kirkland Lake were progressing steadily, with the exception of the Dome and Porcupine Crown, the mine and mill at the Dome mine having been closed down indefinitely.

Shipyards at Port Arthur and the car works and foundry at Fort William were busy, and in machine shops there was a demand for men. The pulp mill was expected to commence operations in February, and farmers were active cutting and supplying pulpwood. Considerable prospecting for iron, copper and molybdenite was being carried on. The elevators at Port Arthur and Fort William were employing fewer men, but men laid off were readily absorbed in other industries.

Manitoba

Winnipeg reported manufacturers of rolling mill products fairly well employed; confectioneries fairly busy, though some help was released and vegetable canneries fairly well employed. Bag manufacturers were well employed and knitting companies reported an increase in the number of working forces. Clothing establishments and laundries were fairly active. Shirt factories reported some falling off in employment, but glove makers and furriers were busy. Newspaper and job printers were well employed, and in binderies there was a demand for experienced help; paper box factories reported business normal.

Brandon reported manufacturers of agricultural implements busy, flour mills and breweries active, but cigar factories dull. Newspaper and job printing offices were active. Tanneries were fairly busy, and manufacturers of trunks and harness were active.

Saskatchewan

Regina reported flour mills operating 24 hours a day, but the abattoir was quiet, supplies being limited. Newspaper and job printing offices were working full time and help was in demand in binderies. The oil works and soap factory were busy. Steam railways were active, though some crews were taken off from freight service.

Moose Jaw reported flour mills busy. Newspaper and job printing houses reported an improvement in business over the same month in 1917. Sash and door factories were idle.

Prince Albert reported flour mills running full time, the abattoir quiet, and sash, door and planing mills dull. Fair railway shipments were reported, but traffic was interrupted by continued cold weather. Lumbering camps were very busy, though the cut was not expected to be quite as large as that of last season. Lake fishing was hampered by unusually severe weather.

Alberta

Medicine Hat reported rolling mills and other metal working establishments fairly active and flour mills running day and night. The printing group continued fairly busy. Planing mills and brick and tile works were somewhat quiet, though the stoneware industry was fairly active.

Lethbridge reported flour mills busy and sash and planing mills active. Coal mines were very busy, but not working to capacity owing to a shortage of men.

Calgary reported iron works fully employed. At the Ogden Locomotive shop, although there was plenty of work ahead, the hours were reduced from nine to eight a day. Flour mills were running day and night shifts; abattoirs and meat packing houses were fully employed and cigar factories reported business good. Breweries and distilleries and soft drink establishments were also well employed. In newspaper and job printing offices employment was good. Trunk, bag and harness makers were active. Railways

were active with freight and coal shipments. The coal mines of the district were working at full capacity, although outputs were delayed by lack of cars. The demand for men in lumber camps and sawmills continued.

Edmonton reported the Edmonton Iron and Machinery Company quiet. The Swift Canadian House Packing Company reported trade good and the Great Western Garment Company added 20 employees to its pay-roll. Newspaper offices continued active, but job printing was only fair.

British Columbia

Fernie reported sash and door factories quiet, but planing mills operating to capacity. Railway employment, owing to the falling off of import shipments usual during January, showed a decline. Reports received from the various mineral mining camps indicated a fairly satisfactory resumption of activity following the re-opening of the Consolidated Mining and Smelting Company's smelter at Trail. Coal mines in the district were being worked at capacity of the labour available and coke ovens were operating steadily.

Normal conditions had not yet been resumed at the Trail smelter, about 1,100 men being engaged, most of the others formerly employed having left for the coast cities and Vancouver Island. The smelter had two copper and two lead furnaces running and all departments of the smelting and refining branch were operating. The Rossland mines were working steadily, but there was a shortage of men, some of the old miners having left during the Trail strike. The completion of the Trail sewerage system caused about 40 men to be laid off, but these men were expected to be absorbed in lumbering.

Vancouver reported activity on stationary and portable engines and in boat and shipbuilding yards. Flour, feed and cereal mills were busy, and the sugar refinery and meat packing houses were running steadily. Fruit and vegetable canneries and evaporators were quiet. A number of women employees of cigar factories were laid off, but tent, awning and sail manufacturers were working to capacity, and the ready-made clothing trades reported the season opening briskly. Overall and shirtmaking establishments were not running full time. Pulp and paper mills on the coast were very busy, and newspaper printing was fairly active; job work was quiet. Sash, door and planing mills and wooden box factories were busy, and boot and shoe workers had a good month. 'Longshore work was fairly busy, and saw and shingle mills were active. There was some halibut fishing, but, owing to rough weather, catches were only fair.

New Westminster reported shipyards fully employed and machine shops very busy. The meat packing plant and vegetable evaporating factory were working full time, but cigar factories were nearly all idle. The sash and door factory was normally employed, and box factories were busy. The tannery was working to full capacity. Employment on street and electric railways was good except in track repair work, where men were being laid off. Railway repair shops were working steadily. Sawmills were very busy; one of the larger mills started to work two shifts in order to keep up with orders for ship timbers. Nearly all shingle mills were working to full capacity.

Nanaimo reported the local foundry working steadily, but not to capacity. Cigarmakers were quiet and breweries in the city and district were practically closed down. Sash and door factories were working steadily. Quartz mining was quiet, but coal mines were active. The Granby Smelting Company was making preparations to open up some new coal mines in the district from which to obtain coke for its smelters. Much time was lost in logging camps owing to wet weather. Sawmills worked steadily, but shingle mills were quieter.

Victoria reported iron shipyards and foundries steadily employed manufacturing boilers, winches, etc., for wooden ships. Marine repair work was also

brisk. Wooden shipbuilding yards were working at full capacity, about 1,400 men being employed. The local stove foundry was busy; shirt and overall factories were steadily employed, and all branches of the printing industry were busy. The wooden box factory and the paint and soap factory were active. Coast navigation was seasonally quiet, but 'longshore work was fairly good. Logging camps were working to capacity. The Victoria Whaling Company was building a cannery on the west coast of Vancouver Island for the canning of whale meat, the first of its kind on the Pacific Coast. The output of coal at the Vancouver Island mines for 1917 was 1,698,235 tons, the largest in the history of the industry.

PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT DURING JANUARY, 1918

DURING the month of January two applications were received in the Department for the establishment of Boards of Conciliation and Investigation, one from machinists, boilermakers and blacksmiths employed on the lines of the Grand Trunk Railway system in Canada, and the other from conductors, trainmen and yardmen employed on the eastern lines of the Canadian Northern Railway and the Halifax and South Western Railway. In the former case a Board was established, and in the latter the dispute was referred by joint request of the parties concerned to the Board established in connection with a dispute on the western lines of the Canadian Northern Railway and affecting the same class of workers.

Reports appear in this issue of Boards which dealt with the following disputes: (1) Michigan Central Railroad Company and passenger men, baggagemen, flagmen and brakemen; (2) Port Arthur Shipbuilding Company, Limited, and boilermakers, etc.; (3) Corporation of Edmonton and firemen; and (4) Canadian Northern Railway Company and maintenance of way employees on western lines.

Settlements were reported in connection with two applications which the Department had dealt with during previous months.

Applications Received

On January 8, an application for a Board was received from certain employees of the Grand Trunk Railway System in Canada, being machinists, boilermakers and blacksmiths, members of the International Association of Machinists, the International Brotherhood of Boilermakers and Helpers, and the International Brotherhood of Blacksmiths and Helpers respectively. The dispute, it was stated, grew out of the employees' demand for a schedule of rules and rates of pay, copy of which schedule was appended to the application. Thirteen hundred employees were said to be directly affected by this dispute. A Board was established by the Minister on January 16 and was constituted as follows: His Honour Judge J. G. Wallace, Woodstock, Ont., chairman, appointed by the Minister in the absence of any joint recommendation from the other Board members; Mr. R. Patterson, Stratford, Ont., company's nominee; and Mr. Fred Bancroft, Toronto, employees' nominee. Whilst the Board was in process of constitution, efforts were made to settle the dispute by direct negotiations, which, however, proved unsuccessful.

On January 23, an application for a Board was received from certain employees on the eastern lines of the Canadian Northern Railway and the Halifax and South Western Railway, being conductors, trainmen and yardmen, mem-

bers of the Order of Railway Conductors and the Brotherhood of Railroad Trainmen respectively. The number affected was given in the application as 650 directly and 1,400 indirectly. The application stated that the dispute related to the employees' demands for increased wages, shorter hours, and a revision of the conditions of employment. Both parties concerned requested that this dispute be referred to the Board which had been appointed to deal with a dispute affecting similar classes of employees on the western lines of the Canadian Northern Railway, the personnel of the Board being as follows: the Honourable Mr. Chief Justice T. G. Mathers. Winnipeg, chairman, appointed by the Minister in the absence of a joint recommendation from the other Board members; Mr. C. E. Dafoe, Winnipeg, company's nominee; and Mr. T. J. Murray, Winnipeg, employees' nominee. Under date of February 4 an order was issued by the Minister authorizing the above Board to deal also with the dispute on the eastern lines of the Canadian Northern Railway and the Halifax and South Western Railway.

Other Proceedings under Act

It has been reported to the Department that a satisfactory understanding has been arrived at in connection with the dispute affecting the steam shovel and excavation workers employed by the Canadian Northern Railway on lines west of Port Arthur, members of the International Brotherhood of Steam Shovel and Dredge Men. An application for a Board had been received, but as a result of representations made to the Minister it was thought that the necessities of the situation might be met by an informal investigation. The services of Messrs. E. L. Taylor and D. Campbell, both of Winnipeg, were secured for this purpose.

Reference has been made in the December, 1917, number of the *Labour Gazette* to an application which was received from the carpenters and joiners employed by the Ontario Hydro Electric Commission on the power canal development work at Niagara Falls and district, a number of the employees concerned being members of Frontier District Council of Carpenters and Joiners of America. The dispute was said to affect 32 employees directly and 22 indirectly and resulted from a demand for the conditions established in the district by the union. The employer being a Commission acting under the authority of the Government of the province of Ontario, it was not clear that the dispute fell within the scope of the statute. Correspondence with the Hydro Electric authorities was, however, continuing at the close of the month with a view to arranging the points at issue.

Report of Board in Dispute between the Michigan Central Railroad Company and certain Employees, being Passenger Men, Baggagemen, Flagmen, and Brakemen

THE Minister received during December the report of the Board which had been appointed to inquire into a wages dispute affecting certain employees of the Michigan Central Railroad Company, being passenger men, baggagemen, flagmen and brakemen, members of the Brotherhood of Railroad Trainmen. A minority report was also received. The application, which was made by the employees, stated that the dispute had grown out of demands for the scale of wages in effect on the eastern lines of the Canadian Pacific Railway, the number affected being given as 340 directly and 1,100 indirectly. The Board established in this matter consisted of Messrs. H. T. Malcolmson, Hamilton, and James Murdock, Toronto, appointed on the recommendation of the company and the employees respectively, and His Honour Judge J. G. Wallace, Wood-

stock, Ont., appointed by the Minister in the absence of any joint recommendation from Messrs. Malcolmson and Murdock.

The report is signed by the chairman and Mr. Murdock. Recommendations are made therein for certain increases to take effect on August 1, 1917. Mr. Malcolmson, the company's nominee on the Board, did not concur in the findings and submitted a minority report. The award was declared acceptable to the employees concerned. The Department was later informed by the company that a conference had been held at which the matters in dispute had been adjusted to the satisfaction of the employees.

Majority Report

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Michigan Central Railroad Company (employer) and certain of its employees, being passenger men, baggagemen, flagmen and brakemen, members of the Brotherhood of Railroad Trainmen (employees).

To the Honourable T. W. Crothers, Esq., K.C.,
Minister of Labour,
Ottawa, Canada.

The Board of Conciliation appointed with reference to this matter has the honour to report as follows:

The members of the Board met for the first time at the city of St. Thomas on November 26, 1917, at 1 p.m., and after each member had taken the prescribed oath of office, proceeded to endeavour to effect an amicable settlement between the parties.

The Board was unable to bring the parties to any agreement and proceeded with the hearing.

The men were represented by Mr. W. J. Babe and Mr. George Fullaway, and the company was represented by Mr. John G. Walber, Mr. Henry Shearer (general superintendent), Mr. James Balkwill (divisional superintendent), and Mr. J. W. Fry (special representative).

The men requested changes in rates as follows:

	Present rate. cents.	Requested rate cents.
Baggagemen	1 65 per mile	2.00 per mile
Brakemen	1.60 per mile	1.89 per mile

MINIMUM DAILY RATES

Baggagemen	$2.75 per day.	$3.10 per day.
Brakemen	2.55 per day.	2.93 per day.

MINIMUM MONTHLY RATES

	Present rate	Requested rate
Baggagemen	$82.50 per month.	$93.00 per month.
Brakemen	76.50 per month.	88.00 per month.

Before this Board, Mr. Babe, for the men, asked that the increase take effect from the first of April, 1917, his letter to Mr. Shearer asking for this increase, however, is dated the second day of July, 1917.

The number of men involved in this application is about 70, and it was claimed by the men that they had received no increase in wage rates since 1913.

The company contended that under the settlement awarded by the Committee of the Council of National Defence, bearing date March 19, 1917, that the men were not entitled to any increased compensation until the thirty-first day of December, 1917.

The position taken by the men with reference to this settlement was that the said settlement did not prevent the men in the passenger service asking for increased pay at any time after the said settlement.

A great many documents were filed with the Board, including a typewritten statement put in by Mr. John G. Walber, consisting of 21 typewritten pages, and the exhibits referred to in the said document are all before the Board. The Board discussed with the representatives for the company and the men the documents which were filed before the Board all of Monday afternoon and all of Tuesday, the twenty-seventh instant, and the evidence to be put before the Board was closed on Tuesday with exception of exhibits "P" and "Q," which were put in on Wednesday with some statements by Mr. Fry and Mr. Babe.

On Wednesday and Thursday, the twenty-eighth and twenty-ninth instant, the members of the Board discussed the matter fully, but were unable to come to any unanimous decision. The members of the Board met again to-day in the Court House in Woodstock and they are still unable to come to any unanimous decision as to what should be recommended.

The chairman of the Board decided as between the parties that the settlement of the nineteenth of March, 1917, above referred to, does not prevent the men from making the claim which is before this Board, and the representative of the men on the Board, Mr. James Murdock, agrees with the chairman on that point.

On the question of the date at which any increase should be given, the company contends that it should not be prior to the thirty-first day of December, 1917. Owing to the fact that in previous schedules it was provided that any change must be upon 30 days' notice, the chairman decided that as the application for increased pay was not made by Mr. Babe until the second day of July, 1917, that no increase should be effective until the first of August, 1917, and Mr. Murdock has agreed to this position taken by the chairman.

The chairman and Mr. Murdock have agreed to recommend an increase in the wages of these men to be fixed on a percentage basis as shown in the company's exhibit "Q" as follows:

For baggagemen, 19.88 per cent increase, and for brakemen, 18 per cent increase, and that the men should be paid on this basis since the first day of August, 1917, and until this increase is superseded by any new arrangement between the men and the railroad company under a new movement which this Board understands is about to be launched.

Dated at Woodstock, this thirtieth day of November, A.D. 1917.

(Sgd.) J. G. WALLACE,
Chairman of Board.
(Sgd.) JAMES MURDOCK,
Member of Board.

Minority Report

In the matter of the Industrial Disputes Investigation Act, 1907, and a dispute between the Michigan Central Railroad Company (employer) and certain of its employees, being passenger men, baggagemen, flagmen and brakemen, members of the Brotherhood of Railroad Trainmen (employees).

To the Honourable T. W. Crothers, Esq., K.C.,
Minister of Labour,
Ottawa, Canada.

Being unable to concur in the majority award of the Board on this subject, I respectfully present the following minority report:

The application of the employees was for rates of pay prevailing on a number of Canadian roads and by comparing the percentage increase requested with that awarded by the Board, it will immediately be seen that the awarded increase of 19.88 per cent for baggagemen and 18 per cent for brakemen is inconsistent with the demands, and instead of securing uniformity in Canadian rates, it will create new rates entirely at variance with, and much in excess of, the so-called Canadian standards of minimum daily and monthly allowances, and the difference created is intensified under the American rules governing payment of overtime in passenger service provided for in the schedule of the M.C.R.R., as compared with the overtime rules in schedules of all other railroads operating in Canada.

The following is a statement of the existing rates of pay of M.C.R.R. passenger trainmen, the rates requested, the percentage increase represented by such request and the percentage increase granted by the award:

MILEAGE BASIS

	Present Rate	Requested Rate	Percentage of increase requested	Percentage of increase awarded
Baggagemen	1.65c.	2.00c.	21.2%	19.88%
Brakemen	1.60c.	1.89c.	18.1	18

MINIMUM DAILY ALLOWANCE, 155 MILES

	Present Rate	Requested Rate	Percentage of increase requested	Percentage of increase awarded
Baggagemen	$2.75	$3.10	12.7%	19.88%
Brakemen	2.55	2.93	14.9	18
MONTHLY MINIMUM				
Baggagemen	$82.50	$93.00	12.7%	19.88%
Brakemen	76.50	88.00	15	18

While it is a fact that the preponderance of passenger service on the M.C.R.R. comes under the mileage basis of settlement, it will be seen that for the short or so-called turn-around runs, which come within the monthly minimum basis of settlement, the award of the Board is out of all proportion to the request of the employees, and, if adopted, would create a serious disturbance of rates on other Canadian lines.

To my mind the railroad company presented evidence which proved the existence of a contract binding alike upon the company and the employees at least until November 30, 1917, if not until December 31, 1917. In connection with the establishment of the so-called eight hour day and the passage of the Adamson Law in the United States, it was shown by exhibits filed with this Board:

1. That the employees of the M.C.R.R. demanded that the Conference Committee representing the railroad in those negotiations should represent the M.C.R.R. as a unit, including its lines in Canada. The Conference Committee was accordingly authorized by the M.C.R.R. to represent all of its lines. These negotiations were concluded after the United States government had intervened, and a settlement was reached through the Committee of the Council of National Defence (U.S.A.) on March 19, 1917, at which time it was also agreed between the labour organizations and the National Conference Committee of the Railroads that all differences arising out of the settlement should be decided by "a standing Commission of eight, four to be chosen by the National Conference Committee of the Railroads and four by the Railroad Brotherhoods."

2. That the Adamson Law referred to created the so-called eight hour day and fixed the rates of pay thereunder in passenger service as well as all other classes of service for a period of 11 months ending November 30, 1917. This law was later sustained by the decision of the Supreme Court of the United States, a copy of such decision being submitted to this Board.

3. In addition, one of the company's witnesses made the following positive statement: "As a member of the Commission of eight, I "can state that the subject of the duration of "the award of the Committee of the Council

"of National Defence and the decisions of the "Commission was discussed a number of times, "and it was recognized by all members of the "Commission that the usual understandings "under which the managements and the repre- "sentatives of the employees had been working "for years, viz., that any settlements reached "shall be in effect for a year, and thereafter "subject to the usual 30 days' notice, was not "changed in any way and was still in force." The employees are represented on the Commission of eight above referred to by a vice-president of their organization.

Exception is also taken to the effective date of the award (August 1, 1917) and the very indefinite period during which the proposed settlement should continue in effect.

Dated at Hamilton, this third day of December, A.D. 1917.

(Sgd.) H. T. MALCOLMSON,
Member of Board.

Port Arthur Shipbuilding Company, Limited, and Employees, being Boilermakers, etc.

THE Minister received early in January the report of the Board which had dealt with this dispute. The Board was constituted as follows: Alderman Wm. Marrigan, Port Arthur, recommended by the company; Mr. Wm. N. Welsh, Fort William, recommended by the employees, and Mr. Frederick Urry, Port Arthur, chairman, appointed on the joint recommendation of Messrs. Marrigan and Welsh.

The Board held its first meeting, by mutual consent, on November 6, and the above named members subscribed and took the oath of office.

The matter in dispute for the investigation of the Board was the case of the dismissal or the leaving of the work by Louis J. Romain, a boilermaker, and president of Local Lodge 461, the union claiming that he had been discriminated against as a union man and should be reinstated, while the company contended that he had left work on his own account, and while refusing to reinstate him, decided to accept the decision of the Board after a thorough investigation into the facts of the case. The union also presented a schedule for increased rates of pay, a shorter work-day, better workshop conditions regarding sanitary affairs and heating of the shops, etc.

Owing to the illness of Mr. Marrigan, that gentleman resigned from the Board on November 19, and Mr. D. W. Davies, Fort William, was, on the company's recommendation, appointed as a substitute.

The findings of the Board were signed by the chairman and Mr. Davies, Mr. Welsh submitting a minority report.

The Board classified the points in dispute as follows: (1) the necessity for an agreement; (2) the desirability of a shorter workday; (3) sanitary and workshop conditions; (4) the rise in the cost of living; (5) industrial problems relating to apprenticeship, classification of work, piece work difficulties, etc.; (6) increase in rates of pay; (7) recommendations for dealing with these problems.

1. The Necessity of an Agreement.—On the question of an agreement, it is pointed out that on evidence submitted to the Board there were in November, 1917, 1,187 men and boys on the payroll of the company, made up of 28 different nationalities. Out of these 1,187 workmen, 596 men and boys were employed in the boiler shop, ship rigging gang and ship yard. "The union," the Board states, "at that time claimed a membership of 185 in the Local Lodge of Boilermakers, Iron Shipbuilders and Helpers, less than one-third of the total number of men working at the industry and eligible to join the union, if they so wished, and of these 185 only 59 voted in favour of asking an agreement according to the records of the union minute book produced for the inspection of the Board on November 26."

The Board remarks that the union officials were not well advised to ask for an agreement, the terms of which had only been agreed upon by less than a third of the workers in that particular branch,

while less than one-third of that number voted in favour of its presentation for consideration by a Board of Investigation. "Two-thirds of the men were not," says the Board, "in the union." Of those in the union, less than one-third thought it right to submit the question for consideration, therefore we have the vote of 59 men deciding the action of 185 men, and if the company should sign an agreement with the union what guarantee is there that the union could keep the men employed loyal to the terms of the agreement? The answer to this has been that the International is behind the Local Lodge, but with over 400 men and boys outside the union, how could the International control them? And if it were possible for a minority to gain higher rates of pay for the majority, what inducement would there be for the majority to join a union?

"We cannot see our way to advise the signing of such an agreement, as we believe it would be prejudicial in the best interests of the men as well as the company, and for other economic reasons dealt with under other clauses of this report, which will show on what grounds we can conceive a good and workable agreement could be arrived at."

2. The Desirability of a Shorter Work-day.—"This question," says the Board, "has received much attention during the past few years, and all who have had to do with industry and have studied the effects of long hours of labour, confess that the shorter work-day is the most economic and efficient form of service."

It was not, however, urges the report, in the present case clear if the effect of a reduction would be to decrease the labour of the day, or to increase the number of overtime hours paid for at the rate of time and a half. Evidence submitted did not indicate, the Board held, that the members of the union would welcome a nine hour day with all chance of time and a half and double time pay entirely eliminated. On the other hand, evidence showed "that men in the union had come to the Port Arthur Shipbuilding Plant to make as much overtime as possible."

3. Sanitary and Workshop Conditions.—The findings of the Board on this point are as follows:

"The general manager of the company has stated to the Board that the company has spent the sum of $9,100.00 this year in heating the workshops, that the whole of the sanitary conveniences have been pulled down this summer and new buildings erected with more accommodation, and in this respect the conditions laid down by the Ontario Factory Act are more than fulfilled.

"Unfortunately, there is no sewerage system for the site or anywhere near it, so that the most modern conveniences cannot be installed; however, all that can be done, the manager states, is being done.

"At the present time there is being erected a building to be used as a lunch room for the men of the shipyard. The material for this was ordered last summer and the site selected, but the press of work before navigation closed and the shortage of men compelled its construction to be postponed until this time.

"This work is therefore being looked after and was projected, according to the evidence placed before the Board, before the general manager had any knowledge that it would be brought forward as a clause in a proposed agreement."

4. The Rise in the Cost of Living.—On this point the Board remarks:

"We find on the evidence submitted that the advance made since the ninth of April, 1917, in the wage rates of all employees at the shipbuilding plant has been in proportion to the increase in the cost of living in the city of Port Arthur and that these increases compare very favourably with increases made during the same period in the district in other industries."

5. Industrial Problems Relating to Apprenticeship, etc.—The Board finds

that the union proposition of one apprentice to every five boilermakers is considered by the company as a very fair proportion, and this rule should be carried out; also, "the excessive classification of work, making specialists of men for one small branch of the work, should be eliminated; chance should be given to all men to become all-round tradesmen."

The Board discusses at some length the relative merits of piece work and straight time and observes in conclusion: "A living wage fixed on the maximum of an eight or nine hour day would be a desirable condition for the industrial workers of Canada, we believe, but that condition can only prevail by the institution of some system of settlement which we venture to outline in our recommendations."

6. Increase in Rates of Pay.—Various wage scales came before the Board which, after a careful analysis of the figures, remarks: "Taking the shipyard rates of pay and the large railway centres of all parts of the United States of America and Canada, including the Skinner and Eddie yard at Seattle, the Vancouver, Victoria, Puget Sound and Mare Island shipyards on the Pacific coast, and New York, Boston, Philadelphia, Norfolk, New Orleans and Charleston shipyards on the east and south coasts of the United States of America and the whole of the Lake shipyards of Canada, together with rates paid in the railway shops to boilermakers on the Canadian Pacific Railway and Canadian Northern Railway at Fort William and Port Arthur and in the railway shops of Chicago, Minneapolis, St. Paul, etc., we have the average prices paid for the different classifications of work in comparison with the prices paid at Port Arthur Shipbuilding Plant.

"We append three tables of these average prices; the first taking in all the centres named; the second taking in all centres except the shipyards on the Pacific coast at Seattle, Vancouver, Victoria, Puget Sound and Mare Island; the third, taking the Canadian shipyards under contract with the Department of Ship Construction for building ships for the Imperial Government and working under similar conditions to the Port Arthur shipyard and the boiler shops of the Canadian Pacific Railway and Canadian Northern Railway at Port Arthur and Fort William.

TABLE No. 1.

Workers	Average Wages all Yards Pacific to Atlantic and Lakes	Average wages Port Arthur Yard
Layer out	61c per hour	43c per hour
Flanger	58 "	68¼ "
Boilermaker	58¾ "	55 "
Ship fitter	50 "	42 "
Riveter	44 "	43 "
Chippers & caulkers	54½ "	42 "
Press, punch shop	42½ "	42 "
Welders	51 "	52½ "
Drillers & tappers	35½ "	36¾ "
Punch and shear	44½ "	44¾ "
Counter sinkers	48 "	39¼ "
Drillers & reamers	37½ "	36¾ "
Holders on	37½ "	39¼ "
Riggers	49½ "	39¼ "
Rivet heaters	24¼ "	31¼ "
Boilermakers' helpers	37¼ "	36¾ "
General helpers	32½ "	35¼ "

"In this table Port Arthur prices are above the average for the whole continent in eight instances out of 17.

TABLE No. 2.

Workers	Average Wages all Yards except Pacific Coast	Average Wages Port Arthur
Layers out	52½c per hour	43c per hour
Flangers	54½ "	68¼ "
Boilermakers	44 "	55 "
Ship fitters	46 "	42 "
Rivetters	39½ "	43 "
Chippers' & caulkers	43 "	42 "
Press, punch shop	42½ "	42 "
Welders	48 "	52½ "
Drillers and tappers	35½ "	36¾ "
Punch and shear	41 "	44¾ "
Counter sinkers	33¼ "	39¼ "
Drillers & reamers	34½ "	36¾ "
Holders on	34 "	39¼ "
Riggers	43 "	39¼ "
Rivet heaters	22½ "	31¼ "
Boilermakers' helpers	35 "	36¾ "
General helpers	29½ "	35¼ "

"In this table Port Arthur prices are above the average in 12 instances out of 17.

TABLE No. 3.

Workers	Average wages all Lake Yards, C.P.R. and C.N.R. Fort William and Port Arthur	Average wages Port Arthur
Layers out	50¼c per hour	43c per hour
Flangers	49½ "	68¾ "
Boilermakers	50½ "	55 "
Ship fitters	39 "	42 "
Riveters	39½ "	43 "
Chippers & caulkers	40¼ "	42 "
Press, punch shop	45 "	42 "
Welders, not given in Yards C.P.R.	44 "	52½ "
Drillers and tappers	35 "	36¾ "
Punch and shear, not given in yards	41½ "	44¾ "
	C.P.R.	
Counter sinkers, not given	.....	39¼ "
Drillers and reamers	33 "	36¾ "
Holders on	34 "	39¼ "
Riggers, not given	.....	39¼ "
Heaters	23¼ "	31¼ "
Boilermakers' helpers	35½ "	36¾ "
General helpers	30 "	35¼ "

"In this table Port Arthur prices are above the average in 15 instances out of 17.

"Note.—The 5 per cent increase bonus granted on October 15 to all workers at the Port Arthur Shipbuilding Company's work is added to above average prices.

"The rates of pay in the Port Arthur yard in nearly all the classifications mentioned are graded in three rates rising in steps of 2½ cents per hour, for example—boilermakers are 50 cents, 52½ cents and 55 cents, or, with the 5 per cent bonus, 52½ cents, 55 cents and 57½ cents.

"We have in all cases taken the middle rate as the average.

"The union men object to this method and ask for a flat rate for each classification, such flat rate to be an advance of the present highest rates.

"The company claims that many of the men seek work in the yard without any previous experience. They are trained in the work and advance from common labourers or helpers in many instances to skilled mechanics and are paid as they become skilful in the branch of work they are following."

The Board's conclusions on this point are as follows:

"We find that the rates of pay, with time and half for overtime and double time for Sundays, holidays and night work after midnight and the hours of labour worked, are according to the conditions generally prevailing in this district and the wages paid above the average. We find that only 59 of the men in the whole plant voted in favour of the presentation for an agreement and increased wages; that there has been no general demand on the part of the majority of the workers for increase in wages; that the increase advanced by the company on October 15 was voluntary; that there has been no discrimination by the company against union men; that the manager has been willing to meet committees of the men and discuss grievances with them at any time when appointments have been made.

"The average rate of wages at the Port Arthur Plant compares very favourably with the average rates prevailing throughout Canada and the United States of America, and we believe the analysis of average rates we have made needs no further comment, and we have therefore come to the conclusion that we should not be justified in recommending any increase in the rate of wages paid to their employees by the Port Arthur Shipbuilding Company at the present time."

7. Recommendations. — The Board made some general remarks as to the desirability of the establishment of an Adjustment Board in the shipbuilding industry, whose functions would include the regulation of wages, hours of labour, etc.

The Board presented no report with reference to the Romain case, but individual expressions of view were received from the three members, two against reinstatement, one, that of the employees' nominee, favouring reinstatement.

Minority Report

The text of Mr. Welsh's minority report and of the agreement recommended by him in this matter is as follows:

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Port Arthur Shipbuilding Company (employer) and its employees, being boilermakers, rivetters, helpers and others, members of the International Brotherhood of Boilermakers, Iron Shipbuilders and Helpers of America.

To the Honourable T. W. Crothers,
Minister of Labour,
Ottawa, Ontario.

Sir,—

In weighing the merits of this dispute, cognizance must be given to the fact that the work over which the dispute has arisen is of the highest national importance and that the award must be of such a character that the danger of jeopardizing the uninterrupted prosecution of the work will be reduced to a minimum; any award which fails to adjust the differences in question will place upon this Board the responsibility for the industrial friction that will inevitably arise.

In the general discussion which took place before the Board on the question of the agreement as presented, on only two points did there appear to be any insurmountable difficulty in the way of bringing the parties to the dispute together; these points were, first: the question of signing an agreement as between the company and the union, and, second, the wage scale.

The union presented the following evidence supporting their demand for an agreement and also that they are a responsible body capable of fulfilling any agreement entered into.

First: This union, along with other of the metal trades unions, has signed agreements with the U. S. Government in the navy yards on the Pacific and Atlantic coasts.

Second: That it has signed agreements with all the shipyards in British Columbia and which are largely employed in the building of ships for the Imperial Munitions Board.

Third: That on September 1, 1917, it had approximately 215 signed agreements with various railroads, shipyards and boilershops in the United States and Canada, that these agreements have been added to since above date until there is now above 300.

Fourth: That the International organization is a party to all agreements and will not permit subordinate lodges to violate agreements under penalty of being ordered back to work, and, if refusing to obey such orders, are liable to have the financial support of the Grand Lodge withdrawn.

It might be further pointed out that in no instance, where there has been a signed agreement in effect, has the efforts of this organization to meet changing conditions resulted in a strike. All its strikes in both Canada and the United States have occurred where there was either no agreement or where an agreement had expired without prospect of a favourable renewal.

During the discussion on the question of signing an agreement, the only objection offered to it by the general manager of the company was that it was the settled policy of the company to run the plant to suit themselves, or, in other words, they wish to continue their policy of denying their employees any voice as to the conditions under which they may work.

In dealing with the question of an agreement, it must be borne in mind that the principle of collective bargaining, in the relations between employers and employees, must obtain to a greater degree than in past, if a proper industrial balance is to be maintained. But the precise point at which it becomes advisable for an organization to enter into negotiations to secure is not within the province of this Board to determine.

The union has at all times been unanimous on the question of presenting an agreement to the Port Arthur Shipbuilding Company, and at the mass meeting held on Nov. 6, at which nearly 500 men, union and non-union, were present, the men without a dissenting voice decided that an agreement regarding a schedule of wages was absolutely necessary to secure in the shipbuilding plant. The vote referred to in the majority report on Nov. the eighth and eleventh, respectively, was on the question of submitting that phase of the dispute to the Board which was then sitting on the Romain case. This mis-statement of the men's action appears a second time in clause 6 of the majority report.

In view of the evidence submitted by the organization supporting its responsibility in the matters of agreements and of the absolute lack of controverting on the part of the company, it is difficult to see wherein the principle of collective bargaining becomes detrimental to the best interests of all concerned.

Shorter work-days are part of the demands of all labour organizations, and I agree with the findings of the majority of the Board that a day of eight or nine hours with a wage in keeping with the cost of living is essential to the physical and social welfare of the workers. That the practice of overtime is not generally satisfactory is amply borne out in the statements by the general manager of the company showing that men were constantly sleeping on the work and that it was impossible to get the full number of employees to report for work daily, as high as 240 out of about 1,100 having failed to report in a single day, while a general average of about 10 per cent of the working force was absent daily. This same state of affairs existed in Great Britain recently, and the Commission which investigation the situation there recommended the abolition of overtime or its restriction to short periods to meet unexpected circumstances.

There is sufficient evidence that this union does not desire overtime in the fact that they have presented a scale of hours and wages that will enable them, in some measure, to meet the cost of living without working two days in one.

Sanitary and workshop conditions are in all probability no better and worse than in other industrial establishments, but there is a great deal to be done in this respect before the physical welfare of the workers can be said to be properly safeguarded. This clause is in the proposed agreement, not because it is a growing grievance, but because it is part of all standard agreements entered into by this organization.

On the question of piece work, the men are a unit in desiring its abolition and the introduction of a minimum flat scale of wages such as prevails on the Pacific coast and in the United States navy yards. The men prefer bit work to piece work only as the lesser of two evils. In only a comparatively small number of the 300 establishments with which this organization has working agreements does the piece work system prevail. I am in accord with the view of the majority of the Board that the excessive classification of work and piece work must be eliminated to insure proper industrial conditions.

With respect to the wage no evidence has in any way been produced by the company that it would suffer by conceding the proposed rates of pay; while it has advanced wages voluntarily and otherwise during the past summer, it is not shown nor is it claimed that such increase is commensurate with the increased cost of living as compared with the pre-war period. The cost of living has increased approximately 60 per cent, while on the company's own showing they have advanced wages but 35 per cent.

The argument that the company never has paid a dividend does not merit serious consideration for two reasons: first, until recently the plant was controlled by the American Shipbuilding Company and was used largely as an auxiliary yard effecting certain repairs and doing such new work as would enable it to collect the cash bonus guaranteed by the city of Port Arthur; second, the employees have only their labour with which to secure a livelihood and cannot be expected to bear the brunt of depression unless they have their just share of periods of prosperity.

It was shown by the evidence that the work of the yards is largely in connection with the Munition Board representing the Government, and as such is work of a public nature and workmen employed on such work should receive a fair compensation for their labour, which the workers concerned are not now receiving. In Vancouver and Victoria, under similar conditions, the rights of the workers have been recognized and have a workday of eight hours and an average of 9 cents per hour more than is being asked in Port Arthur, although there is practically no difference in the cost of living as between the two places.

I am unable to agree with the majority findings in clause 6. It is contradictory to the findings in clause 5, and, further, it is in direct contradiction to the majority findings as given in clause 7, which practically substantiates the contention of the men that an agreement is necessary to maintain settled industrial relations. I fully concur that the prolonging of unsatisfactory conditions will lead to industrial strife in the near future, but I cannot agree to recommend that the collective bargaining power of the organization be taken from them and placed in the hands of a Board clothed with feudal prerogative. This would result in the workers being reduced to a state of complete vassalage.

I therefore recommend that the demands of the employees, as contained in the appended agreement, be granted.

(Sgd.) WM. N. WELSH,
Representative of the Employees.

Port Arthur, Ont., January 7, 1918.

Text of Agreement recommended by Mr. Welsh

Agreement between the Port Arthur Shipbuilding Company and their boilermakers, riveters, holders-on, heaters, reamers, drillers, caulkers, punch-shopmen and helpers and others enumerated in the following wage scale, being members of the International Brotherhood of Boilermakers, Iron Shipbuilders and Helpers of America.

Article 1.—This agreement shall become effective and shall remain in effect from month to month unless either party to this agreement desires a change, when 30 days' notice must be given.

Article 2.—Nine hours shall constitute a day's work, to be worked between the hours of 7 a.m. and 5 p.m., except on Saturdays when five hours will be worked between the hours of 7 a.m. and 12 n. for regular day men. Regular night men's hours shall be 10 hours per night, five night per week, for which 11 hours will be allowed per night. These hours to be worked between the hours of 7.30 p.m. and 6 a.m.

Article 3.—All time worked outside the bulletin hours shall be considered as overtime and paid for at the rate of time and one half on new work and double time on repair work. Double time shall be paid for all Sundays and the following holidays: New Year's, Good Friday, Victoria Day, Dominion Day, Labour Day, Thanksgiving and Christmas. Should any of the above holidays fall on Sunday the day observed by the Dominion shall be considered as the holiday.

Article 4.—When reduction of force is necessary, before laying off the men, the hours must first be reduced to eight hours per day; five days per week; further reductions to be made by laying off men, seniority to govern in each department. The hours shall not be increased until all available employees laid off are given an opportunity of re-employment according to their previous seniority.

Article 5.—Such grievances as do not relate to the subject of hours and wages covered by this agreement and which may arise shall be given consideration as follows:

All grievances not satisfactorily adjusted by the foreman and committee from the men may be appealed to the next succeeding higher officer, until the president is reached. In no case will any employee be discriminated against for having acted on a committee in behalf of his fellow employees. When after investigation it is shown that an employee who has been discharged has been unjustly dealt with, he shall be paid for all time lost and be reinstated.

Article 6.—Employees who are required to do work that calls for a higher rate than that which they are receiving shall be paid said higher rate after being employed on such work more than one day.

Article 7.—Shops shall be kept in a clean and sanitary condition and shall be properly heated on cold days and a properly heated lunch room will be provided for men who work outside in cold weather.

Article 8.—Any man who has served an apprenticeship or has had four years' experience at the boilermakers' trade, and who by his skill and experience is qualified and capable of fitting up, laying out, flanging, rivetting, chipping, etc., shall be considered as a boilermaker.

All work such as laying out, fitting up, flanging, rivetting, patching, chipping, caulking, punching, shearing and rolling of any sheet iron or steel, 16 gage or heavier, that is used in the construction of any boilers, tanks, smokestacks, and the testing and tubing in connection with the same, shall be considered as boilermakers' work.

Men now in the employ of the company's boiler department and doing a part of the above work, and rated as specialist, will be continued on this class of work and given a chance to learn all parts of the trade, with an increase of 3 cents per hour at the end of each year until three years have been served, when they shall receive the boilermaker's rate. No more specialists to be started.

Article 9.—There shall be one apprentice for every five boilermakers, one half shall be taken from the ranks of the helpers, who have had at least two years' service with the company, they to be paid the regular helpers' rate for the first year's apprenticeship, with an increase of 3 cents per hour at the end of each year, until three years have been served, when at the end of that time, if retained in the company's service, shall be paid the boilermakers' rate.

Regular apprentices shall serve a term of four years and shall be paid 20 cents per hour for the first six months, with a two and a half cent increase every six months until his four years have been served, when, if retained in the service of the company, he shall receive the boilermakers' rate.

The following shall be the minimum rates of pay, with 5 cents additional for under foreman:

Layer-out	65	cents	per hour.
Flange-turner	65	cents	per hour.
Boilermakers	62	cents	per hour.
Ship-fitters	62	cents	per hour.
Riveters	62	cents	per hour.
Chippers and caulkers	62	cents	per hour.
Pressmen	55	cents	per hour.
Acetylene burners and welders	62	cents	per hour.
Driller and tapper	55	cents	per hour.
Punch and shears	55	cents	per hour.
Planermen and countersinkers	55	cents	per hour.
Drillers and reamers	50	cents	per hour.
Holders-on	50	cents	per hour.
Tool-sharpener	50	cents	per hour.
Riggers	50	cents	per hour.
Plate hangers	45	cents	per hour.
Rivet beaters	45	cents	per hour.
Crane men	45	cents	per hour.
Helpers, boilermakers	42	cents	per hour.
Helpers on punch	42	cents	per hour.
Helpers on general	40	cents	per hour.
Helpers on ship fitters	30	cents	per hour.
Helpers on plate hangers	40	cents	per hour.

Report of Board in Dispute between the Corporation of Edmonton and Firemen

ON January 15, the Minister received the report of the Board which was established on November 12 to deal with a dispute between the Corporation of Edmonton and firemen, members of Division No. 29, Fire Fighters' Federal Labour Union. The application emanated from the employees. The dispute, it was stated, affected 70 employees and grew out of the city's refusal to enter into an agreement providing for increased wages and improved working conditions. The report bears the signatures of all three members of the Board, namely: the Right Reverend H. A. Gray, Bishop of Edmonton, Edmonton, chairman, appointed by joint agreement of the other Board members; Mr. Wm. J. Carter, Edmonton, city's nominee, and Mr. Arthur Davis, Edmonton, employees' nominee.

The report states that the question of wages had been settled by the parties themselves before the Board met. Further conferences between the parties resulted in an agreement being reached as to terms of employment, which the Board recommended should be incorporated in

a by-law. Recommendations were made for the settlement of any outstanding differences.

Report of Board

To the Honourable Minister of Labour,
Ottawa.

Sir,—

In the matter of the Industrial Disputes Investigation Act, 1907, and *re* differences between the Corporation of Edmonton, Alberta, and its employees, being firemen, members of the Fire Fighters Federal Labour Union.

Your Board of Conciliation have the honour to report:

1. That pursuant to their appointment, a preliminary meeting was held December 6, 1917, and arrangements made to proceed on the following day, Dec. 7.

2. On December 7, when the Board met, the parties reported that the matter of wages referred to it had been satisfactorily adjusted. The Board then directed an adjournment for the purpose of allowing the parties to get together to see if some settlement of the whole matter could not be reached. The Board, after resuming its sittings (no settlement having been reached at this sitting) took evidence on the questions before it. The city contended that it was "ultra vires" for the city to enter into an agreement with the union, and any agreement so entered into would not be binding and unenforceable; that the terms of employment should be arranged and set out in a By-law and Rules and Regulations, but the employees contended that such an agreement was possible and binding, and stated that if the Board obtained the opinion of a solicitor, they would be bound by the award of the Board. Your Board obtained the opinion of an independent solicitor, without reference to either of the parties, and whose name was not divulged to either of the parties, and as that opinion suggested that the terms of employment should be put in the form of a By-law, your Board recommend that the terms of employment which were agreed upon should be incorporated in a By-law and Regulations to be enforced by the city. The representatives of the city agreed to recommend to the City Council the acceptance of the award in the event recommendation was so made. We therefore feel that this award will be carried out.

3. With regard to the terms of employment, representatives of the city and representatives of the men got together and agreed to certain regulations which were to be incorporated in an agreement, if an agreement were made, or a by-law if it were to be done in that manner, and other terms were to be set out in regulations governing the fire department. There were several points, however, which the parties could not agree upon and were left with the Board to make an award upon, namely:

(a) Whether the employees were to have one day off in four, or continue as at present, one day off in six.

(b) Whether or not the merit system of punishment for offences should be put in force.

With reference to the difference (a) first above mentioned, your Board is of the opinion that the firemen are entitled to one day off in four.

With reference to question (b) above mentioned, your Board is of the opinion that the time is not yet ripe for putting in force of the merit system.

Your Board is therefore of the opinion that Rules and Regulations as agreed upon by the parties should be incorporated in a By-law, or that a By-law be so amended so as to contain the same and regulations promulgated by the city, and that these regulations should contain, in addition to the matters agreed upon, provision for giving the employees one day off in four and should not contain the merit system of punishment for offences as suggested by the city.

(Sgd.) H. ALLEN GRAY,
Chairman.
(Sgd.) WM. J. CARTER.
(Sgd.) ARTHUR DAVIES.

Dated at Edmonton, Alberta, this fifteenth day of December, A.D. 1917.

Report of Board between the Canadian Northern Railway Company and Maintenance of Way Employees on Western Lines

ON January 28, the Minister received the report of the Board which had been established to deal with a wages dispute between the Canadian Northern Railway Company and maintenance of way employees on the company's western lines, members of the International Brotherhood of Maintenance of Way Employees. The number affected was given as 3,000 directly and 2,000 indirectly. The Board in this matter was composed as follows: the Honourable Mr. Chief Justice T. G. Mathers, Winnipeg, chairman, appointed by the Minister in the

absence of a joint recommendation from the other Board members; Mr. John T. Haig, Winnipeg, company's nominee, and Mr. D. Campbell, Winnipeg, employees' nominee.

The report is unanimous and includes a proposed schedule of wages which the Board recommended should be "accepted by the parties as a fair settlement of the matters in dispute and that such new rates take effect as of the first day of January, A.D. 1918."

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Canadian Northern Railway, western lines (employer) and its employees, being maintenance of way men, members of the International Brotherhood of Maintenance of Way Employees.

To the Honourable
Thos. W. Crothers, K.C.,
Minister of Labour.

On the thirteenth November, 1917, a Board of Conciliation and Investigation was appointed in the above matter, consisting of John T. Haig, of the city of Winnipeg, in the province of Manitoba, barrister, nominated by the company; David Campbell, of the same place, barrister, nominated by the employees, and the Honourable Chief Justice Mathers, of the same place, appointed by the Minister as chairman of the Board.

The Board held its first meeting on the twenty-fourth November, 1917, when the several members took the necessary oath of office, and fixed the twenty-sixth December for proceeding with the inquiry. It was impossible to fix an earlier date because two members of the Board were also members of a Board then sitting concerning a dispute between the Canadian Pacific Railway Company and its trainmen.

On the twenty-sixth December the Board met as per appointment, and were attended by Mr. Warren, assistant to the general manager of the company, representing the company, and by Mr. Fljozdal, chairman of the general committee of the employees; Mr. M. C. Lay, vice-chairman of the general committee, and Mr. Crick, Mr. Abrahamson and Mr. Maggs, members of the committee representing the men. At the subsequent meetings the company was represented by Mr. Cameron, assistant general manager, with the exception of the one held on the second January, 1918, at which Mr. Warren also was present. Mr. Woods was present as one of the employees' committee from and including December 27, and Mr. Ward from and including December 28.

Upon opening up the matters involved, it was found that the locality of the dispute extended over the main line, branches and yards of the railway company from Port Arthur, Ont., to the Pacific coast, and included 45 miles of line in the United States.

It further appeared that the employees had, on or about the seventh day of June, 1917, given notice that they desired changes in that portion of the existing schedule which deals with rates of pay, and on or about the fifth October last they applied to your department for the appointment of a Board, and submitted therewith the proposed new wages schedule now on file in your department, which constitutes the material in writing on which the application for a Board was based.

The employees sought a re-classification of a number of the yards, and also sought an increase in pay of 75 cents per day, both for those paid by the day and those paid by the month, in the latter case claiming an increase of 75 cents per day for a 30 day month.

Meetings of the Board were held at which the parties were present on the twenty-sixth, twenty-seventh and twenty-eighth days of December, 1917, and on the second of January, 1918, when all the matters of difference were very fully discussed by the representatives of both parties, and both parties expressed the view that they had given all the evidence they desired to give and had made all the representations to the Board that it was their desire to make.

Classification of yards.—The parties were able to agree upon the classification set out in Schedule A hereto, except as to Morris, which in the existing schedule is classed as a second-class yard. The company contended that Morris had ceased to be of sufficient importance to belong to either first or second class. The employees would not agree that Morris should be stricken out of the second class and it was left to the Board to decide the dispute.

Rates of pay.—The employees based their claim to the increase asked on the increased cost of living. In support of their claim they filed with the Board tables published in the *Labour Gazette* of June and October, 1917, showing the increase in the cost of food, fuel, lighting and rent between September, 1916, and September, 1917.

The company resisted the claim by pointing out that a new schedule came into force on the first November, 1916, by which substantial increases were granted to the men, these increases averaging about six and a half per cent. They also filed statements from nine different railways operating in the United States north of St. Paul and Minneapolis, showing that the rates of pay to similar employees on these various lines were in the great majority of cases considerably below those already paid to the men by this company. They also filed the schedule of the Grand Trunk Pacific and the majority and minority reports of a Board of Conciliation recently made upon a dispute between the Canadian Pacific Railway Company and its maintenance of way employees.

The employees replied to these statements that, excepting in two cases the United States companies referred to do not deal with the men collectively, and that in the case of the two excepted companies there were better wages paid than on any of the others. They also pointed out that the conditions of labour on other railroads varied so that no fair conclusion could be drawn from a comparison of the wages paid. They also pointed out that the majority report in the case of the Canadian Pacific Railway Company had not been accepted by the employees, and in the case of the Grand Trunk Pacific, that the men had recently asked for a revision of their schedule.

Findings of the Board.—The Board held meetings on the seventeenth, eighteenth, nineteenth, twenty-second and twenty-third January, 1918, at which all the evidence adduced before them and the representations of the parties was carefully weighed and considered, with the result that the Board has been able to arrive at a unanimous decision upon all points in dispute. A new schedule of rates of pay has been prepared in accordance therewith, which new schedule is appended as Schedule A to this report.

Classification of yards.—After giving the matter full consideration, the Board has come to the conclusion that the contention of the company with respect to Morris is well founded and that it should be stricken out of the list of second-class yards.

Rates of pay.—Upon the general question, we find that the employees have made a case for a substantial increase of pay. By the evidence we are satisfied that since the existing schedule came into effect on the first November, 1916, there has been a large increase in the cost of living. It was recognized that this increase is abnormal, and the employees did not ask for, nor do we think they should receive, an increase in wages sufficient to entirely absorb this abnormal increase in the cost of living, but we do think that they are entitled to a substantial increase. Our attention was drawn to the fact that the wages paid to the maintenance of way men on the Canadian Government railways, western lines, were much higher than the wages at present paid to the employees by the company, and that the Canadian Government railways schedule came into effect in May, 1917, by agreement between the general manager of the western lines and the men, and that on District No. 3 on the Government Railway, from Mission to Transcona, the conditions of life and operation are practically identical with that on the company's lines.

With those matters in mind, we have come to the conclusion that foreman and skilled labourers should generally receive an increase of 45 cents per day, and that an increase of from 35 cents to 40 cents per day be given to the other classes of employees.

The employees asked that "foremen in charge of steel, ballast and other important extra gangs shall receive the maximum," and that a note be inserted to that effect. The Board have agreed to allow this amendment, inserting the words "large and" between the words "other" and "important," so that the clause shall read: "Foremen in charge of steel, ballast and other large and important extra gangs shall receive the maximum."

The existing schedule has this item: "Snow plow—wing men—foremen, ... per day; labourers, ... per day." The employees suggest that these two items be eliminated and replaced by two other items: "Foremen working in snow plow or flanger, ... per day and expenses; labourers working in snow plow or flanger, ... per day and expenses." The Board have decided to refuse the amendment suggested by the employees and to retain the old classification, adding, however, the following note: "Note: Any section foreman working as a labourer in a snow plow or flanger shall receive not less than his regular rate of pay."

Under the head "carpenters," the employees suggested that the sliding scale at present in existence should be eliminated and that only a minimum rate per day be fixed. The Board consider that the sliding scale, with a difference of 25 cents per day between the maximum and minimum should be retained.

The employees also asked for the insertion of a provision that there should be for bridgemen "30 cents per day increase on minimum after one year's service until the maximum is reached." By this request the employees are asking a variation of section 17, clause (b) of the rules. This clause provides that the rate of increase shall be 15 cents per day and that the maximum shall be reached after five years, thus providing for a differential of 75 cents between the minimum and the maximum. The Board have come to the conclusion that the differential should remain at 75 cents, but that the maximum should be reached at the end of three years' continuous service, and have consequently provided for a 25 cents per day increase after one year's service until the maximum is reached. Article 17, clause (b) of the rules is hereby amended accordingly.

The Board desires to express its appreciation of the courtesy and candour with which the inquiry was conducted by both the representatives of the company and of the men. Evidence was not given under oath, but each side accepted the oral and written statements of the other without further verification.

We recommend that the rates of pay given in the schedule hereto appended be accepted by the parties as a fair settlement of the matters in dispute, and that such new rates take effect as of the first day of January, A.D. 1918.

All of which is respectfully submitted.

Dated at the city of Winnipeg, this twenty-third day of January, 1918.

(Sgd.) T. G. MATHERS,
Chairman of Board.

(Sgd.) D. CAMPBELL,
Member of Board.

(Sgd.) JOHN T. HAIG,
Member of Board.

SCHEDULE A

RATES OF PAY

TRACKMEN

Section foremen at Port Arthur, Rainy River, Paddington, Fort Rouge, Portage la Prairie, Brandon, Dauphin, Saskatoon, Edmonton, North Battleford and Drumheller	$3.90 per day
Section foremen at Atikokan, Fort Frances, Beaduette, Emerson Junction, Belmont, Westside, Neepawa, Kipling, Radville, Swan River, Prince Albert, North Regina, Humboldt, Kamsack, Vermilion, Kindersley, Hanna, Big Valley, Calgary, Morinville, Kamldcops, Port Mann, Lucerne, Boston Bar, Blue River and North Saskatoon	$3.70 per day
Section foremen at all other points	3.50 " "
Section or permanent labourers—	
In all first-class yards	2.60 " "
At all other points	2.55 " "
Assistant foremen in yards	3.50 " "
Foremen of extra gangs	$3.80 to 4.35 " "

NOTE—Foremen in charge of steel, ballast and other large and important extra gangs shall receive the maximum.

First assistant foremen of extra gangs	$3.50 per day
Second assistant foremen of extra gangs	3.35 " "
Snow plow and flanger foreman	4.50 " " and expenses
Snow plow wing-men	$3.90 per day
Snow plow labourers	2.85 " "
Snow plow—general—Expenses and regular rates.	

NOTE—Any section foreman working as a labourer in a snow plow or flanger shall receive not less than his regular rate of pay.

Track watchmen	78.00 to 80.50 per month
Signalmen at level crossings	$70.00 per month
Signalmen at interlocking crossings—	
13 levers or under	$73.50 per month
14 to 24 levers	80.00 " "
25 levers and over	95.00 " "
Signal repair men or maintainers	90.00 " " and expenses

BRIDGE AND BUILDING DEPARTMENT

Yard and shop foremen	$4.80 per day
Road foremen	4.65 " "
Carpenters	3.90 to 4.15 per day
Bridgemen	3.10 to 3.85 per day

NOTE—25c per day increase on minimum after one years' continuous service until maximum is reached.

B. and B. labourers	$2.85 per day
Painters, foremen	4.65 " "
Painters	3.75 " "
Bridge watchmen	$75.60 per month..
Pump repairers	111.00 " " and $1.00 per day expenses when away from headquarters.
Pumpmen—one pump	$74.00 per month
Pumpmen—each additional pump	5.00 " "
Pumpmen—single pump where 2 men employed	74.00 " "
Pumpmen—with single pump and doing coal hoisting	74.00 " "

(Sgd.) T. G. MATHERS,
Chairman of Board.
(Sgd.) D. CAMPBELL,
Member of Board.
(Sgd.) JOHN T. HAIG,
Member of Board.

Correction

(Copy.)

Court of King's Bench,
Winnipeg, January 28, 1918.

Hon. Thos. W. Crothers,
Minister of Labour,
Ottawa, Ont.

Sir,—

Re Canadian Northern Railway and its maintenance of way employees.

Referring to the report dated the twenty-third of January, 1918, which we made in this matter, and particularly to Schedule A, we have, since the report was sent to you, discovered that, owing to inadvertence in copying the Schedule, some words were omitted which should have been inserted.

The fourth item in Schedule A is as follows: "Section or permanent labourers, in all first-class yards, $2.60 per day."

The words "and second-class" should have been inserted between the words "first-class" and "yards," so that the clause should read: "Section or permanent labourers, in all first and second-class yards, $2.60 per day."

This is as the clause was originally drafted, but in copying the words referred to were inadvertently omitted.

This letter should be attached to and become part of our report.

We have the honour to be,
Sir,
Your obedient servants,

(Sgd.) T. G. MATHERS,
Chairman of Board.
(Sgd.) D. CAMPBELL,
Member of Board.
(Sgd.) JOHN T. HAIG,
Member of Board.

INDUSTRIAL DISPUTES DURING JANUARY, 1918

SEVEN strikes affecting 760 workpeople were reported as having commenced during January. There were in existence at some time or other during the month 11 strikes directly affecting 976 workpeople. The total time loss on account of industrial disputes was estimated at 7,898 working days, as compared with 33,540 in December and 108,331 in January, 1917. The time loss occasioned by the seven strikes which began in January was 5,890 days, while a loss

of 2,008 days is charged to the four strikes which commenced prior to January. Termination of dispute was reported in the case of two of the disputes commencing prior to January and four of the disputes commencing during January, leaving the four following unterminated strikes on record January 31: plumbers and steamfitters, St. John, N.B.; clothing workers at Toronto, Ont.; machinists at Hamilton, and moulders at Galt, Ont.

A strike of 160 clothing workers at Toronto occasioned the greatest time loss —3,520 working days—while a strike affecting 510 workpeople at Montreal, Que., although of short duration, was responsible for a time loss of 1,785 days. In a strike of packing-house employees at Toronto, 107 workpeople were involved. Less than 50 workpeople were affected by the other strikes recorded during the month.

INDUSTRIAL DISPUTES IN JANUARY, 1918.

Industry or occupation	Particulars	Number of employees affected	Time loss in working days
	DISPUTES COMMENCING PRIOR TO JANUARY, 1918		
BUILDING AND CONSTRUCTION— Plumbers and steamfitters, St. John, N.B.	Commenced April 23, 1917. Demand for an increase in the rate of wages from 37½ to 50 cents per hour. Unterminated.	42	1,092
METALS, MACHINERY AND CONVEYANCES— Moulders, Galt, Ont.	Commenced, May 17, 1917. Demand for nine-hour day. Unterminated.	10	260
Boilermakers, Montreal, Que.	Commenced October 26, 1917. Discrimination in dismissal of employees. Strikers returned to work January 18, 1918. Employers to maintain an "open shop."	44	616
FOODS, TOBACCO AND LIQUOR— Cigar makers, Montreal, Que.	Commenced December 1, 1917. Demand for an increase of $1.00 per M for making cigars. Increased rate granted following negotiations. Strikers resumed work January 7, 1918.	10	40
	DISPUTES COMMENCING DURING JANUARY, 1918		
MINES, SMELTERS, AND QUARRIES— Coal mine employees	Commenced January 21, 1918. Delay in receiving pay cheques. Work resumed January 24 on receipt of pay cheques and a guarantee providing for prompt payment of wages in future.	25	50
METALS, MACHINERY AND CONVEYANCES— Moulders, London, Ont.	Commenced January 8, 1918. Demand for an increase in the rate of wages from $3.75 to 4.25 per day. Negotiations resulted in employers granting the rate demanded and work was resumed January 28, 1918.	18	288
Structural steel workers, electricians, steamfitters, carpenters and boilermakers, Montreal, Que.	Commenced January 16, 1918. Demand for restoration of 10 per cent bonus which had been discontinued. Firm granted 10 per cent increase after negotiations with strikers, who resumed work on January 21, 1918.	510	1,785
Machinists, Hamilton, Ont.	Commenced January 19, 1918. Against increase in daily hours from nine to ten. Unterminated.	10	100
CLOTHING— Clothing workers (coat, pants and vest makers), Toronto, Ont.	Commenced January 7, 1918. Alleged discrimination against members of union. Unterminated.	160	3,520
FOODS, TOBACCO AND LIQUOR— Packing-house employees, Toronto, Ont.	Commenced January 8, 1918. Demand for reinstatement of dismissed employee. Following negotiations employee was reinstated and work resumed by strikers, January 9, 1918.	107	107
MISCELLANEOUS— Waiters, and waitresses, Calgary, Alta.	Commenced, January 23, 1918. Demand for reinstatement of dismissed employee. Hotel management refused to reinstate employee. Strikers resumed work January 24, 1918.	40	40

INDUSTRIAL DISPUTES IN CANADA IN 1917

THE number of strikes which began in 1917 was 141. Seven disputes were carried over from 1916, making a total of 148 in existence in the year. Four strikes remained unterminated at December 31. Only one lockout was reported—in the case of 100 knitting mill operatives at Toronto, who were locked out when they charged that the management discriminated against members of their union. The number of employees involved in the 148 disputes was 48,329, and the number of employers was 714. The total time loss was estimated at 1,134,970 working days (ascertained by multiplying the number of working days in which the industry was idle by the number of employees involved in the dis-

TABLE I.—RECORD OF LABOUR DISPUTES BY YEARS

Year	No. of disputes		Disputes in existence in the year		
	In existence in the year	Beginning in the year	Employers involved	Employees involved	Time loss in working days
1901	104	104	273	28,086	632,311
1902	121	121	420	12,264	120,940

1909	69	68	397	17,332	871,845
1910	84	82	1,335	21,280	718,635
1911	99	96	475	30,094	2,046,650
1912	150	148	989	40,511	1,099,208
1913	113	106	1,015	39,536	1,287,678
1914	44	40	205	8,678	430,054
1915	43	38	96	9,140	106,149
1916	75	74	271	21,157	208,277
1917	148	141	714	48,329	1,134,970
Total	1,742	1,701	10,144	446,120	12,055,509

pute), there being three years in the 17 years of the departmental record in which the time loss was greater—1911, 1913 and 1903 respectively.

The most serious disputes in the year occurred in the coal mining areas in British Columbia and Alberta, known as District No. 18 of the United Mine Workers of America. On January 16, some 5,870 coal mine and coke-oven employees in the district went on strike and a time loss of 42,000 days was involved before the dispute was terminated. On April 1, 7,475 employees in the same district went on strike and the dispute was not terminated until July 3, when the Dominion Government appointed a Director of Coal Operations to take control of the mines. This dispute involved a loss of 512,075 days or 45 per cent of the total time loss in the year. Another serious strike was that of 1,600 employees at the smelter at Trail, B.C. This dispute, which began November 15, caused a time loss of 48,000 days.

A large number of disputes were of minor importance. In about 32 per cent of the cases not more than 650 employees were affected, and in about half of the cases there were not more than 100 workpeople. In a large proportion of the disputes also the time loss was comparatively small. In 42 per cent of the disputes the number of working days lost was under 500. The great majority of the disputes were also of short duration; in one third of the cases the dispute was terminated in five days or less, in 56 per cent in less than 10 days, and in 69 per cent in less than 15 days. Twenty-two of the disputes, or 15 per cent of the total, endured for more than 30 days.

As usual, Ontario had more disputes than any other province, there being 54 disputes, or 36 per cent of the total number, within its borders. As to time loss, however, Ontario ranked fourth with 5.7 per cent of the total number of working days lost. Alberta stood first with 34.2 per cent, British Columbia second with 29.1 per cent, and Quebec third with 25.6 per cent. The two strikes in the coal mines of district 18 accounted for the heavy time loss in Alberta and British Columbia—361,000 days being charged to Alberta and 192,975 days to British Columbia, on account of these two strikes. As usual the time loss in mining—55 per cent of the total—was greater than in any other industrial group, although only 14 per cent of the total number of disputes is charged to the industry. From the standpoint of time loss, the clothing trade was second with 24 per cent of the total time loss in the year and only 8 per cent of the total number of disputes. Mining also stood first from the standpoint of workpeople affected with 18,729, or about 39 per cent of the total. In transportation, 8,258 employees were involved, or 17 per cent of the total, and in clothing the number of employees affected was 6,983, or 14 per cent of the total. The metals, machinery and conveyances group was charged with a higher percentage of the total number of disputes than any other group—25.8 per cent—but the time loss in this group was only 6 per cent of the total.

In the disputes of the year, the question of wages was the most important cause, 74 disputes, or 50 per cent of the total number, being due to requests for increased wages, and 22 disputes, or 15 per cent of the total, to requests for increased wages and other changes. Thus, the demand for higher wages was the dominant cause in 65 per cent of the disputes. In 15 cases, or 10 per cent of the total, the dispute was due to a request for shorter hours. In about 3 per cent of the disputes the dominant cause was a demand for recognition of the union, "closed shop" or other trade union principles.

The figures show that 82 disputes, or 56 per cent of the total number, were terminated in favour of the employees, while 31 disputes, or 21 per cent of the total, terminated in favour of the employers. In 20 per cent of the cases

TABLE II.—INDUSTRIAL DISPUTES, 1917, BY NUMBERS OF EMPLOYEES INVOLVED

(1) Great North Western Telegraph Company's strike was interprovincial but is charged to Ontario as the great majority of the employees affected were in that province.

(2) Strikes in the Crow's Nest Pass Coal Mining District which is partly in Alberta and partly in British Columbia are charged half to each province. In such strikes, however, the numbers involved and the time loss in each province has been ascertained and charged accordingly.

TABLE VI—INDUSTRIAL DISPUTES, 1917, BY INDUSTRIES

	Disputes		Number Involved	Time Loss	
	No.	Per cent of total	Employees	Days.	Per cent of total

Total	148	100	48,329	1,134,970	100

the disputes ended in a compromise and 4 per cent were indefinite or unterminated. Of the total number of employees concerned, 62 per cent were involved in disputes which resulted in favour of employees, 13 per cent in disputes which terminated in favour of employers, and 23 per cent in disputes which were compromised. Comparing the results of the disputes and of the number of workpeople affected, it is shown that the employees were more successful in disputes in which comparatively large numbers of them were involved. The disputes decided in favour of employees concerned 368 workpeople on an average, while the corresponding average in disputes in which the termination favoured the employers was 206.

As to methods of settlement, 89 disputes, or 60 per cent of the total, were settled by direct negotiations between the parties, and 13 disputes, or about 9 per cent, were settled by conciliation or mediation, and in 11 cases, or about 7 per cent of the total, settlement was effected by arbitration. Four disputes were settled by reference to Boards of Conciliation under the Industrial Disputes Investigation Act.

STRIKES AND LOCKOUTS IN CANADA, 1901-1916

THE Department of Labour has just issued a report containing information collected to the close of the calendar year 1916 with respect to strikes and lockouts in Canada. In the report on this subject for the period, 1901-1912, issued in 1913, it was indicated that the department planned to issue similar reports periodically, supplementary to the statements on industrial disputes appearing in the *Labour Gazette* and in the Annual Report of the Department. The earlier report gave special attention to the quinquennial periods, 1901-1905 and 1906-1910, and the present volume gives special tables for the succeeding quinquennium. Comparisons are made with the statistics of industrial disputes for the periods 1901-1905 and 1906-1910, and in addition a brief survey is given of industrial disputes during the 16 years covered by the departmental record.

In the period 1901-1916 there were 1,594 strikes, which involved 9,430 employers, 398,391 employees and a time loss estimated at 10,920,539 working days. Perhaps the outstanding feature of the record is the comparatively slight industrial disturbance in Canada since the outbreak of the war. Disputes in progress when war began in August, 1914, were soon adjusted; only seven disputes occurred in the period from August 1 to December 31, 1914, and less than 300 employees were affected. In 1915 there were 43 strikes affecting 9,140 employees, and causing a time loss of 106,149 days—the smallest amount of disturbance from the standpoints of number of disputes, time loss and percentage of the total population involved ever recorded. Although in 1916 the number of disputes increased to 75, the year stands third in the record as to minimum of trouble. In 1911-1915, the five years with which the report deals most closely, the number of disputes—449—was lower than in either of the two previous quinquennial periods. The number of employees affected —127,959—shows a slight increase over the figures for the two previous periods —126,179 in 1906-1910, and 123,096 in 1901-1905—but the time loss of 4,969,739 days was much the heaviest of the three five-year periods.

From the standpoint of the number of disputes, industrial unrest in the period 1911-15, was greatest in the building, metal, clothing and transportation trades in the order named, and it is noteworthy that this order prevails throughout the three quinquennial periods. Time loss, however, was greatest in mining, in which industry 51.7 per cent of the time loss was recorded. The clothing trade stood second with 11.8 per cent, and building third with 11.2 per cent; in each of the other two periods building took second place. The time loss in mining and lumbering shows marked increases throughout the three periods, and there is also a steady increase in time loss in the metals group, although this is probably not disproportionate to the expansion of the industries of that class. The time loss in the foods and tobaccos group in the last quinquennium was

much heavier than in either of the two previous periods. In the building, woodworking, printing, and miscellaneous groups, the time loss in the last period was greater than in the second, but less than in the first. The figures of time loss for 1911-15 in the textile, leather, and general transportation groups diminished.

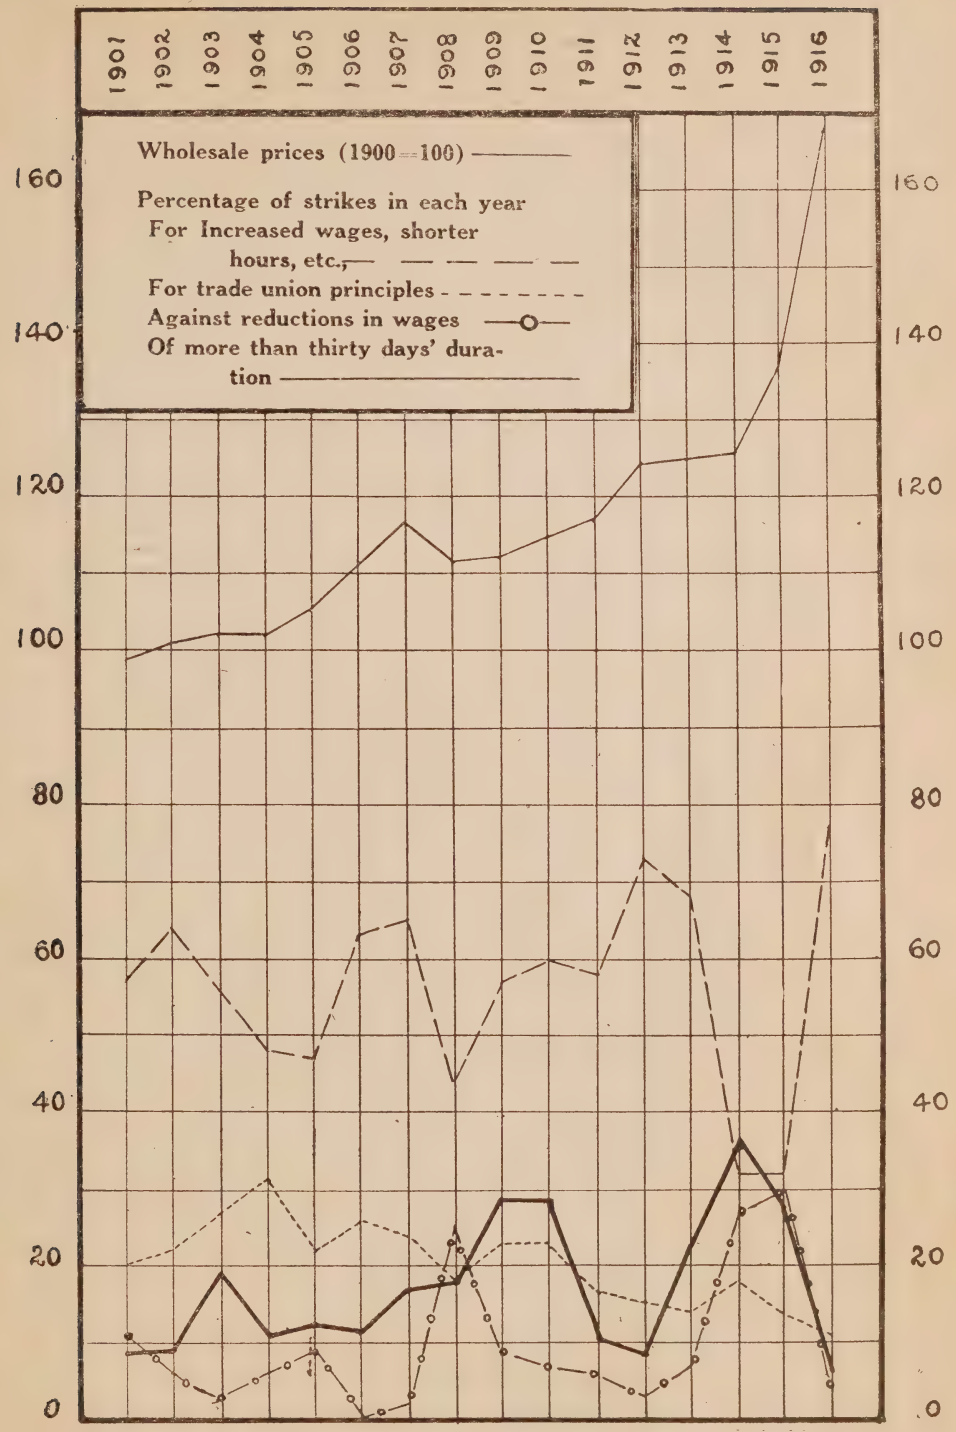
Mining contributes a constantly increasing share of the country's industrial unrest, about 25 per cent of the total time lost being chargeable to this industry in the first quinquennium as against approximately 47 per cent and 51 per cent in the periods 1906-10 and 1911-15, respectively. Leaving mining out of consideration, the volume of industrial unrest as measured by time losses shows a decline in the second quinquennium and the increase in the third period is greatly reduced. This is indicated in the following statement in which the figures for 1901-05 are taken as 100 in each case:

Time loss in working days—

	1901-05.	1906-10.	1911-15.
Total time loss	100	133.3	201.9
Time loss excluding mining	100	97.9	132.2

Industrial unrest in the mining industry is chargeable chiefly to coal mining, the time loss on account of labour troubles in coal mines being particularly heavy in the years 1911, 1913 and 1916. The greatest single factor in the time loss of 2,046,650 working days in 1911, the largest time loss in the 16 years of the record, was a seven-months strike of 7,000 coal miners in the Crow's Nest Pass and Southern Alberta districts. This strike involved a time loss of 1,580,000 working days. Another important factor in the 1911 record was the continuance until May, 1911, of a 22-months strike of coal miners at Springhill, Nova Scotia, which had been in existence from the summer of 1909. The number of working days lost through this strike in 1911 alone was 190,000. While the number of strikes in 1912, namely, 150, was larger than in any other year of the record, coal mining disputes were relatively unimportant. There were only two disputes in this industry, one at Coleman, Alberta, where 560 men were on strike for less than a week, and one at Cumberland, and Ladysmith, on Vancouver Island, which involved a time loss of 350,500 days in 1912. This strike which began September 17, 1912, was not settled until August 19, 1914; the time loss in 1913 on account of this dispute was 588,000 days. The only other dispute in coal mining in 1913 took place at Taber, Alberta, and involved only 37 employees. The continuance of the strike on Vancouver Island until August, 1914, involved a loss of 153,750 working days in that year, and a strike of 900 coal miners at Nordegg, Alberta, brought the time loss in coal mining up to 169,200 days in a total time loss for the year of 430,000 working days. In 1915 there were five relatively unimportant strikes in the coal mining industry, two of these took place at Westville, Nova Scotia, and one at Springhill, in the same province. Strikes of coal miners at Lovettville and Drumheller, Alberta, accounted for the remaining two. The time loss on account of these strikes was 16,794 days in a total for the year of 106,000 days. In 1916 strikes in coal mines accounted for 73,000 days in a total time loss of 208,000 days. These strikes, which were of short duration, took place at Stellarton and

Minto, Nova Scotia, at Bienfait and Taylorton, Saskatchewan, at Bellevue, Alberta, and South Wellington, British Columbia, and two in the Crow's Nest Pass and Alberta coal fields.



The record of the distribution of strikes or lockouts among the provinces during the period 1911-15 places Ontario, the most populous province, in the lead with 43.4 per cent of the total number. Quebec ranking second with 16.7 per cent. Measured by working days lost, however, the economic disturbance was greatest in British Columbia, that province recording 35 per cent of the total time loss. Interprovincial disputes caused 28.9 per cent of the time loss, and disputes in Ontario, which province ranked third from this standpoint, caused 13.5 per cent of the time loss.

The great majority of the disputes concern comparatively small numbers of employees. In 61 per cent of the disputes in the period 1911-1915, less than one hundred employees were involved. There were 10 disputes in which the time loss was 100,000 days or upwards, and these disputes accounted for almost 70 per cent of the total time loss for the period. The majority of the disputes were also of short duration; almost 30 per cent of the disputes in the period 1911-1915 existed for less than five days and 57 per cent endured not more than 20 days. Disputes in this period were of greatest duration in building and mining, in which industries 18.7 and 17.3 per cent of the disputes, respectively continued longer than 30 days.

The majority of the disputes in the period 1911-1915 were due to questions of wages and hours, about 70 per cent of the disputes and 63 per cent of the time loss being due to this cause. Three per cent of the disputes and 20.7 per cent of the time loss were due to demands for recognition of the union, and 2.2 per cent of the strikes and 5.2 per cent of the time loss were on account of sympathetic strikes. As to the results of the disputes, 139 or 30 per cent resulted in favour of the employees, 164, or 36 per cent in favour of the employers, 79 or 17 per cent were compromised and in 67 cases the result was indefinite.

Direct negotiations between the parties or their representatives ranks first as a method of settlement, 196 of the 449 disputes having been settled in this way. Thirty-one disputes were settled by conciliation or mediation, three by arbitration and five by reference to a Board under the Industrial Disputes Investigation Act; in 104 cases the employees returned to work on the employers' terms and in 40 cases the dispute was settled by replacement of the workpeople; in 70 cases the dispute was settled otherwise, or there was no settlement, or the settlement was indefinite or not reported.

The factors which determine the causes and duration of disputes are found in a measure in the general economic situation of the country. The accompanying chart indicates that the percentage of strikes in each year in which the demands for increased wages and shorter hours were dominant causes rises or falls, generally speaking, with the curve of prices. The commercial crises of 1903-1904 and 1907-1908 seem, however, to have retarded the demand for higher wages much more than the advance in prices, while in the period of depression which began in 1913 the downward trend of the demand for higher wages proceeded simultaneously with the move-

ment upward of prices. On the other hand the percentage of strikes to prevent wage reductions rises perceptibly in the crises of 1903-1904 and 1907 and 1908 and during the depression at the time of the outbreak of the war. In the intervening periods of expanding employment and rising prices, strikes to secure higher wages increased.

As to the duration of strikes, the curve showing the percentage in each year of strikes of more than 30 days duration has the same general trend as the curves of prices, demand for higher wages and union recognition. It is noteworthy that when the crest of the wave of prosperity was reached in 1911-1912 there was a strong demand for higher wages, but the percentage of strikes continuing over 30 days declined. In the depression of 1913 and 1914 the number of prolonged strikes increased in apparent efforts to make wages conform to the cost of living and to prevent wage reductions, while in 1915 workmen opposed attempted reductions in wages, half the strikes of more than 30 days in that year being chargeable to this cause. In 1916 the steep advance in prices was concurrent with a strong demand for higher wages, but the decline in the percentage of the disputes which endured for more than 30 days indicated that in general adjustments were speedily effected.

The years 1903, 1911, 1912 and 1913 are prominent in the record as years of unrest and the year 1902, 1904, 1905, 1915 and 1916 as years of comparative calm. The heavy time loss in 1903 is due chiefly to a number of strikes in the building trades and one of over 3,000 men at Toronto in particular and a strike of 5,000 shoe workers at Quebec. The year stands third highest in the record from the standpoints of both time loss and number of disputes. In 1911, the year of heaviest time loss, there were prolonged strikes in the coal fields of the Crow's Nest Pass and at Springhill, Nova Scotia. In 1912 there was a strike of 6,000 railway construction workers in British Columbia, and in September a strike began in the coal mines at Ladysmith, Vancouver Island, which was not terminated until August, 1914. There were strikes of some magnitude in gold mines in the Porcupine district, of garment workers at Montreal and of cloak makers at Toronto. The most serious dispute in 1913 was that in coal mines on Vancouver Island. A number of disputes of lesser importance in the building and clothing trades, and a strike by saw-mill hands at St. John, New Brunswick, contributed to the total. The years 1902, 1904 and 1905 are years of low time loss in the period of comparative industrial peace before the era of expanding employment and advancing wages. They also show the influence of the crises of 1900-01 and 1903-04. The effect of the crisis of 1907-08 is no doubt reflected in the decline in the number of disputes. After the outbreak of the war there was a period of almost complete immunity from labour troubles and the year 1915 established a low record in time losses. The year 1916 stands third in the record as a year of low time loss.

REPORTS OF EMPLOYMENT BUREAUS

THE decrease in the demand for workers noted in previous months continued in December. During the month there was a decline of about 15 per cent, as compared with November, on the basis of the daily average of vacancies notified to 110 employment bureaus (80 commercial, 14 public and 16 philanthropic). As compared with the demand reported for December, 1916, by practically identical bureaus, there was a gain of about 14 per cent. The total number of vacancies notified to all offices in December was 30,525, a daily average of 1237.9, as compared with 1447.7 in December, 1916. The number of persons placed was 14,273, a daily average of 698.3 in November and 557.4 in December, 1916. The proportion of the total vacancies filled to the total vacancies notified was 47.3 per cent, as compared with 48.7 per cent in the preceding month and with 51.5 in December, 1916. As to employment for woman and girl workers, the number of vacancies notified was 4,554, a daily average of 184.6, as compared with averages of 224.7 in the month before and 243.1 in the corresponding period of 1916. The number of such workers placed was 1,597, a daily average of 70.8, as compared with 84.5 in November, 1917, and with 79.5 in December, 1916.

Of the five principal centres of labour distribution—Montreal, Toronto, Winnipeg, Edmonton and Vancouver—Montreal alone showed an increase in the demand for labour, both as compared with November, 1917, and with December, 1916; Toronto, Edmonton and Vancouver all reported decreases in December as compared with the preceding month, and gains as compared with December, 1916, while Winnipeg recorded declines in both cases. Of the smaller centres Ottawa and Regina showed increases in each comparison. Small gains were also noted in Saskatoon and Victoria.

The number of persons who obtained casual employment through the Salvation Army, the Young Women's Christian Association and other agencies was 1,751, a daily average of 72.0, as compared with averages of 71.5 in November, 1917, and 74.6 in December, 1916. The number of casual jobs secured was 4,218, a daily average of 173.2, as compared with 177.1 in the preceding month and with 142.5 in December, 1916.

EMPLOYMENT IN THE BUILDING TRADES AS INDICATED BY BUILDING PERMITS

EMPLOYMENT in the building trades, as indicated by the value of building permits issued in 35 cities, showed an increase during January as compared with the previous month, the total value of permits rising from $874,559 in December to $1,562,637 in January, an increase of $688,078, or 78.7 per cent. All the provinces, except New Brunswick, Ontario and Saskatchewan, recorded increases. As compared with the corresponding month of 1917, there was an increase of 11.5 per cent, the value for January, 1917, being $1,401,932. In this comparison, large increases were shown in Alberta, British Columbia and Nova Scotia. A small gain was also reported in Ontario.

The larger cities—Montreal, Toronto,

Winnipeg and Vancouver—all recorded increases as compared with December, 1917. Toronto and Vancouver also showed gains over January, 1918, while Montreal and Winnipeg reported declines in that comparison. Calgary, Victoria, Fort William and Halifax showed very large increases in both cases.

EMPLOYMENT IN THE BUILDING TRADES IN THE YEARS 1910—1917 AS INDICATED BY BUILDING PERMITS

DURING the year 1917 there was a slight decrease in the volume of employment in the building trades compared with 1916, as indicated by the value of building permits issued in the 35 cities with populations of 15,000 or over. The estimated cost of the building work in these cities in 1917 was $33,936,422, as compared with $39,724,286 in 1916, a decline of $5,787,864, or 14.6 per cent. In the accompanying table, which groups the cities by provinces, decreases are shown in all of the eight provinces included, except New Brunswick and Saskatchewan. British Columbia reported the largest decrease, 69 per cent, while in the other provinces the declines were comparatively small. All the larger cities, Montreal, Toronto, Winnipeg and Vancouver showed declines during 1917. Of the smaller centres, Sydney, Maisonneuve, Peterborough and Saskatoon recorded very large gains as compared with the previous year.

As the table presents the figures for each year beginning with 1910, the effect of the war upon employment in the building trades is plainly indicated. With the industrial depression of 1913-14 the total of building permits for the 35 cities declined in 1913 to $156,547,900 from $185,252,944 in 1912, which was probably the record year in the period of building and construction which began soon after 1900. In 1914, the first war year, there was a decline of 40 per cent, and in 1915 there was a further decline of almost 70 per cent. For the country as a whole building operations seem to have reached practically an irreducible minimum as the value of the permits issued in the 35 cities for the last three years has been almost stationary. There is, however, a greater shinkage in the volume of employment than appears from the figures on account of the increases in the estimates due to higher wages and advances in the cost of building materials.

The figures show that the pre-war level of employment in the building trades has been much better maintained in the Maritime Provinces than in other parts of the country. In the years 1915, 1916 and 1917, the total for the two Nova Scotia cities was higher than in any of the other five years of the record, and the showing for the two New Brunswick cities is also very good. In the province of Quebec there has been a steady decline since the high level of 1913. The heaviest decline took place in 1915 when permits for the five cities fell off about 50 per cent. The total for the 15 Ontario cities has fallen from $50,000,000 in the record years of 1912 and 1913 to $17,000,000 in 1917. The lowest level was reached in 1915 when there was a falling off of over 60 per cent from 1914, and there has been little or no recovery. In the western provinces the falling off in building has been much more marked than in Ontario and Quebec. In Manitoba, the 1917 figures represent a decline of 88 per cent from 1913, in Saskatchewan 90 per cent, in Alberta 95 per cent, and in British Columbia 85 per cent.

ESTIMATED COST OF BUILDING WORK IN THE YEARS 1910-1917, AS INDICATED BY BUILDING PERMITS ISSUED IN THIRTY-FIVE CITIES.

UNEMPLOYMENT IN TRADE UNIONS AT THE CLOSE OF DECEMBER, 1917

THE present article on unemployment among the members of local trade unions, which is the eighth quarterly report on the subject, deals with unemployment as at the end of December, 1917, and is based on returns received from 1,264 labour organizations with a total membership of 139,046, or about 87 per cent of the total trade union membership of the country. Trade unionists unemployed on account of trade disputes or disability were not included. For all occupations represented, 2.4 per cent of the members were unemployed as compared with 1.7 per cent in September, 1917, 2.2 per cent in December, 1916, and 8.7 per cent in December, 1915. The percentage unemployed at the end of

December is somewhat larger than was reported at the end of the previous quarter, and also than at the same time in 1916, due principally to seasonal slackness in the building trades and in the mining, quarrying and refining of ores group. Employment in the manufacturing industries, however, showed improvement over September, while, as compared with December, 1916, the volume of employment was slightly less. Transportation workers, on the contrary, were slacker than in September, 1917, and better engaged than in December, 1916.

Employment in the manufacturing and mechanical industries, as reported by 336 unions having a total membership of 36,062, was considerably brisker than in September, 1917, but it was scarcely as good as in December, 1916. The improvement in the first case is due principally to a greater volume of employment for the leather, boot and shoe workers, the glass bottle blowers, and in the printing trades. As to the subgroups, employment in metals, machinery and conveyances was not as brisk as in September. This is also true of the foods, tobacco and liquors trades and in the woodwork and furniture groups, while the percentage out of work among the clothing workers altered very slightly. Pulp and paper men, whose returns numbered 17, were scarcely as well engaged owing to the installation of a new scheme at one of the plants. Carpet weavers, in the textile group, as reported by four unions, were as usual well employed. The slight increase in the volume of unemployment in the manufacturing industries, as compared with December, 1916, is chiefly attributable to greater slackness among the garment workers and among workers in foods, tobacco and liquors. The printing, publishing and paper goods group, and the glass bottle blowers were also not so well employed, but there was improvement in the leather trades and in the woodwork and furniture trades. Metals, machinery and conveyances remained practically stationary.

Returns from 531 organizations of transportation workers, with a total membership of 59,598, indicate that .70 per cent of the members were out of work, as compared with .55 per cent at the close of September, 1917, and 1.6 per cent in December, 1916. In this group, steam railway employees, constituting about 73 per cent of the total membership reporting, were not quite so well engaged as in September, 1917, or December, 1916, while street railway men and navigation workers were better employed than at either time. This is evident with regard to navigation employees in particular. Teamsters, chauffeurs and drivers, as reported by six unions, appear to be uniformly busy.

In the mining, quarrying and refining of ores group, reports were received from 40 unions having a combined membership of 14,462. The percentage of unemployment was larger than in any previous quarter, except in the one ended December, 1915. This may be attributed to seasonal slackness among the quarry workers and the mill and smelter men. The percentage of miners unemployed remained stationary as compared with the preceding report, but an increase was shown as compared with the same quarter in 1916.

The percentage unemployed in the building and construction trades, according to returns received from 195 unions, with 15,621 members, was 9.58 per cent, as compared with 2.26 per cent at the close of September, 1917, 5.2 per cent at the end of December, 1916, and 28.3 per cent on December 31, 1915. This increase is, probably, largely due to the severe climatic conditions prevailing at the time throughout the country. Bricklayers, masons and plasterers, granite and stone cutters, tile layers, lathers and roofers and bridge and structural iron workers were especially slack. In no trade was there an improvement in the volume of employment as compared with September, 1917. In comparison with December, 1916, however, there was a smaller percentage out of work among the steam shovel and dredge men and

also among the tile layers, lathers and roofers.

In the public employment group, the number unemployed, as reported by 49 unions with 4,168 members, is slightly greater than in the preceding quarter, and also than in December of 1916 and of 1915.

Employment in the group of miscellaneous trades as indicated by returns received from 112 unions with a total membership of 8,935, was poorer than in both September, 1917, and December, 1916, but was much better than in December, 1915. In the first comparison, the increase in unemployment is due to slackness among the stationary engineers and firemen, the musicians and theatre employees and the hotel and restaurant workers. As compared with December, 1916, also, these tradesmen were not so well employed.

The percentages reported unemployed in the different groups of occupations are indicated in the following table:

TABLE I.

Occupation.	Dec. 1917	Sept 1917	June 1917	Mar 1917	Dec. 1916	Sept. 1916	June 1916	Dec. 1915

The following table summarizes the returns by provinces. As compared with September, 1917, Quebec was the only province to record a decline in the percentage of members unemployed. The increase was most noticeable in New Brunswick, while Manitoba and Alberta reported the smallest percentages out of work. In comparison with December, 1916, Quebec, British Columbia and Alberta showed slight percentage decreases.

TABLE II.

Province.	Dec. 1917	Sept 1917	June 1917	Mar 1917	Dec. 1916	Sept 1917	June 1916	Dec. 1915
Nova Scotia and Prince Edward Island	2.64	.11	.23	2.72	.74	.47	.49	.36
New Brunswick	3.07	.11	.20	1.78	1.66	.09	.8	.7
Quebec	2.96	4.66	2.23	2.95	3.62	2.43	1.8	9.9
Ontario	2.44	.99	.94	1.53	1.55	.72	1.7	8.1
Manitoba	1.07	.86	58	2.81	1.01	.83	1.2	3.2
Saskatchewan	2.41	.46	.25	1.77	1.63	2.19	2.6	7.0
Alberta	1.55	.17	.84	1.09	1.70	.92	3.63	4.3
British Columbia	3.05	2.05	2.50	3.00	3.86	3.37	5.3	14.3
Canada	2.42	1.71	1.25	2.16	2.17	1.47	2.1	8.7

The percentages reported idle in some of the largest industrial centres are indicated in the table which follows:

TABLE III.

City.	Dec. 1917	Sept 1917	June 1917	Mar 1917	Dec. 1916	Sept 1916	Jne 1916	Dec. 1915

EMPLOYMENT FOR CIVIC EMPLOYEES IN FIFTEEN CITIES

EMPLOYMENT for civic employees during the first payroll period of two weeks in January, as indicated by reports from 15 cities, showing the numbers of workers temporarily employed and the wages paid these employees, showed a decrease of less than one per cent in the number of employees and an increase of about 22 per cent in the wages paid. In January, 9,042 persons were temporarily employed and the payrolls amounted to $272,234.29, as compared with 9,067 employees and an aggregate payroll of $222,227.18 in December. St. John, Montreal and Brandon showed increases both in the numbers of workers and the wages paid, while Ottawa, London, Moose Jaw, Edmonton, Vancouver and Victoria reported smaller numbers of employees and smaller payrolls. Hamilton and Winnipeg were the only cities showing greater numbers employed and small payrolls, while Toronto, Saskatoon and Calgary reported declines in the numbers of temporary employees with increases in wages paid.

The accompanying table summarizes reports from nine cities which are available since July, 1916. It will be seen from these figures that as regards the number of workers a decline began in January, 1917, and continued almost without interruption to November. In December, however, a slight upward tendency is evidenced and this is continued in January. As to wages, the total for January is the largest reported in the past four months.

EMPLOYMENT (BOTH CONTRACT AND MUNICIPAL WORK) AFFORDED WORKPEOPLE TEMPORARILY EMPLOYED BY FIFTEEN CITY CORPORATIONS, DECEMBER 1917, AND JANUARY, 1918.

MIGRATION AND SETTLEMENT

OF persons other than citizens of the United States, 2,443 left the United States in November, 1917, to take up permanent residence in British North America, as compared with 2,609 in October, 1917; 2,226 persons (other than citizens of the United States) departed from British North America in November, 1917, to take up permanent residence in the United States, as compared with 3,132 in October, 1917, indicating for the United States an inward balance of 217 in November.

HOMESTEAD ENTRIES.—During December, 1917, there were 108 homestead entries in Manitoba, 147 in Saskatchewan, 168 in Alberta and 13 in British Columbia, a total of 436, as compared with a total of 827 in November, 1917, and 727 in December, 1916.

The following shows by provinces and nationality the number of those who took up homesteads during the last quarter of 1917:

HOMESTEAD ENTRIES BY PROVINCES AND NATIONALITY OF HOMESTEADERS, OCTOBER-DECEMBER, 1917

LANDS PATENTED.—According to the Department of the Interior's statement of letters patent covering Dominion lands in Manitoba, Saskatchewan, Alberta, British Columbia and Yukon Territory for the month of December, 1917, the number of patents was 1,670 and the number of acres 269,459.85, as compared with 1,766 patents and 288,108.78 acres in November, 1917, and 2,080 patents and 331,078.68 acres in December, 1916.

The following statement gives details of lands patented during the last quarter of 1917, with a comparison of the figures for the same period in 1916:

PRICES, RETAIL AND WHOLESALE, IN CANADA, JANUARY, 1918, AND IN OTHER COUNTRIES

IN prices the upward movement continued, but in wholesale prices was not as steep as in recent months. Foods were higher, but there were some decreases in certain materials and in fruits.

In retail prices the average cost of a weekly family budget of foods averaged $12.42 at the middle of the month as compared with $12.24 in December, $10.27 in January, 1917, and $7.73 in January, 1914. Slight increases appeared in all the commodities included, except butter and sugar, in which there were declines, and in flour and tea, which were steady. The greatest increase appeared in eggs. Coal and wood also advanced.

In wholesale prices the index number reached 257.1 for January as compared with 253.5 for December, 208.1 for January, 1917, and 136.5 for January, 1914. The greatest increases during the month were in the prices of grain, animals, meats, dairy products, vegetables, miscellaneous foods, cottons, drugs, and in the miscellaneous group. Decreases occurred in fodder as the Food Controller had fixed the prices of bran and shorts. There were also decreases in fresh fruits, sugar, hides, and miscellaneous building materials. In metals there were slight increases.

The weekly budget for a family of five, including staple foods, laundry starch, coal, wood and coal oil, and rent, is based upon the estimated importance of the various commodities included, these being slight modifications of those employed in similar calculations by various official bodies. For some articles comparatively large quantities are included, owing to the omission of other important foods of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. As market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly the relative proportion of expenditure on the various foods therefore tends to be maintained. In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the difference in quality. It is estimated that these calculations represent from 60 to 80 per cent of the expenditure of an ordinary family, according to the total income.

The index number of wholesale prices is based upon the quotations of 271 commodities, one having been dropped in 1915, and is the simple average of the percentages which the current prices of the several commodities bear to their average prices for the base period, 1890-1899, these being therefore made equal to 100.

The accompanying tables and notes give details as to the prices movement during the month and as compared with the same month in the previous year. The table of retail prices shows the prices of some 30 foods at the middle of the month in 60 localities in Canada having a population of 10,000 or over. Quotations are obtained by the correspondents of the *Labour Gazette* from dealers doing a considerable trade with workingmen. All prices are for delivered goods. The rates for rent are for six-roomed houses in districts inhabited by workingmen.

Retail Prices

In sirloin steak the prices advanced in Halifax, Montreal, Belleville, Peterborough, Orillia, Winnipeg, Medicine Hat, Vancouver, and Victoria. Shoulder roast was also higher at Halifax, Fredericton, Three Rivers, Montreal, Ottawa, Brockville, Belleville, Peterborough, Toronto, Brantford, Galt, Owen Sound, Cobalt, Sault Ste. Marie, Winnipeg, and Medicine Hat. Mutton advanced at St. John, St. Hyacinthe, Montreal, Stratford, Chatham, Sault Ste. Marie, Medicine Hat, Edmonton, Calgary, and Vancouver. Fresh pork advanced at St. John, St. Hyacinthe, Belleville, Peterborough, Brantford, Medicine Hat. Salt pork was up at Moncton, Three Rivers, Brantford, Guelph. Breakfast bacon advanced at Peterborough, Hamilton, Galt, Stratford, Calgary, New Westminster, and Victoria, but declined at Sydney, St. John, Kitchener, London, St. Catharines, Nanaimo. Lard was higher at Halifax, Fredericton, St. John, Three Rivers, Hull, Toronto, Niagara Falls, Brantford, Galt, Chatham, Windsor, Port Arthur, Prince Albert, Calgary, Victoria, and Nanaimo.

Fresh eggs advanced at Amherst, Moncton, St. John, Fredericton, Sherbrooke, St. Hyacinthe, Montreal, Hull, Ottawa, Brockville, Belleville, Peterborough, St. Catharines, Hamilton, Brantford, London, St. Thomas, Owen Sound, Cobalt, Prince Albert, Medicine

*December only. ‡Halifax and Saskatoon omitted. †Saskatoon omitted. §Revised.

Hat, Edmonton, Calgary, Lethbridge, and Vancouver, but declined at Galt, Nelson, Trail, New Westminster, and Nanaimo. Storage eggs were higher at Fredericton, Hull, St. Catharines, Brantford, St. Thomas, Brandon, Edmonton, Calgary, and Lethbridge, but declined at Sherbrooke, Woodstock, Stratford, and Regina. Milk declined at Moncton, but advanced at Sorel, St. Hyacinthe, Hull, Guelph, Medicine Hat. Dairy butter was lower at Charlottetown, St. John, Newcastle, Hull, Brockville, Orillia, Galt, Guelph, Kitchener, and Vancouver, but advanced at Three Rivers, Brantford, and Victoria. Creamery butter declined at Charlottetown, Ottawa, Toronto, Hamilton, Brantford, London, Owen Sound,

Winnipeg, and Brandon. Cheese was higher at St. John, Chatham, Windsor, Hull, Galt, Windsor, but was lower at Kingston, St. Catharines, and Medicine Hat.

Bread was higher at Moncton, Newcastle, St. Johns, and Brockville. At Brantford some bakers were selling at lower prices after the middle of December. Rolled oats advanced at Westville, Fredericton, Three Rivers, Sherbrooke, Toronto, Galt, London, Prince Albert, Fernie, and Nelson.

Rice was higher at Westville, Charlottetown, Montreal, Niagara Falls, Edmonton, Calgary, St. John, Brantford, and Regina. Tapioca was higher at St. John, Sherbrooke, St. Hyacinthe, Montreal, Ottawa, Brockville, Niagara Falls, St. Catharines, Owen Sound, Edmonton, and Victoria.

Canned tomatoes were higher at Charlottetown, St. John's, Cobalt, Lethbridge, but declined at Toronto, Chatham. Canned peas were higher at Charlottetown, Fredericton, Three Rivers, St. Johns, Hull, London, and Windsor. Canned corn advanced at St. John's, Hull, Ottawa, Galt, Medicine Hat, but declined at St. John and Toronto. Beans were higher at Moncton, Fredericton, St. Catharines, Cobalt, Brandon, Prince Albert, but declined at Woodstock. Evaporated apples advanced at Halifax, Moncton, Fredericton, Newcastle, Quebec, Three Rivers, St. Hyacinthe, St. John's, Hull, Ottawa, Windsor, Cobalt, Port Arthur, Fort William, Edmonton, Calgary, Lethbridge, 30c per pound being reached in these three cities and also in Three Rivers. Prunes advanced at St. John, Quebec, St. John's, Windsor, Owen Sound, Prince Albert, but declined at Fredericton and Brantford.

Sugar declined at Hull, Woodstock, Chatham, Regina, and New Westminster, but advanced at St. John's, Kingston, and Stratford.

Potatoes declined at Halifax, St. John, Hamilton, Brantford, Kitchener, St. Thomas, and New Westminster, but advanced at Moncton, Fredericton, Newcastle, Toronto, St. Catharines, Chatham, Windsor, Cobalt, Sault Ste. Marie, Winnipeg, Prince Albert, Medicine Hat, Edmonton, Lethbridge, Fernie, and Trail.

Anthracite coal averaged higher in Quebec and Ontario. Bituminous coal averaged higher in Quebec, Ontario, Alberta, and British Columbia, but was lower in Manitoba. Wood was also upward.

Wholesale Prices.

GRAINS AND FODDER.—Prices for wheat were unchanged at the levels fixed in the autumn. Barley rose to $1.49 per bushel at Winnipeg and to $1.48-1.50 at Toronto. Oats rose to 90c at Winnipeg and Toronto. Flaxseed reached $3.21 per bushel. Peas were steady at $3.70-3.80, and rye at $1.78. Hay rose to $15.50 at Montreal. Baled straw was easier at Toronto. Bran declined to $35.00, and shorts to $40.00 at Toronto, being fixed by the Food Controller.

ANIMALS AND MEATS.—Western cattle rose to $11.75 per hundred pounds, and at Toronto the best cattle reached $12.75. Beef rose to $23.00 per hundred pounds for hindquarters. Veal also rose, the best being up to $23.50. Live hogs rose to $18.25 at Toronto, and dressed hogs reached $24.00. Bacon, ham and salt pork were steady. Lard advanced to 29c per pound. Sheep advanced to $15.50, but eased off. Chickens rose to 33c per pound, and fowl reached 29-30c. Turkeys were also high at 35-36c.

DAIRY PRODUCTS. — Creamery butter reached 47½c per pound at Montreal and 48c at Toronto. Dairy prints declined from 35-42c to 30-37c. Eggs were higher at Montreal, the best rising from 65-70c to 70c. Storage eggs rose from 44-48c per dozen to 49-53c. Milk was up from 40c to 45c per gallon at Victoria.

FISH.—The export markets for Porto Rico and Europe were very strong, but transportation to Europe was difficult to obtain. The supply of salt fish was very light, there being very few herrings and practically no mackerel.

All commodities	262†	257.1	253.5	208.1	172.1	138.9	136.5	137.1

*Preliminary figures. †Nine commodities off the market, fruits, vegetables, etc. One line of spelter was dropped in 1915.

OTHER FOODS. — Winter apples were easier and bananas and lemons were lower. Prunes were higher at 12¾c per pound, but raisins were easier at 6-10½c. Onions were up to $3.50 per hundred pounds. Potatoes rose to $2.25 per bag at Toronto and $2.50 at Montreal. Soda biscuits rose from 12c to 13c per pound. Oatmeal advanced to $5.75-6.50 per bag. Sugar was 10c to 40c per hundred pounds cheaper. Molasses advanced to 89c per gallon. Cream of tartar and salt were higher.

TEXTILES. — Raw cotton was up to 32.6c per pound and coloured cottons averaged higher. Silk thread advanced.

HIDES, LEATHERS, BOOTS AND SHOES. — Beefhides, calfskins and horsehides declined. In the leather market heavy grades were reported scarce, but in light grades the supply was better. The demand for the manufacture of harness was strong, but boot manufacturers were buying heavily.

METALS AND IMPLEMENTS.—Tin plates, scrap iron and cast steel advanced. Quicksilver and silver were lower.

FUEL AND LIGHTING.—Coal and coke were steady, but calcium carbide advanced.

BUILDING MATERIALS.—In lumber, a fairly good demand was reported in Ontario and old stocks had been pretty well cleaned up. The demand for lath was improved. It was reported that the Ontario cut would not be above 60 per cent of that in the previous year. At St. John the market was quiet, but the stocks were low. Montreal reported a good demand for export to the United States. Iron pipe eased off, also roofing pitch, red lead and copper wire. Sash cord and cement were higher. Linseed oil, putty, shellac, and turpentine were higher, but white lead was lower.

DRUGS AND CHEMICALS. — Alcohol, opium and soda ash were higher.

MISCELLANEOUS.—In raw furs, mink advanced to $8.50 per skin; raccoon to $3.75, and skunk to $5.50. Malt advanced to $1.75 per bushel. Rubber, raw, rose to 49c per pound. Soap was also higher.

Prices in Other Countries

In the United Kingdom the Ministry of Labour reported a slight average increase in the retail cost of foods on January 1 as compared with December 1, so that the level was 106 per cent above that on July, 1914. The chief changes were an advance in butter and a fall in tea. The Board of Trade index number of wholesale prices was reported as shown in the accompanying table by groups.

BRITISH BOARD OF TRADE INDEX NUMBERS OF WHOLE SALE PRICES

	1917	1916	1915	1914	1913	1912
Coal and metals.....	182.0	165.8	116.7	86.7	92.5	84.9
Textiles (raw materials)	270.1	180.1	119.8	128.8	135.0	119.6
Food, Drink and Tobacco.....	246.1	189.4	154.1	120.9	117.7	119.9
Miscellaneous	256.0	204.0	143.8	111.3	109.4	110.1
All.....	242.9	186.5	143.9	117.2	116.5	114.9

The index number of the *Economist* at the end of January showed a decline, both the cereals and meat groups and the minerals group being lower.

In the United States, wholesale prices were higher at the beginning of January, new high records being reached. Grain was upward, also two grades of leather, textiles, tin, coal, and coke, window glass, hops, and tobacco, while there were lower levels in livestock, fruits, naval stores, and chemicals and drugs. In provisions, milk, butter and eggs were higher, but beef and hogs were down.

FAIR WAGES CONTRACTS, JANUARY, 1918

DURING January the Department of Labour received for insertion in the *Labour Gazette* information relative to eight fair wage contracts. Of these contracts, four were awarded by the Department of Public Works and four by the Department of Railways and Canals. Five of the contracts contained the usual fair wage clause, while the remaining three contained fair wage schedules.

DEPARTMENT OF RAILWAYS AND CANALS.—Construction and completion of an extension to the ice-house at Chaudiere Junction, P.Q., on the line of the Intercolonial Railway. Name of contractor, A. J. Morin, Wolfe, P.Q. Date of contract, December 27, 1917. Amount of contract, $4,350.

DEPARTMENT OF RAILWAYS AND CANALS.—Construction and completion of several buildings at Port Borden, Prince Edward Island Railway. Name of contractor, Peter G. Clarke, Summerside, P.E.I. Date of contract, January 22, 1918. Amount of contract, $2,280.

DEPARTMENT OF PUBLIC WORKS. — Post office fittings in public building, Faubourg St. Jean, Quebec, Que. Name of contractor, Jos. Bourque, Hull, Que. Date of contract, January 11, 1918. Amount of contract, $1,250.

DEPARTMENT OF PUBLIC WORKS. — Supply of 125 four-cap drawer vertical filing sections, No. 22CV. (S-1945) for Dominion Public Buildings, Ottawa, Ont. Name of contractors, Office Specialty Manufacturing Company, Limited, Ottawa, Ont. Date of contract, January 25, 1918. Amount of contract, $5,600.

DEPARTMENT OF PUBLIC WORKS. — Alterations and additions to plumbing and heating system in public building, Cayuga, Ont. Name of contractor, T. J. Minnes & Company, Brantford, Ont. Date of contract, December 31, 1917. Amount of contract, $2,196.

The fair wage clause obtaining in such cases was inserted in the above contracts.

DEPARTMENT OF RAILWAYS AND CANALS.—Construction and completion of a one stall frame engine house at Thorburn, N.S., on the line of the Intercolonial Railway. Name of contractor, James W. Douglas, New Glasgow, N.S. Date of contract, January 22, 1918. Amount of contract, $3,625.

Trade or class of labour.	Rate of wages Not less than
Carpenters and joiner	$0.40 per hour, 9 hours per day

DEPARTMENT OF PUBLIC WORKS. — Temporary pile protection breakwater, Port Arthur, Ont. Name of contractors, The Thunder Bay Harbour Improvement Company, Limited, Port Arthur, Ont. Date of contract, December 31, 1917. Amount of contract, schedule of prices.

Trade or class of labour.	Rate of wages Not less than the following rate:
Foreman carpenter	60c per hour, 10 hours per day.
Carpenters	50c per hour, 10 hours per day.
Blacksmith	42½ to 45c per hour, 10 hrs pr. day.
Blacksmith's helpers	32½ to 35c per hour. 10 hrs pr. day.
Engineman for pile driver	50c. per hour, 10 hours per day.
Ordinary labourers	32½c per hour, 10 hours per day.
Driver with 1 horse and cart	$4.50 per day of 10 hours.
Driver with 2 horses and wagon.	$6.00 per day of 10 hours.

CHANGES IN REGULATIONS AFFECTING COAL MINERS IN CROW'S NEST PASS DISTRICT

IT will be remembered that when labour difficulties in the coal mines of the Crow's Nest Pass District were adjusted in the summer of 1917 (issue of August, 1917, page 613), it was agreed that wages should be adjusted to the cost of living, and a Commission was appointed to report on the cost of living every four months, so that the proper adjustment might be effected. The first report of the Commission, which covered the period April 1 to August 1, 1917, indicated a rise of 20 cents per day in the cost of living (issue of December, 1917, page 987), and Mr. W. H. Armstrong, Director of Coal Operations, issued an order granting an increase of 20 cents a day in wages. The second report finds the increase in the cost of living from August 1 to December 31, 1917, to be .8360 cents per week or .1393 cents per day, and on this finding the Director of Coal Operations has ordered that wage rates be advanced 14 cents per day from December 1, 1917. Mr. W. H. McNeill, representative on the Commission of the Western Coal Operators' Association, in a minority report, finds that the increase in the cost of living for a family of five persons amounted to .5711 cents per week or .0951 cents per day, and that as the average family in the district consisted of three persons the increase should be .0571 cents per day.

The Director of Coal Operations has also issued a number of orders dated December 1, 1917, adjusting various questions in regard to contract rates in some of the collieries in the district. At Hillcrest, rates for loading coal under certain conditions were fixed at 90 cents per ton, and in the same colliery, owing to a change in the pitch of the seam, which rendered it impracticable to drive the entry according to specifications laid down in the original tentative agreement, it was ordered that yardage be paid in proportion to the tonnage produced and that to ascertain the tonnage, measurements should be taken in three places where the pitch of the entry was normal, and in a like number of places where the amount of yardage was in dispute. Another order fixes certain rates affecting raises and angles and brattice and pillar work at the collieries of the Franco-Canadian Company, Frank, Alberta. All orders remain in force until March 31, 1919.

PROPOSED AGREEMENT BETWEEN THE DOMINION COAL COMPANY AND ITS EMPLOYEES

LABOUR difficulties which have existed for some time between the Dominion Coal Company of Sydney, N.S., and its employees, came before the Department of Labour officially in December when the employees of the company asked for a conciliation board under the Industrial Disputes Investigation Act. Involved in the dispute was the question of increased production of coal, a matter of serious moment as the Dominion Coal Company is the largest producer of bituminous coal in the Maritime Provinces. On January 4, an arrangement was made by which Senator Robertson, vice-president of the railway telegraphers' organization, should proceed to Sydney to see what might be done to increase the output of coal from the mines operated by this company and to inquire into and assist if possible in adjusting the disputes between the company and its miners. Mr. J. C. Watters, president of the Dominion Trades and Labour Congress, who had been named by the employees in their application to the Minister of Labour for a board of conciliation as their representative on the Board, accompanied Senator Robertson on this mission.

On January 9 and 10, conferences were had with the executive board of the miners' organization, representing approximately 4,900 men, and a full statement of their grievances was received and considered. On January 11 and 12, conferences took place as between the company's officials and the employees' representatives, attended also by Senator Robertson and Mr. Watters. At these conferences ways and means to increase production by special effort on the part of both the operators and miners was discussed, and a number of suggestions with this end in view were advanced by both parties, and in a number of instances were adopted, and within a week beneficial results ensued, so that at this date the company advise that there has been an increase in the quantity of coal mined per day.

It was impossible, however, to reach an amicable adjustment of the wages dispute at Sydney, but an understanding was reached that Mr. MacDougall, general manager of the company, and Senator Robertson, would proceed to Montreal and lay the whole matter before the president, and, if necessary, the board of directors of the company.

Accordingly, on January 15, a conference was held in Montreal, at the head office of the company, and the whole situation carefully gone into, and a promise obtained from the president that a meeting of the full board of directors would be held on the sixteenth, with a view of seeing what could be done to further increase the efforts the company had formerly made in reply to the men's request for increased wages.

On January 17, the president and general manager of the company came to Ottawa and submitted to Senator Robertson a revised proposition, with a request that he go to Sydney, if possible, and submit it to the men. This was, however, impossible, on account of other engagements, and, in view of the president and secretary of the miners' committee being called to Ottawa to attend a general labour meeting on January 29, it was arranged with the miners' representatives to postpone negotiations until that date.

On January 29, negotiations were resumed at Ottawa, at the Senator's office, and, on January 30, the following memorandum of agreement was drawn up and

agreed to by the general manager, representing the company, and the president and secretary of the miners' union, as a satisfactory adjustment of all the matters in dispute, subject to acceptance by the employees concerned:

"Memorandum of proposed settlement, as agreed between the Dominion Coal Company and the committee representing the mine workers, which is subject to acceptance by the employees concerned—effective Jan. 1, 1918.

1. All men being paid less than $3 per day to receive 10 cents per day, plus 15 per cent in addition. All datal men receiving more than $3 and not more than $3.75 per day, who are not eligible to benefit by the steady work bonus, to receive 15 per cent. All datal men over $3.75 to be increased 12½ per cent.

2. Steady work bonus to be extended 10 per cent instead of 5 per cent as at present.

3. All contract rates to be granted an increase of 12½ per cent.

4. In the event of any perceptible change occurring in the cost of living, the parties to this agreement to be willing to adjust the wage scale to conform with existing conditions on July 1, 1918, and at the end of each six months' period thereafter, upon 30 days' notice.

Note.—Where the adjustment mentioned in paragraph 1 provides an increase of 10 cents per day for machine helpers the company agrees to absorb the 10 cents thus paid."

It is confidently expected that this agreement will be accepted by the employees, inasmuch as their executive officers are so recommending. The increase in cost annually to the Dominion Coal Company is approximately $900,000, and considerably more than the company felt they should be called upon to pay. The employees, on the other hand, greatly modified their original proposition, and have accepted a settlement on a basis considerably less than the rate constituting standards in other mining districts. Both parties were, in their action, impelled by patriotic motives and each entertaining reasonable respect for the justifiable contentions advanced by the other party, both made concessions that, in all probability would not, under normal conditions, have been either offered or accepted.

CHANGES IN RATES OF WAGES AND HOURS OF LABOUR DURING THE LAST QUARTER OF 1917

DURING the last quarter of 1917, 33 changes in rates of wages and hours of labour, affecting approximately 21,400 workpeople, were reported to the Department, as compared with 41 changes affecting approximately 22,000 workpeople, in the third quarter of 1917, and 38 changes, affecting approximately 40,500 workpeople, in the last quarter of 1916. Of the 33 changes, 26 were wage increases, without other changes, five were increases with a reduction in working hours, one a reduction in hours and one a reduction in wages. In the manufacturing and mechanical industries, eight changes were reported, affecting approximately 6,363 workpeople, of whom the great majority were in metals, machinery and conveyances. In transportation, there were seven changes, affecting 5,920 workpeople. Only three changes were reported in mining; the number of workpeople affected—8,100—was larger than in any other group.

The particulars of each change, in so far as they are known to the Department, are given in the following table:

CHANGES IN WAGES AND HOURS DURING OCTOBER, NOVEMBER AND DECEMBER, 1917

Class of workpeople affected	Firm or establisment affected	Approximate number of workpeople affected	Date from which change took effect	Particulars of change
METALS, MACHINERY AND CONVEYANCES—				
Employees	Canadian Locomotive Wks, Kingston.	1,200	Oct. 22	Increase of 10 per cent granted.
Moulders and helpers	Jas. Smart Manufacturing Co., Brockville.	40	Oct. 16	Increase of 10 per cent granted.
Employees	Dominion Steel Co., Sydney.	4,000	Nov. 1	Increase of 10 per cent granted.
FOODS, TOBACCOS AND LIQUORS—				
Butchers and helpers	Swift Canadian Co., New Westminster.	50	Nov. 15	Hours reduced from 10 to 9 per day with an increase of 10 per cent in wages.
PRINTING AND PUBLISHING—				
Compositors	English Newspapers, Montreal.	559	Oct. 16	An increase of $3 per week on evening paper and $4.50 on morning papers.
Compositors	All offices, Saskatoon	39	Nov. 1	Increase of from $4 to $5 per week.
Pressmen (Web)	All offices, Winnipeg	30	Oct. 1	Rates advanced $1 per day.
Compositors	All offices, Ottawa	445	Dec. 17	Rated advanced from $2.50 to $4.50 per week.
TRANSPORTATION—				
Telegraphers	Quebec Central Railway, Sherbrooke	200	Oct. 1	Regular rates increased 15.5 per cent and overtime 20 per cent.
Engineers and firemen	Grand Trunk Railway, Montreal.	3,000	Oct. 1	Increase in rates and hour reduced from 10 to 8 per day.
Freight handlers	C.P.Railway, St. John	700	Nov. 20	Increase of $3 per week.
Motormen and conductors	Internationzl Transit Co., Sault Ste Marie.	20	Nov. 19	Granted an increase of 4 cents per hour.
Teamsters	Cartage Companies, Winnipeg.	250	Nov. 1	Rates advanced $2.50 per week.
'Longshoremen	Steamship Companies, St. John.	1,500	Dec. 12	Increase of 5 cents per hour granted.
Teamsters	Employers, Vancouver	250	Dec. 1	Increase of 20 per cent and hours reduced from 10 to 9 and a half.
MINING, QUARRYING AND REFINING OF ORES—				
Miners, etc	Consolidated Mining Co., Trail.	1,600	Oct. 1	Rates reduced 10 cents per day.
Miners, etc	Various Companies, Drumheller Coal Fields.	4,000	Oct. 20	General increase of 20 per cent granted.
Miners	Western Fuel Co. and Can. Col., Nanaimo.	2,500	Dec. 1	Rates increased by 10 per cent.

CHANGES IN WAGES AND HOURS DURING OCTOBER, NOVEMBER AND DECEMBER, 1917 — *Concluded*

Class of workpeople affected	Firm or establisment affected	Approximate number of workpeople affected	Date from which change took effect	Particulars of change
BUILDING AND CONSTRUCTION—				
Painters	Employers, Calgary	15	Oct. 1	Rate per hour advanced from 50 to 55 cents.
Carpenters	Fegles-Bellows Co., St. John.	20	Oct. 25	Increase of 5 cents per hour and hours reduced from 9 to 8 per day.
Painters	All employers, Winnipeg	300	Oct. 11	Hours reduced from 53 to 50 per week
Plasterers	" " " "	50	Oct. 11	Rates increased from 65 to 70 cents per hour.
Electrical workers	" " " "	50	Oct. 11	Rate increased from 50 to 55 cents per hour.
Plumbers	" " " "	150	Oct. 1	Rate increased from 55 to 62½ cents per hour.
Plumbers	" " Calgary	35	Oct. 1	Rate advanced from 62½ to 70 cents per hour.
Labourérs	" " St. John	45	Oct. 15	Rate advanced from 30 to 32½ cents per hour.
PUBLIC EMPLOYMENT—				
Fire captains and lieutenants	City of Ottawa	17	Oct. 1	Five per cent increase granted.
MISCELLANEOUS—				
Cooks and waitresses	All employers, Vancouver	250	Oct. 1	Minimum wage for waitresses established at $10 per week, 8 hour day, 6 days a week.
Barbers	All employers, Calgary	60	Oct. 1	Rate of wages increased from $18 to $19 per week and 60 per cent commission over $30.
Waiters	C.P.R., Winnipeg	20	Nov. 5	Rate of wages increased $5 per month.

FATAL INDUSTRIAL ACCIDENTS DURING JANUARY, 1918

DURING January the Department received reports of the occurrence of 148 fatal accidents, as compared with 41 in December and 63 in January, 1917. A coal mining accident at Stellarton, N.S., on January 23, was responsible for 87 fatalities. The Department is unable to secure reports of all fatal accidents, but reports are received monthly from all available sources.

FATAL INDUSTRIAL ACCIDENTS DURING JANUARY, 1918

TRADE OR INDUSTRY	LOCALITY	DATE	CAUSE
LUMBERING—			
Sawmill emp.	Clarendon, N. B.	Jan. 25	Caught by machinery
Logger	Elk Lake, Ont.	" ..	Struck by a falling tree.
"	La Tuque, Que.	" 18	" " " "
"	Beckwith Island, Ont.	" 12	Exposure to storm.
"	Grand View, Man.	" 2	Struck by a falling tree.
MINES, SMELTERS AND QUARRIES—			
Miner (Dom. No 1.)	Dominion, N. S.	" 8	Fall of coal.
Miners, Allan Col. (87)	Stellarton, N. S.	" 23	Explosion.
Miner	Garson, Ont.	" 17	Crushed by ore.
BUILDING AND CONSTRUCTION—			
Carpenter	Port Colborne, Ont.	" 18	Falling from trestle.
METALS, MACHINERY AND CONVEYANCES—			
Munition worker	St John, N. B.	" 17	Caught in machinery.
Metal worker	Chippawa, Ont.	" 27	Fall from a crane.
Millwright	Toronto, Ont.	" 3	Struck by falling crank of crane.
Rigger	Steelton, Ont.	" 1	Struck by a plank.
Laborer	Montreal Que.	" 12	Struck by a locomotive.
"	Hamilton, Ont.	" 8	Struck by falling iron.
WOODWORKING—			
Woodworker	Pembroke, Ont.	" 4	Caught in shafting of machinery.
PULP AND PAPER MILLS—			
Paper mill employee	Merriton, Ont.	" 15	Struck by a carrier.
Laborer	Palais, Que.	" 25	Struck by roll of paper
CHEMICALS AND EXPLOSIVES—			
Employee chemical works	Trenton, Ont.	" 20	Explosion of a tank.
" explosives plant (2)	James Island, B. C.	" 1	Caught in machinery.
" linseed oil mill	Medicine Hat, Alta.	" 15	Struck by part of machine.
LEATHER—			
Emp. harness mfg. estab.	Toronto, Ont.	" 10	Falling down elevator shaft.
Laborer	Penetang, Ont.	" 4	Blood poisoning.
STEAM RAILWAY SERVICE—			
Conductor	Chatham Jct., Ont.	" 10	Struck by a semaphore lever.
" and two brakeman (3)	Mimico, Ont.	" 12	Collision.
Conductor	Coglin, Ont.	" 11	Run over by a train.
Fireman	Elmhurst, Ont.	" 15	Derailment of locomotive.
"	Grafton, Ont.	" 14	Derailment of locomotive.
"	Montreal, Que.	" 24	Collision of trains.
"	Capreol, Ont.	" 27	Crushed between hoist and car.
Yard foreman	Mimico, Ont.	" 21	Crushed between cars.
Yardman	Regina, Sask.	" 22	Crushed between cars.
Brakeman	Petersburg, Ont.	" 17	Run over by a train.
"	Porcupine, B. C.	" 9	Fell from a car.
"	St Thomas, Ont.	" 12	Falling from and run over by a train.
"	St. Rosalie, Que.	" 27	Crushed between cars.
"	Winnipeg, Man.	" 17	Run over by a train.
"	Lyn, Ont.	" 13	Struck by snow plow.
"	M.P.55 BoundaryS.D,B,C	" 7	Fell from a car.
"	St. Jacques, Que.	" 26	Fell from a car.
Shops employee	Montreal, Que.	" 9	Struck by falling chain.
Sectionman	St. Bazile, Que.	" 21	Derailment of train.
Sectionmen (2)	Alvinston, Ont.	" 15	Collapse of snow plow.
Sectionman	Ingersoll, Ont.	" 8	Struck by a train.
"	Ville St. Pierre, Que.	" 15	Struck by a train.
"	Toronto, Ont.	" 28	Struck by a locomotive.
"	Niagara Falls, Ont.	" 10	Struck by a locomotive.
"	Richmond, Que.	" 12	Struck by a locomotive.
Employee	Lorneville, Ont.	" 16	Derailment of snow plow.
MISCELLANEOUS TRANSPORT—			
Teamster	Havelock, Ont.	" 9	Load of logs overturned.
Teamster's helper	Montreal, Que.	" 21	Crushed by a motor truck.
Carter	Quebec, Que.	" 23	Drowned.
Longshoreman	St. John, N. B.	" 4	Fell into hold of ship.
MUNICIPAL EMPLOYMENT—			
Employee (water service)	Calgary, Alta.	" 21	Fell into elevator shaft.
MISCELLANEOUS.—			
Warehouse emp.	New Glasgow, N.S.	" 2	Fell down elevator shaft.
" "	Montreal, Que.	" 16	Crushed by elevator.
Employee, cement plant	Tuxedo, Man.	" 14	Buried under falling coal.
" gas plant	Ingersoll, Ont.	" 2	Explosion—burned.

WAR LABOUR PROGRAM OF THE UNITED STATES

RECENT articles in the Official Bulletin of the United States Committee on Public Information afford some view of the plans of the administration in dealing with the labour problems of the war. The Committee on National Defense recently announced, after a series of conferences on the subject, a plan to effect the better organization and distribution of the labour forces of the country. This plan was laid before the President, who approved it and asked the Secretary of Labour to proceed with the organization. The scheme as outlined consists of six principal agencies and is as follows:

1. A means of furnishing an adequate and stable supply of labour to war industries. This will include:
   (a) A satisfactory system of labour exchanges.
   (b) A satisfactory method and administration of training of workers.
   (c) An agency for determining priorities of labour demand.
   (d) Agencies for dilution of skilled labour as and when needed.
2. Machinery which will provide for the immediate and equitable adjustment of disputes in accordance with principles to be agreed upon between labour and capital and without stoppage of work. Such machinery would deal with demands concerning wages, hours, shop conditions, etc.
3. Machinery for safeguarding conditions of labour in the production of war essentials. This to include industrial hygiene, safety, women and child labour, etc.
4. Machinery for safeguarding conditions of living, including housing, transportation, etc.
5. Fact-gathering body to assemble and present data, collected through various existing governmental agencies or by independent research, to furnish the information necessary for effective executive action.
6. Information and education division, which has the functions of developing sound public sentiment, securing an exchange of information between departments of labour administration and promotion in industrial plants of local machinery helpful in carrying out the national labour programme.

A portion of the machinery required to carry out this programme is already in existence in the Department of Labour. The Department's employment service, which has been undergoing expansion for some time past, has been divorced from immigration and created a separate bureau of the Department of Labour, and an appropriation of more than a million dollars for the fiscal year ending June 30, 1918, has been granted. The service now covers the entire country with a network of labour exchanges. Federal, state and municipal employment offices are being utilized and already some 200 exchanges are in existence, and it is announced that 50 more are to be opened in the immediate future. The bureau is divided into five divisions which will handle the details of the service's national operations. These divisions are: division of information; division of farm service; women's division; division of reserves, and division of investigation. The information and women's divisions have existed in the employment service for some time; the others are being created in the reorganization.

The Department of Labour denies the existence of a labour shortage in the country and the need for conscription of labour. It believes that the solution of the problem lies in the proper distribution of the available supply of workers. In operation the employment service "will serve as the national labour mobilization and distribution machine." The administration estimates that the expanded and reorganized service will place between three and four million

workers in agriculture, shipbuilding and other war industries this year.

On January 15, Secretary of Labour Wilson announced the appointment of a national war labour board of six men and one woman to be known as the advisory council, to assist him in the execution and administration of the comprehensive war labour programme here outlined. The personnel of the council is as follows: John Lind, chairman, Minnesota; Waddill Catchings, New York, and A. A. Landon, Buffalo, representatives of employers; John B. Lennon, Illinois, and John J. Caskey, of Pennsylvania, representatives of employees; Dr. I. C. Marshall, of Chicago, economist, and Agnes Nestor, of Chicago, representative of women. Secretary Wilson plans to add to the council representatives from the War, Navy and Agriculture Departments and the Shipping Board, and in this way to insure unity of action by the various departments and the elimination of conflict and duplication of effort in supplying the war industries with labour.

The labour administrator and his council will immediately consider the questions of standardization of labour policies, the providing, distributing and maintaining of a stable and adequate supply of workers, labour dilution and training, priority demands, the adjustment of disputes, the safeguarding of employment, and living and housing conditions. A comprehensive study of these problems is expected to assist in making recommendations for additional machinery, and in the supervision of its operation.

With reference to the placing of skilled labour, it was announced on January 29 that "with the aid of the Council of National Defense, the Shipping Board, governors of states, organized labour and business, the Department of Labour has begun the 'recruiting' of an army of 250,000 men to fill all present and future needs of the shipbuilding yards of the United States." On the institution of the administration's "coast-to-coast drive," independent efforts ceased and the entire problem was turned over to the Department by the Shipping Board and the shipbuilders. All men fitted for shipbuilding work are to be registered and employers and employees will be brought together through the medium of the employment service. For the purpose of enrolling the workers the country was divided into zones and each state allotted a certain quota according to its population and industries. It is expected the registration will be completed by February 11 and shipbuilders will then notify the service of their requirements. While the workers will not be compelled to accept employment in shipyards, the administration is confident that all needs will be taken care of.

Dealing with the unskilled labour supply, in a statement on January 24, Assistant Secretary of Labour Post characterized the agitation for the importation of Chinese and Mexican labourers as "unnecessary and prejudicial." In his statement he said that the requirements for common labour can be met entirely by the better distribution of the domestic supply and by the proper use of American citizens from Porto Rico and the Virgin Islands. It was stated that 110,000 labourers from these two territories were being secured for maintenance and other work on the railroads and that arrangements had been made with the roads for the release of numbers of these workers for farm service during the press of the agricultural season.

All branches of the Government are using the Department of Labour as the common organ for recruiting workers. Men enrolled by the employment service are asked to indicate the work they are best fitted for and the kind of work preferred. As men are needed in shipyards, on railroads, in munition factories or in the divisions of the army which require skilled mechanics, they will be supplied by the employment service first from its lists of unemployed, and, second, by calling on members of the reserve. With reference to the general effect of the Department's employment activities, the "Official Bulletin" says:

Employers of labour, even in so-called unessential industries, will be helped by the success of the public service reserve, because a large registration will make it possible for the Department of Labour to make a fair distribution of all calls for men, and to minimize and equalize the drain on industry which results from unregulated competition for men between war industries and different branches of the Government. Labour is in entire sympathy with the purpose of the department in creating this reserve, because it will help prevent the great hardships which fall upon working men by having no certain way of knowing whether or where there may be a place for them in shipyards, or in munition plants, and because of the absence of any compulsory features. The Department relies wholly on the patriotism of the American workingmen to induce them to answer the country's call wherever reasonable request is made of them.

JUDGMENT ON CROW'S NEST PASS COAL MINERS' CLAIMS FOR EXEMPTION FROM MILITARY SERVICE

IN the Crow's Nest Pass and Southern Alberta coal mining districts where the mines are being operated under the direction of the Director of Coal Operations, appointed by the Dominion Government, the question has been raised as to whether miners eligible for military service under the Military Service Act, 1917, should be exempted from such service, in view of the urgent need for greater coal production. In the cases of some 36 miners whose claims for exemption were disallowed by the local tribunal at Fernie, appeals were made to the Appeal Tribunal by the United Mine Workers of America, and His Honour Judge Thompson, under date of January 26, rendered a judgment in *re* James L. Hunter *et al,* which reads as follows:

This case, with thirty-five others, are appeals made by the United Mine Workers of America on behalf of men of military age whose claims have been disallowed by the local tribunal at Fernie.

Each case will be dealt with individually on its merits and on the principles which I am stating in this general judgment. In each case this general judgment is made part of the individual one.

In making any decisions upon the claims of these appellants, I cannot consider what they promise to do in the future; I can only judge their future conduct by their past performance.

The country has been at war for nearly four years; for months the Military Service Act has been discussed in the House of Commons and in the press, and for months the Act has been in force. Both this winter and last we read statements made by Ministers of the Crown and from many other sources that increased production of coal was essential to the welfare of the country. If a man has not shown that he has been spurred on to greater production by the request of his country, it is not likely he would willingly obey the demand of his country.

These appellants must understand they are not soldiers. And where exemption is granted to them it is so granted because the Court is of the opinion they are of greater value to the nation by remaining coal miners than by becoming soldiers. And the only way they can continue to be of greater value as coal miners than as soldiers is by producing coal.

I repeat my statement: men to whom exemption is granted are in the position of soldiers and they must work as steadily and continuously as though they had donned khaki. To my mind they should esteem it an honour and privilege to be in the position where they are called upon to help their country by using extra efforts for the production of a commodity so essential as coal; and they should carry on their duties here with the same willingness and the same cheer-

fulness that their brothers and friends have shown when they went to the front.

It must be understood that in granting exemption I am endeavouring on the one hand to protect the interests of the worker. He cannot be bound down to any one particular employment in the mine or to work for any one particular employer. That would be placing him too much in the power of his employer. I can understand, also, that there may be many reasons why a man will be unable to work continuously every working day. There may be sickness, some accident may happen in the mine whereby the man is unable to work; therefore, I would endeavour to frame rules to cover these conditions.

On the other hand, there must be no mal-lingering, no holidays other than specified, no letting up on the production of coal, but rather a speeding up on the part of these appellants. If it can be shown by the military authorities at any time that any man is not following the rules I am establishing, that man must understand that his exemption ceases and he will at once become liable for military duty.

I will give both the men and the military authorities every opportunity to come before me from time to time and state their respective cases, but I think it only right I should now warn every appellant that in the event of there being any letting up or any cessation of work by him, either individually or collectively, their exemption will stop and they will at once be drafted into military service.

The rules I establish are as follows:

(1) In cases where I grant an exemption, it shall be conditional upon the appellant being continuously employed in his occupation. Either that in which he is now engaged or some other occupation in the mine.

(2) Any person ceasing to work for more than twenty-four (24) hours will be deemed to be not continuously employed, unless he can show some just cause or reason for his non-employment. This prohibition does not apply to recognized holidays and the holding of funerals pursuant to the book of rates and conditions (pages 16 and 17) as adjusted and amended by the Commissioner on June 27 and July 31, 1917.

A lay-off of twenty-four (24) hours without just cause or reason being shown shall not occur more than once a month.

(3) In case of illness a certificate signed by some medical practitioner must be procured within forty-eight (48) hours, and if demanded by the military or civil authorities, produced and filed in the office of the Chief of Provincial Police at Fernie.

(4) Where a stoppage of work is occasioned by some cause beyond the workman's power to prevent, for example, accident, gaseous condition of the mine, shortage of material, or any other reason whatsoever, a certificate must be obtained from the manager of the mine where the workman is engaged, and upon demand by the military or civil authorities, must be produced and filed in the office of the Chief of Provincial Police at Fernie.

(5) In the event of a strike or cessation of work by workmen, other than exempted men whereby the latter are prevented from working, exemption shall cease, subject, however, to the provisions in rules 9 and 10.

This may seem a harsh ruling, but it must be remembered that this appeal has been made by the United Mine Workers of America, and it will be the duty of the officials of the Brotherhood to see that no such strikes or cessations of work occur.

(6) No exempted man shall occupy an official position, or carry on work, which will necessitate his absence from work at his usual occupation in the mines.

(7) In the event of any person to whom exemption is granted desiring to change his employment from one employer to another, he may do so upon application being made in writing to me, and a certificate allowed by me.

(8) Exemption granted shall continue until the first day of June, 1918. On or before which date application may be made to me for an extension of time.

(9) In the event of any dispute arising between the military authorities and any person to whom exemption is granted, or in the event of the military authorities drafting, detaining, or arresting an exempted man for alleged non-compliance with these rules, or from any cause, the matter shall be brought before me as speedily as possible for determination.

(10) All parties have leave to apply to me in a summarily manner respecting any matters which may arise from time to time in order that they may obtain any further special or general ruling.

(Sgd.) G. H. THOMPSON,
Judge, Appeal Tribunal No. 12.

Fernie, B.C., January 24, 1918.

RECENT LEGAL DECISIONS AFFECTING LABOUR

Definition of inexcusable fault in Quebec

A BOILERMAKER was injured while engaged in cutting rivets by the use of a hammer and chisel. A piece of steel struck him upon the right eye and caused the loss of that eye; there followed a sympathetic inflammation of the left eye, and he became completely blind. He sued his employers for $1,175 for temporary incapacity and for a rent of $475 per annum, charging them with inexcusable fault, and claiming that the work he was doing at the time of the accident should have been performed by two men instead of by one, and also that the company should have provided him with a special lunette. The defendants' plea was that there had been no fault on his part and that the accident was due to the plaintiff's own negligence. Witnesses stated that lunettes were not necessary in such cases and that there was no necessity for the employment of more than one man at the work in question, and also that the defendants' business had been conducted for many years on that principle and that there had never been any accident reported. The trial judge found that there had been no inexcusable fault on the part of the defendants, and ordered them to pay to the plaintiff a rent of $307.89 per annum, said sum representing one half of the wages he was earning before the accident. The defendants appealed and the judgment of the Superior Court was maintained.

In announcing the decision of the Court of Review, Mr. Justice Archibald, Acting Chief Justice, said among other things: "There have been numerous efforts to define what is meant by inexcusable fault and probably the effort has not been successful. Some light may possibly be derived from the consideration of our criminal law. Thus, for example, the offense of murder must contain, as a necessary element, malicious intent. Now, that malicious intent may be expressed, resulting from an intention on the part of the criminal to do harm to or to kill the victim. But in some cases the law will presume a malicious intent, although the person causing the death of another may not have had any previous knowledge of that very person at all. That would result from the voluntary performance of an act on the part of the criminal which would be very likely to result in the death of some one, as, for example, throwing a heavy object out of a window upon a sidewalk which would probably have persons passing upon it. As far as I can reconcile the views as to inexcusable fault, it seems to me that such fault must contain as an element some voluntary act on the part of the person guilty which is likely to produce injury or death, that is to say, an act which would be sufficient at criminal law to constitute implied malice." (*Quebec—Smith v. J. R. Weir, Limited.*)

Workmen's Compensation. Right after injury to make settlement with employee

An injured workman gave a release to his employer, in consideration of the payment of $60, whereby he relinquished all rights to further compensation in respect to the accident. In spite of this, he applied for compensation, claiming that the release was null and void. The action was dismissed by the trial judge, and the plaintiff appealed to the Supreme Court of Saskatchewan. Two grounds of appeal were urged, namely:

1. That the appellant did not understand the nature and effect of the release given by him to respondent.

2. That by virtue of sections 4 and 16 of the Workmen's Compensation Act, said release, even if understood when signed, was void and of no effect.

With reference to the first ground, the judgment of the Supreme Court sustained the opinion of the trial judge, who found that, according to the evidence, the release was fully explained to the plaintiff, and that he understood it. The second ground was based on section 4, subsection 2 of the Workmen's Compensation Act, which reads as follows:

(2) Any contract made after the coming into force of this Act whereby a workman relinquishes any right to compensation from the employer for personal injury arising out of and in the course of his employment shall, for the purposes of this Act, be void and of no effect; and any such contract existing at the coming into force of this Act shall not, for the purpose of this Act, be deemed to continue after the time at which the workman's contract of service would determine if notice of the determination thereof were given at the time of the coming into force of this Act.

It was held by the Supreme Court that this means that any contract entered into by a workman, before the injury takes place, that he will relinquish any right to compensation under the Act from the employer for personal injury shall be void and of no effect. In other words, the workman is prevented from contracting himself out of the Act, but he is not prevented from making a settlement of the rights or compensation that he claims under the Act after the injuries are received. Section 16, also referred to in the appeal, simply means that no deductions are to be made from the compensation for anything in the way of debts or otherwise, except what may have been paid to him on account of the injury, without an actual settlement in full agreed to by the employee, as in this case. The appeal was therefore dismissed with costs. (*Saskatchewan—Carr v. The Imperial Oil Company, Limited.*)

REVIEWS

QUEBEC.—General Report of the Minister of Public Works and Labour of the Province of Quebec for the year ending June 30, 1917; 186 pp.

Factory Inspection and Employment Offices in Quebec

THE general report of the Minister of Public Works and Labour of the Province of Quebec for the year ending June 30, 1917, contains among other matters reports on the Inspection of Industrial Establishments and Public Buildings, Provincial Employment Bureaus, Trade Disputes, Sunday Labour, Examination of Stationary Engineers, and Fair Wages. The reports of the factory inspectors show that children under the legal age of 14 are gradually disappearing from the factories. For greater safety the employment of children with weak constitutions is forbidden, and in certain unhealthy or dangerous industries the age limit is fixed at 16 years for boys and 18 for girls. A recommendation is made that children employed in factories should be required to have school certifi-

cates instead of being examined by the inspectors at their place of employment. It is further recommended that the limitation of the working hours of women and children now successfully in force in cotton mills should be extended to all industries in which they are employed. While there was an increase of 434 in the number of non-fatal accidents, attributed largely to more complete returns, the number of fatal industrial accidents was only 18, a decrease of 10 compared with the previous year.

The reports of the three provincial employment offices show that the demand for labour greatly exceeded the supply. The scarcity of labour was a cause of serious anxiety among some manufacturers, and farmers had great difficulty in procuring the necessary help. The following table shows the operation of these offices during the year:

Locality	Help wanted		Situations Wanted		Places filled	
	Male	Female	Male	Female	Male	Female
Quebec	2,429	28	1,752	51	1,133	9
Montreal	9,273	961	4,628	365	5,540	311
Sherbrooke	1,351	416	705	226	751	387
	13,053	1,405	7,085	642	7,424	707

The registrar of Councils of Conciliation and Arbitration reports that the year was free from serious trade disputes. The few minor ones that took place were chiefly in connection with working hours and were settled amicably after only a few days' idleness. Complaints were laid by the registrar against several manufacturing companies for violation of the law against Sunday labour, and four judgments that had been rendered are quoted in full in the report.

UNITED KINGDOM.—Health of the Munition Worker. Handbook prepared by the Health of Munition Workers' Committee. Ministry of Munitions. London, 1917; 138 pp.

Health of Munition Workers in the United Kingdom

The Health of Munition Workers' Committee, appointed by the British Ministry of Munitions, have prepared a handbook for directors, managers, foremen and others in authority in munition works of all kinds. The handbook is largely based on the 20 Memoranda which have been issued from time to time by the committee, and which have been reviewed in previous issues of the *Labour Gazette*.* The volume deals with the following subjects: Relation of Fatigue to Industry, Hours of Labour, Sunday Labour and Night Work, Lost Time and Incentive to Work, a Healthy Factory Environment, Washing Facilities and Baths, Seats, Clothing, etc., the Industrial Canteen, Sickness and Accident, Protection of the Eyesight, Industrial Diseases, Welfare Supervision, Outside Factory Conditions. The purpose of the handbook is to state in brief, categorical, and somewhat dogmatic form, the principal steps which must be taken to maintain the health and efficiency of the worker. In the appendices are given regulations with regard to factories and workshops; conditions under which expenditure for canteen, recreation, etc., can be allowed as an expense for excess profits duty; canteen equipment; medical certificates of incapacity for work; order in regard to ambulance and first aid arrangements at blast furnaces, copper and iron mills, foundries and metal works; and rules for the use of trinitrotoluene.

Volume 18 MARCH, 1918. Number 3

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

In this Issue

The closing of industries East of Fort William for a few days by order of the Fuel Controller occasioned some loss of time, but apart from this and some slackness due to the scarcity of raw materials, employment was on the whole maintained at a high level in February. The cost of the weekly budget of staple foods was $12.54 in February, as compared with $12.42 in the previous month and $10.46 in February, 1917. The Departmental index number of wholesale prices stood at 263.5, as compared with 258.7 in the previous month and 217.3 in February, 1917. There were 14 strikes in existence at some time or other during the month as compared with 11 in January; seven of the new and two of the old strikes were reported as having terminated leaving five unterminated strikes on record at the end of the month.

* * *

Proceedings under the Industrial Disputes Investigation Act

During February reports were received from four Boards of Conciliation and Investigation which had been appointed to inquire into disputes between (1) The Algoma Steel Corporation, Limited, and steel workers—settlement reported: (2) The Canadian Pacific Railway Company and conductors, baggagemen, brakemen, and yardmen—report includes signed agreements; (3) The Grand Trunk Railway Company and machinists, boilermakers, and blacksmiths—report includes signed agreement; and (4) The Grand Trunk Railway Company and maintenance of way employees—majority and minority reports submitted, company accepted majority report. An application for a Board was received from certain employees of the Collingwood Shipbuilding Company, Limited, but constitution of the Board had not been completed at the close of the month. Settlements were reported in two disputes in connection with which applications had been received during preceding months, namely, electrical workers at Steelton, employed by the Algoma Steel Corporation, and maintenance of way employees of the Grand Trunk Pacific Railway. In one other dispute affecting Canadian Northern Railway maintenance of way employees the award of the Board was made the basis of an agreement between the parties concerned.

* * *

National Registration

By Order-in-Council dated February 23, a Sub-committee of the War Committee of the Cabinet was created under the name "The Canada Registration Board," to take an inventory of the man power and woman power of the country as a part of the Government's policy of organization and mobilization to "enable Canada to make her maximum contribution towards the successful prosecution of the war in

men, food-stuffs, munitions and ships." The personnel of the Board is as follows: Honourable G. D. Robertson, Minister without portfolio, chairman; Mrs. Adelaide Plumptre, Toronto, and Messrs. F. Blanchard McCurdy, Halifax; G. M. Murray, Toronto; Eugene McG. Quirk, Montreal, and Thomas Moore, Niagara Falls. Mr. E. L. Newcombe, K.C., as chairman of the Military Service Council, and Mr. J. D. McGregor, as Director of Agricultural Labour, are members of the Board ex-officio, and provision is made for additions to the membership.

The duties and powers of the Board are as follows:

(a) To make provision for a registration of all male and female persons over 16 years of age residing in Canada.

(b) To make such further provision from time to time as may be deemed necessary and expedient to ensure that the Board shall at all times have as accurate information as possible respecting the man power and woman power of the nation.

(c) To secure an inventory of such of the industries in Canada as the Board may determine with a view to having accurate knowledge at all times of the extent to which the various classes of labour are employed by such industries, the hours of employment, wages paid and such other information as the Board may deem advisable.

(d) To formulate plans subject to the approval of the Governor in Council whereby the eligible men and women of the nation may be made more readily available for such industries as are most essential for the prosecution of the war.

The Board may, with the approval of the Governor in Council, make regulations for the efficient discharge of its duties and may impose penalties for violation of its regulations. The Order provides for the co-operation of the different departments of the Government and for the transfer to the staff of the Board of any officer of any department if it should seem desirable. Meetings of the Board have already been held and it is expected that organization will shortly be concluded, and that the work of registration will commence at an early date.

Mineral Production in 1917

According to a preliminary report on the mineral production of Canada during the calendar year 1917, just issued by the Department of Mines, the total value of the output was $192,982,837, as compared with $177,201,534 in 1916, an increase of 8.9 per cent. The total output of the mines, however, did not increase at the same average rate. The tonnage output of many important products was considerably less in 1917 than in 1916, and over two-thirds of the increase in value is to be attributed to coal, gypsum and cement, in which the quantities marketed were less than in the previous year. The falling off in the production of copper and gold is partly due to the diminished coal and coke output. Lead and silver production was also diminished. There was, however, an important increase in the production of zinc and some gains were also shown in Cobalt, molybdenite and nickel. The total value of the non-metallic production, including clay and quarry products, was $86,352,085, as compared with $70,882,169, in 1916, an average increase of 26 per cent. Under this head practically every product, except the stone quarry output, shows an increased value of production, but in the case of coal, graphite, gypsum and cement, the quantities actually marketed were less, notwithstanding the increased values. The imports of anthracite coal and dust during the year totalled 5,320,198 tons, as compared with 4,570,815 in 1916.

British Co-operative Statistics

British co-operative statistics for the year ending December 31, 1916, which appear in the January issue of the Quarterly Review of the British Co-operative Union, disclose remarkable progress. The increase in membership for 1916 was 255,416 as against 210,514 for the previous year. Deposits in the penny banks conducted by co-operative societies increased during the year from $10,840,315 to $12,735,955, and the reserve and insurance funds showed an increase of over $1,000,000. The share capital of the Retail Society was increased by approximately $20,000,000, and the loan capital also showed an increase. The retail trade made a gain over 1915 of $95,000,000, the grand total of the retail trade of the British Co-operative Movement for 1916 being $608,442,750. The purchases per member for the year averaged $172.85, an increase from $157.05. The trade of the Co-operative Wholesale Society of England increased from $215,508,735 in 1915 to $261,150,370 in 1916. The trade figures for the Scottish Co-operative Wholesale Society were $57,091,770 in 1915, as compared with $72,512,050 in 1916. The aggregate Wholesale and Retail Trade for the British Co-operative Movement for 1916 was therefore $942,105,170. There has been a notable gain in the productive departments of the great wholesale societies in the three war years. Notwithstanding the drain upon their labour resources for the army and navy, the output of the English Co-operative Wholesale Society increased from $45,546,590 to $81,837,545 and the Scottish Wholesale Society's production increased from $14,035,235 to $23,940,520. The surplus for the year was $81,675,295 as compared with that of the previous year of $74,800,430, a sum equal, after paying interest on capital, to 30.60 per cent of the capital employed in the Movement. During the year 1916 the number of workers in the employ of the co-operative retail organizations increased from 109,449 to 115,651. Adding to this the productive and distributive workers in the employ of the two wholesale societies, the aggregate labour force is 158,715.

Annual Convention of District 18, United Mine Workers of America

The fifteenth annual convention of District 18, United Mine Workers of America, was held at Fernie, B.C., February 18 to 28, with 28 delegates present. The convention devoted much time to a discussion of the dispute in the Drumheller mines, and it was recommended that the miners in the Drumheller field, except those employed in the Moodie mine, should go back to work and that the convention should give financial and moral support to the miners on strike at the Moodie mine until the management recognized the organization and operated under the rates of pay and working conditions obtaining in other mines in the Drumheller field. Questions affecting Workmen's Compensation were discussed and a resolution was passed calling for a broader definition of the term "accident" in the compensation laws of British Columbia and Alberta. A number of matters affecting coal mines inspection and legislation were discussed and resolutions were passed as follows: approving the introduction of the single shift system to lessen the danger from explosions and accidents, which it was stated occurred largely on the night shift; suggesting that the Alberta Mines Act be amended so as to provide for the payment of wages weekly, and for the appointment of an inspector from among the members of the miners' organization, who should be subject to recall by a majority vote of the miners and be paid by the Government; recommending that the Alberta Mines Act be amended so that inspectors and check weighers might be appointed who would not be subject to company influence, as it was alleged the "working" inspectors necessarily are. Other resolutions recommended that miners be paid at the rate of 2,000 pounds to a ton instead of 2,240 pounds;

that modern electric lamps and gas detectors be installed in the mines, and that the companies supply and maintain the lamps without charge to the men. The convention was of the opinion that the dependants of soldiers should be provided for from the general revenues of the Federal and Provincial Governments. A motion to the effect that legislation should be passed to provide for crippled soldiers being taught new trades was defeated and it was urged that adequate compensation should be provided in such cases. A resolution protesting against the further extension of the employment of Asiatics was also passed, and the convention favoured the boycotting of products produced by Oriental labour. It was decided to re-establish the "District Ledger," formerly the official organ of District 18. The question of friction between the local unions and District 18 with the head offices in the United States received considerable discussion, but towards the close of the convention telegrams were sent to the president of the United Mine Workers stating that the feeling which had prevailed in some quarters against the International had been eliminated and to the United States Fuel Administrator suggesting that an arrangement be made with the Canadian Fuel Controller in respect to Canadian mines similar to that effected in the United States, for a permanent wage advance and abolition of war bonuses. Calgary was selected as the next place of meeting.

* * *

Reports of Mediation Commission of the President of the United States

The Mediation Commission appointed by President Wilson to promote peaceful industrial relations has submitted reports in regard to the labour disturbances which occurred in the copper mining industry in the Warren District of Arizona during June and July, 1917, and the famous Mooney case in San Francisco. The disturbance in Arizona culminated in the deportation of 1,186 men to Columbus, New Mexico, by a sheriff and his deputies. The Commission found that the deportation was wholly illegal and that the constitutional rights of citizens and others had been ignored by processes not provided by law, and recommendations are made that the evidence should be brought before the proper authorities. In the Mooney case the Commission recommends that Tom Mooney be given a new trial, and the hope is expressed that such action be taken by the Supreme Court of California, before whom an appeal is now pending. In case the Supreme Court fails to take such action the Commission recommends that the President use his good offices to invoke action by the Governor to the end that Mooney may have a new trial. The report states that the jury acted in good faith in Mooney's trial, but that because of subsequent developments there is doubt as to the justice of his conviction.

Regulation of Packers' profits

On March 9 an Order-in-Council was passed providing for the limitation of profits in the meat packing business in Canada. By the terms of the Order no person or firm in Canada, whose gross sales exceed $750,000 shall engage in the slaughter of livestock or the manufacture of products therefrom except under license issued by the Canada Food Board. Apart from the issue of licenses, the regulations are to be administered by the Minister of Finance. As to limitation of profits the Order stipulates that:

> A licensee shall, so far as practicable, so fix the prices on his sales that the profit thereon or on that part thereof not expressly excluded from this limitation, shall not exceed two per cent of the gross value of his sales during any one year.

The section dealing with the disposal of profits reads as follows:

> If any licensee makes profits exceeding an amount equal to seven per

cent upon the capital actually invested in his business, the licensee shall be entitled to retain in addition to such seven per cent, one-half of such excess up to an amount equal to 15 per cent upon such capital. Provided, however, that a licensee shall not be entitled to retain any profits exceeding an amount equal to two per cent of the gross value of his sales during any one year. All profits in excess of those that the licensee may retain shall belong to His Majesty, and shall be paid by the licensee to the Receiver General of Canada.

The Order-in-Council deals in detail with such matters as profits of separate branches, methods of computing sales and profits, interest and similar payments, definition of capital, depreciation, repairs and maintenance, salaries, taxes, etc. Any business in which the licensee has an interest and which he was accustomed to treat as a Department of his own general business is to continue to be so treated. Provision is made for regular reports to the Minister of Finance and any duly authorized representative of the Minister of Finance is to be given access to all books and accounts of the firm and of subsidiary companies. Reports of stock holdings in other companies are also required. The Minister of Finance is given power to make regulations for carrying out the provisions of the regulations and the penalty for violation is a fine not exceeding $5,000 or imprisonment for a term not exceeding six months, or both fine and imprisonment. The Order-in-Council is made retroactive to January 1, 1918, and is to continue in force during the war and until further order.

* * *

Labour Jottings

A Bill has been introduced at the present session of the Manitoba Legislature to amend the Fair Wages Act, and in the Alberta Legislature a "Mine Employees Compensation Act" has received its first reading.

Leave to appeal to the Central Appeal Court Judge from the judgment of His Honour Judge Thompson, regarding military exemption to coal miners, the full text of which was given in the February *Gazette,* p. 150, has been granted.

The Tramways Commission of Montreal has drafted a 35 year contract between the city and the Tramways Company. The contract calls for the construction of 13 miles additional double track lines, a uniform fare for Greater Montreal, and provides that the company shall allow its employees to organize in labour unions if they so wish.

The Toronto Board of Control and representatives of the civic firemen have arranged a new schedule of pensions. Allowances are based on the salaries in effect at the time of adoption of the new schedule and benefits are provided after 10 years of service. Old members will contribute seven per cent and new members nine and a half per cent of their gross wages.

The United States Bureau of Education is carrying on a campaign for the Americanization of the 13 million foreign born and the 33 million persons of foreign origin in the United States.

The United States Bureau of Mines reports that 2,695 men were killed in coal mining in the United States in the year 1917. This is an increase of 470 over the previous year, and is the highest fatality record in the industry in the last seven years. It is said the demoralization caused by war-time conditions is largely responsible.

The United States Official Bulletin of February 19 announces that at that date at least 90 per cent of the members of the American army were insured. The total amount of insurance on the books of the Bureau of War-Risk Insurance was $8,879,104,000. There was a total of 1,082,009 applications on file and the average amount applied for was $8,205.

Mr. Frederick Urry, correspondent of the *Labour Gazette* at Port Arthur, has been appointed manager of the new Ontario Government Employment Office in that city.

According to the preliminary report on mineral production in Quebec during 1917, issued by the provincial mines branch, there were only 4 fatal accidents as compared with 18 in 1916.

INDUSTRIAL CONDITIONS DURING FEBRUARY, 1918

I.—GENERAL REVIEW

The Labour Market

Industries east of Fort William were closed down February 9-11, by order of the Fuel Controller, but apart from this loss of time and some slackness on account of scarcity of raw materials, employment was on the whole maintained at a high level in February. A further decline in steel production was reported from Sydney, but there was improvement at Sydney Mines. There was some slackening in metal working plants at Montreal and at Toronto structural steel works were rather quiet because of scarcity of materials. The large steel works at Sault Ste. Marie were working at capacity. Munition workers were in demand at Montreal, and nitrators at Trenton, and in the Parry Sound District. Shipyards were busy at all points though hampered at Quebec by unfavorable weather; greater activity in shipyards was reported from Sorel. Employment in agricultural implement works was very good and some overtime was worked, but scarcity of cars for western shipments was reported by some plants in Ontario. Locomotive works were well employed, but there was some loss of time in car building because of scarcity of materials. Automobile plants at points in Ontario reported increased activity. In the foods group employment was generally good. Flour mills were active in the east except at Toronto, where receipts of wheat were behind schedule; in the west activity was general. Meat packing houses reported a good month, but there was some quietness in the confectionery trade. Sugar refineries were reported slack at Montreal and Chatham. Abattoire hands were reported in demand at Toronto. Tobacco workers were generally well employed, but employment for brewery and distillery employees while good in Quebec was poor in Ontario. Employment in textiles was reported good at all points; help was in general demand and some overtime was worked. With large orders on hand several important clothing establishments reported slackening in employment because of slow delivery of materials. Employment for fur workers was declining, but for cap and glove workers it was well maintained. Employment in pulp paper and fibre continued very good except at Ottawa, where water power difficulties caused some slackening. Printers were well employed throughout the country. In word working, sash and door factories in the Maritime Provinces and at many point in Quebec continued busy on orders for Halifax, but there was some slackness in Ontario and the west. Shoe factories generally continued quiet. A more active demand from agricultural

districts increased employment in harness factories. Preparations for spring building improved conditions somewhat in brick yards. During the greater part of the month severe weather rendered railway operations difficult, but although a number of trains were taken off, traffic employees were on the whole well employed and repair shops were busy. Railway labourers were in demand at Montreal, Fort William and Port Arthur, Winnipeg and Saskatoon. 'Longshoremen were reported active except at Sydney. Although ore shipments from Cobalt showed a falling off employment in the mines was well maintained, and British Columbia metal mines were in steady operation. Muckers were in demand at Fort William and Port Arthur. In coal mining there was activity in all fields except at the Drumheller mines in Alberta, where a dispute was in progress. Coal miners were in demand at Edmonton. In lumbering, some camps were finishing work in the woods and numbers of men were leaving, but on the other hand bushmen were in demand at Montreal, Ottawa, Toronto, Port Arthur, Fort William, and Winnipeg, and bushmen and tie makers at Edmonton. There was a demand for farm help at Ottawa, Toronto, Winnipeg, Saskatoon and Edmonton. Employment in the building trades as indicated by the value of building permits issued in 35 cities decreased 42.22 per cent as compared with January and 46.39 per cent as compared with February, 1917. Carpenters were in demand at Halifax and Toronto; bricklayers and plasterers at Halifax and painters at Ottawa.

Reports from 16 cities, showing the number of workers temporarily engaged and the wages paid these employees during the first pay-roll period of two weeks in February, indicated an increase of almost 25 per cent in the number of workers, an dan increase of nearly 23 per cent in the wages paid.

Strikes

The loss of time in February on account of industrial disputes, while greater than in January, was much less than in February of last year. There were in existence at some time or other during the month 14 strikes, affecting 3,266 workpeople and involving a time loss of 44,152 working days, as compared with 11 strikes, 976 workpeople and 7,898 days in January, and 13 strikes, 6,139 workpeople and 120,414 days in February, 1917. On February 1, there were on record four strikes, affecting 206 workpeople. Ten strikes were reported as commencing during the month as compared with seven in January. Seven of the new strikes and two of the disputes carried over from January were settled, leaving the five following unterminated disputes, involving 505 workpeople, on record at the end of February: plumbers and steamfitters, St. John, N.B.; metal polishers, Weston, Ont.; moulders, Galt, Ont.; coal mine employees at Drumheller, Alta., and civic firemen at Edmonton, Alta.

Prices

Wholesale prices showed slight advances in many lines and substantial increases appeared in grains, fodders and some metals and building material. The index number of wholesale prices reached 263.5 as compared with 258.7 in the previous month and 217.3 in February, 1917. In retail food prices there were slight advances in nearly all articles except fresh eggs, cheese, bread and sugar which were slightly lower. The average cost of a weekly family budget of staple foods was $12.54 as compared with $12.42 in the previous month and $10.46 in February, 1917.

II.—THE INDUSTRIES AND TRADES

Metals, machinery and conveyances.—Sydney reported the outputs of the steel company adversely affected by storms. The February production at the Sydney steel plant in tons was: pig iron and steel, 23,000; ingots, 28,000; blooms, billets and slabs, 24,000; wire rods, 1,200; wire and wire products, 1,000; merchant bars, 5,500, as compared with a production in January of: pig iron, 24,000; blooms, billets and slabs, 21,500; merchant bars, 1,000; wire rods, 500; wire and products of wire, 900. At the Sydney Mines steel plant the production of iron was 6,500 tons and of steel 9,750 tons, compared with 5,500 tons of iron and 7,725 tons of steel produced during the previous month. Halifax reported the smaller ship repairing plants at Dartmouth active, and reconstruction of the dry dock nearly completed. Westville reported steel working plants quieter and many men in the employ of the Nova Scotia Steel and Coal Company were laid off during part of the month because of scarcity of fuel. At Amherst the Canada Car Company worked about half time on car building owing to difficulties in securing material, but other metal plants were well employed. Truro also reported steel works active. St. John reported rolling mills running steadily and shipbuilding yards active. Car shops at Moncton were steadily employed, but stove and furnace foundries were reported quiet. Fredericton reported machine shops and foundries fairly busy. Montreal reported a slackening in activity in the metals group and an oversupply of labour; shipbuilding was active, with plenty of labour available. Quebec reported shipbuilding busy except when interfered with by severe weather, and, at Sorel, where shipyards were reported quiet last month, activity was resumed. Sherbrooke reported fair conditions in the metals group, and, at Three Rivers, iron foundries and steel plants were busy. Toronto reported the iron and steel industries generally busy; structural steel works were somewhat quiet owing to scarcity of material; shipbuilding was active and engine and boiler plants had plenty of work; automobile and cycle manufacturers had an active month and agricultural implement manufacturers had large orders on hand and reported a shortage of skilled labour. Hamilton reported activity in the metals group and a demand for labour in locomotive shops and stove and furnace foundries. At Niagara Falls, metal working industries were busy and diemakers and machine operators were in demand. St. Catharines reported metal plants busy, although some shops closed down for three days owing to fuel shortage. Ottawa reported much greater activity in iron industries and there was a demand for skilled mechanics; the sheet metal trade, however, was quieter. Brockville reported boiler shops and automobile and carriage factories fairly active, and stove and furnace foundries busy. At Kingston the Canadian Locomotive Works was fairly active, and the Kingston Shipbuilding Company and Montreal Transportation Company were busy fitting out boats for the coming season. Belleville reported rolling mills quiet for a few days but operating to capacity at the end of the month. At Peterborough, foundries and machine shops were very active, and, at Galt, all branches of the metals group were busy, with a demand for moulders. Brantford reported boiler and engine works, carriage and wagon factories active and a demand for skilled and unskilled labour in stove foundries. Agricultural implement plants were working overtime on export orders. Kitchener and Guelph reported activity in all branches of the metals group, and, at Stratford, there was a demand for skilled workmen.

Manufacturing

Woodstock reported a constant demand for moulders, polishers and mounters in stove and furnace foundries. London reported the metals group busy. At St. Thomas the Canadian Iron Corporation and the Erie Iron Works were busy, but the Norsworthy foundry was only fairly active. Employees of the Michigan Central and Pere Marquette shops were busy. Chatham reported all foundries and machine shops so hampered by lack of fuel that one company closed down and laid off 80 hands; automobile and carriage and wagon factories reported business brisk. Windsor reported resumption of activity in the automobile industry and the bridge works and the Concrete Steel Company were busy. Metal industries at Owen Sound were well employed and there was a scarcity of mechanics in some branches. Orillia reported the agricultural implement works hampered by difficulty in obtaining cars for western shipments. The Algoma Steel Corporation at Sault Ste. Marie was running day and night. Winnipeg reported all branches of the metals and machinery group well employed, and, at Brandon, agricultural implement plants and machine shops were busy. At Medicine Hat the rolling mills were active, but some metal-working establishments were quiet. Calgary reported iron works fully employed. At New Westminster, shipyards continued fully employed and machine shops were busy. Victoria reported iron shipyards normally employed and work at wooden shipyards was brisk.

Foods, liquors and tobacco.—Halifax reported confectioneries short of woman help. At Charlottetown, canning factories were running short time. At St. John, flour and feed mills and the sugar refinery were running steadily. Moncton reported flour and feed mills quiet, but bakeries and confectioneries active. At Fredericton, flour mills, meat packing houses and confectioneries were well employed. Montreal reported flour mills busy, but sugar refineries, on account of the difficulty in getting raw sugar, were somewhat slack. Sherbrooke reported abattoirs and meat packing houses and baking and confectionery establishments active and tobacco factories fairly busy. St. Hyacinthe reported activity in cigar and tobacco factories, breweries and distilleries. Toronto reported flour mills slack owing to the delay in receiving wheat shipments, some plants being temporarily closed down; abattoirs and meat packing houses were active; baking, confectionery and fruit canning establishments were comparatively quiet owing to shortage of supplies. Hamilton reported all branches of the food group active, with a demand for cigarmakers in large factories, and, at St. Catharines, flour mills and meat packers were busy. Peterborough reported flour and cereal mills and meat packing houses busy. At Brantford, flour mills and baking and confectionery establishments were active, but preserving companies were seasonally quiet. Kitchener reported flour mills, abattoirs and sausage factories active and cigarmakers steadily employed; breweries were only fair, but the distillery at Waterloo was busy. Guelph reported flour and feed mills active, but breweries and cigar factories quiet. Biscuit manufacturers at London were very busy, and all cigar factories were well employed. Chatham reported flour and feed mills active, but the Dominion Sugar Company was dull owing to lack of raw material. At Winnipeg, confectioneries reported a slight increase in staff, but vegetable canneries were obliged to lay off a number of hands owing to difficulty in securing supplies. Regina reported flour mills running full time and the abattoir fairly busy. Flour mills at Moose Jaw, Prince Albert and Medicine Hat continued active. Calgary reported flour mills and meat packing houses fully employed. At New Westminster, vegetable evaporating plants were shut down and cigar factories were only partly employed. Victoria reported breweries active and making large shipments.

Textiles, cordage and carpets.—Truro reported some slackening in woollen mills, though there was no reduction in staff. Cotton mills at St. John were

busy, and, at Moncton, woollen mills and underwear and knitted goods factories were active. Fredericton reported the cotton factory running steadily with a demand for more hands. Cotton mills at Montreal were active, with many orders on hand. Quebec reported cotton mills very busy, and, at Sherbrooke, all branches of the textiles group were active. At St. Hyacinthe, knitting factories were working day and night. Toronto reported woollen mills working to capacity, and hosiery, underwear and knitted goods establishments were busy; carpet makers were well employed. Hamilton reported cotton manufacturers active and there was a demand for weavers. St. Catharines reported manufacturers of silk, underwear and knitted goods active. At Kingston, cotton, woollen and hosiery mills were very active, with some demand for help. Peterborough reported woollen mills and the cotton factory busy. At Galt, cotton and woollen mills were active, and, at Brantford, there was a demand for help in woollen mills and knitting factories. Kitchener reported hosiery, felt and twine factories busy. At Guelph, woollen spinning mills, knitting factories and carpet factories were very active. Stratford reported a demand for help in woollen and knitting factories. London and St. Thomas reported knitting companies active, and, at Chatham, woollen mills were working overtime. The worsted woollen factory at Orillia installed additional machinery and increased the number of hands. Winnipeg reported bag companies well employed, but knitting establishments were handicapped by lack of material; tent and awning makers reported a slight increase in staff. Vancouver reported an increased demand for operators on sails, tents and awnings.

Clothing and laundering.—At Halifax, clothing factories reported a demand for woman help, and, at Truro, the Eastern Hat and Cap Company was working overtime with a full staff. At St. John, ready-made clothing establishments were active on spring orders, and, at Moncton, cap factories were active. Quebec reported ready-made clothing establishments quiet, but, at Sherbrooke, clothing factories were brisk. Glove factories at Three Rivers were hampered by slow deliveries of materials. Hull factories also reported difficulty in securing raw material, but, at St. Hyacinthe, clothing trades were well employed. Toronto reported garment workers well employed, although not as busy as usual, owing to difficulty in obtaining materials; women's whitewear factories were active, with a constant demand for experienced operators. Hamilton reported ready-made clothing factories active, with a demand for labour in steam laundries and dyeing and cleaning establishments. At Niagara Falls, hat, corset and suspender factories were active. Ottawa reported clothing manufacturers busy, though suffering from delays in shipment of materials. Brockville reported the Walthosen Hat Corporation working full time and manufacturers of gloves and fur goods well employed. Brantford reported overall and shirt companies very busy, and, at Kitchener, help was in demand in shirt and collar factories, button factories, glove and whitewear factories. At Stratford, ready-made clothing factories were fully employed. Windsor reported that the Peabody Overall Company, which had been shut down for three weeks, had re-opened with a very active demand for woman help; the shirt factory also required help. At Orillia, a clothing factory which had been destroyed by fire resumed operations. Winnipeg reported ready-made clothing factories active, but shirt factories rather quiet. Glove factories were fairly active, but furriers were dull; whitewear factories reported a slight increase in staff. At Vancouver, the opening of the season in the ready-made clothing trade created a demand for operators, finishers and pressers, and overall and shirt operators were fairly well employed.

Pulp, paper and fibre.—St. John reported the pulp mill running day and night, and, at Newcastle, pulp mills were busy, with unskilled labour in demand.

Sherbrooke reported pulp and paper mills active, and, at Three Rivers, there was a demand for help. The E. B. Eddy Company and the Beaver Board Company at Hull reported increased business. Manufacturers of felt and tarred paper at Hamilton were busy, and, at St. Catharines, beaver board, pulp and paper mills continued active. At Ottawa, owing to low water and scarcity of cars, the J. R. Booth ground wood mill was partially shut down, about 100 employees being affected. The pulp and paper mills at Sault Ste. Marie were running at full capacity day and night. Victoria reported the roofing paper factory at Sidney and pulp and paper mills on the coast very busy.

Printing, publishing and paper. — Halifax reported printing offices active, and, at St. John, all printers were well employed and binderies and paper box factories were busy. Moncton, Newcastle and Fredericton reported printers well employed. There were no printers idle at Montreal, and, at Quebec, printing offices and binderies reported a busy month. Sherbrooke and St. Hyacinthe reported printers busy, but at Three Rivers the trade was quiet. At Toronto, printers, bookbinders and allied trades were well employed, and all branches of the printing, publishing and paper goods group at Hamilton were active. Ottawa reported the printing and publishing group well employed, and, at Brantford, there was a demand for woman help in paper box factories. Kitchener reported printers steadily employed and paper box factories busy, and, at Guelph, newspaper and job printing offices had an active month. There was some demand for job printers at Woodstock, and all branches of the printing group at London were well employed. Windsor reported employment in newspaper and job offices and in paper box factories quiet. At Winnipeg, printing and publishing houses were fairly busy, and paper box factories were well employed. Brandon reported printers busy, and, at Regina, help was in demand. Moose Jaw and Prince Albert reported employment in the printing industry good. Medicine Hat reported fair conditions, and, at Lethbridge and Calgary, printers were steadily engaged. At Vancouver, employees of paper box factories were not quite as busy as during the previous month. New Westminster reported all printers employed full time, and, at Victoria, newspaper and job printing offices were well employed.

Woodworking and furniture.—Halifax reported sash, door and planing mills operating at capacity day and night, and, at Amherst, the piano company was well employed. Truro reported the woodworking factory running at capacity. St. John reported sash, door and planing mills operating steadily, and the wooden box factory busy; brush and broom factories were well employed. At Moncton, sash, door and planing mills and the cooperage works were steadily engaged, and, at Newcastle, there was a demand for skilled labour in planing mills and sash and door factories. Fredericton also reported activity in planing mills. At Quebec, sash, door and broom factories were active, but box factories were quiet. Sherbrooke reported sash, door and planing mills quiet, but chair factories active. St. Hyacinthe reported sash and door factories and wooden box factories active, and furniture and organ factories well employed. Woodworking establishments at Three Rivers were busy and the E. B. Eddy match factory at Hull reported normal activity. At Toronto, sash and door mills and wooden box factories and furniture factories were working steadily, and piano makers had a good month. Hamilton reported all branches of the furniture and woodworking group active. Sash and door factories at Niagara Falls were quiet, but at St. Catharines were fairly active. Ottawa reported box factories busy and an improvement in broom factories. Sash, door and planing mills at Brockville were somewhat slack, but, at Kingston, were fairly active. Piano factories at Kingston were obliged to close down a few days owing to lack of material. Belleville reported sash, door and plan-

ing mills busy and furniture factories in need of help. Peterborough reported sash, door and planing mills very active; one mill which was destroyed by fire was being rebuilt. At Galt, sash, door and planing mills were very busy, and, at Brantford, sash and door factories were fairly well employed and the piano case factory was very busy. Kitchener reported sash and door factories working full time, wooden box factories busy, and all furniture factories running full time. Broom factories reported trade fair, the piano and organ factory was active, and the wooden toy factory, while having plenty of orders, was closed down part of the month owing to shortage of coal. Guelph reported sash, door and planing mills quiet, but piano and sewing machine factories busy. At Stratford, sash, door and furniture factories were well employed. Woodstock reported there was some demand for skilled hands in furniture and chair factories and in piano and organ factories. London reported activity in sash and door factories and in wooden box factories. At Chatham, some sash, door and planing mills were working short hours, but box factories were busy. Windsor reported sash and door factories well employed and the piano factory running full time. At Owen Sound, all branches of the woodworking group, except the wooden toy factory, were normally engaged. The furniture factory at Orillia reported difficulty in obtaining labour and a slight falling off in demand. Winnipeg reported sash and door factories dull, but, at Brandon, sash and door factories and planing mills were busy. Regina reported fair conditions in the woodworking group, and there was some activity at Moose Jaw in the manufacture of wooden boxes. Planing mills at Prince Albert and Medicine Hat were quiet. At New Westminster the sash and door factory increased its staff and box factories were fully employed; one factory added a wooden toy department, employing about 100 hands. Nanaimo reported sash and door factories working steadily but not at capacity. Wooden box factories at Victoria were busy.

Leather, boots, shoes, rubber. — The Amherst Boot and Shoe Company reported employment good, and, at St. John, the tannery and boot and shoe factory were steadily employed. Fredericton reported tanneries working steadily, the shoe factory busy and larrigan factories working full time. Montreal reported boot and shoe factories very quiet and tanneries dull owing to the small demand for leather. Quebec reported tanneries active, but boot and shoe factories and trunk and bag factories dull. At Sherbrooke, boot and shoe factories were fairly active, and, at St. Hyacinthe, tanneries were very busy and boot and shoe workers were better employed than during the previous month. Three Rivers reported tanneries and boot and shoe factories quiet, but, at Sorel, tanneries were normally employed. Toronto reported the boot and shoe industry quiet, though workers on harness and horse goods were well employed, and the Goodyear Tire and Rubber Company was increasing its staff. Boot and shoe factories at Hamilton were fairly busy, and workers on trunks, bags, horse goods and belting were active. St. Catharines reported that rubber footwear factories had a good month, and, at Ottawa, the Hugh Carson leather company was increasing its staff. Brockville reported fair conditions in the manufacture of harness and belting, and Kingston reported tanneries active. At Peterborough, harness makers and boot and shoe workers were busy. Galt reported an improvement in boot and shoe factories; the Brandon Shoe Company at Brantford were very busy; at Kitchener, tanneries were well employed, and while some boot and shoe factories were busy others were quiet. The Dominion tire factory was working overtime and the large rubber factories were very busy. Tanneries at Stratford and London were active. Winnipeg reported tanneries and trunk and saddle factories fairly active, and, at Brandon, tanneries were fairly busy. Calgary reported trunk, bag and harness workers fully employed. Employees of boot and shoe factories at Vancouver worked steadily, and, at New

Westminster, the tannery was running full time.

Clay, glass and stone.—St. John reported cut stone and granite works dull. Quebec also reported a quiet month, but, at Sherbrooke, employment was fair. St. Hyacinthe reported stone cutting yards quiet, but brick plants and lime kilns were active. Hamilton reported a demand for labour in pottery and porcelain works. Brockville reported cut stone and granite yards quiet. Belleville reported the pottery active in the manufacture of small wares and tile. Kitchener reported stonecutters and marble workers employed full time, but for workers in brick, tile and sewer pipe plants, employment was slack. Chatham reported brick, tile and cement works quiet owing to the severe weather. At Windsor, cut stone and brickyards were making preparations for the spring demand. Regina reported cut stone and granite works very quiet. Brick plants at Medicine Hat continued quiet, but the stoneware company reported business brisk. Victoria reported the pottery and sewer pipe plant operating steadily.

Paints, oils, chemicals, explosives. — Halifax reported the paint factory active, but, at Montreal, there was a reduced demand for paints and oils. The destruction of a wax candle factory by fire threw 15 employees out of work. Sherbrooke reported manufacturers of acids and extracts active, but Three Rivers reported paint mills handicapped by delay in coal and freight shipments. Toronto reported paint and varnish plants busy on spring orders, and chemicals and soap works were in steady operation. At Hamilton, all branches of the paints and chemical group were active. The cyanamid plant at Niagara Falls was quieter owing to lack of electric power. Brantford reported starch and varnish factories well employed. Windsor reported paint and varnish factories active and manufacturers of extracts and drugs busier than usual at this season. At Regina, the oil refinery was running full time and the soap works reported business fair. At Medicine Hat the linseed oil mills were fairly busy. Victoria reported the paint and soap factory working steadily.

Transportation

Earnings of the Canadian Pacific Railway during January, 1918, were $10,789,817, as compared with $10,158,307 for the same month in the previous year. St. John reported that heavy snowstorms interfered with railway operations. At Moncton, railway traffic was very active and repair shops were busy. Newcastle reported that heavy snowfalls necessitated much overtime, and, at Fredericton, railway men had more work than they could handle. Montreal reported that the demand for freight handlers exceeded the available supply of experienced men. The Canadian Pacific Railway shops at Angus were brisk, but shops in Montreal reported a slackening owing to shortage of materials. Quebec reported railways active and much employment in keeping lines free of snow. Toronto reported that steam and electric railways were operated under unusual difficulties owing to frequent snow blockades. Railway repair shops had a large quantity of work on hand. Hamilton reported railway traffic and repair shops active, and, at Niagara Falls, all railways were busy. Brockville reported steam railways active; some passenger trains were taken off. Galt reported steam and electric railways busy, and, at Kitchener, freight departments were well employed. The Grand Trunk Railway shops at Stratford were well employed. London reported that the general curtailment of passenger train service by the Grand Trunk and Canadian Pacific railways set back quite a number of passenger conductors and brakemen, but freight traffic was heavy. The London street railway took off eight cars for a part of the month to conserve electric power but these were later returned to service. St.

Thomas reported the railroad traffic congestion was somewhat relieved, and railroad employees, with the exception of those on the Wabash, were well employed. The Wabash line removed a number of locomotives from the Canadian division, which laid off a number of employees. Railway repair shops at North Bay reported business brisk. Sault Ste. Marie reported that railways were having difficulty in handling freight owing to snow and frost, poor coal and shortage of cars. Winnipeg and Brandon reported employment in railway repair shops well maintained. Regina reported that several passenger trains were taken off and that freight service was only fair. Moose Jaw reported railway traffic not heavy, though there was considerable overtime in repair shops. At Prince Albert, railway conditions were somewhat improved. The Canadian Pacific Railway at Medicine Hat reported improvement. Calgary reported railways fully employed and repair shops busy. New Westminster reported street and electric railway business improving, freight traffic being exceptionally heavy; railway repair shops were fully employed. While work at the Canadian Pacific Railway repair shops in Vancouver was reported plentiful, the shops have been placed on eight hours a day for five days and four hours on Saturdays. Halifax and St. John reported 'longshoremen very active, but at Sydney 'longshore work was quieter. Victoria reported some improvement in coast navigation, several boats which had been tied up during the winter having been placed in commission.

Mining

Sherbrooke reported copper and asbestos mining active and mills and concentrators fairly busy. At Cobalt, ore shipments during February amounted to 26 cars containing approximately 2,128,376 pounds, compared with 39 cars containing 2,909,995 pounds during January, the falling off being attributed to severe winter weather and the short month. Bullion shipments were somewhat lower, there being a tendency on the part of the producing companies to hold their silver ore for expected higher prices. Shipments of bullion were 220,117.80 ounces, compared with 830,964.78 ounces in January. Gold mines at Porcupine and Kirkland Lake reported the supply of labour more adequate. The Alexo Nickel mine near Porquois Junction was shipping ore at the rate of nearly one and one-half million pounds per month, as compared with 1,000,000 pounds monthly during 1917. Fernie reported metal mines in the district steadily employed.

The coal output of the Dominion Coal Company was 268,000 tons, compared with 274,000 tons in January, the short month being responsible for part of the decline. Compared with the first two months of last year there was a decrease of 77,000 tons, and it was estimated that the output for the year would show a decrease of at least 300,000 tons from the production of 1917. The Sydney mines coal output was 44,000 tons, compared with 48,900 tons in January. The coke output of the Dominion Steel Company was 42,000 tons and that of the Sydney Mines coke ovens 9,050 tons. Westville reported that the Allan shaft of the Acadia Coal Company, where an explosion occurred in January, was again being operated, but that the Albion plant which was closed in December last on account of fire was not in condition for re-opening. The Intercolonial Coal Mining Company was working steadily and raised about 15,000 tons. Amherst reported that some old shafts were being opened in the River Hebert district. Fredericton reported continued activity in coal mines at Minto. Calgary reported the coal mines of the district, with the exception of the Drumheller field, where a dispute was in progress, were working

to the capacity of the men employed. Lethbridge and Fernie reported coal mines operating steadily, and, at Fernie, coke ovens were fully employed. Nanaimo reported coal mines on the Island steadily employed but short of men.

Building and Construction

Halifax reported that repairs to the various industrial plants and the erection of temporary dwelling houses were proceeding rapidly, and that the reconstruction operations were giving employment to about 4,000 men. Sydney reported some activity in building and repairs, but, at St. John, building was dull. Moncton also reported building quiet. At Montreal it was estimated that only one-quarter of the available equipment of the large contractors was in actual use and many building tradesmen were out of work. Sherbrooke reported quietness in all branches of building and construction, and other Quebec cities reported building dull. Toronto reported a number of building tradesmen out of employment and some carpenters obtained work in other places. At Hamilton, building tradesmen, while handicapped by weather conditions, were all actively employed; about 25 plasterers went to Halifax. Peterborough reported building active, and Windsor reported extensive building and construction work for the Canadian Steel Corporation at Ojibway, but with these exceptions building was reported quiet at all Ontario centres. Winnipeg and Brandon reported building practically at a standstill. Other western cities reported building quiet, and, at New Westminster and Nanaimo, no building was being done. Victoria reported that construction work on the new Government wharf at Ogden Point was approaching completion. The value of building permits issued in 35 cities decreased from $1,562,637 in January to $901,933 in February, or 42.22 per cent. As compared with February, 1917, there was a decrease of $780,562, or 46.39 per cent.

Lumbering

Westville reported that despite the very heavy snowfall the lumbering industry continued active. Newcastle reported that heavy snowfalls and lack of unskilled labour interfered with lumbering operations. Quebec reported that some of the lumbering camps in the Lake St. John district were closing down owing to the heavy snowfall. Sherbrooke reported lumbering camps active, but in the Ottawa district lumbering operations were somewhat reduced because of difficulty in securing bushmen. At Peterborough lumbering was active, but heavy snowfalls made it difficult to bring out logs. Port Arthur reported that more men were wanted in lumber camps and that outputs were being curtailed accordingly. Prince Albert reported lumbering camps preparing to finish for the season and small squads of men were coming back from the woods. Calgary reported a continued demand for men for lumber camps and sawmills. New Westminster reported sawmills working steadily and nearly all shingle mills operating two shifts. Logging camps in the Nanaimo district were fairly well employed, and sawmills were short of labour. Victoria reported activity in the lumbering and logging industry.

Fishing

Sydney reported fishing quiet. Prince Albert reported that lake fishing showed improvement; many men and teams were employed and fair catches were made. New Westminster reported no fishing being done except for the local market. At Nanaimo the herring season was nearly over.

III.—LABOUR AND INDUSTRY IN THE PROVINCES

Nova Scotia

At Halifax, reconstruction of the dry dock was nearing completion, and small shipyards at Dartmouth were active on repairs. Stove and furnace foundries were working overtime and confectioneries were short of woman help, which was also in demand in ready-made clothing factories. Employment for printers was good; sash, door and planing mills were running day and night, and the paint factory was active. All 'longshoremen were employed.

Sydney reported steel outputs fairly well maintained despite adverse weather conditions. Shipbuilding and repairing yards were not as active as during last month, but normal conditions obtained in stove and furnace foundries. Coal outputs, owing in part to the short month, were less than in January.

Westville reported all steel working plants quiet, and many men in the employ of the Nova Scotia Steel and Coal Company were laid off during part of the month, the company finding it difficult to secure fuel to keep all departments in operation. Woodworking plants were somewhat quiet and freight shipments were less than in January. The coal mining situation, while improved over that of the previous month, still remained serious. The Allan shaft of the Acadia Coal Company was again in operation, but the Albion colliery, which closed down in December on account of fire, was not re-opened. The Intercolonial Coal Mining Company worked steadily during the month. Despite heavy snowfalls the lumbering industry continued active.

At Amherst the Canada Car Company was working about half time on car building, owing to shortage of material, but the International Engineering Company and the Rhodes-Curry Company were well employed. The Amherst Piano and the Amherst Boot and Shoe Company were steadily engaged. Coal mining was very active and two old shafts were being re-opened in the River Hebert district.

Truro reported the steel works operating two shifts. Woollen mills were commencing to slacken a little, though there was no reduction in staffs or short time. The Eastern Hat and Cap Company was working overtime, and the woodworking factory was employed at full capacity. Railway trainmen and machinists were working long shifts and sectionmen were in demand.

New Brunswick

St. John reported rolling mills in steady operation and shipbuilding yards continued active. The sugar refinery and other branches of the foods group were well employed and cotton mills were busy. The pulp mill was running day and night and all printers were employed. Sash, door and planing mills were running steadily, and wooden box factories and brush and broom factories were busy. The boot and shoe factory was working steadily. 'Longshoremen were well employed.

Moncton reported steady conditions in the manufacture of locomotives, cars and parts, but stove and furnace foundries were quiet. Biscuit factories and bakeries were active, but other branches of the food group were somewhat dull. Employment in woollen and underwear factories and in hat and cap factories was good, printers were well engaged, and steady conditions prevailed in the woodworking and furniture group. Employment was good on steam railways and in repair shops.

Newcastle reported shipbuilders very busy and pulp and paper mills were working day and night, with unskilled labour in demand. Planing mills and sash and door factories were well employed. Steam railway employees were

very busy, but lumbering operations continued to be handicapped by heavy snowfalls and lack of unskilled labour.

Fredericton reported machine shops and foundries and the cotton factory running steadily, and sash, door and planing mills busy. Employees of larrigan factories were working full time. Railway men had plenty of employment and the coal mines at Minto continued active.

Quebec

Montreal reported a falling off in activity in some branches of the metals group, owing to delay in receipt of raw materials. Shipbuilding was active. Flour mills were well employed, but sugar refineries, on account of difficulty in getting raw sugar, were somewhat slack. Cotton mills were active and reported a large number of orders still on hand. Manufacturers of clothing were busy and printers had a good month. Tanneries and boot and shoe factories remained quiet. Fifteen employees were thrown out of work owing to fire in a candle factory. Freight handlers had all the work they could do and the demand for men exceeded the supply.

Quebec reported shipbuilding busy and cotton mills active. Newspaper and job printing plants and sash and door factories were active, but box factories were quiet. Tanneries were active, but boot and shoe factories continued dull. Some lumbering camps in the Lake St. John district were closing down owing to heavy snowfalls.

Sherbrooke reported the metals group fairly active, and cotton and woollen factories busy. Pulp and paper mills and newspaper and job printing establishments were well employed, but sash, door and planing mills were quiet. Boot and shoe factories were fairly busy. Employees of steam railways had plenty of work and active conditions prevailed in copper and asbestos mining. Lumbering camps were active, but saw mills and shingle mills were quiet.

St. Johns and Iberville reported that all local industries worked full time, with the exception of the Hearst Accumulator Company, which was short of lead. Furriers were quiet, but all the other trades were well employed.

Three Rivers reported that the Canada Iron Foundries had plenty of work and their machine shops were running day and night; other iron working establishments were also running full time. The Wabasso Cotton Company was employing all hands regularly and glove factories were busy. There was a demand for men at the Wayagamack Pulp and Paper Company, and the St. Maurice Paper Company was working steadily. Tanneries and boot and shoe factories were rather slack. Paint mills were fairly busy, but were hampered by delay in coal shipments.

At Hull, building manufacturers reported some improvement, though there was still some difficulty in securing raw material owing to freight congestion and railway embargoes. The E. B. Eddy Company reported business improved as compared with January, freight congestion affecting raw materials having been overcome. The Beaver Board Company was very busy, and extra help was taken on during the month by the Canada Cement Company.

St. Hyacinthe reported the metal, machinery and conveyances group fairly active but some difficulty in securing raw material. Flour and feed mills, abattoirs and bakeries and confectioneries were active. Cigar and tobacco manufacturers and breweries and distilleries were busy. Knitting factories worked day and night and overall factories were short of help. The clothing trades were fairly well employed and steam laundries had a good month. Printers were busy and the paper box factory fairly active. Sash and door and wooden box factories were active, and furniture and organ factories had plenty of work. Tanneries were very busy, and boot and shoemakers better employed than during the previous month. Stone cutters had a quiet month; brickmaking

establishments and lime kilns were active. Railway workers were very active in all branches, extra gangs being engaged in clearing the yards. Farm hands were scarce; farmers could not secure the help necessary to cut firewood in spite of the high prices offered.

At Sorel, shipyards which were reported quiet last month showed a revival of activity and large numbers of men were engaged upon repairs and new vessels. Foundries were busy and the mica factory and tannery were well employed.

Toronto reported the iron and steel industry generally busy, and some plants working on special orders were being operated to capacity. Structural steel plants were rather quiet, owing to scarcity of raw material, but shipbuilding was active. Agricultural implement manufacturers had large orders on hand and reported a shortage of skilled labour. Flour milling was slack, owing to the delay in receiving wheat shipments, some plants being closed down temporarily. Abattoirs and meat packing houses were active. Baking, confectionery and fruit canning firms were quiet, owing to shortage of materials. Cigar makers were fairly busy. Woollen mills were working to capacity with plenty of orders. Hosiery, underwear and knitted goods establishments were busy and carpet workers had plenty of employment. Cloak and garment workers were active, with a demand for woman labour. Women's whitewear factories also reported a demand for experienced operators. Printers, bookbinders and allied trades had a good month. Sash and door factories, wooden box makers, and furniture factories were working steadily, and piano makers had a good month. The boot and shoe trade was quiet. Paint and varnish plants were busy with spring orders and chemical and soap works were in steady operation. Severe weather interfered with the movement of freight on steam railways and repair shops had a large quantity of work on hand.

Hamilton reported all branches of the metals group busy and a demand for labour in locomotive shops and stove and furnace foundries. The demand for cigarmakers in large factories continued and there was a demand for weavers in cotton factories. Steam laundries and dyeing and cleaning establishments reported a demand for labour, and ready-made clothing factories, shirt, collar and button factories and women's whitewear factories were busy. All branches of the printing and publishing group were well employed and woodworking and furniture factories were active. There was a demand for labour in pottery and porcelain works.

Niagara Falls reported metal-working industries of all kinds busy and diemakers and experienced machine operators in demand. Hat, corset and suspender factories were active, but planing mills were quiet on account of the slackness in building. Railways were busy, though bad weather and lack of motive power delayed freight services. At Welland all industries were active, and at Port Colborne lake vessels were being fitted out for the coming season.

St. Catharines reported metal-working establishments active, although some of them had closed down for a few days owing to fuel shortage. Flour mills, meat packers and confectioneries continued busy and breweries were dull. Manufacturers of silk, knitted goods and underwear were well employed, and beaver-board, paper and pulp mills continued busy. Sash, door and planing mills, and the various branches of the woodworking trade were fairly active. Rubber footwear factories had a good month.

Ottawa reported a demand for boilermakers, but employment for sheet metal workers was dull. Machinists and moulders were in demand at the Victoria Foundry Company, which was much busier than in January. There was an improvement in clothing, although trade was hampered by uncertainty in the shipment of raw materials. The printing, publishing and bookbinding trades were busy, and paper box and

bag factories reported employment well maintained. Wooden box factories continued busy. At Arnprior the factory of the newly organized Arnprior Cabinet Company was opened and operations begun with a staff of 30. Short time was reported in the Parker Broom factory owing to delay in receiving material. Additional help was being taken on in leather factories. Owing to low water and a scarcity of cars, the J. R. Booth ground wood mill was partially shut down, about 100 employees being affected, and the general mill operations were also quieter. Lumbering operations were somewhat reduced owing to difficulty in securing bushmen.

Brockville reported employment in the metals group and in flour and feed mills fair. Newspaper and job printing offices were busy, but sash, door and planing mills were not very active. Railway transportation was steady and a number of boats were being repaired prior to the opening of navigation.

Kingston reported the Canadian Locomotive Works fairly active, and the Kingston Shipbuilding Company and the Montreal Transportation Company were very busy fitting out boats for the coming season. Help was in demand at cotton, woollen and hosiery mills. Sash, door and planing mills were fairly busy and piano factories were active, though closed down a few days owing to lack of material.

Belleville reported activity in all branches of metal manufacturing, with a demand for labour in some establishments. Newspaper and job printers were well employed; sash, door and planing mills were somewhat quiet, but furniture factories were busy. The pottery was steadily engaged.

Peterborough reported electrical workers and employees of foundries and machine shops active, and flour and cereal mills and meat packing houses busy. Employment in woollen mills was good and newspaper and job printers were well employed. Forty men were thrown out of employment by a fire which destroyed the Peterborough Planing Mills, but rebuilding operations were to be commenced as soon as possible. Heavy snowfalls interfered with lumbering operations.

Galt reported all branches of the metals group busy and flour mills working day and night. Cotton and woollen factories and the silk mill were active, with a demand for help. Sash, door and planing mills were very busy, and employment in boot and shoe factories was improving.

Brantford reported the manufacturers of engines and boilers active and carriage and wagon factories were busy on summer orders. The Buck Stove and Range Company was busy and short of labour. All agricultural implement factories were very active on export orders and were working overtime. Flour mills were running full time and baking and confectionery establishments reported an active month. Woollen mills and knitting mills were very busy and short of help. The Brantford Cordage Company was very active and was employing Chinese labour. Shirt and overall manufacturers reported business brisk. Printing establishments were active, but box manufacturers reported a shortage of woman help. Sash, door and planing mills were fairly well employed, and the piano-case company was busy. The Brandon Shoe Company was very active and the starch and varnish factories were well employed.

Kitchener reported activity in the metals group, and some demand for machinists. Flour mills and bakeries and confectioneries were busy and cigarmakers were steadily employed. The hosiery, felt and twine factories were active, and operators were in demand in shirt and collar factories. Help was also in demand in button factories, glove factories and whitewear factories. Sash and door factories worked full time, wooden box factories were busy, and all furniture factories and piano and organ factories were running full time. Tanneries were active, but boot and shoe factories were only fairly well employed. The Dominion Tire factory was work-

ing overtime and both of the large rubber factories were very busy.

Guelph reported all machine shops and foundries active, with the supply of labour equal to the demand. Flour and feed mills were busy, but breweries and cigar factories were quiet. The Guelph Cotton Spinning Mills and the Dominion Linen Mills were running at full capacity and reported a shortage of woman workers. Woollen spinning mills and all knitted goods factories were very active. Carpet mills were busy and steam laundries were advertising for woman help. Newspaper and job printing houses and paper box factories had a good month. Piano and sewing machine factories were brisk.

Stratford reported a demand for skilled workmen in the metals and machinery group, and in woollen, hosiery and knitting factories. Newspaper and job printers were working full time, and sash, door and furniture factories and the Grand Trunk repair shops were well employed.

At Woodstock there was a constant demand for moulders, polishers and mounters in stove and furnace foundries, but in baking and confectionery and in underwear and knitted goods the supply was equal to the demand. There was some demand for job printers and for skilled hands in furniture and chair factories and in piano and organ factories.

London reported the metals group well employed, though a shortage of raw materials was affecting business. Biscuit factories and cigar factories were busy, and hosiery and clothing establishments were active. Newspaper and job printers had a busy month. The curtailment of railway passenger trains lessened employment for passenger trainmen, but freight traffic was active. The street railway took off several cars during the month to conserve electric power.

St. Thomas reported the Canada Iron Corporation busy and Michigan Central shop employees well engaged with the exception of a few days when car repairers were on strike. Pere Marquette employees also were busy. The Norsworthy Foundry Company was only fairly well employed, but the Erie Iron Works reported business brisk. The St. Thomas Packing Company was busy and the Monarch Knitting Company worked full time. Newspaper employees had a normal month and job printers were busy. The Just-Wright Shoe Company was increasing its staff. Railroad traffic men continued busy with the exception of Wabash employees; a number of locomotives were removed from the Canada division.

Chatham reported all foundries and machine shops active, but still handicapped by a lack of fuel, and one company was compelled to close down entirely and lay off 80 hands, owing to lack of gas. Automobile and carriage and wagon factories were brisk and flour and feed mills were busy. The Dominion Sugar Company was dull owing to lack of raw material. The abattoir, while active, was short of cars. Woollen mills were still working overtime and the American Pad and Textile Company was short of hands. Sash, door and planing factories were working short hours, but box factories were busy. Brick, tile and cement works, owing to severe cold weather, were quiet. Steam railways were active, but the electric railway was out of service the greater part of the month owing to fuel shortage.

Windsor reported the bridge works and the concrete steel company active, and automobile plants running to full capacity; stove and furnace factories were somewhat quieter. The Canadian Postum Company was running short-handed and flour mills were dull. Cigar factories reported a demand for woman help. The Peabody Overall Company, which had been shut down for three weeks, re-opened and placed agents in Kingsville, Leamington and Windsor to employ all the woman help they could secure. Help was also in demand at the shirt factory. Newspaper and job printing was quieter. Sash and door factories reported business good and the piano factory was running full time. The

Standard Paint and Varnish Company reported an increase in business and the Canadian Salt Company was very busy; manufacturers of drugs and extracts were active. The gas plant continued to have difficulty in supplying consumers and the electric light plant cut down the use of street and store lights.

At Owen Sound the metals group was active with some demand for mechanics. Woollen mills were still closed down. All branches of the woodworking group, except the wooden toy factory, were normally engaged.

Orillia reported the agricultural implement factory hampered by difficulty in obtaining cars for western shipments, flour mills were working overtime and the worsted woollen factories put in more machinery and increased the number of its hands. A clothing company which had been destroyed by fire resumed operations, employing 16 hands. The furniture factory reported difficulty in obtaining labour.

Cobalt reported the supply of labour adequate, though there was some falling off in ore shipments due to severe weather and the short month. The supply of labour was also reported more adequate at gold mines in the Porcupine and Kirkland Lake district.

Sault Ste. Marie reported the Algoma Steel Corporation operating day and night and pulp and paper mills were also running at full capacity. Iron mines were getting out more ore owing to an improvement in the supply of labour.

Port Arthur and Fort William reported activity in shipbuilding and all other industries were working regular hours.

Manitoba

Winnipeg reported the metals group active and flour mills and meat packing plants normally employed. Confectioneries reported a slight increase in staff and vegetable canners, while reporting business good, were obliged to lay off a number of employees, owing to difficulty in securing material. Bag companies were well employed, but knitting factories reported business dull. In tent and awning factories a few extra hands were employed. Clothing factories reported February conditions somewhat above the average, but in shirt factories there was some dullness. Glove factories were fairly busy, but furriers reported business dull. Whitewear factories reported a slight increase in staff. Printing and publishing houses were fairly busy, and paper box factories reported business very good. Sash and door factories were dull, but soap factories were fairly well employed. Tanneries and manufacturers of saddlery were fairly busy. Employment in railway repair shops was well maintained.

Brandon reported machine shops busy, flour and cereal mills active, and cigar factories dull. Tanneries were fairly busy and leather factories well employed.

Saskatchewan

Regina reported flour mills running full time and the abattoir fairly busy. Help was in demand in newspaper and job printing establishments, and sash, door and planing mills were fairly active. The oil refinery was running full time and the soap works reported business fair. Freight traffic was somewhat quiet and several passenger trains were taken off. Railway repair shops were fairly busy. Farmers were hiring men for the spring season.

Moose Jaw reported flour mills running full time, but abattoirs and meat packing houses somewhat quiet. Newspaper and job printing houses reported activity. Sash and door factories were quiet, but wooden box factories were fairly active.

Prince Albert reported flour mills working full time, but abattoirs quiet. Newspaper and job printing offices reported activity with help scarce. Planing mills were quiet. There was an improvement in railroad conditions and

continued heavy shipments of wood to southern points. Lumbering camps were finishing for the season and small squads of men were coming back from the woods. There was an improvement in fishing in northern lakes, though the extreme cold still interfered with operations.

Alberta

Medicine Hat reported rolling mills active, but other metal working industries, with the exception of a few engaged in special work, were somewhat quiet. Flour mills were brisk, but other branches of the foods group were fairly quiet. Printers were fairly well employed, but woodworkers were very quiet. Brickyards continued quiet, but the stoneware industry was very brisk. Railway employment showed improvement.

Lethbridge reported flour mills working overtime and planing mills busy. Coal mining was very active, though there was still a shortage of men.

Calgary reported iron works fully employed and the Ogden locomotive shops working nine hours per day owing to the pressure of work. Flour mills were still running double shifts and abattoirs and meat packing houses were fully employed. Newspaper and job printing firms reported employment good, and employees of leather factories were steadily engaged. Railway crews and employees of repair shops were busy. Coal mines in the district, with the exception of Drumheller, where some men were out on strike, were working at full capacity. There was still a good demand for men in lumber camps and sawmills.

British Columbia

Fernie reported job printing active, and one plant which had been closed down for two years was about to be reopened. Owing to severe weather only a few planing mills were operating. Freight traffic was considerably reduced owing to the temporary suspension of operations in the lumbering industry and in planing mills. Metal mining in the district was active and coal mines and coke ovens were steadily employed.

New Westminster reported shipyards fully employed and machine shops busy. Vegetable evaporating plants were shut down, but cigar factories were better employed than during the previous month. Printing offices reported all men employed. Sash and door factories and box factories were fully engaged; one factory added a wooden toy department employing one hundred people. Sawmills were working steadily, some of them on double shifts, and nearly all shingle mills were working two shifts.

Nanaimo reported sash and door factories working steadily, though not to capacity. Quartz mines on the west coast of the Island were commencing to get out ore for shipment and coal mines were working to capacity, though still short of men. Logging camps and sawmills were busy. Shingle mills were somewhat quiet.

Victoria reported the iron shipbuilding yard normally employed and work at wooden shipyards proceeding briskly; the work of installing machinery in wooden vessels was commenced. The rubber roofing company at Sidney was busy and breweries were operating steadily. Flour and feed mills were busy, and pulp and paper mills and newspapers and job printers were steadily engaged. The pottery and sewer pipe factory and the paint and soap factory was busy. There was some improvement in coast navigation, several boats which had been tied up during the winter being placed in commission. Logging and lumbering were brisk.

PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT DURING FEBRUARY, 1918

DURING the month of February reports were received of four Boards of Conciliation and Investigation which had been appointed to inquire into disputes between (1) Algoma Steel Corporation, Limited, and steel workers—settlement reported; (2) Canadian Pacific Railway Company and conductors, baggagemen, brakemen and yardmen—report includes signed agreements; (3) Grand Trunk Railway Company and machinists, boilermakers and blacksmiths—report includes signed agreement; and (4) Grand Trunk Railway Company and maintenance of way employees—majority and minority reports submitted, company accepted majority report.

One application for a Board was received during the month, being from certain employees of the Collingwood Shipbuilding Company, Limited. The constitution of the Board had not been completed at the close of the month.

Settlements were reported of two disputes in connection with which applications had been received during preceding months. In one other dispute the award of the Board was made the basis of an agreement between the parties concerned.

Application Received

On February 15 an application was received from certain employees of the Collingwood Shipbuilding Company, Limited, members of Georgian Bay Lodge No. 343 of the International Boilermakers, Iron Shipbuilders and Helpers of America. The number affected was given as 375 directly and 200 indirectly, and the cause of the dispute was a demand for increased wages and improved working conditions in accordance with an agreement submitted by the employees to the company. A strike of the employees occurred on February 20, following the refusal of the company to reinstate an employee to his former position of foreman. An officer of the Department visited the locality for the purpose of assisting in adjusting the dispute. The company agreed to have the workman in question reinstated as foreman, and the men returned to work on February 25 under the same conditions as existed prior to the strike, pending investigation under the Industrial Disputes Investigation Act, 1907. A Board was established on February 26, Capt. J. B. Foote, Toronto, and Mr. Fred. Bancroft, Toronto, being appointed members thereof on the recommendation of the company and the employees respectively. At the close of the month steps were being taken looking to the appointment of a chairman.

Other Proceedings under Act

Reference has been made in the October, 1917, number of the *Labour Gazette* to an application for a Board received from the electrical workers at Steelton, Ont., employed by the Algoma Steel Corporation, Limited, the employees concerned being members of Local No. 726 of the International Brotherhood of Electrical Workers. The application stated that the dispute related to wages, working conditions, and discrimination against certain employees. The number affected was given as 167. This matter was brought to the attention of the Board established in connection with a dispute affecting the steel workers of this company, but as a movement was under way by the management to adjust wages and improve conditions it was decided to leave the matter in abeyance for a time. Word was later received on behalf of the electrical workers to the effect that a Board inquiry would be unnecessary. As a result of the general readjustment a new schedule of wages was formulated by the company,

providing for increased rates to the electrical workers.

Reference has been made in the December and January numbers of the *Labour Gazette* to an application for a Board received from the maintenance of way employees of the Grand Trunk Pacific Railway Company, members of the International Brotherhood of Maintenance of Way Employees, to deal with a dispute involving wages and working conditions and affecting 2,000 employees directly and 1,200 indirectly. Procedure looking to the constitution of a Board was held in abeyance pending the outcome of inquiries into disputes affecting similar classes of employees on the Canadian Pacific and the Canadian Northern railways. Subsequently, negotiations took place between the parties concerned which resulted in an agreement being signed, effective from January 1, 1918.

With reference to the findings of the Board of Conciliation and Investigation which inquired into certain matters in dispute between the Canadian Northern Railway Company and the maintenance of way employees on the company's Western Lines, the Department has been informed on behalf of both parties concerned that an agreement has been arrived at on the basis of the award.

Report of Board in Dispute between the Algoma Steel Corporation, Limited, Sault Ste. Marie, Ont., and Steel Workers

ON February 7 the Minister received the report of the Board of Conciliation and Investigation which had been appointed to deal with a dispute between the Algoma Steel Corporation, Limited, Sault Ste. Marie, Ont., and certain employees, being steel workers, members of Algoma Lodge No. 5, Amalgamated Association of Iron, Steel and Tin Workers of North America. The dispute had to do with wages, hours and conditions of employment, 1,588 employees being affected thereby. The personnel of the Board established in this matter was as follows: His Honour Judge Powell, Parry Sound, Ont., chairman, appointed by the Minister in the absence of a joint recommendation from the other Board members; Capt. Wm. J. Thompson, Sault Ste. Marie, appointed by the Minister as for the company, and Mr. James Lockwood, Sault Ste. Marie, employees' nominee.

The Board convened in September, but, shortly afterwards, it was deemed advisable to adjourn for a time in view of efforts which were being made by the disputants to reach a satisfactory arrangement. The report of the Board states that this general scrutiny of the wage rates resulted in a new schedule which "shows not only fair but generous treatment, so much so that the amount of earnings of the employees in different departments run from four per cent (4%) to twelve per cent (12%) in excess of that demanded in the schedule submitted to this Board by the employees." Reference is also made in the report to the alien enemy aspect of the situation.

Word was received in the Department from both parties to the dispute confirming their concurrence in the findings of the Board.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Algoma Steel Corporation and some of its employees, members of the Amalgamated Association of Iron, Steel and Tin Workers of North America.

To the Honourable
the Minister of Labour,
Ottawa.

Sir,—

In response to the request of the abovenamed Association, your Department authorized the appointment of a Conciliation Board, Mr. James Lockwood being selected on behalf of the employees; the Algoma Steel Corporation declining to appoint a representative; your Department, under the powers contained in the Act, named W. J. Thompson. Mr. Lockwood and Mr. Thompson met on August 31, and

again on September 1, and being unable to agree on a choice of a third man, for chairman, your Department was asked to make the selection. As a result you named His Honour Judge Powell, of Parry Sound. The completed Board, with Judge Powell in the chair, met on September 7, and sat continuously on the eighth, tenth, eleventh and twelfth, when the Board adjourned. A critical condition arising, Messrs. Lockwood and Thompson were in session again on the thirteenth and fourteenth. The executive of the Algoma Steel Corporation made it clear that they were not a party to the creation of the Conciliation Board, and, under the circumstances, did not recognize its authority, but would not embarrass its work in any way; the members of the Board would have free and immediate access to any part of the plant whenever they desired it. They would have access to any evidence they chose to call; that Captain D. Kyle, the superintendent, would be at their service during the investigation.

The first meeting was a consultative one with the executive of the company and the representatives of the employees, after which the Board adjourned and visited the plant and carefully observed conditions at the coke ovens, open hearths numbers 1 and 2, the blast furnaces, rail mills, gas engine room and machine shops. Some of these departments have good and ample lavatories, lockers and cloak rooms; others were inadequate and inconvenient. Of these all but one were in the course of improvement or renewal—shower baths being added to some. The management assured the Board that plans were out for an improved sewer system and that ample and proper lavatories and lockers would be installed where necessary throughout the plant. At the request of the Board, Captain Kyle, the superintendent of operations at the steel plant, was present, whenever required, in the interest of the company. Mr. T. W. O'Neil, president of the Local Lodge of the Amalgamated Association of Iron, Steel and Tin Workers of North America, was present and gave evidence on behalf of the claims of the employees; also a statement of conditions required and rates requested by this organization was submitted. The schedule presented demand as follows:

1. A flat rate of so much per hour, plus so much per 100 tons production, plus a 10 per cent increase on total earnings, for all men paid on a tonnage basis.
2. That all blast furnace machinists, boilermakers, iron workers, millwrights, helpers and oilers, now working 10 hours per day, be paid for noon hour, making an eleven (11) hour day, in addition to advance in schedule.
3. That nine (9) hours per day will constitute a day's work in gas engine room for all engine repair men and riggers.
4. That cinder dump pot men be given an additional increase of 5 per cent.
5. That the rail mills cease rolling at 4 p.m. on Saturday in the event of roll changing while rolling shell steel, as at present arranged.
6. The position of blower at number 1 and 2 blast furnaces be increased to the same rate as blower at number 3 blast furnace.
7. The blast furnace boiler house crew be paid same rate per hour as the rail mill boiler house crew.
8. That a clock system be established, and all employees be paid their earnings every two weeks.
9. That proper toilets and clothes lockers be provided throughout the plant.

It was also urged that the Union of the Amalgamated Association of Iron, Steel and Tin Workers of North America be recognized by the making and signing of an agreement with them.

The representatives of the employees claimed that in many instances the wages paid in 1913, and previous to the outbreak of the war, were higher than that paid up to August throughout the season of 1917; that for a long period, from time to time, their claims had been promised consideration, and intimations of increases had been held out, but nothing materialized, and they declared serious trouble was brewing and would occur should their demands not be complied with.

In reply to the demands and claims of the representatives of the Local Union of the Amalgamated Association of Iron, Steel and Tin Workers of North America, Captain Kyle asserted: the schedule of rates demanded would not work out fairly; that it was out of balance; that since his coming to the superintendency of the plant the company had been working on a scrutiny of the rates since July and were endeavouring to adjust their pay-rolls so as each department would receive their proper rate; that already they had adjusted with departments covering more than four hundred men; they had to do this carefully—it occupied time—and asked for patience for some time longer, as their scrutiny would be completed at the earliest possible date, and such scrutiny would be retroactive, taking effect from August 1 last. Captain Kyle pointed out that the men so far who came under the scrutiny appeared satisfied; that the Algoma Steel Corporation employed approximately four thousands (4,000) men, while the organization making the demand represented less than fifty per cent (50%) of their employees.

The company submitted a schedule of rates paid their different departments during a period of 1913 before the war, and a corresponding period of 1917 during the war, and instead of any of the departments showing a lower scale of wage during 1917 than that during 1913, they all show increases from twenty-three (23%) to fifty-two per cent (52%) ex-

cept one, which shows eleven per cent (11%), and the average wage of each individual in this department was $165.00 per month. The executive of the company declared that under no circumstances, at the present time, would they recognize or sign an agreement with this organization, the Amalgamated Association of Iron, Steel and Tin Workers of North America, but they were willing and glad to meet any one group, or committee, from the departments of their plant to talk over rates and conditions at any time; they welcomed that sort of co-operation; that the company would consent to make semi-monthly payments of earnings and wages.

At this stage of the investigation, after earnest appeals for forbearance, all the representatives present agreed to the following resolution, with the distinct understanding on the part of the representatives of the employees that it would require to be confirmed by the members of the Local Lodge of the Amalgamated Association of Iron, Steel and Tin Workers of North America, before it could be accepted:

"Resolved, that in view of the fact Captain Kyle having been but a short time in his present position, and as improvement in the conditions at the plant are apparent under his management, and from his statement it appearing that it is the intention of the employer corporation to make semi-monthly payment of wages, and also to further improve the conveniences of the plant, and that the manager intends a complete scrutiny of the pay-rolls of the plant, with a view to adjustments, and as he has stated the adjustments are to take effect from first of August last, but that it will take him until the thirty-first October next to complete this scrutiny, this Board thinks the management ought to be given a free hand for a couple of months, and, in view of the war, this Board requests the employees to withdraw their applications for a Board of Conciliation and Investigation—it being understood that after that time the employees will be at liberty to apply again for a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act."—Carried.

(Sgd.) F. R. Powell,
Chairman.

Simulantaneously with the presentation of this resolution to the men in session, a letter explanatory of the company's attitude was received from Captain Kyle by Mr. W. T. O'Neil, which was misunderstood, thereby precipitating matters again, and almost severing negotiations, and necessitating further meetings on the thirteenth and fourteenth of Messrs. James Lockwood and W. J. Thompson, the two available members of the Board. With great patience and judgment the representatives of the employees succeeded in persuading delay until the promised scrutiny was completed. It is now finished, and a copy of the company's new schedule is in the hands of the Board, and, so far as this Board can discover, shows not only fair but generous treatment, so much so that the amount of earnings of the employees in the different departments run from four per cent (4%) to twelve per cent (12%) in excess of that demanded in the schedule submitted to this Board by the employees. The adjustment is now completely satisfactory. The following is a copy of a letter from the applicants for a Conciliation Board expressing their satisfaction with rates and conditions arrived at:

Algoma Lodge No. 5,
A.A. of I.S. and T.W.,
Sault Ste. Marie, Ont.,
December 17, 1917.

W. J. Thompson, Esq.,
Queen St., Sault Ste. Marie.

Dear Sir,—

In reply to your letter of the twelfth inst., I have very great pleasure in stating that a satisfactory settlement has been reached between the members of the above Lodge and the Algoma Steel Company, with the exception of a few isolated cases, which can be adjusted in time.

Thanking you on behalf of the Algoma Lodge No. 5,

I beg to remain,
Yours faithfully,
(Sgd.) A. O. Davies,
Financial Secretary.
(Sgd.) Wm. T. O'Neil,
President.

In the course of this investigation and enquiry, your Board discovered one of the causes of unrest and dissatisfaction, particularly "in the departments where men are paid on a tonnage basis only," is the fact that when these departments fall below normal in their production there was a consequent shrinkage of earnings for the employees. What we may call the basic departments of the plant are the coke ovens and the open hearth furnaces. When they fall below normal, dissatisfaction then is apparent. All the more advanced departments depend on them, and if these fail, the production of rails, rods and munition steel is, to a corresponding extent, reduced. In these basic departments there are nearly twelve hundred (1,200) Austrians employed (alien enemies); they almost entirely run the coking ovens; they have been very hard to control; they receive such good pay that they do not require to work all the time, so they knock off whenever they like, and do not come back until their money is spent, or they are good and ready. On occasion the company has been obliged to round these men up with the police in order to get men enough to operate this department, so as the mills could be kept going. On one occasion, when the Munitions Board was crowding the company for greater production, the

absentee Austrian alien labour was so great the management appealed to the office help for volunteers to keep this department going until these absentees would turn up. The Police Department of this city inform us that these Austrians were frequently in the Police Court for violation of the speed limit, the Ontario Prohibition Act, and breaking parole, and upon being searched they were found to have large sums of money on their persons—eight and ten hundred dollars; one one occasion one had twenty-three hundred dollars. This Board recommends that your Department should take recognition of this situation, and, if possible, correct it. For the duration of the war these alien enemies should be compelled to work six days per week and be given sufficient remuneration to keep them in reasonable bodily comfort —the over-plus should go to the War Tax or Pension Fund of Returned Soldiers, or in any other way the Government might determine.

All of which is respectfully submitted.

(Sgd.) F. R. POWELL,
Chairman.
(Sgd.) JAS. LOCKWOOD.
(Sgd.) W. J. THOMPSON.

Sault Ste. Marie, Jan. 31, 1918.

Report of Board in Dispute between the Canadian Pacific Railway Company and Conductors, Baggagemen, Brakemen, and Yardmen

ON February 11, the Minister received the report of the Board of Conciliation and Investigation which had been appointed to inquire into a dispute between the Canadian Pacific Railway Company and certain employees, being conductors, baggagemen, brakemen, and yardmen, members of the Order of Railway Conductors and the Brotherhood of Railroad Trainmen.

An application in this matter was received from the employees on October 16, and grew out of a demand for a revision of the existing schedule, providing for increased wages and improved working conditions. On October 19, an application was received from the Canadian Pacific Railway Company in this matter, stating that the company desired certain alterations and modifications in the schedule. The number affected was given as 6,200 directly and 8,800 indirectly. The applications having reference to the same dispute and both parties agreeing thereto, one Board was established to deal with the matter. The personnel of the Board was as follows: The Honourable Mr. Chief Justice T. G. Mathers, Winnipeg, chairman, appointed by the Minister in the absence of any joint recommendation from the other Board members; Mr. Isaac Pitblado, K.C., Winnipeg, company's nominee; and Mr. D. Campbell, Winnipeg, employees' nominee.

The report of the Board is unanimous and includes new schedules signed on behalf of both parties concerned, covering (a) conductors, baggagemen, brakemen, and flagmen; and (b) yardmen. Both schedules provide that the increases and the application of the eight hour day should become effective from January 1, 1918, and the rules from February 1, 1918. The dispute was thus satisfactorily settled.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and in the matter of a dispute between the Canadian Pacific Railway Company, Western lines, and its conductors, trainmen and yardmen.

To the Honourable Thomas W. Crothers, K.C.,
Minister of Labour,
Ottawa, Canada.

In accordance with the provisions of the Industrial Disputes and Investigation Act, 1907, a Board of Conciliation and Investigation was, on the 19th day of October, 1917, constituted on the application of the employees, to investigate and report upon a dispute between the above named parties; and on the 16th day of November, 1917, the undersigned — Isaac Pitblado, K.C., and David Campbell, Barrister, both of the City of Winnipeg, were appointed members of the Board on the recommendation of the employers and employees respectively. They having failed to recommend the name of one person who was willing and ready to act as a third member, you appointed the undersigned Chief Justice Mathers of Winnipeg as the third member of the said Board.

The Board so constituted met on the 23rd November, 1917, and duly took the oaths of office, and appointed the 3rd day of December, at the City of Winnipeg, as the time and place the Board would convene to hear the said parties, their witnesses and evidence.

At the time and place appointed the Board met and were attended by: C. Murphy, general superintendent of the Western Lines of the said company; W. Mathers, assistant general superintendent, Vancouver; T. F. Flett, superintendent, Winnipeg; A. Halkett, superintendent, Moose Jaw; F. D. Frayne, train master, Calgary; and W. A. McKenzie, secretary of the committee,—representing the company, and Samuel M. Berry, vice-president of the Order of Railway Conductors; A. F. Whitney, vice-president of the Brotherhood of Railway Trainmen; W. G. Chester, general chairman of the Order of Railway Conductors; E. H. Cooke, general chairman of the Brotherhood of Railroad Trainmen, Western Lines; James McLaughlin, secretary of the Brotherhood of Railroad Trainmen; W. A. Wilson, secretary of the General Committee; C. E. Cross, secretary of the General Committee of the Order of Railway Conductors; and R. H. Urquhart; W. W. Lynes and R. E. Goodwin, members of the Committee, representing the employees.

Upon opening up the matters involved in the said dispute, it was found that the locality of the said dispute extended over the main lines, branches and yards of the Railway from Fort William, Ontario, to the Pacific Coast, the territory between Fort William, Ontario, West, to the Eastern Boundary of British Columbia, knawn as the Manitoba, Saskatchewan and Alberta or Prairie Districts, being governed by one schedule of rates and working rules for conductors and trainmen, and the British Columbia or Pacific territory by another, each containing many different working rules, and materially unlike in rates of compensation, and a separate schedule covering the whole territory for yardmen. The questions in disputes affected about 6,200 employees directly.

It further appeared that the employees had, on or about the 23rd day of June, 1917, given notice that they desired a revision of these schedules and submitted a proposed revised schedule consolidating the two schedules heretofore in force for conductors and trainmen and also a revised schedule for the yardmen. These proposed revised schedules are on file in your department in these proceedings.

It further appeared that on the 31st day of July, 1917, a gneral committee representing the employees met the officers of the company and discussed their demands and continued in conference from time to time until on or about the 4th day of October, 1917, and that, notwithstanding the exhaustive efforts on the part of both parties to arrive at an agreement, it was ultimately found impossible to do so, and on the 11th day of October an application was made to you on behalf of the employees for the appointment of a Board under the said Act.

It also appeared by the proposed schedules that the employees sought, in additions to the intorduction of the eight hour day, large direct ncreases in compensation and many variations and changes in the working rules governing the service of the employees, which the company's representatives alleged materially hampered and interfered wiht the succesful and satisfactory operation of the Railway, and which resulted indirectly in large additional increases to many of the employees, all of which the company opposed.

It further appeared that on the 16th October, 1917, the company made a reply to the presentation of the employees in which it was pointed out that on the 1st day of October, 1916, substantial increases in rates of pay had been granted to certain classes of these employees and on the 1st November, 1916, changes in rules had been made, which materially increased the earning power of the men.

The company contended that there should be no revision of the schedules, which would result in an increase in the cost of operation, claiming that the remuneration paid at the present time under all the circumstances was not only fair and ample, but in many cases excessive.

The company further took the position by their said answer and also by a separate application for a Board, dated the 16th day of October, 1917, that if the schedules should be opened upon the application of the employees, several articles and clauses therein should be changed or modified, the changes and modifications requested being set out in the said answers and application.

At the first meeting of the Board the representatives of the employees presented a memorial supplementing their demands contained in their original presentation. In and by the said memorial the employees urged that because of the enormous expense to which they were put by the prolonged negociations with the company, and of the time that had elapsed since their original demands were made, they were entitled to submit a supplementary statement of rates, which supplementary statement is attached to the said memorial. An examination of the said supplementary statement or rates disclosed the fact that the same carried an increase of approximately ten per cent over and above the rates claimed by the original presentation.

The representatives of the company objected to the employees presenting, or the Board's considering the subject matter of

the said memorial, and a like contention was made by the representatives of the employees with respect to the claims made by the company for alterations and emendations in the existing schedule. The Board decided that it was most desirable that all matters of differences should be considered and disposed of during the present hearing, and that no legitimate subject of complaint should be excluded from consideration by the Board. The representatives of both parties at once acquiesced in this decision of the Board, and the enquiry was proceeded with on the understanding that all matters of difference should be open to ventilation and consideration.

Meetings of the Board for the purpose of hearing arguments and evidence were held on the 3rd, 13th, 14th, 15th, 18th, 19th, 20th and 21st December; the 3rd, 4th, 5th, 7th, 8th, 10th, 15th, 18th, 19th, 21st, 22nd, 23rd, 24th, 25th, 28th, 29th, 31st January; 1st, 2nd, 4th, 5th, 6th and 7th February.

After the Board had been in session for several days, it was suggested by the representatives of the company that the dispute, in so far as it related only to rates of pay, should be left to abide the result of a movement in the United States, in so far as such affected the rates in the Western Territory. Upon consideration, the representatives of the employees agreed to accept this suggestion, as applicable to both roadmen and yardmen, provided an agreement could be arrived at respecting the other portions of the respective schedules, and as to the date when the eight hour day should come into effect. Upon this understanding the Board proceeded with a consideration of the other operations of the schedules.

The feeling of the Board was that a strike at this time would be a national calamity, and that a negotiated settlement was most desirable. All their efforts were therefore directed to bringing the parties together and getting them to agree upon each of the numerous items in the schedules concerning which there was a dispute. The representatives of both parties fully recognized the desirability of a settlement by agreement, and they proceeded in a most conciliatory spirit, and with admirable patience and perseverance to negotiate to that end.

After prolonged negotiation and much argument and careful consideration, the parties with the assistance and upon the recommendation from time to time of the Board arrived at an agreement upon all matters in dispute. One new revised schedule for the roadmen in lieu of the two previously existing, and a new revised schedule for the yardmen was unanimously agreed to and signed by the representatives of both parties and is marked Exhibit A and B to this report.

The rates of pay with the exception of the rates on the New Westminster sub-division, which are by agreement fixed for the life of this new schedule, are the existing rates of pay, but when new rates are promulgated for the Western territory, pursuant to the movement now pending in the United States, these rates of pay are to be replaced by increased rates of pay, if any, granted in the United States, pursuant to the agreement set out in Exhibit C hereto.

Before closing this report, we desire to express our warm appreciation of the ability, patience, diligence and good temper with which the prolonged negotiations were conducted, and the spirit of conciliation and give and take which animated the representatives of both parties, and in the absence of which it would have been impossible to achieve a negotiated settlement.

All of which is respectfully submitted.

Dated this 8th day of February, A.D. 1918.

(Sgd.) T. G. Mathers,
Chairman of the Board.

(Sgd.) Isaac Pitblado,
Member of the Board.

(Sgd.) D. Campbell,
Member of the Board.

"A."

CANADIAN PACIFIC RAILWAY COMPANY,
WESTERN LINES.

Schedule of rates and rules for conductors, baggagemen and flagmen.

In effect—Increases and application of the eight hour day, January 1, 1918.

Rules February 1, 1918.

ARTICLE 1.

A.—Mileage and rates of pay on all passenger trains.

For monthly mileage of 5,000 miles or less, exclusive of overtime, switching and detention, except on the Revelstoke and Nelson divisions, where the mileage will be 4,200 miles or less, exclusive of overtime, switching and detention:

Conductors	$165.00 per month.
Baggagemen	97.57 per month.
Brakemen	88.77 per month.

All mileage in excess of 5,000 miles per month and 4,200 miles per month, respectively, will be paid *pro rata*.

For through freight work (construction) helper (pusher) service.

East of Lake Louise and Crow's Nest:

Conductors	$4.18 per 100 miles.
Baggagement and brakemen	2.84½ per 100 miles.

West of Crow's Nest to Kootenay Landing:

Conductors, brakemen and baggagemen will be paid a differential of 11 cents per hundred miles in addition to the above through freight rates, making the rate for:

Conductors	$4.29 per 100 miles.
Baggagemen and brakemen	2.95½ per 100 miles.

From Lake Louise west and from Kootenay Landing west through the Kootenays, the basing rate is: (These rates also apply to mixed trains, except on the Arrow Lake and Okanagan subdivisions where the way freight rate will apply.)

Conductors ... ... $4.29 per 100 miles.
Baggagemen and brakemen .... 2.97 per 100 miles.

On the Mountain subdivision (Lake Louise to Revelstoke) conductors will receive a differential of $1.05 per hundred miles, baggagemen and brakemen a differential of $1.04 per hundred miles, in addition to the above rates, making rate for:

Conductors ... ... $5.34 per 100 miles.
Baggagemen and brakemen .... 4.01 per 100 miles.

On the Nakusp and Slocan subdivisions and on all subdivisions west of the Columbia river on the Nelson division, conductors will receive a differential of 90 cents per 100 miles, and baggagemen and brakemen a differential of 76½ cents per 100 miles, in addition to the basing rates, making rate for:

Conductors .. .. $5.19 per 100 miles.
Baggagemen and brakemen .. 3.73½ per 100 miles.

For all mixed and way freight service east of Lake Louise and Crow's Nest.

Conductors will be paid a differential of 42 cents per 100 miles, and baggagemen and brakemen a differential of 28½ cents per 100 miles in addition to through freight rate, making rate for:

Conductors .... $4.60 per 100 miles.
Baggagemen and brakemen .... 3.13 per 100 miles.

(This differential is based on 10 per cent in excess of the through freight rate.)

For mixed and way freight service from Crow's Nest to Kootenay Landing.

Conductors will receive a differential of 43 cents per hundred miles, baggagemen and brakemen a differential of 29½ cents per 100 miles in addition to through freight rates, making rate for:

Conductors ... . $4.72 per 100 miles.
Baggagemen and brakemen .... 3.25 per 100 miles.

(This differential is based on 10 per cent in excess of the through freight rate.)

For way freight service west of Lake Louise and Kootenay Landing.

On way freight trains on all subdivisions, conductors will receive a differential of 43 cents per 100 miles, baggagemen and brakemen a differential of 30 cents per 100 miles, in addition to through freight rates for the subdivision on which mileage is earned.

(This differential is based on 10 per cent in excess of the basing through freight rate.)

The way freight rates will be:

Where mountain rates apply (Lake Louise to Revelstoke):
Conductors .... $5.77 per 100 miles.
Baggagemen and brakemen .... 4.31 per 100 miles.

Where semi-mountain rates apply (on the Nakusp and Slocan subdivision and on all subdivisions west of the Columbia river, on the Nelson division):

Conductors .... $5.62 per 100 miles.
Baggagemen and brakemen .. 4.03½ per 100 miles.

Where the basing rate applies:
Conductors .... $4.72 per 100 miles.
Baggagemen and brakemen .... 3.27 per 100 miles.

SPECIFIED ASSIGNMENTS.

1. On Westminster subdivision for crews in assigned passenger, mixed and other service combined, 100 miles or less, eight consecutive hours or less to constitute a day's work. Conductors to be paid not less than $175.00 for calendar month and brakemen not less than $131.25 for calendar month. All time in excess of 224 hours in any month to be paid as overtime *pro rata*.

2. Field Hill crews will be guaranteed 224 hours per month. Eight (8) consecutive hours to constitute a day's work. Overtime after eight (8) hours *pro rata*.

Ruling.—When a crew comes into Field and is released from duty they cannot again be called after the expiration of eight (8) hours from the time they came on duty without being entitled to a new day.

3. Crews may be assigned to transfer, switching and industrial work at the following points: Medicine Hat, Redcliffe, Frank, Taber, Grand Forks, Granby Smelter, and Greenwood-Motherlode, and shall be paid way freight rates except as specified, obtaining on the respective territory where the assignments are made, on the following basis:

Eight hours or less to constitute a day's work, overtime *pro rata*. Time to be computed from the time crews are required to report for duty until time off duty.

Each crew in these assignments will be guaranteed 208 hours per month. In the event of an assignment being discontinued or created during any month, crews will be paid their full proportion of the monthly guarantee for each day held in the assignment.

Medicine Hat, Frank, Taber, Grand Forks and Greenwood, respectively, to be considered the home terminals for such crews.

Crews assigned at Medicine Hat will work between Medicine Hat and Redcliffe and at industries at Redcliffe.

Crews assigned at Frank will not be used in road service to handle traffic east of Burmis or west of Crow's Nest, and will not handle traffic east from Crow's Nest to Sentinel.

Crews assigned at Taber will work only at or between Taber and Barnwell.

Crews assigned at Grand Forks will work only at or between Grand Forks and Granby Smelter, but may be used to unload cinders within five miles of Grand Forks, and will be paid at the following rates:

Conductors $4.72
Brakemen 3.40

Crews assigned at Greenwood will work only at or between Greenwood and Motherlode.

Should any of these crews be used outside of their assignments as above, the crews so used will be paid for such service in addition to and irrespective of the compensation provided above for the assigned work, at schedule rates and under schedule conditions.

All assignments in this service will be made as per Article 7 of the schedule.

4. Swing men on the mountain subdivision shall receive $108.90 per month, and shall be paid overtime at the rate of 4.01c per mile for work between Albert Canyon and Revelstoke, east of Beavermouth, or while working uphill.

(b) No reductions in crews or increases in mileage will be made for the purpose of offsetting the increases of wages given passenger trainmen under this schedule.

(c) Passenger trainmen will not be required to do any other work than their regular trips on their assigned runs in order to make up their mileage. Switching, detention or overtime earned on passenger trains not to be used to make up their mileage.

(d) Passenger trainmen who work only a portion of a month on any assigned run will be paid their full proportion of the compensation provided for such run under this schedule.

(e) Regular passenger trainmen running extra passenger trains or making extra mileage on assigned runs, other than their regular trips, will be paid at through freight rates.

Delayed or detoured regular passenger trains will not be considered extra trains when manned by their regular assigned men.

Where detouring trains occasions extra mileage, same will be paid for in addition to the guarantee at passenger rates.

(f) Freight or mixed trainmen running passenger trains will be paid at through freight rates unless relieving passenger trainmen on their assigned trains, who are on leave of absence or who are not in service, when they will be paid schedule rates of the corresponding men relieved.

(g) On short turn-around runs, no single trip of which exceeds eighty (80) miles, including suburban service, overtime shall be paid for all time actually on duty, or held for duty in excess of eight (8) hours (computed on each run from the time required to report for duty to end of that run) within ten (10) consecutive hours; and also for all time in excess of ten (10) consecutive hours, computed continuously from the time first required to report to the final release at the end of the last run. Time shall be counted as continuous service in all cases where the interval of release from duty at any point does not exceed one hour.

This rule applies regardless of mileage made.

In calculating overtime under the rule, the railroad company may designate the initial trip.

Work incidental to turning or storing their own trains and paid for as switching will be the only deductions when computing overtime.

(h) Regular passenger crews handling freight or boarding cars between local points will be paid through freight rates between points cars are handled.

(i) Crews assigned to runs, a portion of which is passenger and the balance mixed or freight or both, will be paid mileage rate for each class of train, but not less than the minimum passenger rates, exclusive of overtime, detention and switching.

Ruling.—Under this clause crews should not be used to perform service other than the regular service contained in the assignment. Should crews assigned under this rule perform extra service they should be paid for such service in addition to and irrespective of the compensation for the assigned service, and under the conditions of unassigned crews should they be required to do the same work.

(j) One hundred miles or less, eight consecutive hours or less, shall constitute a day's work in all assigned mixed train service, overtime *pro rata*. Crews assigned to mixed train service will be guaranteed not less than 2,800 miles per month at mixed train rates, exclusive of switching or detention. When regular monthly mileage is less, the company will have the right to use such crews in road service up to 2,800 miles, but will not in doing so run them around other crews except:

1. In case of branch line mixed crews on their own subdivision, and

2. When such a crew is being returned light to its assignment after having been brought to a terminal with or without a load because the engine required to be repaired, washed out or exchanged, or has been used to relieve a temporary accumulation of traffic, which the regular service is unable to move promptly, in any of which cases the crew may be sent out light out of its turn for the purpose of returning to its assignment without it being considered a violation of Article 14.

This clause does not apply to Westminster subdivision.

On the British Columbia district, west of Field and Kootenay Landing, except on Arrow Lake and Okanagan subdivisions, mixed train crews handling way freight en route will be paid way freight rates for the time so occupied but not in excess of way freight rates for the entire trip, such time to be deducted in computing overtime. Way freight rates will be paid over entire trip if way freight is loaded or unloaded or switching is done at three or more points (other than picking up and setting out cars belonging to their own train). The rulings in connection with Article 2, Clause "a," will also apply to this paragraph.

Ruling 1.—The last sentence of the first paragraph of this clause refers to crews and not to individual members of a crew, and the crew can only be used as a unit in road service to make up any shortage in the guaranteed mileage of the run. For example: If a member of a crew is used as a pilot he would be paid for such service irrespective of the compensation provided for his assigned service.

Ruling 2.—With the adoption of the general mixed train rule on the British Columbia district, it is understood that the practice of combining mixed and freight service on the Phoenix and Mission subdivisions may be continued on these particular subdivisions, when the work is performed in continuous service in any one calendar day and the time or mileage will be computed continuously exclusive of switching.

See Example.

(k) Light running (engine and van), also a train on which a snow plow or a flanger is working, will be paid for at through freight rates and under through freight conditions. Where a plow or a flanger is working on a way freight train, way freight rates will apply. Track mileage will be paid for at schedule rates for extra mileage made for plowing or flanging side tracks.

When a flanger is used on a passenger train it will not affect the rate being paid the crew running the train.

(l) Through freight rates on basis of 12½ miles per hour will be paid for all time occupied in making up and setting away trains, or switching at the terminal points of the subdivision on which the train is run (not less than three of the crew being used) and for work performed in or between yards at a terminal, and for all time at turn around points, when trains are turned at intermediate points on such subdivision.

On the British Columbia district, west of Field and Kootenay Landing, on trains passing through established turn around points, crews will be paid at through freight rates on the basis of 12½ miles per hour for all time occupied in switching at such turn around points, and this time will be paid for in addition to pay for trip. The established turn around points are Ruby Creek, Walbachin, Notch Hill, Glacier, Beavermouth and West Robson and such other points as may be regularly established as turn around points hereafter.

Through freight rates on the basis of 12½ miles per hour will be paid for all time occupied in switching at Canadian Pacific Railway Junction points and this time will be paid in addition to pay for trip. Such time will be deducted in computing overtime for the trip and this switching will not be regarded as constituting switching at an intermediate point under Article 2, Clause "A."

Interrupted time of 30 consecutive minutes or more preventing continuance of switching operations will be deducted in computing time for switching at Canadian Pacific junction points and also at established turn around points on the British Columbia district west of Field and Kootenay Landing.

Note.—Any time paid for as switching will be deducted in computing detention or overtime.

Ruling.—A train during switching operations is required to turn on a wye. Under these circumstances the total time occupied, including the time consumed in turning on the wye, will be paid for as switching.

(m) When a train is delayed two hours or more loading or unloading stock at any point, the crew will be paid 12½ miles per hour at through freight rates for all time so occupied. This time will not be included when computing overtime.

(n) Trainmen acting as pilots, or trainmen acting as conductors on engines running light, will receive conductor's pay at through freight rates and under through freight conditions.

When a member of a crew is used as pilot or conductor on an engine to a terminal for any purpose he may be returned to his assignment either with the engine or deadhead irrespective of his turn and will not be considered as violating Article 14.

(o) Trainmen doubling will be paid a minimum of 10 miles for each double, or actual mileage when this minimum is exceeded.

This clause will apply in all cases where trainmen are required to double on account of inability of engine to handle the train. In cases where the double is made for other reasons, or where it is necessary for an engine to run for coal or water, and any member of the crew accompanies the engine, actual miles run will be allowed the crew.

(p) Trainmen will not be required to coal engines where regular coalmen or sectionmen are available, nor will it be considered a part of a trainman's duty to shovel down coal on engines en route.

Trainmen actually engaged in coaling engines between the hours of 7 o'clock and 18 o'clock will be paid at the rate of fifty-one (51) cents per hour for the time so occupied, and when engaged in coaling engines between the hours of 18 o'clock and 7 o'clock will be paid at the rate of fifty-one (51) cents per hour with a minimum of four hours for each engine coaled, and this time will not be deducted in computing overtime. If more than four hours are consumed they will be paid for the additional time at the above rate. Not less than two trainmen will be used when it is necessary to shovel the coal. Where the coaling of engines is commenced prior to 18 o'clock the four hour minimum will not apply. Under no circumstances will trainmen be required to coal engines other than those propelling their own train.

It is understood that sectionmen are available when they can be secured without involving an additional delay to the train of more than thirty (30) minutes.

(q) Trainmen held off duty on the company's business or by order of the company's officials will be paid at schedule rates of pay and actual reasonable expenses while away from home. If they are required by the company to attend coroner's inquests, court cases or other public investigations, they will be paid schedule rates for mileage lost and will be reimbursed actual reasonable expenses when away from home. In such cases the witness fees will go to the company.

(r) Trainmen deadheading or travelling passenger will be paid mileage, overtime and initial detention for the trip at the same rate as the corresponding men running the train on which they travel, but in no case will men deadheading be paid less than the minimum day of 100 miles at through freight rates, either for deadheading or for continuous combined deadheading and working service when deadheading to an intermediate point and started to work at that point.

Where deadheading and working service is combined as above and is not in the same class (freight or passenger) separate trip trickets will be made out for each class of service and overtime will be computed separately.

The company shall order the deadhead crew for a definite time.

The first crew out will deadhead and will stand first out of those crews at the other terminal.

See examples.

(s) Trainmen when deadheading to a point to take a preference run or promotion to which they are entitled by change of time table or permanent vacancy, or when returning from same on account of being displaced by reduction of crews, will not be entitled to compensation for same.

Ruling.—It is understood that under this clause a man deadheading to a point for relief work at his own request will not be entitled to the deadhead mileage either going or returning.

(t) Crews or men moved from one point to another locally by order of the company's officers will be considered as deadheading at the instance of the company and will be entitled to compensation as per clause "r" of this article.

Trainmen transferring at the instance of the company from one general superintendent's district to another, travelling passenger for a distance of over 200 miles, will be paid at half passenger rates; otherwise they will be paid as per Clause "R."

Ruling on second paragraph.—This paragraph is intended to cover cases where men are transferred for operating service, or if men are required to travel passenger at the instance of the company from one general superintendent's district to another over 200 miles for any special purpose of the company and does not apply to ordinary deadheading in connection with their regular service.

Example.—A baggageman is required to work on a special train from Winnipeg to Vancouver and is then deadheaded back to Winnipeg, the paragraph will not apply to him and he will be paid as per clause (r) of this article.

(u) Trainmen will be advised at once in writing through the proper officer with the reason, if mileage or time claimed is not allowed in full. In case time is disputed the mileage or time not in dispute will be paid in current pay-roll.

(v) Train baggagemen who receive help to load or unload, handle for the purpose of checking, transfer or delivery, between or at terminals any sacks of His Majesty's mail on runs which regularly handle same will be paid the sum of ten dollars ($10.00) per month therefor.

When a baggageman on such a run works only part of a month he will receive his due proportion of this amount and the man or men relieving him will also receive their due proportion of same.

Train baggagemen who are only intermittently required to handle mail as described above, by reason of their being assigned to trains in pool or other service, some of which do not regularly carry mail, will be compensated therefor on the basis of fifty cents (50c) per trip, with a maximum of ten dollars ($10.00) per month. On short turn around runs a round trip will be considered a trip within the meaning of this clause.

(w) Trainmen required to turn engines on turntables will be paid for all time occupied, irrespective of any other compensation earned on trip. They will not be required to turn engine on turntable at terminals where shop staff is employed.

ARTICLE 2.

Way Freight Service.

(a) Through freight trainmen required to load or unload way freight en route will be paid overtime at way freight rates for the time so occupied, but not in excess of way freight rates for the full trip, such time to be deducted in computing overtime. Way freight rates will be paid over full trip if way freight is loaded or unloaded or switching is done at three or more points (other than picking up and setting out cars belonging to their own train).

Ruling 1.—Trainmen will be paid way freight rates over the full trip if they load or unload way freight at three or more points, or switch at three or more points or a combination of three or both. This is not to be construed to apply to through trains setting out or picking up cars belonging to their own trains, unless a switch has to be made to spot cars which are set out; that is, cars set out of a train will be placed for loading or unloading, and this will not constitute switching unless the placing of same will necessitate the removal of car or cars from the track to which cars set out are destined. When picking up, any cars which are placed must be re-spotted.

Ruling 2.—It is is ruled that the arbitrary allowance will be paid for time occupied in loading or unloading way freight in addition to the through freight mileage unless this amounts to more than way freight rates for the entire trip.

(b) Way freight crews arriving too late to take regular assigned run will be entitled to work on through freight to enable them to catch their regular run at the other terminal, and they may run around other crews to do so. (This will not constitute a run around under Article 14.)

(c) The handling of water cars for other than train purposes will be by way freight rates. If by through freight trains, way freight rates will be paid, provided water is distributed at three or more stations.

(d) Train crews will not be compelled to handle way freight on night trains or on Sundays. They will not be required to put such freight in warehouses, except in case of stress of weather, or when the way freight is perishable. Way freight trains will leave terminal points between the hours of three o'clock and ten o'clock and will not be considered night trains. Such trains will work way freight through to the destination of their run, irrespective of the hour reach-

ing such destination. Trains leaving terminals at hours other than between three o'clock and ten o'clock will be considered night trains after sunset, and trainmen may after sunset set off local way cars.

(e) If the work on any way freight or switching run is unduly heavy it will be lightened by using a smaller engine or by employing additional brakeman.

(f) Way freight trains will not be double headed except in case of storm, and in such case the tonnage will not exceed the rating of the largest engine attached, except that on the British Columbia district, west of Field and Kootenay Landing, the double heading of way freights will be permissible in order to allow a helper engine to be returned to the foot of the helper district and no additional tonnage will be added over that of the single engine handling the train.

ARTICLE 3.

Work Train Service.

(a) Trainmen assigned to work train service and held in that service will be paid on the basis of 12½ miles per hour computed from the hour that the crew is ordered for until laid up, and will be paid equivalent to not less than eight consecutive hours at work train rates for every working day so held, not including overtime work lapping over from previous day.

Crews assigned to work train service will not be transferred or used in other service during a continuance of the assignment by a temporary suspension of the assignment for less than three days, excepting that when a congestion of traffic occurs, which the unassigned crews on the territory are unable to handle, work train crews may be used for that purpose.

(b) Actual mileage, detention and overtime will be paid at through freight rates when going to or from work and this will not be included in time or mileage paid for at work train rates.

When the mileage of a work train, including running and working, exceeds 12½ miles per hour, computed from the time crew is ordered to start work until relieved from duty on any day, actual miles run will be allowed.

Work trains under the meaning of this article are trains assigned to maintenance, construction and betterment work.

(c) Trainmen on wrecking trains will be allowed actual mileage and overtime at through freight rates to and from working limits and work train rates while at work with a minimum of one day's pay at work train rates for the combined service for every day held in such service.

(d) Trainmen will not be paid for performing work train service en route unless time occupied aggregates one hour, in which case they will be paid work train rates for the whole time so occupied, such time not to be included in computing overtime.

Ruling.—Under this article when the aggregate time occupied in work train service is one hour or more it will be paid for in addition to compensation for the trip, but will not be included in computing overtime.

(e) Trainmen assigned to work train service will not be considered absent from duty from the time work is through on Saturday night until usual starting hour Monday morning, unless notified in writing before they are laid up on Saturday night that they will be required. Trainmen will be allowed to go home for Sunday if the train service will permit and it will not interfere with the work service, and will be furnished transportation if requested within a reasonable time before departure of train. If arrangements as per this clause are not made permitting the trainmen to go home for Sunday and they are not used they will be paid for fifty (50) miles at work train rates.

(f) When an unassigned crew is used in work train service for two calendar days or less the crew will be paid through freight rates and under through freight conditions, excepting that when the nature of the work is such that it is necessary for the crew to be run in and out of terminals, it may do so without involving payment of run arounds or the crew being automatically released.

If such crew is tied up at a terminal it will take its turn out in the unassigned service.

If an individual crew is used longer than two days in such service it will be paid under work train conditions after the second calendar day, but all work train service of 10 days' duration or longer will be advertised and made a regular assignment.

This rule will not apply should crew handle revenue freight.

(g) Unless senior conductors or brakemen desire otherwise, junior conductors or brakemen will, if they are competent, be assigned to work and construction trains. All assignments in this service will be governed by the provisions of clauses (c) and (e) Article 7.

(h) Crews assigned to snow service, such as the crews at Glacier, will be paid work train rates and will be governed by work train conditions.

(i) When crews are taken out of work service at a terminal they will take their turn out behind all unassigned crews then in the terminal.

Ruling.—A crew handles revenue traffic from a terminal to a point 60 miles distant, where the crew is then put on a work train for two or three days, after which it is returned to the terminal with another train of revenue freight. Under these circumstances the crew would be entitled to 100 miles in each direction, when handling the revenue freight, and while on the work train would be paid in accordance with Article 3 of Schedule.

ARTICLE 4.

Overtime.

(a) When a regular passenger train averages less than 20 miles per hour and any other train less than 12½ miles per hour, overtime will be allowed at the schedule rates of the subdivision on which such overtime is incurred on a basis of 20 and 12½ miles per hour respectively for the time so occupied, computed from the time train actually leaves initial terminal until arrival at objective terminal. In computing overtime all mileage paid for, including allowances for doubling, will be included in the mileage, and unless otherwise provided for herein the time will not include the time otherwise paid for.

Note.—On the Revelstoke and Nelson divisions, overtime for regular passenger trains will be computed on a speed basis of 15 miles per hour.

(b) Overtime on the Laggan subdivision will be computed separately on the two portions of the line east and west of Lake Louise. On westbound trains the overtime will be computed at 12½ miles per hour at prairie rates from the time the train leaves Calgary until arrival at Lake Louise, and at 12½ miles per hour at mountain rates from the time of arrival at Lake Louise, until arrival at Field. On eastbound trains the overtime will be computed at 12½ miles per hour at mountain rates from the time the train leaves Field until arrival at Lake Louise, and at 12½ miles per hour at prairie rates from the time of arrival at Lake Louise until arrival at Calgary.

(c) Overtime will be computed separately on the two portions of the line east and west of Castlegar. On westbound trains the overtime will be computed at 12½ miles per hour at valley rates from the time the train leaves Nelson until arrival at Castlegar and at 12½ miles per hour at semi-mountain rates from the time of arrival at Castlegar until arrival at Grand Forks. On eastbound trains the overtime will be computed at 12½ miles per hour at semi-mountain rates from the time the train leaves Grand Forks until arrival at Castlegar, and at 12½ miles per hour at valley rates from the time of arrival at Castlegar until arrival at Nelson.

(d) When trainmen are called for duty and the call is cancelled before they have started to work,

they will be paid 12½ miles per hour with a minimum of 33 miles and stand first out. If cancelled after work has been commenced they will be entitled to the minimum day and stand last out.

Trainmen shall be paid initial terminal detention for all time required to be on duty prior to the time that train is ordered to leave, and also for all time held at the terminal until the train actually leaves the terminal.

Excepting that trainmen required to be on duty 15 minutes or less prior to the time train is ordered for shall not be paid initial terminal detention for the first 15 minutes after the time required to report for duty.

Ruling.—Article 4, Clause (d).

It is understood under Article 4, Clause (d), that a crew will not be considered to have started work until they have actually started their train or commenced to switch.

(e) When a train making an objective terminal is held out of such terminal (at the semaphore, yard limit board, or behind another train similarly delayed) on account of yard being congested, or other conditions which make it impossible for the train to be taken in promptly, the crew shall be paid overtime at road rates from the time first stopped until able to proceed, and be released from duty without delay, and this time will not be included when computing road overtime, except that it shall be included to make up a short day.

Ruling.—Under these clauses the principles outlined in the arbitrator's award, December 14, 1916, will apply, viz.: when a train does not make a speed of nine miles per hour, computed from the time they start until they clear the terminal, the crew will be paid for all time in excess of the time necessary to go from the starting point to a point where terminal is cleared at the rate of nine miles an hour, and will be paid for such time at overtime rates. The same allowance will be made on the incoming trip computed from the time train is first stopped approaching the terminal until finally stopped in the receiving yard.

On the incoming trip on short runs, delayed time as stated above may be used to make up a short day.

(f) Trainmen held more than 15 minutes at terminal points after arrival of train has been registered shall be paid for such time at overtime rates.

Ruling.—When the company require the engine coming in on the train to be placed on house track by the crew in charge of the train, they will have the right to use one of the crew to do this work. It is to be distinctly understood that the balance of the crew are relieved from all responsibility and that the man used to perform this service will be paid his regular rate in the class of service employed for all time occupied if held in excess of 15 minutes.

It is agreed that the 15 minutes specified in this clause applies only to trainmen held for service incidental to their own train, such service being defined as:

(1) Taking engine to shop.

(2) Unloading baggage.

(3) Registering train or delivering bills.

When trainmen are held for any other service they will be entitled to all time so held computed from the time train finally stops in receiving yard or at station where road service ends.

It is understood that train is not considered stopped until it has been secured.

The men used for this service will submit their own wages tickets.

ARTICLE 5.

Short Runs.

(a) In all freight service and in all unassigned passenger and mixed train service, pusher and helper service, 100 miles or less, eight hours or less, constitute a day's work, exclusive of switching. When trains are turned at intermediate points, actual mileage both ways on round trip will be counted as mileage of run, but not less than one day's pay for such service will be allowed, exclusive of switching.

(b) A trip will automatically end on arrival at a terminal. The meaning of terminal is understood to be the regular points between which crews regularly run, for instance, the terminal from which a branch line projects will be the terminal for the branch, but not necessarily for the subdivision from which the branch line projects. Crews in short turn around service on the Nelson division may be required to make two short turn around trips out of a terminal with the understanding that a crew shall not be started out of a terminal on a second turn around trip after having been on duty seven hours or more. The definition of terminal in this clause not to apply to the Nelson division. On the Nelson division, Grand Forks, Nelson and Roseberry will be regular terminals for all crews, and additional terminals for crews assigned at other points will be governed as per letter, November 24, 1916, to Mr. Coleman. See letter.

Ruling.—On the Nelson division where crews are permitted to make two turn around trips in continuous service under Article 5, Clause "B," should they earn way freight rates on either one or both of those trips they will be entitled to way freight rates for the entire day.

Note.—(1) For snow plough and passenger extras the following will be considered turn around points:

Kelfield, for Reford subdivision.
Cutknife, for Cutknife subdivision.
Vanguard, for Vanguard subdivision.
Macklin, for Macklin subdivision.
End of track, for Kimberley division.
End of track, for Waldo subdivision.
Huntingdon, for Mission subdivision.
Westminster, for Westminster subdivision.
Arrowhead, for Arrow Lake subdivision.

Note.—(2) Time occupied in making trip from Lac Du Bonnet to Winnipeg river bridge and return will be paid for as switching.

Note.—(3) When La Riviere subdivision assigned way freight makes a trip, Rudyard to Kalcida and return, time or mileage will be allowed, with a minimum of twenty-five (25) miles, exclusive of regular trip. See examples.

(c) Freight crews handling extra passenger trains or sections of regular passenger trains out of Vancouver for the east, or vice versa, may run through Coquitlam without involving the payment of run arounds to crews then in Coquitlam, providing that the crews in Coquitlam will take their turn out when going to Vancouver to catch those extra passenger trains eastbound. It is understood, however, that freight crews handling such passenger trains will not be required to handle freight in either direction. Crews so used will be paid actual mileage and overtime between Coquitlam and Vancouver, and for all time at Vancouver at 12½ miles per hour, at through freight rates. Road crews will be assigned to handle all freight work between Coquitlam and Vancouver, but will not be compelled to do any yard switching at either end of the run and will be paid actual mileage and overtime at 12½ miles per hour for all time engaged in such assignment, with a minimum of 100 miles for each calendar day exclusive of overtime earned on other days. No such assignment will be for a period of less than five consecutive days. Unassigned crews used in freight service between Coquitlam and Vancouver will be paid as per short run clause, but will not be compelled to do yard switching at either terminal. Where unassigned crews are used in this service, Vancouver will be considered as a turn around point for such crews.

Ruling.—Freight crews assigned under this clause who earn way freight rates as per Article 2 "a" on any individual trip or on the trips as a whole will be paid way freight rates for the entire day.

ARTICLE 6.

Double Heading and Helping.

(a) It is not the intention of the company to adopt generally the plan of double heading freight trains, which has prevailed on some other roads, and no materially greater portion of double heading trains on any district will be run than in the past.

(b) The practice of double heading freight trains of over 1,375 actual tons, exclusive of caboose, will be discontinued.

(c) Helping engines may be used to assist trains between the following points:

Westbound—
- Fort William to Raith
- Kenora to Lowther
- Austin to Sidney
- Brandon to Kemnay
- Neepawa to Minnedosa
- Minnedosa to Large
- Solsgirth to Birtle
- Binscart to Harrowby
- Morden to Darlingford
- LaRiviere to Wood Bay
- Indian Head to McLean
- Curls to Crestwynd
- Medicine Hat to Bowell
- Wardner to Cranbrook
- Cranbrook to Fassiferne
- Lake Louise to Stephen
- Beavermouth to Glacier
- Revelstoke to Clanwilliam
- Tappen to Notch Hill
- Castlecar to Farron
- Grand Forks to Eholt
- Roseberry to Summit Lake

Eastbound—
- Broadview to Percival
- Rennie to Kenora
- Kenora to Pine
- Birtle to Solsgirth
- Minnedosa to Ameer
- Rapid City to Varcoe
- Rapeard to Oxbow
- LaRiviere to Binney
- Millwood to Binscarth
- Moose Jaw to Pasqua
- Regina to McLean
- Expanse to Crestwynd
- Suffield to Bowell
- Medicine Hat to Dunmore
- Wynndel to Goatfell
- Michel to Crow's Nest
- Field to Lake Louise
- Ruby Creek to North Bend
- Shuswap to Notch Hill
- Craigellachie to Clanwilliam
- Revelstoke to Albert Canyon
- Albert Canyon to Glacier
- Beavermouth to Mileage 54
- Golden to Field
- Wakusp to Summit Lake
- Roseberry to Sandon
- Cascade to Farron

Northbound—
- Greenwood to Motherlode Spur

Southbound—
- Smelter Junction to Rossland
- Eholt to Phoenix

and all other places where regular helper engines may now or hereafter be established to take over any single grade, the actual tonnage which any single engine handling the train may bring to the foot of that grade. (By the foot of the grade is meant a convenient station near the foot of the grade, at which the helper engine may be taken care of.)

(d) Double headers may be run in cases of storms, accidents, to avoid running engine light, moving engines to and from shops or from one division to another, to expedite stock or perishable freight, but in all such cases the tonnage will not exceed the rating of the largest engine attached, unless as hereinbefore specified. In case of an accident to an engine, consolidation may be effected with another train and the consolidated train brought into terminal as a double header.

(e) Note.—Nothing in the above rules in regard to limiting tonnage or length of train to be handled by double headers, or otherwise, shall be construed so as in any way to limit or establish a precedent as to the proper or safe length of the train to be handled by one engine.

(f) If it is found at any time that the above arrangement is not satisfactory, a meeting will be held on one month's notice to discuss and revise same, without it involving a revision of the schedule.

See letters.

ARTICLE 7.

Promotion.

(a) Promotion on each promotion district will be made according to the seniority of the trainmen on that district, and will be governed by merit, fitness and ability. Any man who is not promoted by the company when his turn comes will be promptly advised in writing by the superintendent the reason therefor.

(b) Brakemen will have no seniority standing for the first six months' service, after which they will rank as brakemen from the date they entered the company's service as such.

(c) Senior brakemen will be required to pass their examinations for conductor in turn. Brakemen refusing their promotion to conductor or failing to qualify for same within 30 days of the date set for their examination, will thereafter rank junior as conductor to men promoted in their stead. Trainmen will be advised in writing by the company immediately the result of their examination.

The promotion of brakemen east of Field and Kootenay Landing will be from through freight to way freight, from way freight to mixed on permanent freight promotion districts. In the event of a brakeman refusing to accept any particular run that his seniority entitles him to, he will lose his rights to that run until it again becomes vacant or until change of time table, but will otherwise retain his seniority standing. Permanent vacancies or new runs created will be bulletined for ten days and given to the senior qualified man applying therefor. Any man away on leave of absence or who is ill will not be affected by this clause. In the event of a reduction in staff the junior men will be reduced.

The promotion of passenger brakemen east of Field and Kootenay Landing will be to train baggagemen, or to any run in passenger service as brakeman or baggageman to which their seniority as brakeman entitled them. In the event of a baggageman or a brakeman refusing to accept any particular run to which he is entitled, he will lose his rights to the run until it again becomes vacant or on change of time table, but will otherwise retain his seniority standing. This will not apply to men who are ill or on leave of absence. Permanent vacancies or new runs created will be bulletined for 10 days and given to the senior man applying therefor. Freight brakemen will not be eligible for position in passenger service, except that when there is a vacancy and no passenger brakeman to fill same, preference will be given to the senior suitable freight brakeman applying for it, and if no suitable freight brakeman applies to the senior suitable yardman applying therefor.

Promotion for brakemen west of Field and Kootenay Landing will be to any run in either passenger, mixed, freight or work train service, to which their seniority as brakeman entitled them, but in the event of a brakeman refusing to accept any particular run that his seniority entitles him to, he will lose his rights to that run until it again becomes vacant or until change of time table, but will otherwise retain his seniority standing. Permanent vacancies or new runs created will be bulletined for 10 days and given to the senior qualified man applying therefor. Any

man away on leave of absence or who is ill will not be affected by this clause. In the event of a reduction in staff the junior men will be reduced.

Promotion to baggage cars west of Field and Kootenay Landing to be made from the ranks of brakemen on their promotion district. A disabled trainman or yardman, who is capable, to have preference.

(d) Trainmen promoted shall rate as conductors from the date they are actually placed in charge of a train, provided always that the senior qualified man gets his turn to qualify. If a junior man has to be used in an emergency, the trainmaster shall take immediate steps to get the senior man in and place him on the train and the emergency trip shall not count as date of rating for the junior man.

(e) The promotion of conductors will be to any run in either work, freight, mixed or passenger service to which their seniority as conductors entitles them. In the event of a conductor refusing to accept any particular run to which he is entitled, he will lose his rights to the run until it again becomes vacant or change of time table, but will otherwise retain his seniority standing. Permanent vacancies or new runs created will be bulletined for 10 days and given to the senior qualified man applying therefor. Any man away on leave of absence or who is ill will not be affected by this clause. In the event of a reduction of crews the junior men will be reduced.

(f) In the event of the transfer of lines from one promotion district to another, the trainmen on such lines will have the choice of being transferred or not according to their seniority. The trainmen transferred will rank with those on the promotion district to which they are transferred, according to the date from which they ranked as conductors, baggagemen and brakemen respectively, but no men will be reduced in rank unless the number of crews employed on that promotion district is reduced.

(g) Promotion to runs extending over more than one promotion district will be divided between the crews on such districts as nearly as possible on a mileage basis.

(h) West of Field and Kootenay Landing in the event of a line of railway being constructed which will connect any two divisions, the whole of such line will be manned equally by trainmen from the superintendents' divisions so connected.

(i) East of Field and Kootenay Landing preference in manning new lines or extensions of the general division (as defined in special agreement of December 3, 1909) will be given to the trainmen on the existing lines of that division, according to seniority, provided they are competent.

Hereafter conductors transferred to new lines or extensions of the general divisions, as per above paragraph, will be given a rating and placed on the seniority list of conductors on the promotion district of which the new line or extension becomes a part, as the junior conductor regularly entitled by seniority to a run in the class of service to which he is transferred at that time of his transfer.

When brakemen transfer as per this clause, they shall take the seniority they held on the promotion district from which they transferred and will be placed on the seniority list accordingly. If a man, who is a brakeman at the time of vacancy, has a rating of conductor on his original promotion district, he may apply, but the only time which shall be counted in both applying for the position, also for place on the seniority list on the district to which he is transferred, shall be the actual time he rated as brakeman previous to promotion.

Vacancies to be filled under this clause will be bulletined at all terminal points of general division, as defined in the permanent promotion district agreement. Applications must be made within 30 days of bulletin. After such line is once crewed no further applicants will be considered.

(j) Men who have lost their promotion rights under former promotion rules will not be considered as regaining any rights by the adoption of this article.

(k) Superintendents will prepare seniority lists of conductors and trainmen covering each promotion district, and post at the headquarters on the first of January, first of May and first of September of each year. Any employee who considers that his standing is not correctly shown on this list must enter a protest in writing between the dates of issue, or no action will be taken in regard to any claims he may make. Any man who is away on leave of absence or who is ill will not be affected by this clause. These lists will be kept posted in passenger and freight registering offices at terminals.

ARTICLE 8.

Leave of Absence.

(a) Conductors on leave of absence will be relieved by the senior suitable conductor desiring same.

(b) Baggagemen or brakemen on leave of absence will be relieved by the senior suitable baggageman or brakeman desiring same. This to apply to freight and passenger service.

ARTICLE 9.

Rest at Terminals and on Line.

Trainmen who have been on duty 12 hours or more will have the right to book rest at any point, the men to be judges of their own condition. Eight hours' rest to be considered sufficient except in extreme cases. Trainmen will not be required to leave terminals until they have had at least eight hours' rest, if desired, but such rest must be booked on arrival and in no case if rest is booked at a terminal shall it be for less than five hours. See letter.

ARTICLE 10.

Discipline and Dismissal.

No trainman shall be disciplined or dismissed until his case has been investigated and he has been proven guilty of the offence charged against him and decision rendered. He, however, may be held off for such investigation for a period not exceeding three days, and when so held off he will be notified in writing that he is being held off for that purpose and advised of the charges against him. He may, if he desires, enjoy the privilege of the assistance of a fellow employee in stating his case at the investigation and will be given a copy of statement made by him at the investigation. All material and necessary witnesses must be notified in writing to appear. If they appear their evidence shall be taken in the presence of the accused. If they do not appear the accused shall be furnished with a copy of their written statements and their names. If accused is not satisfied with the decision he will be given an opportunity of reviewing the evidence and may appeal through his representatives to the higher officials. Should the charge not be proven the trainman will be reinstated at once and paid for all time lost at schedule rates and reasonable actual expenses.

Should the charge be proven the trainman will be paid his reasonable actual expenses for the time he may be held away from his home terminal in excess of three days, but nothing for the time lost, nor for expenses if not held longer than said three days.

Note.—It is understood that men will not be held off unnecessarily and caused to lose time under above rule.

When a trainman is discharged or resigns he will, within five days, be paid and given a certificate, stating the term of service and in what capacity he was employed.

ARTICLE 11.

Trainmen employed in freight crews regularly set up will be paid for not less than 2,800 miles at through freight rates in any one month. When it is

necessary to reduce the number of crews set up, it will be done in the order of seniority, commencing with the junior men. Crews running only a part of a month will be credited with such mileage at the rate of 100 miles for each day regularly set up. This will not be construed to mean that 2,800 miles is a maximum mileage which trainmen will be permitted to make.

ARTICLE 12.

(a) Trainmen will not be temporarily transferred from one promotion district to another, except in cases of shortage of men on that district, and the junior men will be sent and shall go, unless the senior men wish to go. Trainmen will be notified of such transfer at their home terminal and given necessary time to prepare for such transfer.

(b) Trainmen will not be run on any other than their own subdivision, except in cases of shortage of men on that subdivision.

Note.—This article refers to shortage of crews on the subdivision and not at terminal or subdivisional points on the subdivision.

ARTICLE 13.

(a) Freight trainmen living within one and one-half miles of yard office, and passenger trainmen living within one and one-half miles of passenger station will be called in time to be on duty at the time required by the company, but such call shall not exceed two and one-half hours previous to the time train is ordered to leave. Caller will be furnished with a book in which the time will be registered and in which trainmen will sign their names.

(b) When the location of a yard office or a passenger station at any terminal is changed in future, any one residing within the one and one-half mile limit at the time of the change will still be considered as within the calling limit. (This not to affect the present conditions existing at Moose Jaw and Calgary.)

ARTICLE 14.

Unassigned crews in freight service will be run first in and first out of terminals. When run around they will be paid 50 miles for each run around and stand first out.

Note.—When an unassigned crew has come on duty in turn and they have got their engine and commenced work, they will remain with train called for, even though another crew comes on duty later and gets out of terminal first. The first crew called will not be entitled to pay as per this article.

ARTICLE 15.

When freight crews are called out for any service the full crew will be used, but may be split when required to run sections of passenger trains, except between Revelstoke and Field.

Note.—It is agreed as an exception to the above that the company will have the right to require a member of a crew in any service to bring engine from shop track to train, and such trainman will be entitled to initial terminal detention from the time he is required to report for duty until the train actually leaves the terminal and shall submit his own wages ticket from the time he reports for duty until his regular time with his crew commences.

ARTICLE 16.

(a) All passenger and mixed trains will have at least one baggageman and one brakeman. All passenger trains of eight cars or more will have two brakemen and one baggageman if there is a local baggage car on train; one or two box baggage cars or refrigerator cars to count as one car, and three or four as two cars. Two brakemen in addition to baggagemen to be employed on all passenger trains between Revelstoke and Field.

Where more than one distributing baggage car is placed on passenger trains, sufficient baggagemen will be put on so that the work may be properly handled.

(b) East of Field and Kootenay Landing, when mixed trains are manned with conductor and two men, the brakemen will be taken from the freight service, one of whom may act as baggageman, and when train is manned with conductor and three men the baggageman will be taken from the passenger service.

ARTICLE 17.

One brakeman on all trains must be competent and have had at least six months' experience as such, and one of the brakemen must be acquainted with the road. A conductor will not be required to take out a brakeman who is found to be incompetent more than one round trip, unless his incompetency is disproved.

ARTICLE 18.

Trainmen will not be compelled to ride in plows or flangers, but will be supplied with a van or other suitable car properly equipped.

ARTICLE 19.

(a) Crews will not be compelled to abandon their vans between terminals for the purpose of travelling passenger, nor when being moved from one to next subdivision terminal for freight service, nor when handling trains composed of colonist or immigrant cars.

(b) Crews regularly set up in freight service will be supplied with regular caboose or other suitable car properly equipped. When freight crews are sent out on passenger trains without their regular caboose, they will, unless otherwise employed, be returned to original terminal deadhead on the first available train after their arrival at the distant terminal or their caboose will be delivered at the distant terminal within 15 hours of the time of departure of such crew from the original terminal. Article 14 will not apply if crew returns deadhead to the crew or crews run around at the distant terminal.

(c) Cabooses will not be taken away from crews when they book rest, unless the congested state of traffic absolutely demands it, and all other available cabooses at that point are in service, and if this rule is violated the men will not be used in any service, but will be paid the same compensation as earned by the crew using the caboose.

Note.—A caboose will not be laid up under this rule unless all members of the regular crew arriving thereon book rest.

ARTICLE 20.

(a) Trainmen assigned to regular runs will not be required to stop in vans at terminal points, and unless they are advised that they will be required before their regular run will not be considered absent from duty if so required and not on hand. When assigned crews are willing to perform extra service during their lay over hours, they will not be used in such service if unassigned crews are available, to the detriment of the unassigned crews.

(b) Conductors and trainmen in pool freight and in unassigned service held at other than home terminal will be paid continuous time for all time so held after the expiration of 18 hours from the time relieved from previous duty, at the rate per hour paid them for the last service performed. If held 16 hours after the expiration of the first 26 hour period, they will be paid continuous time for the next succeeding eight hours, or until the end of the 24 hour period, and similarly for each 24 hour period thereafter. Should a conductor or trainman be called for duty after pay begins, time shall be computed continuously. For the purpose of applying this rule the railroad company will designate a home terminal for each crew in pool freight and in unassigned service.

ARTICLE 21.

Freight crews handling five or more heated cars, seven or more coaches, or three and five combined, will have a man in charge of same. Where less than the number of heated cars or coaches as specified above are on a train, the heated cars will be marshalled together as far as practicable. This is to apply between the months of November and March inclusive.

ARTICLE 22.

Trainmen will not be compelled to handle cars in trains the draft gear of which is defective and requires to be chained, further than to take car of perishable freight or live stock that may become disabled en route to the first terminal. Under no circumstances will trainmen be compelled to handle cars behind van other than official cars or flangers.

ARTICLE 23.

Crews assigned to regular runs will not be compelled to do other work than that to which they are regularly assigned, except in cases of wrecks when no other crews are available, and as provided in clause governing short mileage mixed train runs.

ARTICLE 24.

(a) Trainmen will not be required to sweep or clean coaches, but where train porters are not employed they will remove rubbish from coaches while en route, so as to keep them in a tidy condition.

(b) Trainmen will not be required to couple or uncouple air or steam hose at terminals where carmen are employed and within the hours of service of such carmen.

ARTICLE 25.

At points where company's ice houses are located, trainmen will be allowed ice for cabooses.

ARTICLE 26.

Rotary plows will not be handled on way freight trains, and these plows will, when handled behind the cabooses, be properly equipped with automatic air in working order.

The car limit on trains handling rotary plows as above to be 15 cars, exclusive of caboose.

ARTICLE 27.

Trainmen will not be required to place the following heavy stores on cabooses at points where same are regularly supplied, *i.e.*, jacks, chains, brasses, wedges, knuckles, air hose, oil and dope. Stores for passenger crews will be supplied at or near depot. Requisitions for stores required and keys of vans will be left at the registering office when the arrival of the train is booked and a receipt therefor secured, otherwise trainmen will secure their supplies on their own time. Receipt will be given for requisition and key by the man in charge of the office.

ARTICLE 28.

When trainmen are used to set up a caboose, the men who are to occupy it will be called and will be paid thirty-three (33) miles at through freight rates for so doing. The crew so set up will take their turn out as per article 14 after work of setting up caboose is completed.

When a regularly set up crew is required to transfer into another caboose, the crew will be notified of time such transfer will be made, and if required to make the transfer, will be paid for the time so occupied, and will be called in time to do so before leaving the terminal in their turn.

ARTICLE 29.

Crews will not be held away from home terminal to make more than two round trips in turn around service. Article 14 will not apply to crews exercising this right.

ARTICLE 30.

Home terminals for unassigned crews as at present established will not be changed except by mutual arrangement.

ARTICLE 31.

Trainmen will not be required to brass cars other than those in their own trains.

ARTICLE 32.

The articles embodied in this schedule shall constitute an agreement between the Canadian Pacific Railway Company and its conductors, baggagemen, brakemen and flagmen employed on its western lines thereof, and will remain in force subject to 30 days' notice from either party.

THE FOLLOWING EXAMPLES, AGREEMENTS AND LETTERS ARE A PORTION OF THIS SCHEDULE:

Article 1, Clause "J."

A crew is assigned to a mixed train running daily except Sunday, and making sixty-two (62) actual miles each day, for which they are, of course, entitled to a minimum of one hundred (100) miles per day. There are twenty-seven (27) working days in the month and the crew work every one of these days on their regular assignment. In addition to this they make five hundred (500) miles in extra service outside of their assignment during the month.

Under this example one hundred (100) miles would go to make up the shortage of the guaranteed mileage and the crew would be entitled to payment for four hundred (400) miles in addition to their guaranteed mileage.

Article 1, Clause "R."

Example No. 1.

Crew deadheads on passenger "A" to "C" and runs freight "C" to "G."

"A" and "G" are terminals and "C" an intermediate point.

Ordered to appear on duty at 6.45 to leave at 7K.
Leaves "A" at 7K.
Arrives "C" at 9K. (distance 50 miles).
Goes in freight service at 9K.
Leaves "C" at 9.30K.
Arrives "G" at 15K. (distance 50 miles).
Allowed 50 miles deadhead at passenger rates.
75 miles at freight rates.

Total 125 miles.

Example No. 2.

Ordered to appear on duty at 6.45 to leave at 7K. (to run freight).
Leaves "A" at 7K.
Arrives "C" at 10K. (distance 50 miles).
Leaves "C" at 11K. (deadhead on freight).
Arrives "G" at 15K. (distance 50 miles).
Allowed 100 miles at freight rate.

Example No. 3.

Ordered to leave "A" at 7K. (to deadhead on passenger).
On duty at 6.45.
Leaves "A" at 8K.
Arrives "C" at 10K. (distance 50 miles).
Goes into freight service at "C" at 11K.
Leaves "C" at 12K.
Arrives "G" at 15K. (distance 50 miles).
Released from duty at "G" at 16K.

Allowed 20 miles initial detention (passenger rates).
50 miles deadhead at passenger rates.
20 miles at passenger rates (held at "C")
50 miles at freight rates.
12½ miles at freight rates (objective detention).

Total 152½ miles.

Example No. 4.
Ordered to leave "A" at 7K. to appear on duty at 6.45 to run freight.
Leaves "A" at 8K.
Arrives "C" at 13K. (distance 50 miles).
Leaves "C" at 15K. (deadhead on passenger).
Arrives "A" at 17K. (distance 50 miles).
Allowed 12½ miles initial detention at freight rates.
62½ miles at freight rates.
25 miles at freight rates (held at "C").
50 miles at passenger rates (deadhead).

Total 150 miles.

Example No. 5.
Ordered to leave "A" at 7K. to appear on duty at 6.45 to deadhead on passenger.
Leaves "A" at 7K.
Arrives "D" at 9K. (50 miles) ("D" is a C.P.R. Junction).
Goes into freight service at 10K.
Switches one hour, 10K. to 11K.
Leaves "D" at 12K.
Arrives "G" at 16K. (50 miles).
Allowed 50 miles at passenger rates.
20 miles at passenger rates (held at "D").
12½ miles at freight rates (switching from 10K. to 11K.
50 miles at freight rates.
12½ miles at freight rates (overtime).

Total 145 miles.

Example No. 6.
Ordered to leave "A" at 7K. to appear on duty at 6.45 to pilot engine.
Leaves "A" at 7K.
Arrives "B" at 9K. (distance 25 miles).
Leaves "B" at 10K. (on passenger train deadhead).
Arrives "A" at 11K. (distance 25 miles).
Allowed 25 miles freight rates.
12½ miles freight rates held at "B."
25 miles passenger rates.

Total 62½ miles.

Total not equalling 100 miles at through freight rates, 100 miles allowed.

Example No. 7.
Called for 7K. to appear on duty at 6.45 to pilot engine.
Leaves "A" at 7K.
Arrives "D" at 10K. (distance 50 miles).
Leaves "D" at 13K. (deadhead on freight).
Arrives "A" at 16K. (distance 50 miles).
Allowed 50 miles through freight rates.
Held at "D" no allowance.
50 miles through freight rates.

Total 100 miles.

From "A" to "D" to "A," 9 hours, man is, therefore, entitled to one hour overtime.
Examples, Article 5.
Example No. 1.

Crew runs from Red Deer to Alix and return to Red Deer.

Red Deer is a terminal point between Calgary and Strathcona, and 18.4 miles north thereof is Lacombe, the junction of the Lacombe branch. Alix is on the Lacombe branch at a point 26.7 miles east of Lacombe. The distance, therefore, from Red Deer to Alix and return is 90 miles, and the crew is accordingly entitled to 100 miles.

Example No. 2.

Crew runs from Red Deer to Alix, from Alix back to Lacombe, thence to Strathcona.

The distance between Red Deer and Strathcona is 97 miles; the distance on the Lacombe branch to Alix and return is 53 miles. The crew is, therefore, entitled to 100 miles for the trip from Red Deer to Strathcona and 100 miles for the trip from Lacombe to Alix and return to Lacombe.

Example No. 3.

Stettler is at the end of the Lacombe branch and a crew runs from Red Deer to Stettler, back to Lacombe, thence to Strathcona.

Inasmuch as Stettler is the terminus of the Lacombe branch, the crew is entitled to pay for two trips (a) Red Deer to Stettler, (b) Stettler to Strathcona. The distance from Red Deer to Stettler is 68 miles, for which the crew is entitled to 100 miles and the distance from Stettler to Strathcona is 128 miles, and the crew is entitled to actual mileage.

Example No. 4.

Crew starts at Brandon, runs to Chater on Carberry subdivision, to Varcoe on Rapid City subdivision, to MacGregor on Varcoe subdivision, to Winnipeg on Carberry subdivision. Allowed miles or hours whichever the greater.

Example No. 5.

Crew starts at Brandon, runs to Chater on Carberry subdivision, to Forrest on Rapid City subdivision, to Lenore on Lenore subdivision, Lenore being end of line and a terminal, crew allowed time or miles whichever the greater, but not less than minimum day.

Example No. 6.

Crew starts at Souris, runs to Lauder on Estevan subdivision, to Sanger on Boissevain subdivision, to Deloraine on Napinka subdivision, to Lyleton on Lyleton subdivision. Lyleton being a terminal, crew allowed time or miles whichever the greater, but not less than minimum day.

Example No. 7.

Crew starts at Souris, runs to Napinka on Estevan subdivision, to Deloraine on Napinka subdivision, to Lyleton on Lyleton subdivision. Lyleton being a terminal, crew allowed time or miles whichever the greater, but not less than minimum day.

Note.—Napinka being a terminal for Napinka subdivision, where crews tie up, example seven applies only to snow plow and passenger trains running from Estevan subdivision to Napinka subdivision via Napinka.

Example No. 8.

A crew leaves Revelstoke, runs to Okanagan Landing, thence to Sicamous and return to Okanagan Landing. Crew would be entitled to two trips, viz.:
A. Revelstoke to Okanagan Landing.
B. Okanagan Landing to Sicamous and return.
Sicamous being considered a turn around point.

Article 5, Clause "B."

Extract of letter addressed to Mr. Coleman under date of November 24, 1916, referred to under Clause (b) Article 5.

"We understand that in the case of a crew stationed at Smelter, for instance, to do the running on short turn around trips out of Smelter, would be considered as arriving at their home terminal when they arrived at Smelter.

"If this crew for any reason was run from Smelter to Nelson or from Smelter to Grand Forks, Nelson and Grand Forks would also be terminals for that crew and they would be entitled to a minimum of 100 miles from Smelter to Nelson and from Nelson to Smelter, also from Smelter to Grand Forks and from Grand Forks to Smelter.

"The position we want to make clear to you is that a terminal cannot be considered as a terminal to-day and a turn around point to-morrow. It is and must be either one thing or the other, excepting where, as stated above, a crew is assigned with home terminal at Smelter or other similar places, which for other crews than those regularly assigned there is not considered a terminal point under the British Columbia district schedule, and in the case of those crews assigned to work out of Smelter, or other similar places, the regular terminals on the division, such

as Nelson and Grand Forks, are terminals for these crews as well as other crews working on the territory."

Article 6.

Winnipeg, October 3, 1913.

W. G. Chester, Esq.,
Canora Street,
Winnipeg, Man.

Dear Sir,—

Referring to our conversation this morning respecting the operation of Article 6 in regard to double heading and helping.

The tonnage over any helper's district is limited to the tonnage which any single engine handling the train may bring to the foot of the grade. For instance, if the tonnage that an engine of a certain rating can bring into a point at the foot of the helper's district is 1,000 tons, it is to be understood that there will be no tonnage above this 1,000 tons added for the helper's district no matter what the capacity of the helper engine may be. I have issued instructions in accordance with this.

Yours truly,
(Sgd.) GRANT HALL,
General Manager.

Article 6.

Example.—The tonnage from Fernie to Wardner for a 210 per cent engine is 1,575 tons. This tonnage cannot, of course, be taken into Cranbrook and has to be reduced at Wardner to 1,183 tons. The tonnage set off is allowed to accumulate there until there is sufficient tonnage for two engines, when a helper is sent down to Wardner to bring it into Cranbrook. This is contrary to schedule, as no more than 1,575 tons can be brought from Wardner to Cranbrook in accordance with Article 6. It must be understood that the tonnage from Wardner to Cranbrook with an assisting engine must not exceed the tonnage that can be brought into Wardner from Fernie with any single engine handling the train.

Article 6.

Winnipeg, January 31, 1918.

S. N. Berry, Esq.,
Vice-President, Order of Railway Conductors,
Winnipeg, Man.

A. F. Whitney, Esq.,
Vice-President, Brotherhood of Railroad Trainmen,
Winnipeg, Man.

Dear Sir,—

Regarding our conversation to-day in connection with pusher grade tonnage from Michel East.

The tonnage of 1,530 tons as shown out of Natal is proven by test an error, and it is agreed, as previously stated, that the tonnage into Michel from the west is that shown out of Fernie, and will remain as such so long as the gradients between Fernie and Michel remain as at present.

Yours truly,
(Sgd.) C. MURPHY,
Chairman of the General Manager's Committee.

Article 9.

Winnipeg, January 21, 1918.

To all Officers and Members,
Divisions O.R.C. and Lodges B. of R. T.,
Canadian Pacific, Western Lines.

Dear Sirs and Bros.,—

While your committees were presenting its arguments in support of certain changes in the proposed joint schedule before the Honourable Board of Conciliation and Investigation, established under the provisions of the Industrial Disputes and Investigation Act, the manager's committee representing the railway company alleged that a few trainmen at certain points were abusing their rights under the 12 hour rest rule by booking rest between terminals for the purpose of evading work, and complaint was made that in some instances crews booked rest when within one or two stations from the terminal.

The purpose and intent of the rule is to give trainmen the right to take rest when their physical condition demands it and in no instance should it be used as a subterfuge to avoid work, and while it is conceded that every trainman shall be the judge of his own condition, it is understood that men will not book rest between terminals unless they really require it and in their opinion they cannot proceed to the terminal without rest.

We urgently request, therefore, that our members refrain from giving justification to complaints relative to booking rest between terminals for any purpose other than to do justice to their physical condition.

We are, yours fraternally,

(Sgd.) S. N. BERRY,
Vice-President,
Order of Railroad Conductors.

(Sgd.) A. F. WHITNEY,
Vice-President,

PROMOTION DISTRICT AGREEMENTS.

(Revised Dec. 1, 1909.)

Canadian Pacific Railway Co.,
General Superintendent's Office,
Winnipeg, Dec. 3, 1909.

The Central Division permanent promotion sections will be as under:

Freight Train Service.

Section 1.—Kenora, Ignace, Fort William sections; Dyment and Lac du Bonnet branches.

Section 2.—Brandon, Souris, La Riviere, Napinka and Varcoe sections; Emerson, Winnipeg Beach, Teulon, Gretna, Mowbray, Lyleton and Carsman branches.

Section 3.—Broadview, Pheasant Hill, Last Mountain, Lanigan and Saskatoon sections and Wynyard section Lanigan to Wynyard.

Section 4.—Minnedosa and Yorkton sections, Wynyard section to Wynyard, Estevan, Rapid City, Arcola and Reston sections; Lenore, Miniota and Russell branches.

Section 5.—Moose Jaw, Swift Current, Portal, Outlook and Moose Mountain sections and Weyburn branch.

Extensions or acquired lines will be included in the freight promotion section they are projected from except all lines built or acquired east of Winnipeg, which will be added to promotion section No. 1.

Permanent Passenger and Mixed Trains.

Section 1.—Kenora, Ignace, Fort William sections; Dyment and Lac du Bonnet branches.

Section 2.—Brandon, Souris, La Riviere, Napinka, Estevan, Arcola, Rapid City, Minnedosa, Varcoe and Yorkton sections; Wynyard section to Wynyard; Emerson, Gretna, Winnipeg Beach, Teulon, Lenore, Miniota, Russell, Carman, Mowbray, Lyleton and Broomhill branches.

Section 3.—Broadview, Pheasant Hills, Last Mountain, Lanigan, Saskatoon, Moose Jaw, Swift Current, Outlook, Portal and Moose Mountain sections; Wynyard section from Lanigan to Wynyard and Weyburn branch.

Extensions and Branches Built or Acquired will be Added to Passenger and Mixed Promotion as under.

Section 1.—East of Winnipeg.

Section 2.—West of Winnipeg to Second Meridian Line.

Section 3.—West of Second Meridian Line to Swift Current.

Through change in time card reducing train crews, the conductors taken out of passenger service and mixed service will resume freight service on the promotion section upon which they ran prior to advancement to passenger service or mixed service.

A permanent run is one established by carding passenger and mixed trains and through vacancies in regular carded passenger and mixed trains.

When men first enter train service on freight promotion sections 3 and 4, they will be assigned to promotion section 3 or 4, and it will be so noted on their employment form.

Men on freight promotion sections 3 and 4 will be run as much as possible on their assigned promotion sections, but are required to run on any part of freight promotion sections 3 and 4 if required.

Passenger and mixed promotion on Reston and Wolseley branch to be governed as follows: Manning from passenger and mixed promotion section No. 2 to remain as at present, but next crew required will come from passenger and mixed promotion section No. 3 and alternate crews thereafter.

It was decided by the committee and general superintendent that Wynyard would be the dividing line between the promotion sections in both freight and passenger service.

It is understood that where additional crews are required on runs extending over more than one promotion district, the crews will be assigned as nearly as possible on a mileage basis from each district.

It has been agreed that a line be drawn due north and south at Swift Current to the nearest terminal point on new lines, this to be considered as dividing line between Central and Western divisions for promotion and application of Article 31.

No change will be made in promotion sections, unless upon mutual desire of the general superintendent and the men in train service.

(Sgd.) J. T. ARUNDEL,
General Superintendent.

(Sgd.) W. G. CHESTER,
Chairman, Joint Gen. Com.,
O.R.C. and B.R.T.

Winnipeg, December 3, 1909.

J. T. Arundel, Esq.,
General Supt. C.P.R. Central Division,
Winnipeg, Man.

Dear Sir,—

Our understanding of the agreements arrived at between yourself and the committee covering the questions involved are as follows, and we submit the same for your approval.

It has been agreed by yourself and the committee that the line from Lipton to Sutherland will be advertised for one crew as per Article 31.

The line from Yorkton to Lanigan will be advertised according to Article 31.

That the men transferred from Moose Jaw to man the line between Saskatoon and Wilkie in accordance with special agreement of June 2, 1908, will take their rating in seniority on freight promotion section No. 3 according to their length of service as conductors and brakemen respectively with the company.

It is understood that the line from Saskatoon to Wilkie is now manned by special agreement of April 18, 1907, in accordance with Article 31, and is exempt from application of the Article.

In the event of passenger service being extended from Wilkie to Hardisty and only one crew required between Saskatoon and Hardisty, it has been agreed that the crew on the run between Saskatoon and Wilkie will man the train.

Yours truly,

W. G. CHESTER,
Chairman, Joint General Committee,
O.R.C. and B.R.T.

Approved:

J. T. ARUNDEL, Gen. Supt.
A. PRICE, Gen. Supt.

Calgary, July 6, 1907.

Canadian Pacific Railway Company,
Office of the General Superintendent.

The Western Division will be divided into permanent promotion districts as specified hereunder:

Freight Train Service.

District No. 1—
Medicine Hat section.
Calgary section.
Lethbridge section.

District No. 2—
Laggan section.
Edmonton branch.
Lacombe branch.
Wetaskiwin branch.

District No. 3—
Crow's Nest section.
Sirdar section.
Macleod branch.
Kimberley branch.
Curson branch.
Kootenay Central subdivision.
Extensions or acquired lines will be included in the freight promotion districts from which they are projected.

Passenger and Mixed Promotion Districts.

District No. 1—
Medicine Hat section.
Calgary section.
Laggan section.
Edmonton branch.
Lacombe branch.
Wetaskiwin branch.
Macleod branch.

District No. 2.
Lethbridge section.
Crow's Nest section.
Cranbrook section.
Sirdar section.
Kimberley branch.
Curzon branch.
Kootenay Central subdivision.

Extensions or acquired lines will be included in the passenger and mixed train promotion districts from which they are projected.

It is agreed that the men employed in freight service on Lethbridge section before the districts were changed will have no promotion rights on Medicine Hat or Calgary sections, but will retain their promotion rights on District No. 3, holding their present standing on Lethbridge section until promoted or moved to a run of the same class west of Lethbridge, to which, under this arrangement, they will be entitled to in order of seniority in their respective classes, and which they must take when it is coming to them. New men employed on Lethbridge section, after this arrangement becomes effective, will have no promotion rights on District 3, but will belong to and take their promotion on District No. 1 in the same manner as the men now employed on the Medicine Hat and Calgary sections, and it will be so noted on the superintendent's records.

It is further agreed that the men employed in freight service on the Macleod branch, when this agreement becomes effective, will have no promotion rights on District No. 3, but will retain their promotion rights on District No. 2, holding their present standing on Macleod branch until promoted or moved to a run of the same class on District No. 2, to which under this arrangement they will be entitled in order of seniority in their respective classes and which they must take when it is coming to them. New men employed in freight service on Macleod section after this arrangement becomes effective will have no promotion rights on District No. 2, but will belong to and take their promotion on District No. 3, and it will be so noted in the superintendent's records.

Through change in time table, reducing train crews, the conductors taken out of passenger service and mixed service will resume freight service on the promotion district upon which they ran prior to their advancement to passenger or mixed train service.

A permanent run is one established by carding passenger or mixed trains and through vacancies in regular carded passenger or mixed runs.

Senior men in passenger and mixed train service will have choice of runs in their respective classes, but no change of men in the same class will be neces-

sary, except when a permanent vacancy occurs, or when a change is made in the time table.

Men in freight service on freight promotion districts 1 and 2 will have until August 1st to apply for transfer to Districts 1 and 2. Transfers will be governed by seniority in service in their respective classes, and in the event of enough men not making application for transfer to man either district, the company will transfer a sufficient number to do so, commencing at the junior conductor and brakeman on the other district. The company to have until August 15 to make transfer in accordance with the above, and after that date no transfers will be made except as per Article 20 in schedule, which provides for temporary transfers.

Macleod branch will be temporarily manned by men from Districts 1 and 2. The manning of the Macleod branch will be governed by seniority. In the event of senior men not wishing to go, junior men will be required to go.

No changes will be made in promotion districts as arranged herein, unless by mutual desire of the general superintendent and of the men on train service on the western division.

(Sgd.) R. R. JAMIESON,
General Superintendent.

(Sgd.) W. G. CHESTER,
General Chairman O.R.C.
and Chairman Joint
Committee O.R.C. and B.R.T.

(Sgd.) J. MCLAUGHLIN,
General Chairman B.R.T.,
Western Division.

Extract of Agreement Arrived at, at Winnipeg, December 3, 1909:

It has been agreed that a line be drawn due north and south at Swift Current to the nearest terminal point on new lines, this to be considered as dividing line between Central and Western Divisions for promotion and application of Article 31.

(Sgd.) A. PRICE,
General Superintendent.

(Sgd.) J. T. ARUNDEL,
General Superintendent.

(Sgd.) W. G. CHESTER,
Chairman, Joint General
Committee O.R.C. and B.R.T.

"C."

Winnipeg, Man., February 6, 1918.

Re Canadian Pacific Railway and trainmen and yardmen.

At an early stage of the proceedings before the Conciliation Board appointed in this matter, the suggestion was made by the representatives of the company that the dispute in so far as it related only to rates of pay should be left to abide the result of a movement inaugurated in the United States in so far as such result affected rates on the western territory. After consideration the representatives of the men agreed to accept the suggestion applicable to both roadmen and yardmen provided an agreement could be arrived at respecting the other portions of the respective schedules and as to the date when the eight-hour day should come into effect. Upon this understanding, consideration of the other portions of the schedules was proceeded with and this morning an agreement had been arrived at on all matters of difference with the exception of:

(a) The fixing of the respective dates when the eight-hour day and the increased rates of pay, if any (the disposition of which had been deferred), should become effective.

(b) When the new schedule of rules should come into force, and

(c) The contention that the mountain rate should be extended to the semi-mountain territory.

When an attempt was made to formulate an agreement to carry into operation the suggestion referred to, pursuant to which the consideration of rates of pay had been deferred, a sharp difference of opinion developed as to what the suggestion covered. The understanding of the company's representatives was that whatever rates were adopted for the different classes of service in the western territory should become the rates for the same classes of service on the Canadian Pacific Railway. On the other hand, the understanding of the men's representatives was that whatever increases were granted in the western territory whether percentage or flat rate increase should be added to the existing basing rates on this line. The representatives of the men also contended that the eight-hour day should become effective as of the first of October, 1917, and that the increases, if any granted, should take effect at the time they become effective in the United States. The company's representatives contended that the eight-hour day should take effect as of the first of February, 1918. At this stage of the proceedings the Conciliation Board held a conference, and as a result made the following unanimous recommendation as a fair and equitable settlement of the difference between the parties, which recommendation the representatives of the parties after consultation with their respective committees agreed to accept.

First.—That the increases in rates of pay, whether percentages or flat rates, hereafter granted by the United States Government in the western territory to conductors, brakemen, baggagemen or yardmen, in the movement now pending be applied to the existing basing rates on the Canadian Pacific Railway. This not to apply to conductors, brakemen or baggagemen upon the Westminster subdivision who are not to participate in the said increases, if any granted, and for whom increased rates have been agreed upon in the new schedule.

Second.—In the event of the United States Government standardizing the rates of pay or adopting a uniform rate throughout said territory, and in case the parties cannot agree as to the application of such standard or uniform rates to the Canadian Pacific Railway, it is agreed that the members of this present Board will be consulted and asked to make a recommendation.

Third.—That the mountain rates be not extended to the semi-mountain territory.

Fourth.—That the eight-hour day and the increases, if any granted, become effective as of the first of January, 1918, and the new rules take effect as of first of February, 1918.

Winnipeg, Man., January 18, 1917.

Memorandum of Agreement Regarding the Handling of Hospital Trains.

Bad order cars which cannot be repaired on the road, or which have to be moved to general repair shops for repairs, will be handled by hospital trains only, and such trains will be run when necessary to do this work.

The car limit of these trains will not exceed a total of thirty-five (35) cars nor will they exceed fifty (50) per cent of the advertised tonnage rating of the engine used in hauling the train.

Such trains will be accompanied by not less than two carmen with proper equipment and may pick up bad order cars en route up to the limit specified above.

In order that the men may have daylight as far as possible to do this work, these trains will leave terminals not later than eight (8) K.

Way freight rates will apply to this service.

This agreement is in no way to be construed as interfering with or modifying Article 22 in the Prairie and British Columbia schedules of the conductors and

trainmen, except as herein specified, and is subject to cancellation on 30 days' notice in writing from either party.

Vice-President, Brotherhood Railroad Trainmen.

RATES AND RULES FOR YARDMEN, CANADIAN PACIFIC RAILWAY COMPANY, WESTERN LINES.

Increase and Application of Eight Hour Day, in effect January 1, 1918. Rules, February 1, 1918.

Rates of Pay.

(a) Lethbridge and west through the Kootenays, Calgary and west, main line and branches, Calgary and north to all points on the Edmonton branch.

	Rates per hour.	
	Day.	Night.
Yard foremen	52½c	55c
Yardmen	48¾c	51¼c
All other yards—		
Yard foremen	50c	52½c
Yardmen	46¼c	48¾c

(b) Pilots will receive foreman's pay. Engine herders will be paid yardman's pay, and no yardman acting as such will be used outside of yard limits, except as otherwise provided in Article 8 hereof.

ARTICLE 1.

Hours of Duty.

(a) Eight hours or less shall constitute a day's work. Overtime to be paid *pro rata*, actual minutes to be counted.

(b) Yard crews will be assigned for a fixed period of time per day, not to exceed 10 hours except in isolated yards where only one yard crew is assigned and where the work requires it, the time of the assignments may be extended not to exceed 12 hours; under this exception the minimum shall be 10 hours.

(c) No new work will be given to a crew where the assignment is for nine or more hours after the expiration of the period for which regularly assigned; overtime may be required in order to finish work that the crew is performing at the expiration of the assigned period or in emergencies. This will not be construed to extend the company's rights under similar existing rules for 10 hour assignments.

(d) On assignments where the hours are limited to eight, overtime will be worked only in case of emergency; or in case of transfer crews or crews engaged in industrial work to finish assigned or programmed work, or in either case to get to regular relief points; the purpose being that if assigned or programmed service usually requires more than eight hours' work, the assignment should be extended to meet the requirements of the service either nine or ten hours.

(e) Section (a), (b), (c) and (d) will also apply to yard crews called or used in extra service. They shall not be construed to require railroads to pay yard crews for more than the minimum day plus the actual time consumed in excess of eight hours, except where the assignment is for either nine or ten hours the minimum shall be nine hours exclusive of the meal hour.

(f) The word "emergency" as used in sections (c) and (d) is defined as follows: wrecks, handling live stock, attending fires or handling passenger trains.

RULINGS OF COMMISSION OF EIGHT.

ARTICLE 1.

Question 1: "May a yard crew be assigned to a 10 hour shift for, say, four days in a week, and an eight or nine hour shift for the remaining two or three days, specifying in the publishing of the assignment the days on which the crew would work 10 hours and the day on which it would work eight or nine hours?"

Answer: "No, the assignment should be for the same hours daily."

Question 2: Decision No. One, Article 1 (b):

". . . in isolated yards where only one yard crew is assigned and where the work requires it, the time of the assignments may be extended not to exceed 12 hours; . . ."

"Does this mean a spread of 13 hours with one hour deducted for meal, or does it mean a total spread of 12 hours?"

Answer: The provisions for nine or more hour assignments apply to the hours of work and not the hours of spread of day produced by deductions of time for meals.

Question 5: "In a certain switching district, engine terminal is located at A. Engines work out of A, switching all day at B—2 miles from A; at C—3 miles, D—4 miles, E—5 miles. Can B, C, D and E be considered isolated yards?"

Answer: Crews working out of a common terminal do not come within the exception relating to isolated yards.

Question 7: Article 1, paragraph (b) reads as follows: "Yard crews will be assigned for a fixed period of time per day, not to exceed 10 hours except in isolated yards where only one yard crew is assigned and where the work requires it, the time of the assignments may be extended not to exceed 12 hours; under this exception the minimum shall be 10 hours."

Is the foregoing intended to encourage the retention of nine or more hour assignments?

Answer: Nothing in Article No. 1 is intended to encourage the retention of nine or more assignments, nor to prevent eight hour assignments. The purpose of the decision was to make practicable eight hour assignments, where rules existing prior thereto prevented such assignments.

Question 6, paragraph (c).

Should the words "or in emergencies," Article 1, paragraph (c), Decision No. 1, be incorporated in the Chicago Memoranda of Agreement, and, if so, how should the said Article be written into the Agreement, or in any schedule containing the rule reading: "No new work shall be assigned after the expiration of 10 hours?"

Answer: The words should be inserted in the Chicago Memoranda of Agreement, as well as in other agreements containing this rule, in the following manner:

"No new work will be given to a crew where the assignment is for nine hours after the period for

which assigned; overtime may be required in order to finish work that the crew is performing at the expiration of the assigned period or in emergencies.

"No new work shall be assigned to a 10 hour crew after the expiration of 10 hours."

Note.—Under schedules where in an isolated yard a 12 hour assignment is worked and the schedule contains the provision relative to "new work after 10 hours," there should be inserted in the second line of the answer, following "nine hours," the words "or 12 hours."

Question 7, paragraph (c).

What constitutes new work as mentioned in this Article which stipulates that no new work will be given to a crew where the assignment is for nine or more hours after the expiration of the period to which regularly assigned?

Answer: New work is such work as is not a portion of the regular programmed or routine work of a crew. If the regular work is made up of distinct portions, and a distinct portion remains to be performed after the hours of the assignment, such distinct portions are not new work. Work which is not a portion of the problem or routine may be added to the programme or routine prior to the end of the assigned hours, but not afterward.

Overtime may be worked to finish the programmed or routine work of an assignment. This is not to be construed as authority to work crews overtime when it can be avoided; nor is it to be construed as authority to programme work when it is clearly known that portions of the programmed work, under ordinary conditions, cannot be started until after the assigned period, or to require overtime on new work which is given to a crew prior to end of assigned period.

Question 11: Is it permissible to have regular crew on an assignment for a given number of hours and have one or more members thereof on an assignment of a less number of hours?

Answer: No regular member of the crew shall be assigned for a lesser number of hours than the number of hours for the crew as a unit.

ARTICLE 2.

Lunch Time.

(a) Yard crews where the hours of work are limited to eight will be allowed 20 minutes for lunch between four and one half and six hours after starting work without deduction in pay.

(b) In eight hour yard assignments, yard crews will not be required to work longer than six hours without being allowed 20 minutes, and in nine or more hour assignments 30 minutes, for lunch, with no deduction in pay or time therefor.

(c) In nine or more hour assignments, yardmen will be allowed one hour for meals between the hours of eleven thirty and thirteen o'clock and between twenty-three thirty and one o'clock, but if required to work the meal hour or any part thereof they will be paid for one hour in addition to the hours of their regular assignment, and will be allowed 30 minutes under pay for meals. Day crews not relieved by nineteen o'clock and night crews not relieved by seven o'clock will be allowed 30 minutes for meals and paid continuous time after nineteen and seven o'clock respectively.

(d) At points where the time is changed, yardmen will work on the time used by the community.

ARTICLE 2.

Question 2: "If a yard crew, through some unforeseen circumstances, be on duty, say, 14 hours, would the crew be entitled to a second period of 30 minutes in which to eat, and, if so, when would it begin?"

Answer: Article 2, paragraph (b) applies to both the first and second lunch periods. In the case cited, crew would be entitled to the second lunch period six hours after completing the first lunch period. In either case, yardmen will not be worked longer than six hours without being given an opportunity to eat.

Question 13, paragraph (b).

Under the several provisions for meal periods, must they be given within the prescribed time?

Answer: Yes. The lunch period must be given and completed within four and one half and six hours.

ARTICLE 3.

Starting Time.

(a) Regularly assigned yard crews will each have a fixed starting time and the starting time of a crew will not be changed without at least 48 hours' advance notice.

(b) Where three eight-hour shifts are worked in continuous service, the time for the first shift to begin work will be between 6.30K. and 8K; the second, 14.30K. and 16K., and the third, 22.30K. and 24K.

(c) Where two eight-hour shifts are worked in continuous service, the first shift may be started during any one of the periods named in paragraph (b).

(d) Where two eight or nine hour shifts are worked not in continuous service, the time for the first shift to begin work will be between the hours of 6.30K. and 10K., and the second not later than 22K.

(e) Where ten or more hour assignments are worked, the rules or practices for time of beginning work are not affected by paragraphs (b), (c) and (d), and starting time will be 7K. and 19K.

(f) Day rates will be paid yardmen on assignments beginning as follows:

	Where time for meals is deducted.	Where time for meals is not deducted.
8-hour assignments		6.30K. and 11K.
9-hour assignments ..	6.30K. and 9K.	6.30K. and 10K.
10-, 11- or 12-hour assignments ..	6.30K. and 8K.	6.30K. and 9K.

Yardmen starting their assignments at other periods will be paid night rates.

ARTICLE 3.

Question 15, paragraphs (a) to (d) inclusive. Are paragraphs (a), (b), (c) and (d), Article 3, optional or mandatory on the part of the companies?

Answer: Said paragraphs are mandatory.

Question: What is starting time for two nine-hour shifts in continuous service?

Answer: Where two nine-hour shifts are worked in continuous service, the starting time will be governed by Article 3, paragraph (d).

ARTICLE 4.

Yardmen will have the right to book rest after 12 hours' service.

ARTICLE 5.

Yardmen held off duty on company's business or by order of the company's officials will be paid at schedule rates of pay and actual reasonable expenses while away from home. If they are required by the company to attend coroner's inquests, court cases or other public investigations, they will be compensated as above. In such cases the witness fees to go to the company.

ARTICLE 6.

Yardmen will be advised at once, in writing, through the proper officer, of the reason if the mileage or

time claimed is not allowed in full. In case time is disputed the time not in dispute will be paid on current pay-roll.

ARTICLE 7.

(a) The right to preference of work and promotion for yardmen will be according to seniority in their respective yards, and will be governed by ability. Preference of work to mean men in their respective classes to have choice of work in their respective yards according to their seniority. Any man refusing promotion or failing to qualify for promotion will thereafter rank junior to the man or men promoted in his place as foreman only. This not to apply to men who are sick or on leave of absence. Any yardman not promoted when his turn comes will be promptly advised the reason in writing by the yardmaster.

Note.—West of Field and Kootenay Landing, yardmen will have preference of work and promotion under their respective superintendents.

When a yardman claims preference of work in another yard under this note and is transferred he will remain in such other yard for not less than one year except in case he goes for promotion or on account of reduction in staff in that yard.

(b) In the event of a yard being abolished, the men in such yard will be assimilated with the men in other yards on the superintendent's division, ranking according to seniority from the time of entering the company's service as yardmen. When a new yard is created, yardmen on superintendent's division will be given preference in the positions in that yard in accordance with seniority in their respective classes.

(c) Men who have lost their promotion rights under former promotion rules will not be considered as regaining any rights by the adoption of this rule.

Ruling.—That when a man takes his preference of work as per Article seven, he will be required to hold it for not less than 30 days, except that if a permanent vacancy occurs the senior man shall have preference. Regarding the spare men: the senior man shall have preference, and has the first right to a job whenever a spare man is required and he will stay with the job until the regular man returns to service, and then if a junior man is working he has the right to displace him and work there until the other man returns.

ARTICLE 8.

(a) Yardmen will not be required to go outside of yard terminals except for switching or transfer service, and yard crews whose work takes them outside of the switching terminal will receive yardmen's rates.

(b) Yardmen allotted to other than their regular duties will receive not less than schedule rates of pay for yardmen. If a yardman is used in an emergency in road service, road rates and conditions will apply.

Ruling.—The first sentence of this clause means that yard foremen or yardmen will receive not less than their schedule rates per hour for all time engaged in other than their regular duties, but not less than their daily guarantee, except when used to relieve a yardmaster, assistant yardmaster or stationmaster, for 30 consecutive days or more they will be paid the rate of the man relieved.

Note.—The above will not prevent the company from using yardmen to handle high explosives to powder houses adjacent to terminals, or for the purpose of handling mill or transfer work within a reasonable distance of terminal. Road crews will be used for work train service. The superintendent will regulate the manning of a crew to protect a pile driver working within a terminal.

ARTICLE 9.

A yard crew shall consist of not less than a foreman and two helpers, except where special arrangements are made between the officers of the company and the general committee.

ARTICLE 10.

Yard foremen will not be compelled to work with an incompetent yardman, after such man has been reported in writing to the yardmaster, unless his incompetency is disproved. Yard foremen will not be compelled to work with two inexperienced yardmen, if experienced yardmen are available.

ARTICLE 11.

(a) Yardmen will not be required to work with an engine that is not properly equipped with footboards, grab irons, automatic couplers and headlights. Engines that leak steam, thereby obstructing the observation of signals, shall not be used while in that condition in yard service.

(b) Yardmen will not be required to move cars by the use of stake, cable or chain between engine and cars or between cars except in cases where the draft gear is damaged or in some other temporary emergency. This will not be construed to interfere with Article 12.

ARTICLE 12.

Yardmen will not be required to couple or uncouple air or steam hose on cars on chain up cars in yard or on repair tracks where carmen are employed.

ARTICLE 13.

No yardman shall be disciplined or dismissed until his case has been investigated and he has been proven guilty of the offence charged against him and decision rendered. He, however, may be held off for such investigation for a period not exceeding three days, and when so held off he will be notified in writing that he has been held off for that purpose and advised of the charges against him. He may if he desires enjoy the privilege of the assistance of a fellow employee in stating his case at the investigation, and will be given a copy of statement made by him at the investigation. All material and necessary witnesses must be notified in writing to appear. If they appear, their evidence shall be taken in the presence of the accused. If they do not appear the accused shall be furnished with a copy of their written statements and their names. If accused is not satisfied with the decision, he will be given an opportunity of reviewing the evidence and may appeal through his representatives to the higher officials. Should the charges not be proven the yardman will be reinstated at once and paid for all time lost at schedule rates and reasonable actual expenses.

Should the charge be proven the yardman will be paid his reasonable actual expenses for the time he may be held away from his home terminal in excess of three days, but nothing for the time lost, nor for expenses if not held longer than said three days.

When a yardman is discharged or resigns, he will, within five days, be paid and given a certificate stating the time of service and in what capacity he was employed.

Note.—It is understood that men will not be held off unnecessarily and caused to lose time under above rule.

ARTICLE 14.

Yardmen who are on night duty shall not be required to attend an investigation into a matter duly reported until they have had an opportunity of having at least eight hours' rest after going off duty, unless the extreme urgency of the case demands otherwise.

ARTICLE 15.

Yardmen must not switch trains with cabooses attached.

ARTICLE 16.

Yardmen in transfer service will be supplied with a caboose or other suitable car properly equipped.

At points where two or more yard engines are employed, suitable shelter will be provided for the accommodation of yardmen.

ARTICLE 17.

Employees in yard service shall have access at all times to seniority list, to be posted in a convenient place in the office of the general yardmaster, which will contain a correct list of all the yardmen and their seniority standing. Such lists will be compiled and posted January the first and July first of each year, and list to be subject to appeal for 30 days. Any man who is on leave of absence or who is ill will not be affected by this rule.

ARTICLE 18.

Regular yardmen who do not lay off of their own accord and are held for entire month to fill an assignment will be paid for not less than the calendar working days of the month or their proportion thereof when an assignment is created or discontinued.

This will not apply to irregular yard service unless men are held for such service.

ARTICLE 19.

(a) Pay of yardmen will continue until they return to point at which they started work.

Note.—In Winnipeg, "I" and "N" yard offices will be considered as one and the same point.

(b) Yardmen who do not hold regular work will be called when required for duty, and if called and no service is performed they will be paid for at least eight hours at yardmen's rates. The senior spare yardman will be called.

Note.—Spare yardmen will be considered available for service unless leave of absence has been granted. In such cases they must notify the general yardmaster in writing when they are again ready for service.

ARTICLE 20.

The Articles embodied in this schedule shall constitute an agreement between the Canadian Pacific Railway Company and the yardmen and trainmen employed on its western lines thereof, and will remain in force subject to 30 days' notice from either party.

(Sgd.) C. MURPHY,
Chairman Assistant General
Manager's Committee,
(For the Company.)

(Sgd.) E. H. COOKE,
General Chairman Brotherhood
of Railroad Trainmen.

Approved:

(Sgd.) A. F. WHITNEY,
Vice-President Brotherhood Railroad Trainmen.

Report of Board in Dispute between the Grand Trunk Railway Company and Machinists, Boilermakers, and Blacksmiths

ON February 18, the Minister received the report of the Board of Conciliation and Investigation to which had been referred certain matters in dispute between the Grand Trunk Railway Company and machinists, boilermakers, and blacksmiths, members of the International Association of Machinists, the International Brotherhood of Boilermakers and Helpers, and the International Brotherhood of Blacksmiths and Helpers. The application for a Board in this dispute grew out of a demand for certain rates and rules which were embodied in a proposed schedule. Thirteeen hundred employees were said to be directly affected by the dispute.

A Board was established by the Minister on January 16 and was constituted as follows: His Honour Judge J. G. Wallace, Woodstock, Ont., chairman; Mr. R. Patterson, Stratford, Ont., company's nominee; and Mr. Fred Bancroft, Toronto, employees' nominee. The appointment of Judge Wallace was made by the Minister in the absence of a joint recommendation from Messrs. Patterson and Bancroft.

The report of the Board is unanimous and includes an agreement signed by both parties to the disputes, effective for one year from March 1, 1918, and thereafter, thirty days' notice being required if a change is desired. The dispute was thus satisfactorily settled.

Report of Board

In the Matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Grand Trunk Railway System, employer, and its machinists, boilermakers and blacksmiths, being members of the International Association of Machinists, International Brotherhood of Boilermakers and Helpers, and International Brotherhood of Blacksmiths and Helpers, respectively, employees.

To the Honourable T. W. Crothers, Esq., K.C.,
Minister of Labour,
Ottawa, Canada.

The Board of Conciliation appointed with reference to this matter has the honour to report, as follows:

The members of the Board met for the first time at the City of Stratford, on the 6th, and after each member taking the prescribed oath of office. proceeded to endeavour to effect an amicable settlement between the parties, and continued in session on the 7th, 8th, 9th, 12th, 13th, and 14th days of February, 1918.

The Railway Company was represented by W. D. Robb, vice-president; W. H. Sample, superintendent of Motive Power; G. M. Wilson, master mechanic, Montreal Shops; C. F. Needham, accountant; C. Kelso, master mechanic, Stratford Shops. The employees were represented by the Men's Committee, composed of: John Sample, J. Clark, R. Hanlon. A. Stralo, H. Harper, International Officer of Machinists; J. P. Merrigan, International Officer of Boilermakers; John McClelland, International Officer of Machinists.

The members of the Board desire to report that the sessions were marked by a desire on the part of both parties to avoid assuming an arbitrary position. The company's representatives and employees' representatives discussed the points at issue, which were in some ways most involved, in a businesslike and amicable way, and the result of this attitude is a mutual agreement arrived at by the parties.

The logical result of this attitude of both parties is that a mutual understanding has been arrived at embodying conditions and wages, which has been signed by the representatives of the men. This being so, the Board, with pleasure, report that they have unanimously endorsed the agreement arrived at, feeling conscious that not only does this agreement provide a mutual arrangement for the term of one year, but also the discussions which have taken place across the table and before the Board, and the knowledge of each other gained by the parties, have brought about a mutual respect, which will do much to continue the harmonious arrangements which seem now to prevail.

The Board does not feel that anything else is necessary than to append hereto the agreement duly signed and accepted by both parties, and submitted as the unanimous award of the Board.

(Sgd.) J. G. WALLACE,
Chairman.

(Sgd.) FRED. BANCROFT,
Member of the Board.

(Sgd.) ROBT. PATTERSON,
Member of the Board.

Agreement

Mutual agreement arrived at between the Grand Trunk Railway Company and its employees of motive power department in Canada, as represented by the trades specified herein.

ARTICLE 1.

Hours.

(a) Work hours for shop work are as follows:

For day work, excepting Saturdays and Sundays, 7 a.m. to noon and 1 p.m. to 5 p.m. Saturdays 7 a.m. to noon.

For night work 9½ hours between 7 p.m. and 6 a.m. on the day following. When shops are on full time men will be worked 10½ hours each night, five nights a week.

(b) Work hours for running work in locomotive department are as follows:

For day work, excepting Sundays, 7 a.m. to noon, and 1 p.m. to 6 p.m.

For night work, excepting Sundays, 7 p.m. to 6 a.m. on the day following, ½ hour to be allowed for meals between 11 p.m. and 2 a.m.

ARTICLE 2.

Overtime.

(a) Overtime at the rate of time and one half will be allowed for all time worked outside of the regular working hours.

(b) Men called for work after regular hours will receive in all not less than two and one half hours if called before midnight; after midnight, four hours will be allowed.

(c) Night men called during the day will receive the same consideration.

(d) Overtime will be as follows, except as heretofore specified, from the close of regular work hours and on Sundays and the following Dominion holidays, viz.: New Year's Day, Good Friday, Victoria Day, Dominion Day, Labour Day, Thanksgiving Day and Christmas Day, and will be paid for at the rate of time and one half.

Should any of the above mentioned holidays fall on Sunday the day observed by the Federal or Provincial Governments will be observed. Men will not be laid off during regular working hours to equalize overtime made.

(e) Men who, while working, are told to continue to work after shop hours, or who are told to come back and work overtime, commencing not over one hour after shop hours, will not be considered to have been called out.

ARTICLE 3.

Travelling and Wrecks.

(a) All men called for wrecks will be paid according to regular working hours, from time called, including men left in charge of wreckage. Men called for wrecks and afterwards cancelled will received in all not less than two and one half hours straight time if called prior to midnight, and four hours if called out after midnight, except such call is made two hours prior to regular working hours, when time and one half shall be allowed.

Night men called during the day will receive the same consideration.

(b) Should men be sent from home temporarily to work at any other point, they shall be paid at the regular rate, and also receive straight time from the time called for service, and in addition an allowance for expenses of $1.00 per day if away one week or more, and $1.50 per day if away less than a week.

ARTICLE 4.

Reduction of Expenses.

When reduction of expenses is necessary, before reducing the force, time will be reduced to at least eight hours per day, five days per week; when force

is reduced, seniority and proficiency to govern, other things being equal. When force is again increased, or when vacancies occur, men who have been laid off will be given preference of employment if available provided services are satisfactory. Men laid off at one point may be transferred to another in preference to hiring new men.

ARTICLE 5.

Grievances.

Employees having grievances, either specific or of a general nature, may present the case to the proper officer. If investigation is desired, the aggrieved party or other employee representing him, or a committee of employees representing him, may during working hours arrange with his foreman for same. Investigation to be held within 48 hours after such application, and in case a satisfactory adjustment cannot be made the case may be referred to the next higher officer of the department, until the superintendent is approached. If, after investigation, the employee is found to have been unjustly dealt with, he will be paid for all time lost. In order that the committee may be properly constituted and entitled to formal recognition it must have applied to adjust the case with the foreman before applying to a higher officer.

Employees representing their fellow workmen will not be discriminated against.

ARTICLE 6.

Leading Hands.

Recognized leading hands are those who, while working themselves, also direct and supervise the work of others.

Where such leading hands are paid by the hour, they will receive not less than two (2) cents per hour above the minimum rate.

ARTICLE 7.

Superior Work.

Employees required to do superior work will be paid at the rate for such superior work for each day so employed, providing they are employed at such work for three days or more, irrespective as to whether such superior work is continuous or not, excepting that fractions of days at superior work will not be considered.

ARTICLE 8.

Oil Tank Cars.

All gasoline and oil tank cars shall be thoroughly steamed and allowed to cool before the employees are asked to work inside of them.

ARTICLE 9.

Apprentices.

(a) Apprentices when engaged must be between the ages of fifteen (15) and twenty-one (21) years; must serve not less than four years, must be able to read and write and know the first four rules of arithmetic.

(b) The number of apprentices shall be one for the shop and one for every three (3) mechanics employed.

(c) Apprentices will be instructed as thoroughly as possible in all branches of their trade during their apprenticeship.

(d) Apprentices will not be required to work overtime unless it is impossible to avoid it.

(e) Apprentices out of their time will be paid the minimum rate for journeymen if retained in the service.

(f) Apprentices who have served three months, and in the opinion of the shop foreman show no aptitude for acquiring their trade, will be transferred or dismissed, and all obligations accepted by the company will, of necessity, be forfeited.

(g) Roundhouse apprentices may move to larger shops for the purpose of acquiring larger (wider) experience, after three years, and are open to make applications for such transfer after two years' service, providing they are 19 years of age.

ARTICLE 10.

Promotion.

(a) Employees through general good conduct, strict attention to, and faithful discharge of duty, and who show qualifications to assume increased responsibility, will be considered as in line for promotion.

(b) Helpers will not be advanced to the detriment of mechanics or apprentices, unless committee has been unable to furnish men after two weeks' notification, work not to be delayed in the meantime.

DEFINITION OF CRAFTS.

ARTICLE 11.

Machinists.

(a) Men who have served an apprenticeship or who have had four years' varied experience in the operation of lathes, boring mill, planing, milling, shaping, tyre boring machine, or machine tool, and are capable of fitting up, assembling and repairing the various parts or details of engines or locomotives, stationary, marine or any kind of machine or machine tools and vise work generally, shall be designated as "machinists."

(b) A machinist shall be in charge of tender work in all shops and roundhouses.

(c) Helpers will not be advanced to the detriment of mechanics or apprentices, unless committee has been unable to furnish men after two weeks' notification, work not to be delayed in the meantime.

(d) Locksmiths and brass burnishers will be considered as machinists specialists' work.

ARTICLE 12.

Blacksmiths.

Any man who has served an apprenticeship of four years or who has had four years' varied experience at the blacksmiths' trade, and who, by his skill and experience, is qualified and capable of taking a piece of work and with the use of drawings and blue prints can transmit such work to a successful completion within reasonable time, shall be considered a blacksmith. All work appertaining to the blacksmiths' trade shall be done by blacksmiths or apprentices where such are available.

ARTICLE 13.

Steamfitters, Plumbers and Coppersmiths.

(a) Any man who has served an apprenticeship of four years or who has had four years' varied experience at the trade, and is capable of piping an engine, or general pipe work, shall be considered a steamfitter, plumber or coppersmith.

(b) All pipe work, whether new or repaired, shall be done by pipefitters if available. At roundhouses pipefitters or machinists will do the work if available.

(c) Helpers will not be advanced to the detriment of mechanics or apprentices, unless committee have been unable to furnish men after two weeks' notification, work not to be delayed in the meantime.

(d) As far as possible the general piping on locomotives in main shops is to be done when engines are not under steam.

ARTICLE 14.

Oxy-acetylene and Electric Welders.

Employees engaged on electric or oxy-acetylene welding will be taken from the craft that would have handled the work had it been done by the former methods, where possible, and will be confined to work pertaining to their trade when there is not sufficient of this work to keep them employed. At outside points where there is not sufficient of this work to require a man from each craft, the foreman shall select a man from the metal trades craft to perform all the work to be done by these processes. This clause is not intended to interfere with present practice. When practicable, protection will be provided employees when these processes are being operated.

ARTICLE 15.

Foreman's Decision to be Accepted.

In case of any work being undertaken which is not provided for in this schedule, the foreman's decision will be accepted by employees without action which would delay the completion of the work. If the decision is not considered fair, employees can have the matter adjusted under Clause "A," Article 6.

ARTICLE 1 .

Boilermakers, Apprentices and Helpers — Defining Work. — Classification.

(a) Men who have served an apprenticeship or had four years' varied experience and are competent to do laying-out on boiler and light work, patching (including electric and acetylene welding and burning out), staybolt testing on locomotive and other steam boilers, flanging and fitting up, will be designated as first-class boilermakers.

(b) (At main shops.) Men competent to do chipping, caulking, staybolt riveting, hand and machine riveting on steam tight work, will be designated as riveters.

(c) Men competent to do riveting, chipping, caulking, tubing, staybolt and other work, tank, ash pan, front end, grate work and other sheet iron work, will be designated as second-class boilermakers.

(d) Helpers will not be advanced to the detriment of mechanics or apprentices, unless committee has been unable to furnish men after two weeks' notification, work not to be delayed in the meantime.

(e) Boilermakers sent out on the road to work shall, when possible, have a skilled helper with him.

(f) When boilermakers are required to work on Sundays or holidays, they shall, when possible, be notified the day before, and shall when necessary have a helper to assist them.

Secretary.

(Sgd.) H. HARPER,
For Machinists.

(Sgd.) J. P. MERRIGAN,
For Boilermakers and Helpers.

Stratford, February 13, 1918.

Report of Board in Dispute between the Grand Trunk Railway Company and Maintenance of Way Employees

ON February 20, the Minister received the report of the Board which had been established on the application of the maintenance of way employees of the Grand Trunk Railway Company, members of the International Brotherhood of Maintenance of Way Employees, to deal with a dispute affecting wages, the number concerned being givn as 3,200. A minority report was also received.

A Board was established in this matter on November 12, and was constituted as follows. His Honour Judge J. G. Wallace, Woodstock, Ont., chairman, appointed by the Minister in the absence of a joint recommendation from the other Board members; Mr. F. H. McGuigan, Toronto, company's nominee; and Mr. J. G. O'Donoghue, Toronto, employees' nominee.

The report is signed by the Chairman and Mr. McGuigan and recommends an increase of forty cents per day to the employees concerned, to be effective from January 1, 1918, "with the understanding that these increases shall not exceed similar rates paid by the Canadian Pacific Railway in the same or adjacent territory." Mr. O'Donoghue, in his minority report, states that he is unable to agree with the majority award as to the amount of increase and recommends the payment of higher rates to the employees concerned.

On February 22 the Department received a notification of the company's acceptance of the majority award, but at the time of writing the employees' position had not been stated.

Report of Board

In the matter of the Industrial Dispute Investigation Act, 1907, and of a dispute between the Grand Trunc Railway System, employers, and its maintenance of way employees, being members of the International Brotherhood of Maintenance of Way Employees, employees.

The Board of Conciliation and Investigation to inquire into the above dispute was appointed by the Minister of Labour on November 12th, 1917; His Honour, Judge J. G. Wallace, of Woodstock, was appointed Chairman on November 20th, 1917, the other members of the Board being Mr. F. H. McGuigan, representing the Grand Trunk Railway System, and Mr. J. G. O'Donoghue, representing the employees.

The meetings of the Board were held at Toronto and Montreal on January 3rd, 12th, 14th, 15th, 16th, 17th, 18th, 19th, 30th, February 1st, 2nd and 16th, 1918. The representatives of the men were: Messrs. A. E. Barker, Joseph Mainhood, George Cummings, M. J. Wilson, G. Geraldi, Fred Foster, James Shaw and L. Seeberger. The company was represented by Messrs. H. R. Safford, chief engineer, M. S. Blaiklock, engineer of maintenance of way, H. E. Whittenberger, general superintendent, and John Regan, general roadmaster of Western Lines. The Board finding it impossible to reach agreement, adjourned to Montreal and met in conference Mr. Howard G. Kelley, president, Mr. U. E. Gillen, vice-president, and Mr. Safford, in the general offices of the Grand Trunk at Montreal.

A very full hearing was given to the claims and arguments of all parties to the dispute; after much serious consideration the Board is unable to agree and submits its majority and minority reports herewith:

Majority Report

In view of the fact that the Board of Conciliation dealing with the demands of the same class of labor on the Canadian Pacific Railway, after hearing all evidence submitted and considering the matter from August till October, granted an increase of approximately forty cents a day to these employees, and that the same class of labor employed by the Canadian Northern Railway recently entered into an agreement to accept thirty-five cents per day advance in their wages, we are unable to grant a greater increase to the men whose cases we are considering than the amount granted by the Board of the Canadian Pacific Railway, and we therefore recommend an increase of the rate now paid of forty cents per day, to be effective from January 1st, 1918, (which would make the rate five cents per day in excess of the rate now paid by the Canadian Northern Railway) with the understanding that these increases shall not exceed similar rates paid by the Canadian Pacific Railway in the same or adjacent territory.

(Sgd.) J. G. WALLACE,
Chairman of the Board.

(Sgd.) F. H. McGUIGAN,
Member of the Board.

Minority Report

I am unable to agree with the majority report. I am of the opinion that the employees have made out a good claim and I respectfully recommend that section foremen should receive a minimum increase of sixty cents a day and sectionmen a minimum increase of fifty-five cents a day. The increase should take effect on and after January 1st, 1918. The differential as between section foremen at intermediate points and sectionmen in first and second class yards can be arranged between the company and the representatives of the employees.

In view of the admittedly great increase in the cost of living, the amount recommended is only fair. In the stress of living the small savings of the men in earlier years have been gradually disappearing. The wage paid is not sufficient to attract desirable labour to this very important service, nor to retain any man who is free to transfer his labour elsewhere.

(Sgd.) J. G. O'D. NOGHUE.

INDUSTRIAL DISPUTES DURING FEBRUARY, 1918

TEN strikes affecting 3,060 workpeople were reported as having commenced during February. There were in existence at some time or other during the month 14 strikes directly affecting 3,266 workpeople. The total time loss on account of industrial disputes was estimated at 44,152 working days as compared with 7,898 in January and 120,414 in February, 1917. The time loss occasioned by the 10 strikes which began in February was 41,595 days, while a loss

of 2,553 days is charged to the four strikes which commenced prior to February. Termination of dispute was reported in the case of two of the disputes commencing prior to February and seven of the disputes commencing during February, leaving the five following unsettled strikes, involving 505 workpeople, on record February 28: plumbers and steamfitters, St. John, N.B.; metal polishers at Weston, Ont.; moulders at Galt, Ont.; civic firemen at Edmonton, Alta., and coal mine employees at Drumheller, Alta.

INDUSTRIAL DISPUTES IN FEBRUARY, 1918

Industry or occupation.	Particulars	No. of employees affected	Time loss in working days
	DISPUTES COMMENCING PRIOR TO FEBRUARY, 1918		
BUILDING AND CONSTRUCTION— Plumbers and steamfitters, St. John, N.B..	Commenced April 23, 1917. Demand for an increase in the rate of wages from 37½ to 50 cents per hour. Unterminated.	42	1,008
METALS, MACHINERY AND CONVEYANCES— Moulders, Galt, Ont.....	Commenced May 17, 1917. Demand for nine-hour day. Unterminated	10	240
Machinists, Hamilton, Ont.....	Commenced January 19, 1918. Against increase in daily hours from nine to ten. Company replaced strikers, with ten-hour day in effect.	9	..
CLOTHING— Clothing workers (coat, pants and vest makers), Toronto, Ont.	Commenced January 7, 1918. Alleged discrimination against members of union when reducing staff. Strikers returned to work on Feb. 12, following negotiations.	145	1,305
	DISPUTES COMMENCING FEBRUARY, 1918.		
MINES, SMELTERS AND QUARRIES— Coal mine employees, Rosedale Mine, Drumheller, Alta.	Strike commenced February 2, 1918. Employees of Rosedale Coal and Clay Products Co. demanded recognition of union. Employees in fifteen other mines ceased work in sympathy on Feb. 4, and returned to work on Feb. 26. Unterminated Feb. 28.	1,500	29,276
Coal mine employees (Oliphant Munson Collieries, Oliphant Mines, Alta.	Commenced February 1, 1918. Misunderstanding as to date of payment of war bonus. Work resumed on February 5, following negotiations.	75	225
BUILDING AND CONSTRUCTION— Carpenters, Ste. Anne de Bellevue, Que....	Commenced February 19, 1918. Objection to a new superintendent. Strikers resumed work on February 25; superintendent not removed	280	1,400
METALS, MACHINERY AND CONVEYANCES— Metal polishers and machinists, Weston, Ont.	Commenced, February 12, 1918. Against a reduction of wages. Unterminated February 28.	180	2,700
Iron workers (shipbuilding) Collingwood, Ont.	Commenced February 20, 1918. Alleged discrimination in the matter of reducing a foreman to an inferior position. Dispute adjusted through mediation of Department of Labour. Strikers resumed work February 25, under conditions prevailing prior to strike.	400	1,600
CLOTHING— Boot and shoe machine workers, Quebec, Que.	Commenced February 14, 1918. Demand for an increase in piecework rate of 10 cents per case to 15 cents per case. Strikers accepted the rate of 12½ cents per case, following negotiations, and work was resumed February 27.	350	3,850
TEXTILE— Knitting mill operatives, Hamilton, Ont...	Commenced February 18, 1918. Objection to the employment of Chinamen. Terminated February 26. Employees returned to work under conditions prevailing prior to strike.	28	196
TRANSPORTATION— Car repairiers, Michigan Central Railway, St. Thomas, Ont.	Commenced February 14, 1918. Demand for adjustment of piecework rates, according to schedule. Dispute adjusted through mediation, Department of Labour. Assurance given that schedule rates would be effective in future. Work was resumed February 18.	18	54
Electric Railway Employees, Halifax, N.S.	Commenced February 23, 1918. Alleged unjust dismissal of one employee and suspension of another. Compromise adjustment effected through mediation, company changing dismissal to suspension. Work resumed February 26.	155	542
MUNICIPAL EMPLOYMENT— Civic firemen, Edmonton, Alta.....	Commenced February 1, 1918. Objection to appointment of chief of fire department. Unterminated February 28, 1918.	74	1,752

REPORTS OF EMPLOYMENT BUREAUS

THE decline in the demand for workers which has been noted in previous months continued in January. During the month there was a decrease of nearly 13 per cent as compared with December on the basis of the daily average of vacancies notified to 110 employment bureaus (77 commercial, 18 public and 15 philanthropic). As compared with the demand reported for January of last year by practically identical bureaus, there was a slight increase. The total number of vacancies notified to all offices in January was 27,167, a daily average of 1040.5 as compared with 1191.0 in December and with 1021.6 in January, 1917. The number of persons placed was 14,764, a daily average of 559.6 as compared with averages of 584.9 and 514.0, respectively, in December and January, 1917. The proportion of the total vacancies filled to the total vacancies notified was 53.8 per cent, as compared with percentages of 49.2 in December and 50.3 in January, 1917. As to employment for woman and girl workers the number of vacancies notified was 4,767, a daily average of 184.4 as compared with 182.4 in December and with 263.9 in January, 1917. The number of such workers placed was 1,938, a daily average of 74.7 as compared with 70.6 in the month before, and with 97.2 in the corresponding period in 1917. The proportion of vacancies filled to vacancies notified for men and boys was 57.3 per cent, and for women and girls 40.7 per cent, as compared with 48.8 per cent and 35.1 per cent, respectively, for December, and with 52.6 per cent and 36.5 per cent, respectively, for January of a year ago. Of the five principal centres of labour distribution—Montreal, Toronto, Winnipeg, Edmonton and Vancouver—Toronto and Vancouver showed increases in the demand for labour, both as compared with December and with January, 1917. Montreal and Winnipeg recorded declines in both cases, while at Edmonton a decrease was reported in comparison with December and an increase as compared with January, 1917.

The number of persons who obtained casual employment through the Salvation Army, the Young Women's Christian Association and other agencies was 1,869, a daily average of 71.7, as compared with averages of 72.0 in December and 76.9 in January of last year. The number of casual jobs secured was 4,704, a daily average of 180.5 as compared with 173.2 in the preceding month and with 149.2 in January, 1917.

EMPLOYMENT FOR CIVIC EMPLOYEES IN SIXTEEN CITIES

REPORTS from 16 cities showing the number of workers temporarily engaged, and the wages paid these employees during the first pay-roll period of two weeks in February, indicated an increase of almost 25 per cent in the number of workers, and an increase of nearly 23 per cent in the wages paid. In February, 11,293 persons were employed temporarily, and the pay-rolls amounted to $333,630.00, as compared with 9,040 employees, and an aggregate pay-roll of $272,259.64 in January. St. John, Montreal, Toronto, London, Winnipeg, Regina, Moose Jaw and Edmonton all showed increases both in the number of workers and in the wages paid. Halifax, Calgary and Brandon reported smaller numbers of employees and smaller pay-rolls. Ottawa, Hamilton, Saskatoon and Victoria recorded fewer employees, but larger pay-rolls, while at Vancouver the same number of men were engaged, but the amount of wages paid was smaller.

The accompanying table summarizes reports from the nine cities for which returns are available since July, 1916. The table shows that as regards the number of workers, a decline began in January, 1917, and continued almost without interruption to November. In December and January, however, an upward tendency is evidenced, and this is continued in February. As to wages, the total for last month is the largest reported since September, 1916.

EMPLOYMENT IN THE BUILDING TRADES AS INDICATED BY BUILDING PERMITS

EMPLOYMENT in the building trades as indicated by the value of building permits issued in 35 cities showed a decrease during February as compared with the previous month, the total value of permits falling from $1,562,637 in January to $901,933 in February, a decline of $660,704, or 42.2 per cent. Saskatchewan and Manitoba recorded increases, while in Nova Scotia, also, there was an inconsiderable gain. As compared with the corresponding month of 1917, there was a decrease of 46.4 per cent, the value for February, 1917,

Victoria	103,380	11,875	900	— 91,505	— 88.51	+ 10,975	+ 1,219.44
Total (35 cities)	$1,562,637	$ 901,933	$1,682,495	— $660,704	— 42.22	— $780,562	— 46.39

being $1,682,495. In this comparison, increases were shown in Alberta, Saskatchewan and Manitoba.

Of the larger cities, Montreal and Toronto reported decreases both as compared with January, 1918, and with February, 1917; Winnipeg recorded increases in both comparisons, while at Vancouver there was a gain as compared with January and a decline as compared with February of last year. Of the smaller centres, Westmount, Brantford, Hamilton, Moose Jaw, Saskatoon and Edmonton all reported increases in both cases.

MIGRATION AND SETTLEMENT

OF persons other than citizens of the United States, 2,434 left the United States in December, 1917, to take up permanent residence in British North America, as compared with 2,443 in November, 1917; 2,094 persons (other than citizens of the United States) departed from British North America in December, 1917, to take up permanent residence in the United States, as compared with 2,226 in November, 1917, indicating for British North America an inward balance of 340 in December, 1917.

HOMESTEAD ENTRIES.—During January, 1918, there were 75 homestead entries in Manitoba, 109 in Saskatchewan, 124 in Alberta, and 10 in British Columbia, a total of 318, as compared with a total of 436 in December, 1917, and 455 in January, 1917.

LANDS PATENTED.—According to the Department of the Interior's statement of letters patent covering Dominion lands in Manitoba, Saskatchewan, Alberta, British Columbia and the Yukon Territory for the month of January, 1918, the number of patents was 1,834 and the number of acres 293,728.75, as compared with 1,670 patents and 269,459.85 acres in December, 1917, and 2,087 patents and 339,146.52 acres in January, 1917.

PRICES, RETAIL AND WHOLESALE, IN CANADA, FEBRUARY, 1918, AND IN OTHER COUNTRIES

PRICES showed slight advances in many lines and substantial increases appeared in grains, fodders, and some metals and building materials. There were declines in fresh eggs, hides, and jute. Live stock, meats, and dairy products averaged somewhat higher, as well as fruits and canned vegetables.

In retail food prices there were slight advanced in nearly all the articles included, but prices were slightly lower for fresh eggs, cheese, bread, and sugar. The average cost of a weekly family budget of staple foods in nearly sixty cities was $12.54 as compared with $12.42 in January, $10.46 in February, 1917, and $7.75 in February, 1914. Coal and wood were also slightly higher.

In wholesale prices the index number reached 263.5 as compared with 258.7 in January, 217.3 in February, 1917, and 136.6 in February, 1914. The chief increases were in grains and fodder, fruits and vegetables, miscellaneous foods, metals and implements, and paint, oils, and glass.

The weekly budget for a family of five, including staple foods, laundry starch, coal, wood and coal oil, and rent, is based upon the estimated importance of the various commodities included, these being slight modifications of those employed in similar calculations by various official bodies. For some articles comparatively large quantities are included, owing to the omission of other

important foods of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. As market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly the relative proportion of expenditure on the various foods therefore tends to be maintained. In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the difference in quality. It is estimated that these calculations represent from 60 to 80 per cent of the expenditure of an ordinary family, according to the total income.

The index number of wholesale prices is based upon the quotations of 271 commodities, one having been dropped in 1915, and is the simple average of the percentages which the current prices of the several commodities bear to their average prices for the base period, 1890-1899, these being therefore made equal to 100.

The accompanying tables and notes give details as to the prices movement during the month and as compared with the same month in the previous year. The table of retail prices shows the prices of some 30 foods at the middle of the month in 60 localities in Canada having a population of 10,000 or over. Quotations are obtained by the correspondents of the *Labour Gazette* from dealers doing a considerable trade with workingmen. All prices are for delivered goods. The rates for rent are for six-roomed houses in districts inhabited by workingmen.

Retail Prices

In beef, sirloin steak advanced at St. Hyacinthe, Ottawa, Belleville, Woodstock, Sault Ste. Marie, Brandon, Edmonton, New Westminster, Vancouver, Victoria, and Nanaimo. Round steak, rib roast and shoulder roast, rose also in several localities. Mutton advanced at Niagara Falls, Woodstock, Sault Ste. Marie, Brandon, Regina, Edmonton, Fernie, New Westminster, and Nanaimo. Pork, fresh, was higher at Westville, Halifax, St. Hyacinthe, St. John's, Brockville, Belleville, Orillia, St. Catharines, Woodstock, Stratford, Sault Ste. Marie, Regina, Lethbridge, Fernie, and Nanaimo. Salt pork was higher at Quebec, St. Hyacinthe, St. Catharines, Chatham, Edmonton, Calgary, and New Westminster. Breakfast bacon was higher at Quebec, Hull, Belleville, Peterborough, St. Catharines, Guelph, Woodstock, Regina, Calgary, Fernie, Vancouver, and Nanaimo. Lard was dearer at Kingston, Toronto, Guelph, Woodstock, St. Thomas, Sault Ste. Marie, and Moose Jaw.

Eggs were cheaper at Westville, Amherst, Guelph, London, Cobalt, Prince Albert, New Westminster, Vancouver, Victoria, and Nanaimo, but were dearer at Charlottetown, St. John, Quebec, Three Rivers, Hull, Brockville, St. Catharines, Woodstock, Stratford, St. Thomas, Chatham, Windsor, Owen Sound, Sault Ste. Marie, Winnipeg, Brandon, Regina, Moose Jaw, and Fernie. Milk advanced at Charlottetown, Kingston, Orillia, Chatham, Sault Ste. Marie, but declined at New Westminster. Dairy butter advanced at Sydney, Charlottetown, St. John, Three Rivers, Sorel, St. John's, Hull, Brockville, Kingston, Cobalt, Fort William, Regina, Calgary, Lethbridge, and Victoria, but declined at Guelph, Galt, Kitchener, London, Chatham, Windsor, Sault Ste. Marie, and Port Arthur.

Bread and flour were changed very little, but there were some advances in rolled oats. Rice was fairly steady, but tapioca advanced in several cities.

In canned vegetables and dried beans prices were steady. Evaporated apples advanced at Halifax, Quebec, Ottawa, Kitchener, Woodstock, Windsor, Cobalt, Winnipeg and Vancouver. Sugar, tea, and coffee were steady.

Potatoes were lower at Sydney, Truro, Quebec, Guelph, Edmonton and Victoria, but advanced at St. John, Sherbrooke,

†15c per lb. in $1.00 lots. *g*Calculated from price per 100 lbs. *e*Including $1.00 for delivery.

St. Hyacinthe, St. John's, Peterborough, Toronto, St. Thomas, Windsor, Owen Sound, Calgary, Fernie and Nanaimo.

Anthracite coal was higher at Quebec, Sherbrooke, St. John's, Brockville, Peterborough, Hamilton, Kitchener, Stratford, but declined at Brantford. Bituminous coal was higher at Truro, Quebec, Belleville, Peterborough, Hamilton, Guelph, Kitchener, Stratford, Chatham, Moose Jaw, and New Westminster. Hard wood advanced at Truro, Brockville, Cobalt, but declined at Stratford, and Prince Albert. Soft wood declined at Sorel, Stratford, Prince Albert, but advanced at Hull, Brockville, Hamilton, Kitchener, Cobalt, Sault Ste. Marie. Coal oil was higher at Amherst, Montreal, Orillia, Brantford, Guelph, Kitchener, Windsor, Lethbridge.

Wholesale Prices.

GRAINS AND FODDER. — Barley advanced from $1.49 to $1.71 at Winnipeg and from $1.50 to $1.69 at Toronto. Oats advanced from 89c to 95c at Winnipeg and from 89c to 98c at Toronto. Corn rose to $2.00 at Toronto. Flaxseed was up from $3.21 to $3.68. Rye rose to $2.10. Hay was $1.00 per ton higher at Montreal at $15.50-16.00 and at Toronto at $16.00-17.00

ANIMALS AND MEATS. — Cattle advanced at Winnipeg to $11.75 for the best butchers, but eased off 25c at Toronto. Best butchers were down from $12.75 to $11.75, but later advanced to $12.25. Dressed beef declined from $22.00-23.00 for hindquarters and forequarters were also easier. Veal was higher at $15.00-22.50. Live hogs rose from $17.00 to $18.25. Dressed hogs rose from 23-24c to 24-25c per pound. Bacon was steady at 40-41c, but ham was 1c higher at 31-32c. Lard rose from 29c per pound to 29½-30c. Sheep were up to $13.00-14.50. Mutton advanced from 16-18c per pound to 18-20c.

DAIRY PRODUCTS. — Butter rose from 47-47½c to 50½-51c at Montreal. Dairy butter at Toronto rose to 32-41c. Fresh eggs eased off at Montreal from 70c to 65c. Storage eggs at Toronto rose from 49-50c to 50-51c.

FISH.—Dried codfish reached the highest price on record at Halifax, reaching $11.50 per quintal, the export market being very good except for Porto Rico. There was also a good demand for fish in Canada, but there were some difficulties in the transportation of sufficient supplies.

FRUITS AND VEGETABLES. — Bananas were up to $3.50 per bunch, lemons to $6.00 per case. Oranges were also higher at $5.50 per case. Evaporated apples were easier at 23-24c per pound. Currants advanced to 29-30c per pound. Prunes were easier at 12-13½c. Potatoes were down to $1.90 at Montreal. Onions were easier at $2.25-2.50 per bag of 75 pounds. Canned corn, peas and tomatoes were slightly higher.

MISCELLANEOUS FOODS. — Oatmeal advanced to $7.00 per bag and rolled oats to $6.50. Yellow sugar was higher at $8.19 per hundred pounds. Molasses advanced to 94c per gallon. Maple sugar rose to 20-22c per pound. Pepper was higher at 36-40c. Cream of tartar was up to 80-90c per pound.

TEXTILES.—Raw cotton was easier at 31-35c per pound. Grey cottons and prints averaged higher. Machine silk thread advanced to $10.90 per pound. Jute was slightly higher and hessians were slightly lower. Oilcloth advanced.

*Preliminary figures. ‡Revised. †Nine commodities off the market, fruits, vegetables, etc. One line of spelter was dropped in 1915.

HIDES, LEATHER, BOOTS AND SHOES. — Hides were easier at 15c per pound. A line of sole leather was lower at 82-83c per pound.

METALS AND IMPLEMENTS.. — Boiler plates and wrought iron scrap were slightly higher. Aluminum was down 1c per pound at 36-38c per pound. Lead was higher at 9¾-10c per pound. Silver bar was lower at 85c per ounce. Spelter was down from 12c to 11c per pound. Solder bar rose to 42½c. Tin rose to 80-90c. Axes, crowbars, grindstones, horseshoes and carpenter's mallets were higher.

FUEL AND LIGHTING.—Anthracite coal rose from $8.85 to $9.00 per ton at Montreal. Coal oil rose from 15½c per gallon to 16½c.

BUILDING MATERIALS.—In lumber there were some advances in pine and spruce. Brick rose to $16.00 per thousand and cement to $2.60 per barrel. Lime rose from 29¼c per bushel to 29½c. Iron pipe and sash cord were higher, but iron nails, iron wire and copper wire were lower. White lead, linseed oil and window glass were higher. Prepared paints, shellac and varnish were higher.

HOUSE FURNISHINGS.—Sad irons advanced slightly.

DRUGS AND CHEMICALS. — Bleaching powder was up to 4c per pound.

MISCELLANEOUS.—Malt rose to $2.00 per bushel. Newsprint paper advanced to $2.85 per hundred pounds on the recommendation of the investigating commissioner. Sulphite pulp was up to 70-75c per ton. Rubber was easier at 48-49c per pound. Laundry soap advanced ot $9.00 per case.

Prices in Other Countries

In the United Kingdom, the *Labour Gazette* of the Ministry of Labour reported that the retail prices of foods were only slightly higher at the beginning of February than a month before. Maximum prices were fixed for fish as the prices were rising on account of the scarcity of meat and bacon. Eggs were also higher in price for the same reason, whereas they usually decline in January. Tea was lower, the average being ¾d. per pound. The rise in the retail prices of food since July, 1914, is estimated at 108 per cent, but owing to changes in diet it was calculated that the average expenditure on food had increased only 51 per cent. In wholesale prices the index number of the *Economist* at the end of January showed a decrease from the figure at the end of December owing chiefly to the change in quotations made by the Food Controller. The index number of the *Statist* showed a rise due chiefly to increase in vegetable food, but animal food, minerals, textiles and sundries were also up, while sugar, coffee and tea were lower.

In the United States, wholesale prices at the beginning of February were higher than a month before owing to advances in nearly all the groups except hides and leather, and miscellaneous, where hops and tobacco were lower. At the first of March, Bradstreet's index number of wholesale prices showed a slight decrease from that at February first, two hundredths of one per cent, the first decline since August, 1916. The decrease was due to a fall in foodstuffs.

PRICES, RETAIL AND WHOLESALE, IN THE UNITED STATES, 1916

THE Bureau of Labour Statistics in the United States Department of Labour has issued its annual reports on Retail Prices and Wholesale Prices in the United States for the calendar year 1916. Quotations of prices from month to month during 1916 are given for the articles included, and index numbers for each commodity and group, back to 1907 in the case of retail prices, and back to 1890 for wholesale prices.

In the report on retail prices, quotations in 46 cities are given for 28 articles of food, 8 textiles (several lines being quoted in each case), 2 kinds of anthracite coal, bituminous coal, and gas. The price of bread per loaf and the weight of each loaf before baking are also included. The index number of food prices includes 27 articles back to 1915, 18 back to 1914, and 15 back to 1907. Index numbers of coal prices are also given.

"Prices in 1916 were more than 12 per cent higher than in 1915—a much greater increase than in any other year shown. Food prices have risen each year since 1907 except 1911 and 1915, and in 1916 were more than 39 per cent higher than in 1907. Every article reported for the period has increased in price each year almost without exception save for the years 1911 and 1915. Milk shows the smallest increase for the period, 18 per cent, while round steak shows the greatest, 61 per cent. Only two articles, potatoes and sugar, in any year dropped below the prices of 1907. In 1915, 14 of the 27 foodstuffs carried fell in price when compared with the prices in 1914. Even so, the price level in 1915 was higher than in any previous year except 1914. Prunes were cheaper in 1916 than in 1915; rice, coffee and tea remained the same in price; all the other 23 articles carried made advances in price ranging from 2 per cent for canned salmon to 75 per cent for potatoes."

In the report on wholesale prices, 342 series of quotations are given, once each month for most of the lines, but weekly for those articles which change frequently in price. For some of the commodities, such as eggs and potatoes, there are quotations in several markets. For

each commodity the average price for each year back to 1890 is also given with the relative price for each year based on the average price in 1890-1899. Until 1913 the Bureau's index number was based on this decade, but since that year the general index number is based on the average prices for the current year.

"Wholesale prices in the United States, considered in the aggregate, reached new high levels in 1916. The upward trend which began in the latter part of 1915 continued without interruption through the whole of 1916, the increase being most pronounced in the closing months of the year. The Bureau's weighted index number for December stood at 118, as compared with 89 for January, an increase of nearly 33 per cent. The increase over the level of prices in December, 1914, was more than 49 per cent.

"During 1916 phenomenal advances were recorded in the prices of many commodities belonging to the groups designated as farm products, food, cloths and clothing, fuel and lighting, and metals and metal products. Farm products, which include many food articles in the raw state, increased steadily in price from January to November, with a slight decline in December. The net increase in average monthly prices during the year in this group closely paralleled those in farm products, a net increase of nearly 28 per cent being observed between the beginning and e end of the year.

"Cloths and clothing prices advanced rapidly throughout the year, the greatest increase being between November and December. In the fuel and lighting group a slight decline took place in May, but prices again advanced in the following month and continued steeply upward until the close of the year. The December average for this group was 60 per cent above that for January. Metals and metal products increased in price from January to May, but decreases occurred in the next three months. In September prices again advanced, the increase continuing through the remainder of the year and becoming most pronounced (16 per cent) between November and December.

"In the remaining groups, except the one designated as miscellaneous, prices in 1916 moved within somewhat narrower limits. Lumber and building materials were lowest in January and July and highest in December. Drugs and chemicals showed steady increases during the first five months, but reached the lowest point of the year in August and September. House-furnishing goods increased materially in price in each quarter of the year. In the group of commodities classed as miscellaneous, including such important articles as cottonseed meal and oil, lubricating oil, malt, news-print and wrapping paper, rubber, plug and smoking tobacco, whiskey, and wood pulp, prices as a whole climbed steadily upward throughout the year, except for a slight drop in February. The net increase for the year in this group was approximately 27 per cent.

"Comparing 1916 with 1915, the group of commodities showing the greatest increase in average yearly prices was that of metals and metal products, the increase in the group as a whole being nearly 54 per cent. In the other groups the increase in average yearly prices between 1915 and 1916 was: fuel and lighting, 33 per cent; cloths and clothing, 28 per cent; drugs and chemicals, 25 per cent; miscellaneous, 23 per cent; food, etc., 20 per cent; farm products, 16 per cent; house-furnishing goods, 9 per cent, and lumber and building materials, 8 per cent.

The accompanying tables show the index numbers for recent years based on prices in 1916=100. In the *Monthly Review*, issued by the Bureau of Labour Statistics, the figures are given for recent dates from time to time.

THE CANADA FOOD BOARD

THE powers and duties formerly vested in the Food Controller were transferred to a new body, The Canada Food Board, under the jurisdiction of the Minister of Agriculture, by an Order in Council of February 11, as follows:

His Excellency the Governor General in Council, on the recommendation of the Minister of Agriculture and under and by virtue of the powers in that behalf conferred on the Governor in Council by the War Measures Act, 1914, is pleased to order and it is hereby ordered:—

That a Board be created to be called The Canada Food Board;

That the said Board consist of a Director of Food Conservation, a Director of Food Production, and a Director of Agricultural Labour;

That the Board shall be under the jurisdiction of and shall report to the Governor General in Council through the Minister of Agriculture.

And it is hereby further ordered:—

1. That the Board shall generally direct the production, conservation and distribution of food stuffs in the interests of Canada and the other British Dominions as well as the Allied Nations.

2. That all the powers and duties now vested in the Food Controller be transferred to and vested in The Canada Food Board, and that all relevant Orders in Council and regulations conferring powers or imposing duties upon the Food Controller shall have force and effect as if The Canada Food Board had been named and designated therein instead of the Food Controller.

3. That for the better accomplishment of the said purposes the Board shall have power:—

(*a*) To expend any sums of money approved by the Governor General in Council for any of the purposes aforesaid.

(*b*) To co-operate with the Provincial Governments with a view to co-ordinating the activities of all local bodies for the aforesaid purposes.

(*c*) To enter into agreements for the cultivation of idle land on such terms as may appear to the Board to be advisable.

(*d*) To utilize and direct the co-operation in the work of the Board of any member of the Outside Service for the purposes of publicity and of securing information.

(*e*) To mobilize on a voluntary basis the farm labour resources of Canada.

(*f*) To make such regulations consistent herewith for carrying out their duties and for the internal economy of the Board, as the Board may deem advisable.

An Order in Council of the same date constituted the Canada Food Board as follows: Mr. Henry B. Thomson, Chairman of the Board and Director of Food Conservation; Hon. Charles A. Dunning, Director of Food Production; Mr. James D. McGregor, Director of Agricultural Labour. Mr. Thomson had been Food Controller since the resignation of Hon. W. J. Hanna, in January. Mr. Dunning is Provincial Treasurer for the Province of Saskatchewan and Mr. McGregor was the Western Representative of the Food Controller.

FURTHER REGULATIONS AFFECTING WESTERN COAL MINES

DURING the month, Mr. W. H. Armstrong, the Director of Coal Operations for the mines in South Eastern British Columbia and South Western Alberta, issued a number of orders in regard to working conditions in several of the mines. (See issues of August, 1917, p. 613; December, 1917, p. 987, and February, 1918, p. 142.) At the Jasper Park collieries and the Pocohontas and Miette mines, rates were fixed for pumpmen, motormen and blacksmiths, and a complaint having been received from men employed at these mines that the cost of living increase had not been paid to men who had left the company's employ since August 1, 1917, the company was ordered to pay the increase for the time the employees had worked. An employee of the International Coal and Coke Company at Coleman made a claim for a special rate as a boiler washer, but the Director found that as the employee had severed his connection with the company he had, under the terms of the agreement, no claim for compensation. The Director allowed a claim for blacksmith's wages to an employee who had been given a lower rate, although doing blacksmith's work. A number of employees at the same mine claimed compensation for time lost owing to the company's refusal to allow them admittance to the mine, it being stated by the company that the men were late for work. The claim was admitted only in the case of one of the employees concerned. Another order adjusted the rate for haulage and fan engineers at No. 6 mine of the Galt colliery, Lethbridge, and the rates to be paid for brushing in entries. Orders in regard to the Midland mine in the Drumheller field directed the company to hold a conference with the district union officers and to endeavour to effect a settlement of a dispute in regard to the use of black powder and the elimination of timber sets. Another order affecting the same field directed the Rosedale Coal and Clay Products Company to open their colliery and to continue operations under the conditions as to the employment of labour set forth in the tentative agreement and supplementary orders. A joint request was received from the Commissioner of the Western Coal Operators' Association and the district officers of the union for an interpretation of the clause in the tentative agreement entitled "Retirement," which reads as follows: "Where any employee has drawn his time before the regular pay day, he therefore severs his connection with the company, and any alleged grievance he may have ceases to be a question for consideration under this agreement." In the Director's opinion the phrase, "drawn his time before the regular pay day," is satisfied by the application of the employee for, and his receipt of, his time cheque before the regular pay day. Another order deals with a claim of miners at the Coal Creek mines of the Crow's Nest Pass Coal Company for yardage in certain places. The Director found that the places in question were not haulage ways, as the men contended, but different in no way from the regular roons and cross-cuts, and that there should be no further payment in respect thereof. Other orders fixed the contract mining rates and other conditions at the Federal mine, Lethbridge, and the rate for machine mining at the Canmore Coal Company's properties.

FAIR WAGES CONTRACTS, FEBRUARY, 1918

DURING February the Department of Labour received for insertion in the *Labour Gazette* information relative to three fair wage contracts. Of these contracts, two were awarded by the Department of Public Works and contained the usual fair wage clause, while the third one was awarded by the Department of Railways and Canals and contained a fair wage schedule.

DEPARTMENT OF PUBLIC WORKS. — Dredging, Hardwicke (McLean's Gully), N.B. Name of contractor, F. A. Fowlie, Chatham, N.B. Date of contract, February 6, 1918. Amount of contract, Class "B," $0.36c p.c. yd. (scow-).

DEPARTMENT OF PUBLIC WORKS. — Supply of 200 four-cap-drawer vertical filing sections, No. 14CV (S-1950), for Dominion Public Buildings, Ottawa, Ont. Name of contractor, The Steel Equipment Company, Limited, Ottawa, Ont. Date of contract, February 1, 1918. Amount of contract, $8,160.

The fair wage clause obtaining in such cases was inserted in the above contracts.

DEPARTMENT OF RAILWAYS AND CANALS.—Construction and completion of a standard No. 4 station at Valley, N.S., on the line of the Intercolonial Railway. Name of contractor, James W. Douglas, New Glasgow, N.S. Date of contract, February 11, 1918. Amount of contract, $3,725.

Class of labour.	Rate of wages not less than
Carpenters and joiners	$0.40 per hour, 9 hours per day
Concrete workers	0.30 " 9 " "
Plumbers	0.40 " 9 " "
Tinsmiths	0.40 " 9 " "
Lathers	0.35 " 9 " "
Labourers	0.25 " 9 " "
Masons	0.50 " 8 " "
Bricklayers	0.50 " 8 " "
Painters and glaziers	0.40 " 8 " "
Plasterers	0.45 " 8 " "
Stonecutters	0.50 " 8 " "
Structural iron workers	0.40 " 9 " "
Electricians	0.37½ " 9 " "

POST OFFICE DEPARTMENT.—The following is a statement of payments made in February for supplies ordered by the Post Office Department subject to the Regulations for the Suppression of the Sweating System, the securing of fair wages and the performance of work under sanitary conditions:

Nature of orders.	Amount of orders
Supplying new mail bags and bagging	$6,613 63
Repairing mail bags	3,816 92
Supplying mail bag fittings, including new locks	1,961 30
Making and supplying articles of official uniforms	4,901 15
Supplying and repairing mail clerk's tin boxes and steel portable boxes; also repairing and erecting letter boxes	485 84
Repairing miscellaneous articles of postal stores	16 17

FATAL INDUSTRIAL ACCIDENTS DURING FEBRUARY, 1918

DURING February the Department received reports of the occurrence of 59 fatal industrial accidents, as compared with 148 in January and 48 in February, 1917. The Department is unable to secure reports of all fatal industrial accidents, but reports are received monthly from all available sources.

FATAL INDUSTRIAL ACCIDENTS DURING FEBRUARY, 1918.

Trade or Industry	Locality	Date	Cause of fatality.
AGRICULTURE—			
Farmer	Wainfleet, Ont	Feb. 23	Fall from a ladder.
Farmer	Canboro, Ont	" 16	Struck by falling beam.
Farmhand	Ingersoll, Ont	" 19	Crushed by falling tree.
LUMBERING—			
Sawmill employee	Renfrew, N.S	" 23	Fell on revolving saw.
Engineer	Nairn Centre, Ont	" 20	Struck by falling post.
Logger	Stag Bay, B.C	" 18	Falling tree.
Logger	Myrtle Point, B.C	" 15	Collision of trains.
Logger	Sioux Lookout, Ont	" 6	Struck by a tree.
Piler	Poplar Island, B.C	" 13	Crushed by falling timber.
MINES, SMELTERS AND QUARRIES—			
Copper mine employees (5)	Eustis, Que	" 20	Fall of rock.
Miner	Magpie Mine, Ont	" 14	Fall of rock.
Miner	Sellwood, Ont	" 4	Crushed between cars.
Miner	Britannia Mines, B.C	" 3	Buried by a snow slide.
BUILDING AND CONSTRUCTION—			
Structural steel worker	Winnipeg, Man	" 7	Fall from top of pier.
Structural steel worker	Deseronto, Ont	" 2	Fall from trestle.
WOODWORKING TRADES—			
Sash and door factory employee	New Westminster, B.C	" 11	Fall from a runway.
PULP AND PAPER—			
Pulp and paper mill employee	Sault Ste Marie, Ont	" 28	Suffocated—Fell into a pulp tank.
Pulp and paper mill employee	Iroquois Falls, Ont	" 6	Struck by a knife.
TEXTILE—			
Woollen mill employee	Preston, Ont	" 9	Fall.
FOODS, TOBACCO AND LIQUOR—			
Cheese maker	Thurlow, Ont	" 22	Struck by a block of ice.
Cereal mill employee	Galt, Ont	" 14	Caught in shafting of machine.
CHEMICALS AND EXPLOSIVES—			
Chemical works employee	Trenton, Ont	" 13	Struck by an icicle.
Explosive plant employee	Belœil, Que	" 1	Explosion.
STEAM RAILWAY SERVICE—			
Engineer	Duncan, B.C	" 22	Overturning of locomotive.
Fireman	Mimico, Ont	" 27	Struck by a locomotive.
Fireman	Montrose, Ont	" 1	Struck by a train.
Fireman	Trenton, Ont	" 26	Asphyxiated by gas fumes.
Fireman	North Bay, Ont	" 4	Crushed between tender and locomotive.
Brakeman	Calhouns Station, N.B	" 22	Falling from a car.
Brakeman	Oshawa, Ont	" 16	Run over by cars.
Brakeman	London, Ont	" 7	Run over by cars.
Brakeman	Winnipeg, Man	" 7	Run over by cars.
Wiper	Lucerne, B.C	" 11	Burned in fire box of locomotive.
Sectionman	Transcona, Man	" 12	Struck by a locomotive.
Sectionman	Drayton, Ont	" 26	Struck by a train.
Labourer	Hamilton, Ont	" 25	Crushed by falling coal.
Labourer	Farnham, Que	" 4	Struck by locomotive.
Labourer	McAdam, N.B	" 2	Struck by cars.
Labourer	Capreol, Ont	" 2	Struck by locomotive.
Labourer	Kamloops, B.C	" 7	Caught in coal hoisting machinery.
Labourer	Montreal, Que	" 11	Attempting to board moving cars.
MISCELLANEOUS TRANSPORT—			
Teamster	Bannock, Sask	" 16	Crushed by falling logs.
Teamster	Egan, Ont	" 6	Struck by a sleigh.
Driver	Montreal, Que	" 13	Falling from vehicle.
Expressman	Montreal, Que	" 4	Explosion of percussion caps.
Longshoreman	Halifax, N.S	" 3	Struck by falling timber.
Longshoremen	St. John, N.B	" 13	Fell into hold of vessel.
PUBLIC UTILITIES—			
Hydro-commission employee	Stamford, Ont	" 8	Collision of electric locomotives.
Light and power department employee	Winnipeg, Man	" 19	Crushed by an elevator.
MUNICIPAL EMPLOYMENT—			
Municipal employee	Winnipeg, Man	" 20	Crushed by an elevator.
MISCELLANEOUS—			
Labourer	Calgary, Alta	" 22	Caught in machinery.
Warehouse employee	Charlottetown, P.E.I	" 27	Crushed by falling elevator.
Box factory employee	Toronto, Ont	" 21	Crushed by a hoist.
Washing machine factory employee	Toronto, Ont	" 8	Fall from a ladder.
Glue factory employee	Echo Place, Ont	" 25	Caught by shafting.

RECENT LEGAL DECISIONS AFFECTING LABOUR

Action on grounds of conspiracy and wrongful dismissal taken by dismissed employee

AN employee of a railway company was dismissed and he took action against the company and also against certain employees of the company on the grounds of wrongful dismissal and conspiracy. Separate applications were made by the two sets of defendants for an order striking out the whole or certain portions of the statement of claim on the ground that they disclosed no reasonable cause of action. These applications were dismissed by the Master in Chambers at Calgary and the defendants appealed to the Supreme Court of Alberta. With regard to the company, its application was only in respect of conspiracy, being against the claim that the company had conspired with others to ruin the plaintiff's reputation, and to reduce his salary and dismiss him. It was held by the Court that an employer, whether an individual person, or a corporation, could not be charged with conspiracy with some of his, or its, employees to dismiss wrongfully another employee. It was therefore ruled that no legal cause of action for conspiracy was disclosed against the company, and the appeal of the company was allowed with costs. With regard to the individual defendants, who were alleged to have had a part in the dismissal of the plaintiff, their appeal was "for an order that the statement of claim and particulars filed pursuant to order be struck out on the ground that the statement of claim and particulars disclosed no reasonable cause of action" against them. It was contended for the defendants that their acts were the acts of the company, and accepted as such by its president, as proved by the continuance of the defendants in the service of the company. Therefore, it was claimed there was no conspiracy, but merely a termination by the company of the contract with the plaintiff. This contention was not upheld by the Court, which declared that a good cause of action was disclosed in the statement of claim, and that even if the defendants' acts were the acts of the company, a servant is always personally liable for his tort, although his master may be also. The appeal of the individual defendants was therefore dismissed with costs. (*Alberta—Patterson v. Canadian Pacific Railway et al.*)

Priority of wages claims against insolvent estate held valid

A company made an assignment for the benefit of its creditors under The Assignments Act of Alberta. Workmen's claims for wages were filed with the assignee. The Assignments Act provides that "the assignee shall pay in priority to the claims of the ordinary or general creditors the wages or salary of all persons in the employ of such person at the time of making such assignment . . . not exceeding three months' wages or salary." Two months later the company was ordered to be wound up under The Winding-Up Act, and a permanent liquidator was appointed with whom the workmen filed their claims. Their counsel asked the court that these claims be paid in priority to those of the ordinary creditors. The Winding-Up Act says: "Clerks and other persons . . . in the employment of the company . . . shall be collocated in the dividend sheet by special privilege over other creditors for any arrears of salary or wages due or unpaid, at the time of the making of the winding-up order, not exceeding the arrears which should have accrued to them during the three months next previous to the date of such order." It was contended by the liquidator that since the claims in question did not accrue during the three months previous to the date of the winding-up order, therefore the privilege or priority of the workmen was lost and their claims must rank with those of the ordinary creditors.

The opinion was expressed by the Court that the wages due were not a lien, but by virtue of Section 28 of The As-

signments Act they were given statutory priority over the claims of ordinary creditors, the workmen having a first claim on the company's assets. This right to their wages was given by statute and was not lost by the subsequent winding-up proceedings. It was a right acquired before the liquidator took over the affairs of the company, and he was bound to recognize it. It was further pointed out that if the contention of the counsel for the liquidator was correct, a company might fraudulently defeat the claims of honest workmen by causing an assignment for the benefit of creditors, allowing the proceedings to drag on for three or more months, and then bringing about winding-up proceedings. The conclusion was reached by the Court that the estate came into the hands of the liquidator subject to the statutory priority or privilege of the wage-earners, which must be recognized by him, and the claims should be paid in priority to those of the ordinary creditors. REVIEWS

UNITED STATES.—Industrial Experience of Trade Schools in Massachusetts. U. S. Department of Labour, Bureau of Labour Statistics. Bulletin No. 215. 275 pp.

Trade schools for girls in Massachusetts

A BULLETIN has been issued by the United States Department of Labour on the trade schools for girls in Massachusetts. It is the result of a study undertaken in September, 1914, by the Department of Research of the Women's Educational and Industrial Union of Boston. These trade schools for girls are situated in Boston, Worcester, Cambridge and Somerville. The school at Somerville, however, has been changed into a Vocational School, offering training in home making, and is therefore not included in the study.

In 1914-15, the Boston Trade School for Girls offered six courses, dressmaking, millinery, power-machine operating on cloth, power-machine operating on straw hats, catering, and design. The Worcester school trained girls in four subjects—dressmaking, millinery, power-machine operating on cloth, and trade cooking. In Cambridge, instruction was offered in dressmaking and in trade cooking. These schools have grown rapidly, without, however, detracting from the attendance of the public schools of the State. Of the 2,500 who had entered the schools up to the time when this study was made, 908 girls, or more than one-third, went into the trades. While trade training for girls is still in the experimental stage, and the body of experience is insufficient for the formation of a final opinion, the trade school experience has already shown—

1. That a completed grammar-school education is a great help in gaining access to the skilled trades.
2. That a certain degree of maturity, 16 years at least, is essential to entering these trades at present in Massachusetts.
3. That the majority of girls require a trade-school course of at least a year in order to enter and remain in their trades.

The schools have not yet succeeded in their endeavour—

1. To make a year in trade school equivalent to a year in the trade.
2. To find trades suitable for all pupils who apply for training.
3. To develop school incentives comparable to the incentive of the pay envelope in trade, leading to rapid and thorough work.

UNITED STATES.—Labour Legislation in Massachusetts, 1915, 1916 and 1917. Commonwealth of Massachusetts. Bureau of Statistics. Labour Bulletin No. 122. 162 pp.

Labour Legislation in Massachusetts

A bulletin has been issued by the Massachusetts Bureau of Statistics on Labour Legislation in Massachusetts during the years 1916. It is supplementary to Labour Bulletin No. 104, entitled "Handbook of Labour Laws in Massachusetts," which contain the labour laws in effect at the close of the legislative session of 1914.

During the last three years it is stated that no distinctively new principle in the matter of labour legislation was established in Massachusetts, the laws passed for the most part having been merely for the purpose of amending previous legislation. In 1915 the more important acts had reference to the following subjects, namely: Unemployment; liens for labour; amendments to the Workmen's Compensation Act; further regulation of licensed occupations; a revision of the public school teachers' retirement system; the extension of pensions to various employees of cities and towns; a general extension of the Civil Service law; the establishment of a department of university extension under the direction and control of the State Board of Education; and the establishment of agricultural schools in Norfolk and Hampshire counties. In 1916 the principal measures dealt with the Civil Service and provided for the reorganization of the Civil Service commission, the extension of the Civil Service laws and the abolition of the Joint Board of the State Board of Labour and Industries, and the Industrial Accident Board, and the transfer of its powers and duties to the State Board of Labour and Industries. The law relative to the weekly payment of wages was extended to include hotel employees, and changes were made in the law relating to the assignment of wages. Amending acts were passed relating to pensions, hawkers' and peddlars' licenses, employment of women and children, and workmen's compensation. During 1917 a great many acts were passed affecting public employment relating to hours of labour, wages and salaries, vocations, etc. As a war-time measure an act was passed making lawful: "The cultivation of land and the raising, harvesting, conserving and transporting of agricultural products on the Lord's Day." Provision was made for the establishment of county industrial farms and the employment thereon of prison labour. A resolution was passed accepting the Federal Act providing for the promotion of vocational and agricultural education through the co-operation of the Federal and State Governments.

SWEDEN.—Statens Förlikningsmäns för medling I Arbetstvister verksamhet under ar 1916. 92 pp.

Conciliation in Trade Disputes in Sweden

According to the official report under the law of Sweden with regard to trade disputes, the principle of conciliation and mediation is making progress there. The country is divided into seven districts, each of which has a separate official conciliator, who in the event of a strike or lockout either offers his services to the parties in dispute, or intervenes upon the request of one or both of the disputants. In 1916 the total number of disputes in which the conciliators took part was 102, compared with an average of 70 for the years 1907 to 1915. Negotiations, however, took place in only 72 disputes in 1916 out of the 102 cases in which the intervention of the conciliators had been attempted. These negotiations affected 1,138 employers and 33,864 workpeople. In 53 cases where negotiations took place work was suspended prior to the negotiations, and in only one case was there a suspension of work after the intervention of the conciliator. Fifty-one of the stoppages were in the nature of strikes and the other three cases were a mixture of strike and lockout. Of the 72 cases of negotiation during 1916, 64 were on the initiative of the conciliator, three on that of the employees, one on that of the workpeople, and in four cases the initiative was taken by both parties in the dispute. In 47 cases of mediation definite results were obtained, three being in favour of the employers, 14 in favour of the workmen, while 30 ended in a compromise. Of the remaining 25 cases an arrangement was made between the parties concerned in 22 cases, and in only three the dispute continued without any solution being reached. As an indication of the progress of conciliation, it is stated that action was taken by the conciliators in 24.2 per cent of the disputes in which there was a suspension of work during 1916, as against 18.8 per cent during the years 1907 to 1915.

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

While there was some decline in output of steel plants at the Sydneys, metal manufacturers generally were busier, due in the main to improvement in the transportation and fuel situations, and, on the whole, employment in industry was good. As to industrial disputes the month was quieter than February and also than March of last year. There were in existence at some time or another during the month 13 strikes, as compared with 14 strikes in February. Five of the new strikes and two of the old disputes were settled, leaving six unterminated strikes, involving only 313 workpeople, on the record at the end of the month. The cost of the weekly budget of staple goods was $12.65, as compared with $12.54 in the previous month and $10.70 for March, 1917. The departmental index number of wholesale prices stood at 269.2, as compared with 263.5 for the previous month and 220.6 for March, 1917. The special articles include a review of labour legislation enacted or likely to be enacted in 1918.

In this Issue

* * *

During March the Department received the report of the Board of Conciliation and Investigation appointed to inquire into a dispute between the Canadian Northern Railway and trainmen on Western lines. Four applications for Boards were received: (1) from certain employees of the Canadian Collieries, Limited, and the Wellington Railroad Company—Board appointed; (2) application affecting certain employees of the Canadian Northern Railway Company—application under consideration; (3) from firemen in the employ of the Corporation of Ottawa—action pending; (4) from motormen and conductors in the employ of the Sandwich, Windsor and Amherstburg Railway Company—Board appointed. The Board appointed to deal with the application of certain employees of the Collingwood Shipbuilding Company was completed by the appointment of a chairman.

Proceedings under the Industrial Disputes Investigation Act

* * *

A difficult situation, which had arisen between the various shipbuilding companies on the Pacific Coast and their employees by reason of a difference arising out of the wages schedule, etc., seems likely to be adjusted through the efforts of a Commission which was appointed during March. Some months ago the United States Shipbuilding Labour Adjustment Board undertook an inquiry into conditions at the shipyards on the Pacific Coast of the United States where a strike had prevailed for a good many weeks. Fortunately the strike had not extended to the shipbuilding yards of the Canadian Pacific Coast, but much unrest existed among the employees. The

Commission appointed to adjust wage dispute in B.C. shipyards

Imperial Munitions' Board, which controls many of the contracts in the Canadian yards, is understood to have undertaken to use its influence to secure in the Canadian yards in which its contracts were placed the adoption of the same wage schedule which might be recommended by the Wages Adjustment Board for the United States yards, and, later, when the Labour Adjustment Board made its report and recommended a certain wages schedule, this schedule was adopted also in the Canadian shipyards in question. Subsequently, however, to the adoption in the United States of the schedule recommended by the Labour Adjustment Board, the United States Board added 10 per cent to the wage rate named in the schedule and the increased wage went into effect in the United States shipyards. Employees in the Canadian shipyards urged that the 10 per cent increase should apply also in their case, but this view was not accepted by the shipbuilders of the Imperial Munitions Board. The employees were apparently prepared to press the point, if necessary, to a strike, and it was publicly announced that arrangements were made for a strike to be effective from March 1. The matter did not, however, escape the attention of the Minister of Labour, who had been in negotiation with the various disputants, and a Royal Commission was appointed charged with the duty of investigating the situation and endeavouring to bring about a working agreement. The Commission was composed of Mr. Justice Murphy, of the British Columbia Supreme Court, chairman; Mr. Gordon Kelly, of Vancouver, representing the men, and H. Tonkin, of Victoria, representing the employers. The employees undertook at once to postpone action looking to a strike and the inquiry proceeded without delay. Shortly after the end of the month word was received by the Minister indicating that the inquiry had been closed, with what appeared to be a good prospect of a satisfactory working agreement being concluded.

Second Report on Joint Standing Industrial Councils in the United Kingdom

The March issue of the British Labour Gazette contains the following summary of the second report on Joint Standing Industrial Councils, prepared by the Committee on Relations between employers and employed. A summary of the first report, the so-called Whitley report, was printed in the August, 1917, issue of the *Labour Gazette*, page 570.

The second report on Joint Standing Industrial Councils, which has been prepared by the Committee on Relations between Employers and Employed, has now been published. This report deals especially with industries in which organization on the part of employers and employed is less completely established than in the industries covered by the previous report, and with industries in which such organization is weak or non-existent.

For convenience of consideration the committee have divided the industries of the country into three groups: Group A—consisting of industries in which organizations on the part of employers and employed is sufficiently developed to render their respective associations representative of the great majority of those engaged in the industry. Group B—comprising those industries in which, either as regards employers and employed, or both, the degree of organization, though considerable, is less marked than in Group A. Group C—consisting of industries in which organization is so imperfect, either as regards employers or employed, or both, that no associations can be said adequately to represent those engaged in the industry.

In the more highly organized industries (Group A) the committee have, in their first report, proposed a triple organization of national, district and workshop bodies. In industries where there are representative associations of employers and employed, which, however, do not possess the authority of

those in Group A industries, they now propose that the triple organization should be modified by attaching to each National Industrial Council one or at most two representatives of the Ministry of Labour to act in an advisory capacity. In industries in both Groups A and B they propose that unorganized areas or branches of an industry should be provided, on the application on the National Industrial Council and with the approval of the Ministry of Labour, with Trade Boards for such areas or branches, the Trade Boards being linked with the Industrial Council. In industries having no adequate organization of employers or employed, it is recommended that Trade Boards should be continued or established, and that these should, with the approval of the Ministry of Labour, be enabled to formulate a scheme for an Industrial Council, which might include in an advisory capacity the "appointed members" of the Trade Board.

Briefly, the proposals are that the extent of state assistance should vary inversely with the degree of organization in industries. The committee do not, however, regard Government assistance as an alternative to the organization of employers and employed. On the contrary, they regard it as a means of furthering the growth and development of such organization.

The proposals which are set forth do not require legislation except on three points, namely, to provide: (1) that the Trade Boards shall have power, in addition to determining minimum rates of wages, and hours; (2) that the Trade Boards shall have power to initiate inquiries, and make proposals to the Government Departments concerned, on matters affecting the industrial conditions of the trade, as well as on questions of general interest to the industries concerned respectively; (3) that when an Industrial Council sufficiently representative of an industry makes application, the Minister of Labour shall have power, if satisfied that the case is a suitable one, to make an Order instituting for a section of the industry a Trade Board on which the Industrial Council shall be represented, or constituting the Council a Trade Board under the Trade Boards Act.

The committee remark that their proposals must necessarily be adopted to meet the varying needs and circumstances of different industries, and do not anticipate that they will be uniformly in practice. Their recommendations are intended merely to set forth the main line of development believed to be essential to ensure better relations between employers and employed. The application of the recommendations to the several industries can, the committee assert, be safely left to those intimately concerned, with the conviction that the flexibility and adaptability of industrial organization which have been so large a factor in enabling industry to stand the enormous strain of the war will not fail the country when peace returns.

In a Prefatory Note it is stated that this report is now receiving the joint consideration of the Minister of Reconstruction and the Minister of Labour, in the light of the practical experience which has been gained in establishing Joint Industrial Councils in accordance with the proposals of their first report. A statement will shortly be published with regard to any modification of the recommendations of this second report which may be considered expedient from the administrative point of view.

* * *

Organization of the United States Employment Service

The United States employment service, organized by the Department of Labour (see February issue, page 148), is publishing a weekly bulletin called The United States Employment Service Bulletin, the first issue of which appeared on January 28, 1918. In its initial issue the announcement is made "that its primary purpose is to distribute information and promote coordination among the officials and employees of the Federal employment service and of the co-operating state and

municipal employment offices and state councils of defence." The following statement outlining the work and organization of the employment service is from the March issue of the Monthly Review of the United States Bureau of Labour Statistics:

The organization of the Service to meet the labour distribution problem is one of the features of the national war-labour programme, the administration of which has been delegated to Secretary Wilson and the department. It will be the task of the extended service to furnish millions of workers for the various war industries. It is estimated that by August between 3,000,000 and 4,000,000 workers will be needed in agriculture, shipbuilding, munitions making, and other essential industries. John B. Densmore, of Montana, for the past five years solicitor for the Department of Labour, has been appointed Director of the United States Employment Service by Secretary Wilson. Charles T. Clayton, of Maryland, is assistant director. The details of the operation of this national labour distribution machinery will be managed by four divisions, the chiefs of which, together with the director and assistant director, will constitute a policies board. The statistical data in connection with the employment service will be tabulated and published from time to time by the Bureau of Labour Statistics of the Department of Labour. The following are the four divisions, with the names of their respective chiefs: Division of Information, Administration and Clearance—T. V. Powderly, of Pennsylvania, chief. Woman's Division —Mrs. Hilda Muhlhauser Richards, of Ohio, chief. Division of Reserves—William E. Hall, of New York, national director of the United States Public Service Reserve and the United States Boys' Working Reserve, chief. Farm Service Division—A. L. Barkman, of Missouri, chief.

For several months the Department of Labour has been quietly working to equip the Federal employment service to handle efficiently the problem of supplying war labour. Funds appropriated specially by Congress or allotted by the President from his war-emergency fund are believed to be sufficient to conduct the service until the end of the fiscal year. The service is now covering the entire continent with a network of labour exchanges. Federal, state and municipal employment offices and the facilities of the various state councils of defence are being utilized and made co-ordinate parts of this comprehensive Federal machine. Complete centralization and unification of all efforts to supply labour are thus effected, eliminating all duplication and waste of effort, time and expenditures. There are already more than 200 such exchanges in operation, and the immediate establishment of 50 more in various parts of the country is now being arranged. With these labour exchanges as the medium for the distribution of workers and their placement in the war industries, a vast reservoir of skilled and boy workers to meet the additional demands of the essential industries is being created by the United States Public Service Reserve and the United States Boys' Working Reserve, both comprising a division of the Federal employment service. The reserves are, in effect, the service's "recruiting service." Already about 30,000 skilled workers have been enrolled in the Public Service Reserve and approximately 150,000 boys between the years of 16 and 21 in the Boys' Working Reserve. Both bodies are now placing men and boys in industrial service through the machinery of the employment service. In connection with the work of the service and its reserves, a corps of travelling examiners is being created. These examiners will cover the country and determine the fitness of applicants for shipbuilding and other war industrial work. They will have the co-operation of the enrolling officers of the Public Service Reserve throughout the country, employers, labour leaders, chambers of commerce, and other business organizations and patriotic persons generally. By means of these examiners it is anticipated that few men will be

placed in positions for which they are not fitted, and there will be real conservation of the available supply of skilled workers. "Maximum service from every worker" is a cardinal principle of the reorganization of the employment service.

* * *

Labour Resettlement Committee in the United Kingdom

The Minister of Labour of the United Kingdom has established a Labour Settlement Committee to advise him on problems arising out of the demobilization of the army and navy. The committee is composed of equal numbers of representatives of employers and trade unions, and there are also representatives of women workers and of Government departments. The following outline of the Minister's view of the work of the committee, given in an address at the committee's first meeting, is taken from the March issue of the British Labour Gazette. The Minister said:

There were two sets of questions which they would have to consider, though they constituted a single problem. First, there was the re-settlement of sailors and soldiers to civil life, and, secondly, the re-settlement of those who had been engaged in war industries. As regards the former, a sub-committee of the Reconstruction Committee had examined the matter with great care, and they would be asked to consider the scheme which that committee recommended for adoption. He thought they would agree that the committee's work had been done well and that they had studied the question with great thoroughness. As regards civil workers, another committee appointed by the Reconstruction Department had been considering their case and are submitting two reports, which would shortly be laid before them. The question of the civil worker he regarded as being more difficult even than that of the soldier and sailor. Recent events, of which the committee would be aware, in connection with discharges of a certain number of munition workers, had brought this question up already in a concrete form. The position arising from these discharges, whether as regards the total numbers discharged or the prospect of finding fresh work, was not of a nature that need cause alarm, but it should be carefully watched, and he proposed to ask the committee to appoint a sub-committee whose function it would be to keep the matter under review.

Among the most important subjects for consideration by the committee would be the arrangements for providing out-of-work pay for ex-service men and others who were unemployed. In the case of pay and allowances, to be followed by a free policy of insurance against unemployment which would be valid during the succeeding year. The precise amount of the weekly rate of benefit was not yet settled, but it was proposed that it should be possible to draw benefit up to a total of 20 weeks during the year. The majority of civil war workers were already insured against unemployment, but the rate of benefit in their case was only 7s. a week, and though this was in many cases supplemented by voluntary insurance through trade unions, the amount was clearly inadequate for any prolonged period of unemployment. The best method of dealing with this difficulty and also of providing for the workpeople who were not at present covered by insurance was receiving careful consideration.

There was, further, the question of the machinery by which the schemes adopted were to be administered. The Government had decided that the work would have to be largely carried out by the employment exchanges, which were the only national organization capable of coping with the problem. We possessed a great advantage in having the organization of the employment exchanges ready to hand. He did not think, however, that the exchanges, or indeed any piece of official machinery, could carry out the task unaided. They, like the Ministry itself, would need the

constant advice and co-operation of the employers and workpeople in their districts. In order to secure this, he and his predecessor had undertaken the formation of local advisory committees consisting in the main of an equal number of employers and workpeoples' representatives who would be associated with the work of the exchanges. Some two hundred and fifty of these committees were already in working order and some of them had performed very valuable work, especially in the direction of finding employment for disabled men. Through the agency of these committees he hoped that the exchanges would be able to ascertain the demand for labour in their districts and to secure the co-operation of the local branches of the trade unions in meeting it. He was sure that in order to obtain the best results it was necessary to utilize the trade union organization to the fullest possible extent. He knew that some trade unionists did not like using the exchanges, but he also knew many others who did, and he hoped that by a free interchange of information between the exchange and the local branches of the trade unions through the latter's representatives on the local advisory committees it would be possible to deal successfully with these men. In other words, his view was that every scrap of machinery suitable for the purpose ought to be used in order to carry out the work of re-settlement as smoothly and easily as possible, and he hoped that the committee would be able to give him very useful advice as to how co-ordination could best be secured over the whole field of industry.

The Minister referred to other questions, such as the classification of the various trades of the country according to their national importance and the immediate prospects of employment which they afford; arrangements for reinstating soldiers and munition workers in the industries from which they have gone; arrangements in regard to substitutes who had been introduced in their places; arrangements necessary to enable those whose apprenticeship had been interrupted by military service to resume their instruction. It was essential that these questions should be carefully considered beforehand by joint bodies fully representative of the employers' organizations and the trade unions in every important industry.

* * *

Labour Jottings

In the February *Labour Gazette*, page 143, a copy of the proposed agreement between the Dominion Coal Company and its employees was given, together with some account of the negotiations which resulted in the drafting of the agreement. The Department has since learned that the proposed agreement has been signed by both parties and is now in effect.

In a series of three reports, the New York State Federation of Labour has come out for state administration of health insurance and has drafted a bill which is now pending in the state legislature.

Under a Danish law, dated October 27, 1917, which, however, is to be operative only until March 31, 1918, provision is made for granting increased relief to unemployed workpeople who are members of approved unemployment funds. The relief in question takes the form of (a) special out-of-work benefit in respect of unemployment amounting to at least one-third of the normal weekly working hours, and (b) grants in aid of rent.

By a Vice-Regal Decree, dated August 23, 1917, and entering into operation some time before June next, Italy has extended the principles of compulsory insurance against accidents to agricultural workers generally.

The trade union movement has under advisement a plan to establish a bureau of labour statistics, to be operated co-operatively by international trade unions in this country, for the purpose of gathering and disseminating statisti-

cal and other information of interest to organized labour. The proposal was first considered at the convention of the Ontario Labour Educational Association, held at London last May, and a comprehensive plan has been developed by the committee of the executive which has had the matter in hand.

The United States Government has obtained the co-operation of the ablest educators in the country in connection with its plans for re-education for blinded soldiers.

The United States Department of Labour announced, on March 29, that during the previous week the Department's mediators succeeded in settling 17 industrial disputes, involving some 25,000 workers, and that in only five instances was time-loss occasioned through strikes. Nearly all of these disputes occurred either in war industries or in industries indirectly connected with the war.

Insurance to the extent of about $12,000,000,000 has already been written on the lives of American soldiers, sailors and nurses by the United States Bureau of War-Risk Insurance. This amount covers more than 1,500,000 persons and the average policy is $8,085.

The United States Employment Service has announced establishment in 13 principal cities of employment offices devoted to obtaining positions for women and girls in all fields except that of teaching.

Estimates of United States Army General Staff and Department of Labour, based on British experience, indicate that six workers in munitions factories are required for every soldier maintained in the field.

INDUSTRIAL CONDITIONS DURING MARCH, 1918

I.—GENERAL REVIEW

The Labour Market

In the steel plants at the Sydneys, employment declined still further in March because of heavy snowstorms, but the metal industries were generally busier throughout the Maritime Provinces and in Quebec and Ontario, due in the main to improvement in the transportation and fuel situations. Employment was good in locomotive and car works and in railway repair shops some overtime was worked. There was some slackness among machine shop men at Montreal, but machinists, moulders and blacksmiths were in demand at many points in Ontario. Employment continued brisk in agricultural implement plants. Munition workers were in demand at Montreal, Toronto and London, and women for aeroplane work were wanted at Toronto. The high level of employment in shipbuilding was maintained, and at lake ports there was activity preparing vessels for the opening of navigation. In the foods group, sugar refineries continued slack at all points and there was also some dullness in confectionery establishments. Abattoirs and meat packing houses experienced some difficulty in securing supplies and there was consequent dullness. Brewery and distillery workers were well employed at most points in Quebec and Ontario, and employment for tobacco workers were generally brisk. Flour mills were active throughout the country, but canning and preserving establishments reported between-seasons' slackness. Textile workers were reported busier at all points except Quebec and Winnipeg; the mills were calling for hands at Fredericton, Sherbrooke, Kingston, Hamilton, Guelph, Brantford and Kitchener. Employment

was better for workers on tents and awnings. Workers in the garment trades were generally busier and women workers were in demand at shirt, collar and whitewear factories. Pulp and paper mills were working at capacity, and labour shortage was reported from some plants. Conditions in the printing trades were generally normal, some slackness being reported from cities in the prairie provinces. Despite the approach of the building season, sash, door and planing mills were quieter at many points in the east, but improvement was reported in the west. Furniture workers, however, were generally well employed. In the leather group, tanneries were busy and employment for shoe workers was much improved. Employment on clay, glass and stone products continued dull in Quebec, but some improvement was reported from Ontario and the west. In railway work, snowstorms afforded much extra employment early in the month, but there was some quietness in the prairie provinces. 'Longshoremen were active at Halifax and St. John and men were in demand; employment was also reported good from Pacific ports. Metal miners were busy in the Cobalt and Porcupine fields, but there was some quietness in mines in British Columbia, as the smelters were well supplied with ore. There was some falling off in coal production in Nova Scotia; coal miners were in demand in the Alberta and British Columbia fields. Lumbering in the east was rather quiet, logging having been completed and river-driving not having been begun; numbers of men were leaving the camps. Employment continued brisk, however, in logging camps, sawmills and shingle mills in British Columbia. There was a heavy demand for farm hands at points in Ontario. Except in a few instances, building continued dull. Employment in the building trades, as indicated by the value of building permits issued in 35 cities, increased 136.6 per cent as compared with February and decreased 13.3 per cent as compared with March, 1917. Reports from 16 cities, showing the number of civic employees temporarily engaged and the wages paid these employees during the first pay-roll period of two weeks in March, indicated an increase of about 9 per cent in the number of workers, and an increase of nearly 6 per cent in the wages paid.

Strikes

The loss of time in March on account of industrial disputes was much less than in February and was also less than in March of last year. There were in existence at some time or other during the month 13 strikes, affecting 1,008 workpeople and involving a time loss of 8,276 working days, as compared with 14 strikes, 3,266 employees and 44,152 days in February, and 16 strikes, 6,727 workpeople and 67,777 working days in March, 1917. On March 1, there were on record five strikes, affecting 313 workpeople. Eight strikes were reported as commencing during the month as compared with ten in February. Five of the new strikes and two of the old disputes carried over from February were settled, leaving the six following unterminated disputes, involving 343 workpeople, on record at the end of March: plumbers and steamfitters, St. John, N.B.; machinists at Montreal; carpet weavers at Peterborough; metal polishers at Weston, Ont.; moulders at Galt, Ont.; hotel and restaurant employees at Calgary.

Prices

In prices, foods continued upward, although there were important decreases in eggs and potatoes. In materials there were some advances, especially in building materials, but there were also some declines, notably in hides, metals and chemicals. Grain and hay were considerably higher, also cattle, hogs and meat. Eggs were lower, but storage eggs went off the market. Potatoes and apples declined considerably in some parts of the country. In wholesale prices, the departmental index number for March stood at 269.2, as compared with 263.5 for February, 220.6

for March, 1917, and 136.0 for March, 1913. The average cost per week of a family budget of staple foods in nearly 60 cities was $12.65, as compared with $12.54 for February, $10.70 for March, 1917, and $7.68 for March, 1914. In fuel, anthracite coal was slightly lower, but wood advanced.

II.—THE INDUSTRIES AND TRADES

Metals, machinery and conveyances.

Manufacturing

—Sydney reported that heavy snowstorms kept the outputs of the Dominion Steel Company lower than usual. The March production of the plant in tons was: pig iron, 25,000; ingots, 30,000; blooms, billets and slabs, 24,000; rods, 9,600; merchant bars, 4,200; wire, 1,200, and wire products, 1,100, as compared with a production in February of: pig iron and steel, 23,000; ingots, 28,000; blooms, billets and slabs, 24,000; wire rods, 1,200; wire and wire products, 1,000, and merchant bars, 5,500. At the Sydney Mines steel plant, the production of iron was 6,200 tons and of steel 9,100 tons, compared with 6,500 tons of iron and 9,750 tons of steel last month. Halifax reported boat and shipbuilding plants busy and stove and furnace foundries very active. Westville reported steel plants a little more active during the latter part of the month owing to an improvement in transportation and in fuel supply, and, at Truro, the steel plant was working two shifts. St. John reported rolling mills and shipyards active. At Moncton, employment in the Canadian Government railway shops was steady, with overtime in some departments, and foundries and machine shops were busy. Fredericton also reported machine shops and foundries well employed. At Newcastle, ship builders were steadily employed. Montreal reported a gradual betterment of conditions in the various industries using iron and steel, though there were still a number of machine shop men unemployed. A number of large orders for rolling stock promised a continuation of activity in railway shops. Quebec reported iron shipbuilding and repairing yards very busy, and metal working establishments at Sherbrooke were active. All branches of the metals group at St. Hyacinthe were busy. At Three Rivers, the Canada Iron foundry was increasing the number of its employees and shipbuilding yards were active. At Toronto, the metal industries showed continued activity, though some plants, owing to the limited supply of materials, were readjusting for the manufacture of new lines. Hamilton reported a demand for labour in car shops, in stove and furnace foundries, and in factories making electrical apparatus. Niagara Falls reported machine shopmen and blacksmiths in special demand. At Ottawa, there was a demand for machinists. Kingston reported the locomotive works very active and the shipbuilding companies well employed. The Canada Steel Company's plant at Belleville was running day and night shifts. Metal workers at Peterborough were well employed and nearly all shops reduced the working hours from ten to nine. Galt reported the various branches of the metals group busy, and, at Brantford, machine shops and agricultural implement plants were working some overtime. Kitchener reported a demand for machinists. There was a constant demand for moulders in stove and furnace foundries at Woodstock, and foundries and agricultural implement plants at London were busy. St. Thomas reported iron foundries well employed and railway shop employees busy. At Chatham, foundries and machine shops were active, but short of men; automobile and carriage factories were busy and were working nine hours per day. Windsor reported the Canadian Bridge Works

taking on more men and automobile factories were very busy, with mechanics in demand. At Orillia, stove and agricultural implement plants were busy. At Fort William, the car works was adding to staff. Winnipeg reported the metal industries well employed, and, at Brandon, machine shops were busy. Iron works and the Ogden Locomotive shops were fully employed. Edmonton reported a slight increase of staff at the Edmonton Iron and Machinery Company. Shipyards and machine shops at New Westminster were fully employed. Victoria reported steady employment at iron shipyards and foundries and work in the wooden shipbuilding yards continued brisk.

Foods, liquors and tobacco.—St. John reported the sugar refinery slack, on account of the scarcity of raw sugar. Biscuit factories at Moncton were very active, and, at Fredericton, bakeries were busy, but there was some slackening in confectionery departments. Montreal reported sugar refineries were restricting deliveries to limited lots on account of the uncertainty as to raw supplies. Quebec reported abattoirs busier and tobacco factories active. At Sherbrooke, meat packing houses and confectioneries were busy and tobacco factories and breweries fairly well employed. St. Hyacinthe reported abattoirs fairly active, and biscuit factories very busy. Toronto reported the provision trades steadily employed and cigarmakers had an active month. All branches of the foods group at Hamilton were busy and the demand for cigarmakers in large factories continued. Peterborough reported flour and feed mills active. Flour mills at Brantford were running full time, but the Waddell Preserving Company was seasonally quiet. Kitchener reported flour mills and meat and sausage factories well employed; breweries had a good month, and the Seagram distillery was active. Guelph reported flour and feed mills running to capacity, cigarmakers fairly busy, and breweries quiet. Biscuit and confectionery factories at London were short of help; tobacco factories and breweries were very active. Chatham reported flour and feed mills busy, but the sugar refinery was not operating; abattoirs and meat packing houses were also quiet, owing to delays in deliveries of stock. Windsor reported the cereal plant operating again and cigar factories active, with a demand for woman help. At Winnipeg, confectioneries and vegetable canneries reported employment good. Flour mills at Regina were busy and the abattoir was fairly active, though hampered by a shortage of supplies. Flour mills at Moose Jaw and Prince Albert were operating steadily. Medicine Hat reported flour mills running day and night and confectioneries busy. At Lethbridge, flour mills and the macaroni factory were busy. Calgary reported flour mills and meat packing houses fully employed. Vancouver reported confectionery establishments and tobacco factories fully employed, and, at New Westminster, the abattoir was running at capacity; evaporating and canning plants, however, were shut down and cigar factories were working part time.

Textiles, cordage and carpets.—Amherst reported woollen mills working full time. At St. John, cotton mills were running steadily, and, at Moncton, woollen and underwear factories were very busy. At Truro, also, woollen mills were busy. Fredericton reported a demand for help in the cotton mill. Montreal reported cotton and woollen factories busy, but, at Quebec, cotton mills were reported quieter. At Sherbrooke, cotton, woollen and knitting mills were active, and, at St. Hyacinthe, there was a demand for weavers and other hands. Three Rivers reported cotton mills working day and night. At Toronto, woollen goods and knitting factories were busy; carpet factories and tent and awning factories were busy, but the twine factory was quiet. At Hamilton, there was a demand for weavers in the cotton factories, and other branches of the textiles group were active. St. Catharines reported woollen and knitting factories busy and the silk mill well employed.

Kingston reported textile mills very active and in need of woman help. At Peterborough, woollen mills were active and carpet factories were well employed in some departments. Galt reported cotton, woollen and knitting factories busy and the silk mill had a good month. Brantford reported woollen mills, knitting mills and silk mills busy, with an active demand for help. At Kitchener, knitting factories and felt factories were busy, and there was a shortage of help in the twine factory. Woman help was also in demand in cotton spinning mills and woollen and worsted mills at Guelph. Stratford reported woollen and knitting mills very busy and taking on extra help. Knitting factories at London and St. Thomas were well employed and woollen mills at Chatham were working overtime. Winnipeg reported bag factories busy, but knitting mills were dull owing to a shortage of material; tent and awning workers were well employed. Vancouver reported an increased demand for operators on sails, awnings and tents; knitting factories were fairly busy.

Clothing and laundering. — Halifax reported a shortage of woman help in ready-made clothing factories. At St. John, ready-made clothing factories were busy and laundries were very active. Moncton reported the Maritime Hat and Cap Company well employed and steam laundries very active. At Fredericton, garment workers were reported somewhat quieter. Ready-made clothing factories at Montreal, Quebec and Sherbrooke were busy. St. Hyacinthe reported shirt factories and ready-made clothing factories very active. Clothing manufacturers at Hull were fairly well employed, but there was some difficulty in securing materials. At St. John and Iberville, there was a demand for woman help in the Cluett-Peabody factory. Toronto reported hat, cap and glove factories steadily employed, and whitewear, dress and blouse firms working to capacity. Ready-made clothing factories were busy and woman help was in demand. All branches of the clothing group at Hamilton were busy, and hat, corset and suspender factories at Niagara Falls were active. At Ottawa, additional help was taken on in clothing factories, and Brockville reported hat, cap and glove factories fairly active. At Kitchener, the clothing factories were busy and there was a demand for woman help in shirt and collar factories and in glove and whitewear establishments. Stratford reported ready-made clothing factories very active. At Windsor, the Peabody Company was advertising for woman help. Winnipeg reported ready-made clothing establishments busier, and shirt, cap and glove factories steadily employed; furriers were busy and whitewear factories reported business improving. All branches of the ready-made clothing trade at Vancouver reported activity. Victoria reported shirt and overall factories steadily employed.

Pulp, paper and fibre.—St. John reported the pulp mill running steadily, and, at Newcastle, pulp and paper mills were running at full capacity, with a shortage of unskilled labour. Sherbrooke reported pulp and paper mills active. Pulp and paper companies at Three Rivers were busy, and Hull reported the E. B. Eddy Company and the Beaverboard Company well employed. Manufacturers of felt and tarred paper at Hamilton were active, and beaverboard, pulp and paper mills at St. Catharines had a good month. Port Arthur reported a demand for car unloaders and river drivers at the pulp mills. Victoria reported pulp and paper mills unable to supply the heavy demand.

Printing, publishing and paper.— Halifax reported newspaper and job printing plants busy, with some demand for plate pressmen. At St. John, printers were steadily employed, and paper box factories were brisk. Moncton and Fredericton reported printers and allied trades well employed. Montreal reported little change in employment in the printing trades, though there was some demand for men. At Quebec, newspaper and job printing establishments reported a quiet month. All branches

of the printing and publishing group at Sherbrooke and St. Hyacinthe were busy. Toronto reported the printing and publishing trades active, and paper box and bag makers were well employed. Normal conditions prevailed at Hamilton and Ottawa. At Guelph, paper box factories were active. There was a demand for job hands in printing establishments at Woodstock, and, at St. Thomas and London, printers were busy. Windsor reported newspaper and job printers quiet, but at other Ontario centres normal conditions prevailed. Winnipeg reported printers steadily employed, but bindery hands were only fairly busy. At Brandon, employment in newspaper and job offices was fair, but, at Regina, help was in demand. Medicine Hat reported newspaper and job printing quieter, but at Lethbridge, Calgary and Edmonton, employment was good. At New Westminster, printing offices were working full time, and, at Victoria, employment was good.

Woodworking and furniture.—Halifax reported sash, door and planing mills working day and night. At St. John, the planing mills, the wooden box factory and the brush and broom factory were well employed. Westville reported sash and door factories quiet. At Quebec, planing mills were quiet, but, at Sherbrooke, they were fairly busy. St. Hyacinthe and Three Rivers reported all woodworking factories active. Toronto reported woodworkers and pianomakers busy and furniture factories generally active, though operations were somewhat hampered by scarcity of materials. At Hamilton, sash and door factories were fairly busy and other branches of the woodworking and furniture group were active. St. Catharines reported fair conditions in planing mills, and, at Ottawa, sash and door factories continued active. Brockville reported sash and door factories fairly busy, and, at Kingston, all branches of the woodworking group were active. Galt reported sash and door mills well employed, but, at Brantford, these factories were quiet. Kitchener reported planing mills running full time, wooden box factories very busy and furniture factories active, with a demand for finishers, cabinet makers and machine hands. The cooperage shops at Waterloo had a good month. Guelph reported planing mills quiet, but piano and sewing machine employees busy. Planing mills at Stratford were quieter, but furniture and chair factories were working full time and there was a demand for help in the stave factory. Woodstock reported a demand for skilled labour in furniture and chair factories and in piano and organ factories. Sash, door and planing mills at Windsor were fairly busy and the piano factory was active, chiefly on repairs. Winnipeg reported an improvement in planing mills, and, at Brandon, sash and door factories were busy. Regina reported planing mills fairly active, and, at Medicine Hat, improvement was reported. Lethbridge reported planing mills very busy. New Westminster reported sash and door factories very busy and wooden box factories working full time. Victoria and Nanaimo also reported steady conditions in sash and door factories.

Leather, boots, shoes and rubber. — St. John reported employment in tanneries and shoe factories good, and, at Fredericton, shoe and larrigan factories were well employed. Montreal reported an improvement in employment in shoe factories, though normal conditions had not been restored. At Quebec, shoe factories had an active month and tanneries were busy. Sherbrooke reported shoe factories very busy. St. Hyacinthe reported that the leather industry had a fair month and shoe factories worked some overtime. At Three Rivers, however, the leather industry was somewhat quiet. Toronto reported that the shoe industry showed a decided improvement, manufacturers having received extensive orders; harness workers were active and rubber factories were busy, with labour in demand. Hamilton reported fair conditions in shoe factories. St. Catharines reported tanneries busy and rubber footwear factories well employed. Galt re-

ported shoe factories quiet, but at Brantford, the Brandon Shoe Company was well employed. Kitchener reported tanneries very busy and some shoe factories active and short of help; trunk and bag factories, the Dominion Tire Company and the rubber factories were running full time. London reported the tannery and shoe concerns busy, and, at St. Thomas, shoe workers were fairly well employed. Brandon reported tanneries and trunk and harness factories fairly busy, and, at Calgary, workers in trunk, bag and harness factories were fully employed. Vancouver reported shoe workers busy, and the tannery at New Westminster was fully employed.

Clay, glass and stone.—St. John reported cut stone and granite works quiet, and the brick, tile and sewer pipe business very dull. Quebec also reported conditions quiet, but, at Sherbrooke, there was a fair amount of activity in cut stone and granite yards. At St. Hyacinthe, marble and stone yards were well employed and lime kilns were active. At Belleville, the cement works and factory was busy. Hamilton reported activity in all branches of the clay, glass and stone group, and, at Kitchener, stone and granite cutters had a good month; brick and tile plants, however, were somewhat slack. Windsor also reported cut stone yards busy. Medicine Hat reported an improvement in brick and tile plants, and the stoneware industry was active. At Victoria, there was an improved demand for tile and for lime.

Paints, oils, chemicals, explosives.—Halifax reported the Brandram-Henderson paint and varnish works employed at capacity. Montreal reported an improvement in orders, and, at Sherbrooke, manufacturers of acids and extracts continued active. Paint mills at Three Rivers were only fairly busy. Toronto reported that paint, varnish and chemical works had a good month. Hamilton reported manufacturers of soaps and of acids and drugs active. The cyanamid plant at Niagara Falls received more electric power and operated more units. Windsor reported the paint and varnish factory fairly busy, and manufacturers of soap, extracts and drugs reported a demand for woman help. At Winnipeg, the soap factory reported normal conditions, except for some difficulty in securing material. At Regina, the oil refinery continued well employed and the soap factory was fairly busy. Medicine Hat reported fair conditions at the linseed oil works.

Transportation

Earnings of the Canadian Pacific Railway during February were $9,574,301, as compared with $9,084,276 for the same month in the previous year. Sydney reported steam railways very active, but Westville reported freight and passenger service interrupted by snowstorms during the first three weeks of the month. St. John reported that snow blockades afforded additional employment to railway workers. Moncton reported an average passenger business, but heavy freight traffic and much special work by train crews. At Fredericton, railway workers and freight handlers were busy; traffic was much impeded by heavy storms during the month. Quebec reported steam railways busy, and, at Sherbrooke, railway crews and repair shop employees were well employed. St. Hyacinthe reported railway workers very busy and much extra employment owing to heavy snowfalls. Toronto reported transportation conditions much improved by favourable weather, and many arrears in shipments were overtaken. Hamilton reported steam and electric railways and repair shops active. Niagara Falls reported that favourable weather helped to relieve freight congestion. Brantford and Kitchener also reported steam and electric railways busy, and the Grand Trunk repair shops at Stratford were steadily employed. At St. Catharines all railway men were well employed. Men for train service were in demand. Wind-

sor reported a greater volume of employment on steam railways. Winnipeg reported that owing to the discontinuance of the jitney service, about 200 men would be displaced, although the street car company will be required to place auto busses upon routes not served by cars. Brandon reported fair conditions upon railways and repair shops active, but Regina reported railways quiet. Moose Jaw reported that the limitation of passenger service released a number of crews for freight work and employment was somewhat quieter for men who had not been long in the service. Calgary reported all railwaymen fully employed. New Westminster reported railway repair shops fairly busy.

Halifax reported 'longshoremen very active and shipping companies found it difficult to secure men; there was also a shortage of coal handlers. 'Longshore work at Sydney was quiet, but, at St. John, employment for 'longshoremen and ship labourers was good. Victoria reported an improvement in coast navigation.

Mining

Copper and asbestos mining in the Sherbrooke district continued active. Cobalt mines worked at maximum capacity, the output aggregating approximately 1,500,000 ounces. During March, 38 cars were shipped, containing 2,879,423 pounds of ore, as compared with 26 cars in February, containing 2,128,376 pounds. Bullion shipments were 898,668.26 ounces, as compared with 220,117.80 ounces in February. At Porcupine, operations were more extensive. In the Kirkland Lake gold area, satisfactory progress was being made, and in the Boston Creek district a new mill, with a capacity of about 40 tons per day, was being installed. Fernie reported normal conditions in metalliferous mining. In the Nelson district, however, few mines were operating, as the smelter at Trail was unable to handle all the ore. Rossland mines were working and shipping about 5,000 tons of ore per week to Trail. At Trail, the smelter and refinery was in steady operation, but the concentrator was closed down for two weeks. Nanaimo reported the smelter at Ladysmith still shut down and quartz mines in the district were quiet.

Sydney reported that the coal output of the Dominion collieries was 272,000 tons, compared with 278,000 tons last month, heavy snowstorms being responsible for the decrease. The coal output at Sydney Mines was 42,000 tons, as compared with 44,000 tons last month, and the coke output was 9,200 tons, as compared with 9,050 tons. Westville reported improved conditions in coal mining in the district; the Acadia Coal Mining Company resumed operations, though on a somewhat limited scale, in the mines which had been temporarily shut down. Amherst reported all coal mines working steadily, and in the Minto district outputs were somewhat increased, though there was still a labour shortage. Lethbridge reported coal mining very busy, but some of the miners were leaving to go on farms. Coal mining operations were reported satisfactory at Fernie, and coke ovens were operating to capacity. Nanaimo mines were operating steadily, but were hampered by a shortage of skilled miners.

Building and Construction

Halifax reported reconstruction work progressing favourably; temporary houses were almost completed and many were occupied; building tradesmen were steadily employed and there was still a demand for good mechanics. St. John and Moncton reported building dull, but, at Fredericton, building tradesmen were well employed. Montreal reported building and construction quiet. Quebec reported building quiet, with a poor outlook for the summer. At Sherbrooke there was little activity in the erection of dwellings, but a number of industrial plants were extending their premises. St. Hyacinthe also reported building operations very quiet, but, at Three

Rivers, a fair amount of building was under way. Toronto reported that building began to show more activity towards the close of the month, and with several large undertakings in prospect, the season promised to be more active than last year; many small houses were being put up in the suburbs and dwellings were much in demand. Hamilton reported building tradesmen well employed upon alterations and extensions and in the construction of dwellings. Belleville reported that no extensive building work was planned for this season. Guelph and Peterborough reported fair prospects, but in practically all other cities building was dull, with little prospect for much improvement. Brandon reported activity in the erection of dwelling houses and fair conditions in extensions to industrial plants. At Regina, building was fairly active, but at Moose Jaw and Prince Albert building was quiet. Lethbridge reported dullness, but there was some building activity in Calgary. Fernie, Trail and New Westminster reported building quiet, but at Victoria building was fairly brisk. The value of building permits issued in 35 cities increased from $901,933 in February to $2,133,781 in March, or 136.6 per cent. As compared with March, 1917, there was a decrease of $327,381, or 13.3 per cent.

Lumbering

Newcastle reported lumbering quiet; logging operations had been finished and stream driving had not commenced. In the Fredericton district, however, lumbermen were still in the woods. Quebec reported lumber camps closed for the season and men were getting ready for river driving. Sherbrooke reported activity in lumber camps. In the Ottawa district it was reported that the cut was below that of last year and most of the large companies were finishing operations in the woods. Peterborough reported lumbering active. Lumber camps on the Algoma Central Railway were closing down and a number of men were available for other work. Prince Albert reported the lumber camps breaking up and large numbers of men were returning daily. Calgary reported a demand for men for lumber camps and sawmills. At New Westminster, all sawmills were very busy, some working double shift; shingle mills were running to capacity. Nanaimo reported logging camps active, but short of men; sawmills also continued busy, but shingle mills were somewhat quiet. Victoria reported logging and lumbering brisk, about 3,000 men being employed on the Island and lower mainland.

III.—LABOUR AND INDUSTRY IN THE PROVINCES

Nova Scotia

Halifax reported boat and shipbuilding plants busy and stove and furnace foundries active; one foundry was erecting a new building. There was a demand for woman help in ready-made clothing factories and for pressmen in printing offices. Sash, door and planing mills were working day and night, and the Brandram-Henderson paint and varnish factory was working at capacity. Longshoremen were very active and shipping agents reported difficulty in securing men. There was also a shortage of coal handlers.

Sydney reported that heavy snowstorms kept the outputs of both coal and steel lower than usual; the collieries were hampered and the movement of cars at the steel plants was retarded. The smaller works were fairly busy. Owing to heavy drift ice there was no fishing.

Westville reported steel plants more active owing to the improvement during the latter part of the month in transportation and in fuel supplies. Steam and electric transportation was seriously affected during the early part of the month by snowstorms. Coal mines were more active; the Acadia Company resumed operations, though on a some-

what limited scale, in mines which had been temporarily shut down. Lumbering continued very busy.

Amherst reported that owing to difficulty in securing material the Canada Car and Foundry Company was only fairly well employed. Woollen mills worked full time and woodworking factories had a fair month. Coal mines were operating steadily.

Truro reported metal plants working steadily and woollen mills employed full time, with the exception of a few days when they were closed for want of coal. Printers were working overtime.

New Brunswick

St. John reported activity in rolling mills and in shipyards. The sugar refinery was somewhat slack, owing to the scarcity of raw sugar. Cotton mills were operating steadily and ready-made clothing factories reported employment good. The pulp mill was busy and newspaper and job printing plants were well employed. Sash, door and planing mills and the wooden box factory were running to capacity, and brush and broom factories had a good month.

Moncton reported steady employment in the Canadian Government Railway shops, with considerable overtime in some departments. Foundries and machine shops were busy. Flour mills were quiet, but biscuit factories were active. Woollen and underwear factories and the Maritime Hat and Cap Company were operating steadily, and sash and door factories were well employed.

Newcastle reported shipbuilders steadily employed, and pulp and paper mills working to full capacity with a shortage of unskilled labour. Sash and door factories were busy, but lumbering was quiet, logging operations being finished and river driving not having commenced.

Fredericton reported machine shops and foundries well employed, and flour mills and packing houses working steadily. Sash and door factories were operating full time and shoe workers and larrigan workers were busy. Help was in demand at the cotton mill, but garment workers were quieter than during the preceding month. Railway employees were busy, heavy storms necessitating extra workers. Coal mines at Minto were increasing their output.

Quebec

Montreal reported some improvement in the various industries using steel and iron, though there were still a number unemployed who some months ago were working regularly in machine shops. Sugar refineries were restricting deliveries owing to uncertainty as to supplies of raw material. Cotton and woollen factories were busy and printing and publishing establishments were well employed. Tanneries were still quiet, but boot and shoe factories were busier.

Quebec reported iron shipbuilding and repairing very busy, and about 1,000 men were employed in the construction of wooden ships. Abattoirs were more active, and tobacco factories were busy. Cotton mills had a very busy month and the clothing trades were normally employed. Newspaper and job printing establishments and planing mills reported a quiet month. Boot and shoe factories were active and tanneries were busy. Timber camps were closed for the season and preparations for river driving were under way.

Sherbrooke reported fair conditions in iron and steel working establishments, abattoirs and meat packing houses active, and all branches of the textile group busy. Pulp and paper mills and newspaper and job printing establishments were active and planing mills were fairly well employed. Chrome iron, copper and asbestos mines were active.

At St. Hyacinthe the metal plants were active. The flour mill was well employed and the abattoirs were fairly active. The Penman Manufacturing Company worked day and night, and weavers and other classes of labour were in demand. Clothing establishments worked full time, with help in demand. The paper box factory was active. Boot and

shoe workers were active, some working overtime.

Three Rivers reported the Canada Iron foundry adding to plant and increasing the number of its employees. Shipyards were active. The Wabasso Cotton Company was working day and night and pulp and paper mills were steadily employed. All woodworking factories were busy.

At Hull, clothing manufacturers continued well employed. The E. B. Eddy Company reported an improvement in the pulp and paper mill and activity was well maintained in the match and indurated ware departments. The Beaver Board Company reported business brisk.

At St. Johns and Iberville, industrial establishments were steadily employed. The Canadian Accumulator Company was working below capacity because of difficulty in securing raw materials. The Excelsior Straw Hat Company commenced operations at Iberville. Woman labour was in demand at the Cluett-Peabody Company's factory.

At Sorel, shipyards continued active and one company was adding extensively to its plant. The mica factory, the tannery and the shirt factory were well employed.

Ontario

Toronto reported the metal industries active, but some factories reported limited supplies of material. Shipbuilders were active, with a large number of steel and wooden vessels in course of construction and many steamers undergoing repairs and alterations prior to the opening of navigation. Agricultural implement plants, automobile factories and other lines of metal manufacturing were active, though in some cases handicapped by shortage and delay in the delivery of steel. The provisions trades were steadily employed and cigarmakers had an active month. Knitting mills were steadily employed and the carpet factory was busy; the twine factory was quiet, but tent and awning firms were active. Hat, cap and glove factories were steadily employed, and whitewear, dress and blouse firms were working to capacity. Printing, bookbinding and allied lines were active and paper box and bag makers were well employed. The boot and shoe industry showed a decided improvement. Harness workers were active and rubber factories were busy, with labour much in demand.

Hamilton reported all branches of the metals and machinery group active and a demand for labour in locomotive and car plants and in stove and furnace foundries. There was also a demand for labour in plants manufacturing electrical apparatus and fixtures. The various branches of the foods group were busy and cigarmakers continued in demand in large tobacco factories. There was a demand for weavers in cotton factories and other branches of the textiles group were busy. Ready-made clothing factories were active and steam laundries and dyeing and cleaning establishments were in need of help. All branches of the printing and publishing group were busy and furniture and chair factories were active. Boot and shoe factories were fairly busy.

Niagara Falls reported metal working establishments busy and machine shop men and blacksmiths in special demand. Hat, corset and suspender factories were well employed. Planing mills were more active and the shoe parts factory required women operatives.

St. Catharines reported metal manufacturing active in all branches and flour mills and meat packing houses busy. The various branches of the textiles group continued well employed and manufacturers of beaverboard, pulp and paper were active. Tanneries and rubber footwear factories had a good month.

Ottawa reported machinists in demand at several plants and all branches of metal manufacture were active except the sheet metal industry. Woollen mills and clothing manufacturers were busy, and printers were well employed. Sash and door factories were brisk. Additional help was taken on by the Hugh

Carson Company to meet the active demand for leather horsegoods. A marked shortage of freight cars hampered lumber shipments.

Brockville reported fair conditions in the manufacture of engines and boilers and of automobiles and carriages. Manufacturers of hats, caps, gloves and fur goods were fairly active. There was some activity in the fitting up of boats for the opening of navigation.

Kingston reported the locomotive works very active and shipyards busy. At the textile mills woman help was in demand.

Belleville reported the Canada Steel Company operating day and night shifts and other branches of the metals group busy. Flour and feed mills were active, and newspaper and job printing establishments were well employed. There was a demand for help in furniture factories. The Canada Cement Company's plant was very active and the pottery was well employed.

Peterborough reported the various branches of the metals group well employed and the Canadian General Electric Company was advertising for men. Flour and feed mills continued active. Woollen mills and carpet works were active. Lumbering was busy and sawmills were making preparations for the season's cut.

Galt reported all branches of the metals group active. Cotton and woollen mills had a good month; planing mills were active. Boot and shoe factories, while busy in some departments, were quiet in others.

Brantford reported manufacturers of engines and boilers busy and carriage and wagon companies running full time. The Buck Stove and Range Company was short of skilled moulders. Farm implement plants were working overtime in some departments owing to shortage of men. Flour mills were running full time, but the Waddell Preserving Company was seasonally quiet. Woollen mills were very busy, and the Watson Knitting Company was advertising for help. The silk works and the cordage company were short of operators. Manufacturers of overalls and shirts were working full time. Planing mills were quieter.

Kitchener reported manufacturers of engines and threshers very busy and a demand for machinists at the Regal Motor Company. Foundries also reported a demand for machinists. Flour mills and sausage factories had a good month. Confectioneries were active and short of help. Breweries and distilleries were very busy. The hosiery factory was running full time and the twine factory was short of hands. The robe and clothing factory was working overtime in the tailoring department. There was a demand for women in shirt and collar factories, and in button, glove and whitewear factories. Sash, door and planing mills were running full time and wooden box factories were very busy. Finishers, cabinet makers and machine hands were in demand in furniture factories. Tanneries were very busy; some boot and shoe factories were active and short of help, while others were quiet. The Dominion Tire Company and the rubber factories were running full time. Stone and granite cutters had a good month.

Guelph reported engine plants active and moulders in demand in stove and piano-plate works. Flour and feed mills were running to capacity. Breweries were quiet, but cigarmakers were fairly busy. Cotton spinning mills and woollen and worsted mills continued active, with woman help in demand. The printing and publishing group was fairly busy and paper box factories were active. Planing mills and sash and door factories were quiet, but piano makers were busy.

Stratford reported iron foundries and machine shops steadily employed. The various branches of the foods group were busy, but the cigar factory closed down. Woollen mills and hosiery and knitting factories were very busy. Sash, door and planing mills were quieter, but furniture and chair factories were working full time and there was a demand for help in the stave factory

Woodstock reported a demand for moulders in stove and furnace foundries and for job hands in printing establishments. Furniture and chair factories reported a demand for cabinet makers, and in piano and organ factories skilled workmen were wanted.

London reported the metals group active and a demand for help in biscuit factories. Tobacco factories and breweries were very busy. Printers and employees in paper box factories were brisk. Employment was good in the Hyman tannery and in boot and shoe factories. The Grand Trunk car shops were very active.

St. Thomas reported iron foundries and railway machine shops busy. The bakeries and the St. Thomas packing company had a good month. All railway men were well employed and a greater quantity of freight was handled than in the previous month.

Chatham reported foundries and machine shops short of men, and automobile plants and wagon factories were working steadily. Flour and feed mills were active, but the sugar refinery was unable to resume operations for want of raw material. Abattoirs and packing houses, owing to difficulty in securing stock and transportation, were quieter than in the previous month. Tile and sewer pipe yards were busy.

Windsor reported that the Canadian Bridge Works was adding to staff and the Trussed Concrete Steel Company was busy. Automobile factories were very active and in need of mechanics. The cereal plant resumed business in all departments, but was hampered by a scarcity of material. Cigar factories were busy, with woman help in demand, and the Peabody Overall Company was advertising for woman help. Newspapers and job printers were quiet. Sash, door and planing mills were fairly busy, and the piano factory was active. Cut stone yards were busy and brick and tile yards reported improvement. The paint and varnish company was fairly brisk. Manufacturers of soap, perfumes and patent medicines were active, with woman help in demand. Steam railway traffic was active.

Cobalt reported the mines working at capacity. There was an increase in the amount of ore and bullion shipped. In Porcupine there was a more adequate supply of labour and more extensive operations were under way. In the Kirkland Lake gold area, work was carried on steadily, and in the Boston Creek district a new mill, with a capacity of about 40 tons per day, was being installed.

Sault Ste. Marie reported lumber camps were closing down and large numbers of men were being released.

Port Arthur reported shipbuilding active and a considerable increase in the payroll of the car works at Fort William. There was a demand at the Port Arthur pulp mill for car unloaders and river drivers.

Manitoba

Winnipeg reported rolling mills and metal working establishments well employed. Confectioneries and vegetable canneries reported business good. Bag companies slightly increased their staffs, but knitting factories reported business dull owing to a shortage of material. Tent and awning makers were busy. Ready-made clothing factories reported increased business, with a greater number of employees; in shirt factories business was normal. Glove manufacturers slightly increased their staffs and furriers were exceptionally busy. Whitewear factories reported an improvement in business and experienced help hard to secure. In the printing trades all branches were steadily employed. Sash, door and planing mills reported improvement.

At Brandon, agricultural implement plants and machine shops were busy and flour mills and breweries were active, but cigar factories were dull. Tanneries and trunk and harness factories were fairly busy.

Saskatchewan

Regina reported the flour mills running night and day. The abattoir reported business fair, but supplies limited. Newspaper and job printing establishments were active, with help in demand. Railway repair shops were fairly busy. Wages for farm help were higher, farmers offering from $55 to $70 a month for single men and from $75 to $100 a month for man and wife.

Moose Jaw reported flour mills running to capacity. A number of passenger crews were released for freight work, and as these take seniority, employment was slack for men not long in the railway service.

Prince Albert reported flour mills in regular operation, but the abattoir was only moderately busy. Printers were busy, but sash and planing mills were quiet. There was considerable hauling of ore from the Beaver Lake district for the smelter at Trail. Lumber camps were breaking up and large numbers of men were returning daily. Preparations for a busy season were being made at the sawmills.

Alberta

At Medicine Hat the rolling mills were fairly active, and an improvement in metal working establishments was reported. Flour mills were busy. Newspaper and job printing continued fair. Planing mills and brick and tile plants reported an improvement. The stoneware industry was very active.

Lethbridge reported flour mills very busy and planing mills active. Coal mining was very brisk, though some of the miners were leaving to go on their farms and others were taking up new homesteads.

Calgary reported the iron works and the Ogden locomotive shops fully employed. Flour mills were running day and night shifts and abattoirs and meat-packing houses were busy. Newspaper and job printing firms reported business good and leather workers were fully employed. Steam railway traffic was heavy. There was a decline in activity in the coal mines of the district owing to lack of orders.

Edmonton reported the Edmonton Iron and Machinery Company fairly busy, and there were some additions to staff. The Swift Canadian Packing Company also reported an increase in staff. The Great Western Garment Company reported trade good. There was a demand for compositors in newspaper printing and job printing remained fair.

British Columbia

Fernie reported increased activity in breweries, and sash and door factories were busy. Railway freight traffic was considerably reduced owing largely to the temporary suspension of operations in the lumbering industry. Metaliferous mines in the district reported satisfactory conditions and coal mining operations maintained the same level as in March of the preceding year. Coke ovens were operating to capacity.

In the Nelson district there were very few mines operating, the smelter at Trail being unable to handle all the ore. All mines in Rossland were working and shipping about 5,000 tons of ore to Trail per week. About 1,300 men were employed at the Trail smelter and refinery. The concentrator was closed down for two weeks, but was in operation at the end of the month.

New Westminster reported shipyards busy, about 575 men being employed. Machine shops were active. The abattoir was running at capacity, but evaporators and canning factories were shut down. Cigar factories were working part time, about half the normal staffs being employed. Printing offices were working full time, and sash, door and wooden box factories were well employed. Railway repair shops were busy and all sawmills were very active, some working double shift. All sawmills in the district changed from a ten to a nine-hour day with Saturday afternoons off. Shingle mills were running to capacity.

Nanaimo reported sash and door factories working steadily. Quartz mines

in the district were quiet, as smelting facilities for small shipments were inadequate. The smelter at Ladysmith remained shut down. Coal mines in the district worked steadily, but were still short of men. Logging camps were active, and sawmills were busy, but shingle mills were quiet.

Victoria reported employment in iron shipyards and foundries steady, and work at the wooden shipbuilding yards continued brisk. Owing to a shortage of skilled caulkers, one of the yards established a school to teach the trade. A large number of men were employed in assembling machinery for wooden vessels at Ogden Point. Shirt and overall factories were busy. The pulp and paper industry was active, and newspaper and job printers were busy. Sash, door and planing mills showed improvement. Coast navigation was better, owing to greater traffic to northern ports. Logging and lumbering camps continued brisk, about 3,000 men being employed on the Island and lower mainland. Since March 11, all loggers in these districts were granted the eight-hour day.

PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT DURING MARCH, 1918

DURING the month of March the report was received of the Board of Conciliation and Investigation which had been appointed to inquire into a dispute between the Canadian Northern Railway Company and the conductors, trainmen and yardmen employed on the company's western lines.

Four applications for the establishment of Boards were received during the month. Boards were established in three cases, the remaining application being under consideration at the close of the month. One other Board, established during the preceding month, was completed by the appointment of a chairman.

Application Received

On March 7, an application for a Board to deal with a dispute was received from certain employees of the Canadian Collieries (Dunsmuir) Limited, and the Wellington Railway Company, being machinists, blacksmiths, moulders, carpenters and helpers, and outside labourers, employed at Union Bay, Vancouver Island, B.C. The number of employees directly affected was given in the application as 30. The dispute grew out of the employees' demand for a revival of the system of overtime payment which prevailed before the depression of 1914. A Board was established in this matter on March 14, the personnel of which was as follows: His Honour Judge D. M. Eberts, Victoria, chairman, appointed by the Minister in the absence of any joint recommendation from the other Board members; Mr. Thos. R. Stockett, Vancouver, company's nominee, and Mr. Jos. Naylor, Cumberland, B.C., employees' nominee.

The workmen in question had gone on strike on January 31, but had returned to work on February 4 on the understanding that the matter would be investigated by a local board. To this end the company and the employees named their representatives. The company made an offer, which was, however, refused, and a deadlock occurred. It was considered impracticable to proceed with the completion of the local Board, a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act being instead applied for by the employees concerned.

On March 18, an application was received for a Board to deal with a dispute affecting certain employees of the Canadian Northern Railway Company, being clerks, station employees, etc., members of the Canadian Brotherhood

of Railroad Employees. The application stated that the dispute grew out of a demand on the part of the employees for a schedule providing for increased wages and improved working conditions. The number affected was given as 786 directly and 1,200 indirectly. At the close of the month this application was under consideration.

On March 22, an application was received from the firemen in the employ of the Corporation of Ottawa, members of Federal Union No. 24. The number affected by the dispute was given as 85 directly and 10 indirectly. The dispute related to wages, classification and other grievances. A Board was established by the Minister on March 30, Mr. Wm. Lodge being appointed a member thereof on the employees' recommendation. At the close of the month steps were being taken looking to the completion of the Board.

On March 23, an application for a Board was received from the motormen and conductors in the employ of the Sandwich, Windsor and Amherstburg Railway Company, members of Division 616 of the Amalgamated Association of Street and Electric Railway Employees of America. The dispute was said to affect 80 employees and resulted from the latter's demand for the adoption by the company of a proposed agreement providing for increased wages and improved working conditions. Subsequently, word was received from the employees alleging that one of their number had been unjustly dismissed, and asking that this matter should be included in the Board investigation. A Board was established by the Minister on March 27. Messrs. E. G. Henderson and F. C. Kerby, both of Windsor, Ont., were appointed members on the recommendation of the company and the employees respectively. Shortly after the close of the month the Board was completed by the appointment of Mr. Malcolm G. Campbell, also of Windsor, to the chairmanship, this appointment being made on the joint recommendation of Messrs. Henderson and Kerby.

Other Proceedings under Act

In the March number of the *Labour Gazette*, reference has been made to the appointment of Capt. J. B. Foots and Mr. Fred. Bancroft, both of Toronto, as members of a Board which had been applied for by certain employees of the Collingwood Shipbuilding Company, Limited, Collingwood, Ont., members of Georgian Bay Lodge No. 343 of the International Boilermakers, Iron Shipbuilders and Helpers of America. During the month of March, Mr. H. P. Hill, Ottawa, was appointed to the chairmanship on the joint recommendation of the other Board members.

Report of Board in Dispute Between the Canadian Northern Railway Company and Conductors, Trainmen and Yardmen on Western Lines

DURING the month of March the Minister received the report of the Board of Conciliation and Investigation to which had been referred certain differences between the Canadian Northern Railway Company and the conductors, trainmen and yardmen employed on the company's western lines, members of the Order of Railway Conductors and the Brotherhood of Railroad Trainmen respectively. The application grew out of demands on the part of the employees for a revision of the existing schedules which would provide for increased wages and improved working conditions; also for compensation for time lost through alleged wrongful dismissals. The number affected was given as 1,300 directly and 600 indirectly. A Board was established by the Minister on December 7, the personnel of which was as follows: the Honourable Mr. Chief Justice Mathers, Winnipeg, chairman, appointed by the Minister in the absence of any

joint recommendation from the other Board members; Mr. C. E. Dafoe, Winnipeg, company's nominee, and Mr. T. J. Murray, Winnipeg, employees' nominee.

Under date of March 15 the Board presented an interim report to which was attached proposed schedules covering (1) baggagemen, flagmen and brakemen, and (2) yardmen. In these schedules the section concerning wages is left blank, this point being dealt with in the report proper. The report states that at the opening of the inquiry the company offered to introduce the eight hour day; this was accepted on behalf of the employees and the inquiry therefore proceeded on the assumption that the eight hour day would be established for all classes of employees. It was recommended that the eight hour day and the proposed rates of pay should be effective as of the first of January, 1918, and the rules from the fifteenth of March, 1918.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and a dispute between the Canadian Northern Railway Company, western lines, and its employees, being conductors, trainmen and yardmen, members of the Order of Railway Conductors, and members of the Brotherhood of Railroad Trainmen, respectively.

To the Honourable Thos. W. Crothers, K.C.,
Minister of Labour.

On the seventeenth day of December, 1917, a Board of Conciliation and Investigation was appointed to investigate the subject matter of the said dispute, consisting of the undersigned: C. E. Dafoe, of Winnipeg, nominated by the railway company; T. J. Murray, of the same place, nominated by the employees; and Chief Justice Mathers, also of Winnipeg, appointed by yourself as chairman, the other two members having failed to agree.

The Board held its first meeting on the thirtieth day of January, 1918, when the several members took the necessary oath of office and fixed the eighth day of February for proceeding with the inquiry. It was impossible to proceed at an earlier date, because the chairman of the Board was also chairman of a Board then sitting upon a dispute between the Canadian Pacific Railway Company and its conductors and trainmen, and because the Grand Lodge representatives of the employees were also engaged before the said last mentioned Board.

On the eighth day of February, the Board met as per appointment, and were attended by S. N. Berry, vice-president of the Order of Railway Conductors; A. F. Whitney, vice-president of the Brotherhood of Railroad Trainmen; H. E. Barker, general chairman of the Order of Railway Conductors; J. Irwin, secretary of the Order of Railway Conductors; A. J. Ryall, chairman of the Brotherhood of Railroad Trainmen, and F. Spooner, secretary of the Brotherhood of Railroad Trainmen, and their committees, representing the employees, and by Mr. J. R. Cameron, assistant general manager of the company, on behalf of the company. From time to time during the inquiry the company was also represented by Mr. W. A. Brown, Mr. A. Wilcox, general superintendent at Edmonton and Winnipeg, respectively; Mr. B. T. Chappell, superintendent of the Pacific division, and Mr. J. E. Nelson, superintendent at Fort William.

Upon opening of the matters involved, it was found that the locality of the dispute extended over the whole of the company's railway system from Port Arthur, Ont., to the Pacific Coast, and included that portion of the company's railway which runs through the United States.

It further appeared that the conductors are governed by one schedule of rules, the trainmen by another, and the yardmen by still another. The conductors did not ask for a revision of their schedule of rules, but requested an increase of 25 per cent over the prevailing rates of pay. The trainmen and yardmen, on the other hand, asked for a general revision of their schedules, including increases in the rates of pay amounting in the case of trainmen to 25 per cent, and in the case of yardmen to 34 per cent. They presented complete new and revised schedules embodying their demands, which new schedules were made the basis of the inquiry and were carefully considered clause by clause. Both conductors and trainmen claimed a differential equivalent to a further increase of 10 per cent upon all lines west of Tollerton (Edson), in British Columbia.

Some of the changes in the rules asked for by the trainmen would, if granted, involve still further increases in the rates of pay, the chief of these being a change in the lay-away from home condition; pay for switching at junction points; change in way freight clauses; the extension of area of terminals, and through freight rates for crews of passenger trains upon which a flanger is operated.

It further appeared that both conductors and trainmen complained specially that a conductor and brakeman on the Duluth, Winnipeg & Pacific, a subsidiary of the company, had been wrongfully dismissed, and asked for compensation for the time so lost by them.

Meetings of the Board at which the parties were present were held on February 8, 9, 11, 12, 13, 14, 15, 16, 18, 19, 20, 21, 22, 23, 25, 26,

27 and 28, and March 1, 2 and 4, and by the Board alone on March 12, 13 and 14 for the consideration and preparation of report.

The employees' presentation filed with the Department upon application for a Board did not ask for the establishment of an eight hour day, but the company, at the opening of the inquiry, offered to introduce it. The Grand Lodge representatives of the employees took the position that the eight hour day had been asked for by the men and had been granted on practically all the great railways, and that they, on behalf of the employees, would accept the company's offer to introduce it here, and it was therefore agreed that the inquiry should proceed upon the assumption that an eight hour day would be established for all classes of employees.

With respect to the increases in rates of pay asked, it was, at the commencement of the inquiry, agreed between the parties that, if an agreement could be arrived at with respect to all other matters in dispute, the question of increased rates of pay for conductors, trainmen and yardmen should be left to abide the result of a movement at present pending in the United States, and that the increases in rates of pay, if any, there granted, as applicable to the western territory, whether percentages or flat rates to conductors, brakemen, baggagemen or yardmen, be applied to the existing basing rates on the Canadian Northern Railway.

A consideration of the trainmen's and yardmen's schedule was then proceeded with. On the fourth of March, an agreement had been arrived at with respect to the yardmen's schedule, and with respect to all matters involved in the trainmen's schedule with the exception of the following:

1. The differential of 10 per cent west of Tollerton (Edson) claimed by both the conductors and trainmen.

2. The date when the eight hour day should become effective.

3. The date when the proposed increases, if any, granted should become effective.

4. The date when the new rules should come into effect.

5. Article 5, rule 6 of the employees' presentation.

The representation of the employees claimed that the eight hour day and the increases when granted should become effective on the first January, 1918, and that the rules should come into operation on the first March, 1918. The company, on the other hand, objected to making either the eight hour day or the increases effective before the first February, 1918, or the rules before the fifteenth of March, 1918.

Upon these five points there appeared to be a very sharp difference of opinion between the representatives of the employer and the employees, chiefly with respect to the claim for a 10 per cent differential for Mountain territory. The Board earnestly endeavoured to induce the parties to come to an amicable agreement on these remaining points. For this purpose they met the parties separately and placed themselves in the position of mediators for the purpose of bridging, if possible, the difference that existed between them, but we regret to say that our efforts were not successful.

Upon all the points with the exception of the claim for a differential, we think the parties could have been brought together, but upon this point neither party was willing to yield in any respect, and the matter was left in the hands of the Board.

By agreement recently made between the Canadian Pacific Railway Company and its conductors and trainmen, the first of January, 1918, was fixed as the date when the eight hour day and increased rates of pay, if and when granted, should become effective. We are given to understand that the same date has been fixed for the new rates when granted in the United States to become effective. We think therefore that the eight hour day and the increased rates of pay should become effective as of the first of January, 1918. Some time will be required to familiarize the company's officers with the new rules, and we think, therefore, that they should take effect as of the fifteenth of March, 1918.

The principal dispute centred around the claim for a differential of 10 per cent for the territory west of Tollerton (Edson). The representatives of the men vigorously and earnestly pressed upon the Board their claim to this differential, basing their claim upon the fact that it exists in the Mountain territory on the Canadian Pacific Railway and on other railways in the United States through their Mountain territories; upon what they claimed to be higher cost of living and worse living conditions, and greater danger for crews operating in that territory; upon the slower train movement and the greater productive efficiency of the crews as compared with like crews operating through the Mountain territory upon the Canadian Pacific Railway; and upon the fact that the company is allowed to collect higher freight and passenger rates upon that section of its line. The representatives of the company argued that the differential in force on the Canadian Pacific Railway main line was confined to freight service from Lake Louise to Revelstoke and to passenger service from Lake Louise to Kamloops, only a fraction of the distance for which the men claimed a differential here; that it was granted in that territory because the line there has a grade in excess of two per cent and pusher and helper engines are required in both services, whereas the highest grade on the Canadian Northern Railway line through said territory is .07 per cent, and no pusher or helper service is required or used. They also pointed out that no differential is granted on the Grand Trunk Pacific Railway, although the grade on part of that line is one per cent; that the engineers and firemen have recently made a settlement with this company, claiming the same rates of pay from Edmonton westward as is paid to the Canadian Pacific Railway employees.

of the same class on the valley territory on that line. Our attention was also drawn to the fact that on the Great Northern and Northern Pacific Railways a differential is granted only on certain specified grades and others of 1.8 per cent or more; that from Kamloops to the Coast the Canadian Northern Railway line parallels the Canadian Pacific Railway, and that no argument could be urged for paying the Canadian Northern Railway conductors and trainmen on that portion of the line higher rates than are paid to like employees on the Canadian Pacific Railway. The crews operating in this territory reside at Kamloops and Lucerne. The latter terminal, it is said, will in a short time be changed to Jasper.

We believe that the conditions of operation between Tollerton (Edson) and the Coast on the Canadian Northern Railway are not as onerous as those prevailing on the so-called Mountain territory on the Canadian Pacific Railway. We believe that the employees are entitled, on the lines west of Tollerton (Edson) to as high rates as are paid to the same class of employees on the valley territory on the Canadian Pacific Railway; but after careful consideration, and with a due regard for all the evidence and arguments in favour of the differential and with a sincere desire to be fair to both parties, we cannot find that they have shown themselves entitled to the differential asked for.

The company's representative offered to grant the Canadian Pacific Railway valley rates from Edmonton westward, such rates not to apply to trains operating to, from and upon the Athabasca and Sangudo subdivisions. That is, that the existing rates on the Canadian Northern Railway from Edmonton westward be continued, but that in any case where the rates paid for the valley territory on the Canadian Pacific Railway to its conductors, brakemen and baggagemen are greater than those paid by the Canadian Northern Railway to its conductors, brakemen and baggagemen, operating from Edmonton westward, the Canadian Northern rate shall be increased to that paid on the Canadian Pacific.

As an agreement upon all points involved, exclusive of the claim for increased rèmuneration, has not been reached in so far as the trainmen's schedule is concerned, the condition upon which it was agreed to let the question of increased rates abide the result of the pending movement in the United States has not been fulfilled. Nevertheless, it is the desire of both parties that we should not enter upon an inquiry as to rates of pay, but should embody in our report a recommendation in consonance with the agreement referred to—a recommendation in which we have no doubt both parties will acquiesce.

Attached hereto, marked Exhibit A, is the schedule (trainmen and yardmen) in so far as the same has been agreed to by both parties. The rates of pay have been left blank and we recommend that these several blanks be in each case filled in with the existing rates of pay except that from Edmonton west, the rates in force upon the so-called valley territory on the Canadian Pacific Railway for conductors, bagbagemen and brakemen be substituted for the existing Canadian Northern rates in all cases in which the Canadian Pacific rate is greater than the Canadian Northern rate. This not to include crews operating to, from and upon the Athabasca and Sangudo subdivision. These rates to take effect as of January 1, 1918, and to be the basic rates upon which the increases for this territory shall be applied.

Several clauses included in the new schedules as presented by the men were by agreement stricken out, as the subject matter could be more appropriately covered by the exchange of a letter, and this course the parties in each case agreed to adopt. In one of such cases the parties did not reach an agreement upon all points. The men, by Article 5, Rule 71, of their presentation, sought to procure for the forward brakeman more suitable seating accommodation upon some of the engines in use by the company. The Board inspected one of the engines and found that the only seating accommodation provided for the brakeman was a narrow space on the left side scarcely wide enough to admit a full grown man between the injector pipe on the boiler and the side of the cab. The representatives of the company agreed to remedy this defect by moving forward the injector pipe and making some other changes which the men agreed would remove the grievance. Upon the question of the time within which these changes should be made the parties could not agree. Forty-five engines required to be changed, and it was obviously out of the question, in view of the paucity of motive power, to send all these engines to the shop at once. The representatives of the men finally adopted as satisfactory the suggestion of the Board that not less than 11 of the engines be altered every three months and that all of them be so altered within 12 months.

The employees requested that Article 5, Rule 6, of their presentation be stricken out out of the schedule. The company's representatives, on the other hand, desired its retention in the form presented. We recommend as fair to both parties the following modification of the rule as presented:

> "Rule 6. Trainmen tied up between terminal points and relieved of duty by cancellation of train on account of wrecks, washouts or snow blockades, will be allowed actual mileage made as per Rule 11 of this Article, and thereafter one hundred (100) miles for each successive twenty-four (24) hours on a basis of hour for hour up to eight (8) and so on to the end of the twenty-four (24) hours, then actual mileage as per Rule 11 of this Article to terminal. Time so tied up to apply to all trains at through freight rates."

The Board submits the above recommendations as a fair and equitable settlement of the

matters in difference between the parties according to the merits and substantial justice of the case.

The members of the Board desire to express their appreciation of the courtesy, candour and fairness with which the inquiry was conducted on both sides and of the mutual respect and confidence towards each other by which the parties were animated.

As all matters referred to the Board are not yet disposed of, this must be regarded as an interim report.

All of which is respectfully submitted.

Dated at Winnipeg, this fourteenth day of March, 1916.

(Sgd.) T. G. MATHERS,
Chairman.
(Sgd.) C. E. DAFOE,
Member of Board.
(Sgd.) THOS. J. MURRAY,
Member of Board.

"A."

(Copy.)

CANADIAN NORTHERN RAILWAY COMPANY.

Western Lines.

SCHEDULE OF RATES AND RULES

For Baggagemen, Flagmen and Brakemen.

Eight hour day effective;
Increase in rates effective;
Rules effective.

ARTICLE 1.

Rates and Rules for Passenger Trainmen.

Clause A.—Rates and minimum monthly mileage.

For average monthly mileage of five thousand (5,000) miles or less, baggagemen will be paid .... per month. Brakemen will be paid .... per month. Baggagemen and brakemen making less than four thousand five hundred (4,500) miles per month will include switching and detention to make up four thousand five hundred (4,500) miles.

Clause B.—Excess mileage.

All mileage made in excess of five thousand (5,000) miles per month will be paid *pro rata*.

Clause C.—Additional crews.

When the combined extra mileage of trainmen on any regular run exceeds five thousand (5,000) miles, an additional crew will be put on.

Clause D.—Terminal payments.

Trainmen in passenger service will be paid initial terminal detention for all time required to be on duty prior to the time that train is ordered to leave, and also for all time held at terminal until train actually leaves terminal. Excepting that trainmen required to be on duty fifteen (15) minutes or less, prior to the time train is ordered for shall not be paid initial terminal detention for the first fifteen (15) minutes after the time required to report for duty.

Trainmen held at terminal points after arrival of train has been registered shall be paid for such time at overtime rates.

Trainmen on passenger trains required to accompany engines to or from shop tracks at Edmonton, Saskatoon, and on trains from the west at Kamsack, will be paid for all time consumed at overtime rates with a minimum of twenty (20) minutes in addition to other payments. Trainmen performing this service will put in his own wage ticket. At other points present practices will be continued.

Clause E.—Overtime speed basis.

When a passenger train averages less than twenty (20) miles per hour, overtime will be allowed *pro rata* on a basis of twenty (20) miles per hour. This not to include time otherwise paid for.

Clause F.—Freight or mixed trainmen running passenger trains.

Freight or mixed trainmen running passenger trains will be paid through freight rates, unless relieving passenger trainmen on their assigned runs, when they will be paid at schedule rates per mile of the corresponding man relieved. Passenger trainmen will not be used off their assigned runs if freight trainmen are available. If used, they will be paid the same rate and on the same basis as freight trainmen. Freight trainmen used as extra men on passenger trains will receive freight pay.

Clause G.—Manning passenger trains.

One baggageman and two brakemen shall be employed on all passenger trains west of Edson, and one baggageman and one brakeman on all passenger trains east of Edson, except that on trains of eight (8) cars or more east of Edson an additional brakeman shall be used.

When second brakeman is used on account of train having eight (8) cars or more, he will go through to passenger terminal, except, when train is reduced to less than eight (8) cars, he may be returned in service from meeting point on first passenger train.

When a passenger train has cars to pick up en route, which will increase its number to eight (8) or more, the second brakeman will be taken from the initial terminal or from an intermediate point to avoid violating this article.

Clause H.—Filling position of baggagemen.

When appointing baggagemen, passenger trainmen will be given preference. Passenger trainmen not to be in line for promotion to conductor. As far as practicable the services of disabled trainmen and yardmen will be utilized for baggage car service, with the approval of the general superintendent and the general chairman.

Clause I.—Promotion to passenger service.

In the event of a passenger run becoming vacant, or new runs created for baggagemen or brakemen, it will be advertised for fifteen (15) days and given to the oldest passenger trainman applying for it in order of seniority on the lines west of Port Arthur, and if no passenger trainman applies for it, to the senior suitable freight trainman applying for it, and if no freight trainman applies for it, to the senior suitable yardman applying for it. Fifteen (15) days will be given to transfer. Freight trainmen or yardmen accepting passenger service under this clause for longer than fifteen (15) days will thereafter hold no rights in freight or yard service.

A trainman making application for a bulletined passenger run will be required to take it if his seniority entitles him to same unless notice of withdrawal of application is forwarded, either by Government registered mail or commercial telegraph, to the official to whom the application was sent, on or before the date of the expiration of the bulletin, when the next senior applicant will be assigned. This is, however, not to interfere with the right of the trainman to take fifteen (15) days to transfer.

A trainman who gives up his run causing it to be advertised will not be permitted to bid it in until it has been filled and again becomes vacant, unless he is the only applicant.

Clause K.—Passenger trainmen transferring to freight service.

Any passenger trainman who has been in passenger service eighteen (18) months or more and desires to transfer to freight service will upon written application be given four (4) months rights in freight service for each year of seniority in passenger service and will lose his seniority in passenger train service, and must after transferring have at least one year's actual freight experience before being eligible for promotion to conductor. It is understood under this clause that no passenger trainman will be allowed to accumulate more than two years' freight seniority. It is further understood that a man transferring under this clause will take up his freight seniority on the district on which he was hired, except in cases where he has been in passenger service on the district where he is working for at last two years.

Clause L.—Cleaning coaches.

Trainmen will not be required to clean coaches, but it will be their duty on trains on which train porters are not employed to keep coaches in a tidy condition en route.

Clause M.—Designation of train baggageman.

Any person performing the duties of train baggageman will be classed as train baggageman and receive pay as such. This not to apply to cases where special arrangements have been made with foreign roads, and where their men run over the Canadian Northern Railway.

ARTICLE 2.

Rates and Rules for Mixed and Way Freight Trainmen.

Clause A.—Rate per mile.

Trainmen, per mile, ... cents.

Clause B.—Rate for combination run.

Trainmen assigned to runs, a portion of which are passenger and the balance mixed or freight, or both, will be paid a mileage rate for each class of train, but not less than the minimum passenger train rate.

Clause C.—Minimum monthly mileage.

Trainmen assigned to mixed trains will be paid for not less than twenty-eight hundred (2,800) miles per month. When assigned trainmen do not make this mileage, overtime and time occupied while making up and putting away their own trains may be included as mileage up to an equivalent of twenty-eight hundred (2,800) miles.

Clause D.—Run around to make up minimum.

Trainmen on mixed trains may run around chain gang trainmen to make up their mileage on their own branch lines.

Clause E.—No. trainmen on mixed trains.

Mixed trains will have at least two trainmen; one trainman may be used to handle baggage, express and mail.

Clause F.—Vacancy ten days or more.

Mixed and way freight trainmen on leave of absence for ten (10) days or more will be relieved by the senior freight trainman applying for it on the promotion territory.

Clause G.—Housing way freight.

Trainmen will not be required to put freight in warehouses or sheds, except in cases of stress of weather or when the freight is perishable, or any exceptionally heavy piece. At all points where there are no agents and shelter is provided freight will be housed.

Clause H.—Assistance on heavy way freights.

All trains handling way freight will have at least two trainmen and on runs where the work is unduly heavy, it will be lightened by using a smaller engine or an additional trainman.

ARTICLE 3.

Rates and Rules for Through Freight Trains.

Clause A.—Rate per mile.

Trainmen, per mile .... cents.

Clause B.—Rate, light engine and caboose.

Clause B.—Trainmen with light engine and caboose will be paid through freight rates.

Clause C.—Snow plow on flanger trains.—Plowing and flanging side tracks.

Trainmen on snow plow and flanger trains will be paid through freight rates.

Where a plow or flanger is working on way freight trains, way freight rates will apply.

Under no circumstances will trainmen be required to ride in snow plow or flanger. When sending out a snow plow or flanger, a caboose or other suitable car will be provided for the accommodation of the trainmen, and two trainmen will be used, and accommodation when practicable, other than the caboose, will be provided for labourers.

Plowing or flanging side tracks will be paid for at the rate of twelve and one-half (12½) miles per hour in addition to pay for trip. Time so occupied will be deducted in computing overtime to avoid duplicate payment.

Clause D.—Performing work train service en route.

Trainmen will not be paid for performing work train service en route unless time so occupied aggregates one (1) hour, in which case they will be paid at work train rates for the whole time so occupied. Such time not to be included in counting overtime.

Clause E.—Minimum monthly mileage.

Trainmen employed on through and way freight trains regularly set up will be paid a minimum of three thousand (3,000) miles and twenty-eight hundred (2,800) miles respectively a month. Detention, switching and overtime may be used to make up these guarantees. Trainmen working only part of a month will be allowed not less than one hundred (100) miles for each day regularly set up.

This rule does not mean that three thousand (3,000) and twenty-eight hundred (2,800) miles a month is the maximum mileage that trainmen will be permitted to make.

Clause F.—First in first out.

Trainmen in chain gang regularly set up will be run first in first out of terminal points on their respective sections. All such trainmen ready for duty so run around will be paid one hundred (100) miles for each run around, retaining their original standing on train board. It will be understood that the first crew called out in unassigned service will take the engine first turned out in unassigned service.

Clause G.—Manning through freight trains.

Through freight trains will have at least two trainmen, but may be split when required to run sections of a passenger train.

On Pacific district west of Lucerne trains of sixty (60) cars or more will have three (3) trainmen.

Clause H.—Reduction of crews.

When it is necessary to reduce the number of trainmen regularly set up, it will be done in the order of seniority, commencing with the junior man, even though he may be on a run acquired by bulletin.

ARTICLE 4.

Rates and Rules for Work Trains, Construction, Helper, Pusher and Pile Driver Service.

Clause A.—Rate per mile and basic rate.

Trainmen, per mile, ... cents, eight hours or less, one hundred (100) miles or less, to constitute a day's work, overtime *pro rata*.

Clause B.—Manning work trains.

Work trains will have at least two (2) trainmen.

Clause C.—Work trains running forty miles or more, to or from work.

When work trains run forty (40) miles or more to or from loading or unloading point, they will be paid time or mileage, whichever amounts to the most, in addition to actual time loading or unloading.

In any case, where trainmen make more actual mileage than hours in any one day, they will be paid on a mileage basis.

Clause D.—Work train assignment.

Trainmen assigned to work train service and held in that service will be paid on the basis of twelve and one-half (12½) miles per hour, computed from the time they come on duty until tied up, and will be paid for not less than one hundred (100) miles or eight (8) consecutive hours at work train rates for every working day so held, not including overtime lapping over from previous day.

Clause E.—Payment for service on wreck trains.

Trainmen on wrecking train will be allowed actual mileage to and from wrecks, work train rates while working at same, and will be paid for not less than one (1) day's pay for such combined service.

Clause F.—Week-end leave.

Trainmen assigned to work train service will not be considered absent from duty from the time work is through Saturday night until usual starting hour Monday morning, unless notified in writing before they are tied up on Saturday night that they will be required. If so notified and not used they will be paid for five (5) hours at work train rates. Trainmen will be allowed to go home for Sunday if the train service will permit and it will not interfere with work train service. Work trainmen may have the option of refusing to do through freight service between Saturday night and Monday morning.

Clause G.—Assigning men to work trains.—Used in service other than work train.

Unless senior trainmen desire otherwise, junior trainmen will be assigned to work trains. When trainmen are required to go out on work trains they will be given sufficient time before leaving home to prepare for such service, twenty-four (24) hours being considered sufficient.

Trainmen assigned to work train service will not be transferred or used in other service during a continuance of the assignment by a temporary suspension of the assignment for less than three (3) days, excepting that when a congestion of traffic occurs, which the unassigned trainmen on the territory are unable to handle, work train trainmen may be used for that purpose.

ARTICLE 5.

Rates and Conditions for Trainmen to Apply to all Classes of Service Unless Otherwise Specified in this Schedule.

Rule 1.

Rule 2.—Full crew.

When trainmen are called out, full crew governed by this schedule will be used.

Rule 3.—*Pro rata* allowance guarantee.

Trainmen who work only a portion of a month on any assigned run will be paid their full proportion of the compensation provided for such run under this schedule.

Rule 4.—Overtime speed basis, other than passenger trains.

When any train other than a passenger train averages less than twelve and one-half (12½) miles per hour, overtime will be paid at schedule rates on a basis of twelve and one-half (12½) miles per hour. Time to be computed from the time of departure of train until arrival at destination. In computing overtime, all mileage paid for, including doubling, will be allowed in the mileage, and unless otherwise provided herein, the time will not include time otherwise paid for.

Rule 5.—Trainmen held at other than home terminal. —Trainmen tied up between terminals.

Rule 5.—Trainmen in pool freight and in unassigned service held at other than home terminal will be paid continuous time for all time so held after the expiration of eighteen (18) hours from the time relieved from previous duty, at the rate per hour paid them for the last service performed. If held sixteen (16) hours after the expiration of the first twenty-six (26) hour period, they will be paid continuous time for the next succeeding eight (8) hours, or until the end of the twenty-four (24) hour period, and similarly for each twenty-four (24) hour period thereafter. Should a trainman be called for duty after pay begins, time shall be computed continuously. For the purpose of applying this rule the railroad company will designate a home terminal for each crew in pool freight and in unassigned service.

Rule 7.—Deadheading.

Trainmen deadheading or travelling passenger will be paid at the same rates and mileage as earned by the corresponding trainmen working the train on which they travel except a trainman deadheading to take a preference run or promotion to which he is entitled by change of time table or permanent vacancy, or when returning from same on account of being displaced by reduction of crews, or when deadheading to or returning from a point for relief work which he took at his own request, will not be entitled to the deadhead mileage going or returning.

The trainmen first out will deadhead, and will stand first out of these trainmen at the other terminal. Trainmen will not be required to abandon caboose except to run passenger or official trains, or unless it is the intention to return them deadhead on passenger, when the caboose would be an encumbrance, in which case trainmen will be advised number, date of, and departure of train they will be returned on before they are obliged to give up caboose. On any passenger train, other than a first class passenger train, caboose will be attached. This not to be construed as to force trainmen to give up caboose in order to deadhead them on passenger.

Rule 8.—Handling express in addition to baggage.

Train baggagemen and mixed and way freight brakemen handling express in addition to baggage will be paid seventeen dollars and fifty cents $17.50) a month, except milk train between Vancouver and Hope, the rate will be twenty-two dollars and fifty cents ($22.50), in addition to other compensation.

Men who work only part of a month will receive their due proportion of this amount.

Rule 9.—Payment for overtime handling express.

Train baggagemen and mixed and way freight brakemen handling express, who are required to be on duty more than fifteen (15) minutes at beginning or end of trips, will be paid for all time held, handling express, at overtime rates. Terminal time paid for under any other rule will be deducted to avoid duplicate payment.

Rule 10.—Handling Government mail.

Train baggagemen and mixed and way freight brakemen who receive help to load or unload, handle for the purpose of checking, transfer or delivery, between or at terminals, any sacks of His Majesty's mail on runs which regularly handle same, will be paid the sum of ten dollars ($10.00) per month therefor.

When a trainman on such a run works only part of a month, he will receive his due proportion of this amount, and the man or men relieving him will also receive their due proportion of same.

Trainmen who are only intermittently required to handle mail as described above, by reason of their being assigned to trains in pool or other service, some of which do not regularly carry mail, will be compensated therefor on the basis of fifty cents (50c) per trip, with a maximum of ten dollars ($10.00) per month. On short turn around runs a round trip will be considered a trip within the meaning of this clause.

Rule 11.—Basic day, freight and mixed service.

One hundred (100) miles or less, eight (8) hours or less, to constitute a day, in through and irregular freight, local freight, and mixed train service.

Rule 12.—Loading or unloading way freight or switching en route.

Trainmen required to load or unload way freight, or switch en route, will be paid overtime at way freight rates for time so occupied, but not in excess of way freight rates for the full trip, such time to be deducted in computing overtime. Trainmen will be paid way freight rates over the full trip if they load or unload way freight or switch at three (3) or more points, or a combination of three (3) of both. This is not considered to apply to through trains setting out or picking up cars belonging to their trains, unless a switch has to be made to spot cars which are set out; that is, cars set out of a train will be placed for loading or unloading, and this will not constitute switching unless the placing of same will necessitate the removal of car or cars from the track to which cars set out are destined. When picking up, any cars which are placed for loading must be respotted. The handling of water cars for other than train purposes will be by way freight trains; if by through freight trains, way freight rates will be paid provided water is distributed at three (3) or more points.

EXAMPLES UNDER RULE 12.

Example 1.
Leave A, 10K.
Switch or handle way freight at C., 11.15K. to 11.45K., and at E. 12.30K. to 12.45K.
Arrive G., 18K. (Distance, 102 miles.)
Allowed: 102 miles through freight rates.
9¾ miles way freight rates.

Total 111¾ miles.

Example 2.
Leave A., 10K.
Switch or handle way freight at E., 11.30K. to 12.30K.
Arrive G., 19K. (Distance, 102 miles.)
Allowed: 102 miles at through freight rates.
12½ miles at way freight rates.

Total 114½ miles.

Example 3.
Leave A., 10K.
Switch or handle way freight at E., 11.30K. to 12.30K.
Arrive G., 20K. (Distance, 102 miles.)
Allowed: 102 miles at through freight rates.
12½ miles overtime at through freight rates.
12½ miles overtime at way freight rates.

Total: 127 miles.

Example 4.
Leave A., 10K.
Switch, load or unload way freight at E., 11.30 to 14.30K.
Arrive G., 18K.
Allowed: 102 miles at way freight rates.

Example 5.
Crew makes trip over sub-division A. to G.
Loads or unloads way freight at B.
Performs station switching at C.
Picks up cars necessitating a switch at D.
Allowed: way freight rates for full trip.

Rule 13.—Handling way freight at terminals.

Trainmen required to load or unload way freight at terminal points will be paid at way freight rates for the time so occupied.

Rule 14.—Switching or delayed at terminal or turn around points.—Switching at C.N.R. junction points.

Clause (a).—Trainmen switching or delayed at terminal or turn around points will be paid for actual time so occupied at through freight rates. Excepting that trainmen required to perform yardmen's work in any one yard in excess of five (5) hours in any one day will be paid at yardmen's rates per hour for the actual time occupied. This time will be in addition to mileage or hours made on the trip.

Agents or yardmasters will issue tickets specifying time in this service, same to be forwarded to timekeeper with trip ticket.

Clause (b).—Through freight rates on the basis of twelve and one-half (12½) miles per hour will be paid trainmen in through freight service for all time occupied in switching at Canadian Northern Railway junction points and this time will be paid in addition to pay for trip. Such time will be deducted in computing overtime for the trip and this switching will not be regarded as constituting switching at an intermediate point under Article 5, Rule 12.

Interrupted time of thirty (30) consecutive minutes or more preventing continuance of switching operations will be deducted in computing time for switching at Canadian Northern junction points.

Rule 15.—Short runs.—Suburban service.

Clause (a).—Unassigned trainmen on short runs for round trip of seventy-five (75) miles or less, will be allowed actual hours or one hundred (100) miles. On round trip of over seventy-five (75) miles going and returning portions of trip to be split, giving overtime made in either direction.

Example 1.
Leave A., 7K.
Arrive D., 9K., 35 miles.
Leave D., 10K.
Arrive A., 12K., 35 miles.
Allowed: 100 road miles.
12½ miles at turn around point.

Total: 112½

Example 2.
Leave A., 7K.
Arrive D., 9K., 40 miles.
Leave D., 10K.
Arrive A., 15K., 40 miles.
Allowed: 40 miles A. to D.
12½ miles at D.
40 miles D. to A.
25 miles overtime D. to A.

Total: 117½ miles.

Clause (b).—Trainmen may be assigned to suburban service (within a radius of ten (10) miles, the duration of which exceeds one day and will be paid for all time actually on duty, or held for duty. Eight (8) consecutive hours or less to constitute a day, overtime *pro rata*.

Rule 16.—Annulled after coming on duty.

When trainmen come on duty for a train which is annulled, they will be allowed for time held on duty at through freight rates, with a minimum of three (3) hours, and stand first out. See ruling dated February 26th, 1918.

Rule 17.—Fitting up caboose.

Trainmen called out to fit up a caboose will be paid for time so occupied with a minimum of three (3) hours at through freight rates.

Rule 18.—Doubling.

Trainmen doubling will be paid a minimum of ten (10) miles for each double, or actual mileage when this minimum is exceeded.

This clause will apply in all cases where trainmen are required to double on account of inability of engine to handle the train. In cases where the double is made for other reasons or where it is necessary to assist other trains or for an engine to run for coal or water and any member of the crew accompanies the engine, actual mileage run will be allowed the crew.

Rule 19.—Switching industrial spurs en route.

Trainmen required to switch industrial spurs en route, of over one (1) mile in length, will be paid at the rate of twelve and one-half (12½) miles per hour as per class of service for all time so occupied in addition to pay for trip. Time paid for under this

rule will be deducted in computing overtime to avoid duplicate payment.

Rule 20.—Time on duty at initial terminal.

Trainmen of mixed or freight trains will be on duty at initial terminal thirty (30) minutes before time set for departure of train, and will receive pay for same at through freight rates.

Rule 21.—Piloting.

Trainmen acting as pilots will be paid the same rate of pay as the man running train.

Rule 22.—Coaling engines.

Trainmen actually engaged in coaling engine en route will be paid at the rate of forty cents (40c) per hour for the time so occupied. This time not to be deducted in computing overtime. Trainmen will not be required to coal engines, except where no coal men or section men are available.

Rule 23.—Held off duty on company's business.

Trainmen held off duty on company's business or by order of the company's officials will be paid at schedule rates of pay and actual reasonable expenses while away from home. If they are required by the company to attend coroner's inquests, court cases, or other public investigations, they will be paid schedule rates for mileage lost and will be reimbursed actual reasonable expenses when away from home. In such cases the witness fees shall go to the company.

Rule 24.—Promotion of trainmen to conductors.

Clause (a).—Promotion of freight trainmen will be to conductors under each superintendent's jurisdiction, and will be made according to seniority of the trainmen, and will be governed by merit, fitness and ability.

Clause (b).—Freight trainmen who have been in the company's service as such, four (4) years, will be given an opportunity to qualify as conductors and will be given conductors' rank if successful. Their written and oral examinations shall be held at their home terminals during the months of January and July on dates designated by the examining officer.

Clause (c).—Trainmen will be notified in order of seniority when it is necessary to increase the force of conductors, in order that they may qualify for promotion. If for any reason they are not notified, they will not lose any rights under this rule provided they can pass the required examinations. Trainmen not promoted in order of seniority or if the examination is not satisfactory, will be advised the reason thereof in writing and will have the right of appeal.

Clause (d).—Trainmen failing to pass the examination for conductors will be given another opportunity to pass at the expiration of ninety (90) days and will not lose their seniority as trainmen. Trainmen promoted during the interval will rank senior to those who fail to pass.

Clause (e).—Inexperienced trainmen will have no seniority standing for the first six (6) months' service, after which they will rank as trainmen from the date they entered the service as such.

Rule 25.—Promotion of trainmen from through freight.

The promotion of trainmen will be from through freight to way freight, and from way freight to mixed.

Ruling.—When a man is reduced by reduction of crews he may have the option of replacing a junior man on his promotion territory, although such man may have acquired the run by bulletin.

Rule 26.—Manning of built or acquired lines.

Any lines built or acquired will be manned by the trainmen on the promotion territory to which such lines are added, except that manning branch lines which connect up two (2) freight promotion territories, they will be manned equally from the two (2) promotion territories so connected, in which case the trainmen transferred will rank according to their seniority with the trainmen on the territory to which they are transferred. All lines built or acquired east of the Red River (except Victoria Beach line) will be manned by trainmen from the first division Central district.

Note.—It is understood that operating trainmen on acquired lines will not be displaced.

Rule 27.—Transfer of lines from one superintendent's division to another.

In the event of transfer of lines from one superintendent's division to another, the number of trainmen necessary to operate the lines transferred will be taken over with the lines. Trainmen will be allowed to transfer according to their seniority, and will rank with those on the territory to which they are transferred according to their seniority, but no man on that territory will be reduced in rank or taken off a regular run which he already holds, except in case of reduction in staff when the junior man will in all cases be reduced. Trainmen will not be transferred from one promotion territory to another except in case of shortage of men on that territory when the junior men will be sent and must go, unless the senior men wish to go. Trainmen will be notified of such transfer at their home terminal.

Rule 28.—Spare trainmen run first in first out.

Spare trainmen will be run first in first out in their respective classes and will be paid one hundred (100) miles for each time run around and will maintain their standing on the spare board except:

(1) When a caboose or run is to be vacant for a period of ten (10) days or more, the senior man on the spare list will be entitled to said caboose or run.

(2) When a regular man lays off and does not give the company forty (40) minutes' notice before train for which he is called is ordered to leave, in which to call the spare man entitled to the run, the most available spare man will be called and spare men run around under these circumstances will not be paid run arounds.

(3) The penalty features of this rule will not apply to spare trainmen who have less than six (6) months' experience.

Ruling.—The forty (40) minute provision under exception (2) of this rule will not permit regular men to lay off on short notice except in cases of sickness or injury.

Rule 29.—Trainmen assigned to regular sub-divisions.

Freight trainmen will be assigned to regular sub-divisions, and will be kept on those sub-divisions, except in emergency on account of shortage of men or crews they may be required to go on another sub-division, in which case they must be changed off with the first unassigned trainmen on that sub-division met en route.

Trainmen arriving at their own sub-division terminal, when trainmen from another sub-division are about to be used, shall change off with said trainmen for the purpose of keeping trainmen on their own respective sub-divisions, even though the trainmen about to be used have been called and started to work.

This rule will not be enforced when trainmen require rest.

Rule 30.—Handling way freight at night and on Sunday.

Trainmen will not be required to handle way freight at night or on Sunday, except trainmen on trains handling perishable freight, such as fresh meat, fruit, butter, eggs and beer, or other liquids that are perishable, will load or unload such perishable freight at night or on Sundays, but will not be required to load or unload other freight at stations where they may handle perishable freight during the prohibited hours.

All trains leaving terminal points between the hours of five (5) o'clock and ten (10) o'clock, November first to April first, and all trains leaving terminal points between the hours of three (3) o'clock and ten (10) o'clock, April first to November first, will not be considered night trains and such trains will work as way freight through to destination of runs irrespective of the hours of reaching such destination.

It is understood that trainmen called for way freight service under this rule will not be called so as to be required to be on duty previous to three (3) o'clock and five (5) o'clock.

Rule 31.—Handling bad order cars.

Trainmen will not be compelled to handle cars in trains, the draft gear of which is defective and requires to be changed, further than to take care of perishable freight or livestock that may become disabled en route to the first terminal. Under no circumstances will trainmen be compelled to handle cars behind caboose, other than official cars or flanger.

Rule 32.—Booking rest.

Trainmen on arrival at terminals will not be called again for immediate duty if they want rest, the trainman to be judge of his own condition, but eight (8) hours is to be considered sufficient, except in extreme cases. Required rest must be booked on arrival, and will be given complete before being called. When a trainman books rest, the caboose will not be sent out until rest period has expired. Under the above provision, trainmen will not be permitted to book less than five (5) hours' rest.

Rule 33.—Booking rest.

Trainmen who have been on duty twelve (12) hours on way freight, or fourteen (14) hours on other trains, will be entitled to eight (8) hours' rest; the same to be granted by the dispatcher as soon as it can be arranged without delaying other trains that meeting points have been arranged with, before notice of rest required had been given. When any trainman so books rest it will automatically tie up the other trainmen.

Ruling.—It is agreed that trainmen will be automatically tied up for rest when conductors with whom they are working book rest, after being on duty on any trip twelve (12) hours in way freight service or fourteen (14) hours in other train service, and that said trainmen shall not be entitled to compensation during rest period.

Rule 34.—Coupling or uncoupling air or steam hose.

Trainmen will not be required to couple or uncouple air or steam hose at terminals where car men are employed and within the hours of service of such car men.

Rule 35.—Handling supplies for cabooses and baggage cars.

At terminal points trainmen will not be required to carry chains, knuckles, brasses or other supplies, between their cabooses, baggage cars or storehouses. Trains arriving at terminal with cars chained up, or emergency knuckles in use will have some returned to them, or new ones supplies. Stores for passenger crews will be placed at or near passenger station.

Rule 36.—Coal for cabooses.

Arrangements will be made between superintendent and local committee to supply cabooses with suitable coal at terminals.

Rule 37.—Ice for cabooses.

Trainmen will be allowed to take a reasonable amount of ice for use in cabooses at terminals where ice is kept.

Rule 38.—Watering stock; filling water barrels or water cars.

Trainmen will not be required to water stock en route except in case of emergency. Trainmen will not be required to fill water barrels or water cars, except for domestic purposes, and when done at three (3) or more points, way freight rates will be allowed for entire trip.

"Emergency" means train delayed between terminals on account of wrecks, washouts, engine failure or other unavoidable causes.

Rule 39.—Caboose track, switching with cabooses.

A caboose track will be provided at terminals. It is understood that switching operations will not be performed with cabooses.

Rule 40.—Handling repair cars.

Repair cars moved forty (40) miles or less will be handled on head end of train.

Rule 41.—(Blank.)

Rule 42.—Train service between Port Mann and Vancouver.

Freight trainmen may be assigned to transfer freight, mixed and local service between Port Mann and Vancouver, and will do all industrial and other switching at Vancouver and make up and set out their own trains at Port Mann. One hundred (100) miles or less, eight (8) consecutive hours or less to constitute a day's work. Trainmen to be paid not less than one hundred and thirty-one dollars and twenty-five cents ($131.25) per calendar month. All time in excess of two hundred and twenty-four (224) hours in any one month to be paid as overtime *pro rata*.

When the switching and industry work at Vancouver becomes heavy enough to warrant installing a yard crew, yardmen will be assigned and trainmen provided for under this rule will not be permitted to do switching at Vancouver except to make up and set out their own trains.

Rule 43.—Filling temporary runs or vacancies.

All temporary runs or vacancies in first class service of thirty (30) days or more, will be bulletined for five (5) days to the division on which such run or vacancy originates and five (5) days will be given to transfer.

When a temporary run or vacancy is filled by a trainman holding a regular permanent assignment, such assignment will be considered as temporary.

Under this rule when a baggageman lays off for less than thirty (30) days, senior trainman on superintendent's division will have the privilege of taking car.

Rule 44.—Double heading.

It is not the desire or intention to establish the practice of double heading engines on freight trains.

Double headers may be run in case of storms, accidents, to avoid running engines light, moving engines to and from shops, or from one division to another, or to consolidate with another train on which the engine has been party disabled, and in all such cases the tonnage shall not exceed the tonnage of the largest engine attached over the division. The maximum number of cars handled, exclusive of caboose, will be thirty-five (35). Way freights will not be double headed.

It is understood under this clause that two engines under steam will be considered double headers.

Rule 45.—Helping.

Helping engines may be used to assist trains over the following grades, and at such points as may be arranged from time to time between the general superintendent and the general committee without the revision of this schedule:

Central District—First Division.

Stanley Junction to Kakabeka Falls.
Mokoman to Rowan.
Shabaque to Mabella.
Sprague to South Junction.

Second Division.

Miami to Altamont.
Learys to Cardinal.
Somerset to Top of Hill (Carman and Miami sections.)

Third Division.

Wawanesa to Top of Hill, both ways.
Ninette to Top of Hill, both ways.

Western District—First Division.

Roblin to Makaroff.
Prince Albert to Davis.
Kamsack to Veregin.
Buchanan to Rama.

Second Division.

Lumsden to Regina.
Lumsden to Disley.
Saskatoon to Top of Hill, both ways.
Prince Albert to Clouston.

Third Division.

Borden to Langham.
Islay to Kitscoty.

Fourth Division.

Drumheller to Top of Hill, both ways.

Note.—Munson Junction to be considered Top of Hill east bound.

Rule 46.—Calling trainmen.

Freight trainmen living within two (2) miles of yard office, and passenger trainmen living within two (2) miles of passenger station, will be called sufficiently in advance to be on duty the required time before leaving time of train. Caller will be furnished with a book in which will be registered time train leaves, and in which they will sign their names, and calls will be made as nearly as possible two (2) hours before the departure of train.

Trainmen of passenger and mixed trains timed to leave passenger station between the hours of eight (8) o'clock and twenty-two (22) o'clock will not be called.

Rule 47.—Trainmen assigned to regular runs remaining in cabooses.

Trainmen assigned to regular runs will not be required to stop in cabooses at terminal points, and unless they are advised that they will be required before their regular run, will not be considered absent from duty if required and not on hand. Trainmen will leave their proper addresses at terminals, and should they be absent from their regular residence they will leave word where they can be found, if required.

Rule 48.—Assigned trainmen not required to do other work.

Trainmen assigned to regular trains will not be required to do other work than that to which they are regularly assigned, except in case of wrecks, when no other trainmen are available.

Rule 49.—Competent trainmen.—Charges made against trainmen.

One trainman on each train must be competent, and have at least six (6) months' experience as a trainman. Objections or charges made against any trainman shall be in writing, and must state clearly and fully the reasons for filing such objections or charges. An investigation will be held before any decision is rendered or action taken, and if charges are not proven, the man against whom charges were made will be paid for time lost, if any.

Rule 50.—Discharged account past record.

No trainman will be discharged on account of past record after sixty (60) days from date of entering the company's service.

Rule 51.—Discipline or dismissal.—Notice of appeal. —Charges made against trainmen.

All accidents shall be investigation, and trainmen may be held off not exceeding three (3) days for this purpose. Evidence of all parties concerned shall be taken, and no trainman shall be disciplined until his case has been investigation, and if not satisfied with decision rendered he will be given an opportunity to review the evidence, and may appeal to the superintendent, and through his representative to the higher officials.

Notice of appeal to be served in writing on the superintendent within twelve (12) days.

Trainmen charged with offences involving discipline or dismissal will be advised the nature of such offences, and may have the assistance of a fellow employee at any and all investigations; when found blameless, will be paid for time lost at schedule rates. When a charge is laid against a trainman, said trainman may have the privilege, if desired, of meeting party or parties making the charge face to face in the presence of an officer of the company. It is understood that the investigation will be held as quickly as possible, and men will not be held off unnecessarily. The lay-over time will be used as far as practicable. Trainmen will be furnished with copies of their statements at the time of signing same.

Rule 52.—Certificate of service.

When a trainman is discharged or resigns, he will, as soon as possible, be paid, and given a certificate, on request, stating time of service and in what capacities he was employed.

Rule 53.—Fines.

No fines will be imposed on trainmen.

Rule 54.—Trainmen working on construction lines.

Canadian Northern trainmen compelled to work on construction lines will be governed by rules and rates of pay governing the trainmen on the Canadian Northern Railway.

Rule 55.—Trainmen turned in by construction department.

A trainman who, with proper consent, temporarily works for the construction department, and is turned in by that department, will have the right to place his case before the proper officials of the operating department, who will immediately institute enquiries, and if evidence obtained shows that dismissal is not warranted, he will be returned to the service.

Rule 56.—Loss of seniority when engaged in other service.

Trainmen entitled to regular work in road service will lose their seniority standing after thirty (30) days' service in any other class of work, except by special arrangement with the superintendent and local committee, and in cases where trainmen accept positions with the Brotherhood of Railroad Trainmen.

Rule 57.—Trainmen to rank as new men if not re-employed within six months.

Men who are discharged and not re-employed within six (6) months will be regarded as new men, except that a man who has been discharged more than six (6) months may be reinstated when such action has been sanctioned by the general superintendent and general committee.

Rule 58.—Leave of absence for men laid off on account reduction of force.

Trainmen who are laid off on account of reduction of force will, upon requesting same, be paid and given leave of absence for six (6) months, and a letter stating the reason. Trainmen accepting leave of absence under this rule will keep superintendent or trainmaster advised as to their whereabouts, and superintendent or trainmaster will notify such trainmen by letter or wire when they are required. If not required for service at end of six months, leave of absence, when requested, will be extended.

Trainmen so notified will report for duty within fifteen (15) days, otherwise they will lose their seniority standing.

Rule 59.—List of names to be added to seniority list.

Superintendent or trainmaster on each district will, on request, furnish the chairman of local committee each month with the names of all men promoted to conductor, or hired as brakeman during the month, giving dates. Such names will be added to the seniority list, which will be kept in a conspicuous place at each terminal. Any man desiring to protest his rating, or the absence of rating, must do so within sixty (60) days from the date names are posted; otherwise his protest will not be considered.

Rule 60.—Relief and transportation, general committee men.

Members of general committee shall be relieved when required for committee work, and will be furnished necessary transportation. Sufficient notice must be given superintendent or trainmaster so that service will not suffer.

Rule 61.—Assistance for attending heaters and coaches.

All freight and mixed trains handling five (5) or more heated cars, or seven (7) or more coaches, or three (3) and five (5) combined, between the months of November and March inclusive, will be allotted a man to attend to the heaters.

Rule 62.—Meals.

Trainmen will have the opportunity of having meals at a reasonable hour by previously advising dispatcher.

Rule 63.—Turn around service away from home terminal.

Trainmen will not be held away from home terminal to make more than two (2) round trips in turn around service.

Ruling.—In event of trainmen standing first out after having made two (2) turn around trips away from home terminal and the third trip is to be made they may elect as to whether or not they will make the third trip or require trainmen standing behind them to do so, but when exercising this right clause (F) of Article 3 will not apply.

Rule 64.—Disputed time or mileage.

Trainmen will be advised at once in writing through the proper office, with the reason, if mileage or time claimed is not allowed in full. In case time is disputed the mileage or time not in dispute will be paid in current pay-roll.

Rule 65.—Making assignments.

No assignments will be made except by bulletin or time-table.

Rule 66.—Brassing cars.

Trainmen will not be required to brass a car of company's or construction material, unless perishable freight, except to insure safe movement to station where it can be set out, nor to pick up cars on line that need brassing.

Rule 67.—Notification of being displaced.

A trainman displaced will be notified in sufficient time to permit removal of his personal effects from caboose.

Note.—Failure after due effort to find man for purpose of notifying him of being bumped will not be justification for claim for compensation.

Rule 68.—Held for other than assigned service.

Trainmen held for other service than that to which assigned and not used will be paid for time lost at schedule rates.

Rule 69.—Handling grain doors.

Trainmen will not be required to load or unload grain doors in car lots, or to load or unload grain doors in smaller quantities, except in cases of emergency, when they may be required to load and unload in way freight service, not more than twenty (20) sections on one trip.

Rule 70.—Transferring trainmen from one division to another.

When there is a surplus of trainmen on one division of the railroad and a shortage on another, the surplus trainmen will be transferred to the portion of the railway where the shortage exists, for the purpose of giving them employment and to avoid employing new men, and will rank ahead of inexperienced trainmen who have less than six (6) months' rights on that division.

Such trainmen will be promptly returned to their home division as soon as there is work there for them, unless they desire to remain on the division to which they were temporarily transferred, in which event they will be permitted to do so (unless there is a surplus of men on that division) and their seniority on that division shall date from the day that they made their first trip on the division to which transferred.

Under this rule it is incumbent upon surplus trainmen to accept temporary transfer to the division where shortage of trainmen exists. Men transferring under this rule will not be entitled to deadhead mileage.

Rule 71.—Terminals.

The following stations constitute terminals within the meaning of the term, and may be eliminated or added to by giving the general chairman fifteen (15) days' notice in writing and bulletining same on division affected over the signature of the general superintendent of the district:

Central District.

Port Arthur.	North Lake.	Atikokan.
Rainy River.	Winnipeg.	Emerson.
Dauphin.	Brandon.	Belmont.
Deloraine.	Virden.	Gypsumville.
Steep Rock.	Neepawa.	Russell.
Yorkton.	Beulah.	Kipling.
Carlyle.	Estevan.	Radville.
	Gravelbourg.	Moose Jaw.

Western District.

Dauphin.	Regina.	Winnipegosis.
Kamsack.	Saskatoon.	Swan River.
Humbolt.	Prince Albert.	Hudson Bay Jct.
North Battleford.	Kindersley.	The Pas.
Vermilion.	Hanna.	Alliance.
Vegreville (for 4th Div. crews.)		St. Brieux.
Edmonton.	Calgary.	Carlton.
Big River.	Big Valley.	Eston.
	Lochearn.	Dublane.
	Edson.	Turtleford.
		Sangudo.
		Athabasca.

Pacific District.

Edson.	Blue River.	Boston Bar.
Lucerne or Jasper	Kamloops Jct.	Port Mann.
		Vancouver.

Note.—The limits of Winnipeg terminals will be the east switch at Paddington and the west switch at Portage Junction.

The limits of Port Arthur yard will be the Port Arthur passenger station and the west switch Fort William "loop." Switching performed between west switch at Mount and west switch Fort William "loop" will be paid for under terminal time rule.

The limits of Rainy River yard will be the east switch at Rainy River and the west switch at Beaudette.

The limits of North Regina yard will be Dewdney street and north switch at North Regina yard.

The limits of Saskatoon yard will be Twenty-fifth street and Nutana and the Government elevator switch on the Kindersley subdivision. Except that the terminal limits for Delisle subdivision, trains will be at the switch to the Quaker Oats plant, and switching at the Government elevator switch will be paid for under terminal time rule. Switching at North Saskatoon will be paid for under terminal time rule.

The limits of Dauphin yard will be the west switch at West Yard and the east switch at East Yard. Delays to eastbound trains at North Jct. will be paid for under terminal time rule.

Note.—It is understood that at terminals other than those specified above, when a train can head into a clear track, or pull ahead and back into a clear track, and get engine away without delay, terminal time will not apply.

Rule 72.—Promotion territories.

Permanent freight and mixed promotion territories will be as under:

Central District—First Division.

Hornepayne to Winnipeg, and North Lake, Ridgeville sub-divisions.

Second Division.

Victoria Beach, Oak Point, Emerson, Carman, Inwood, Miami, Wakopa sub-divisions.

Third Division.

Winnipeg to Dauphin, Arizona, Oakland, Neepawa, Riding Mountain, Carberry, Rapid City, Rossburn, Yorkton, St. Rose sub-divisions.

Fourth division.

Wawanosa, Hartney, Kipling, Regina, Carlyle, Radville, Bienfait, Bengough, Moose Jaw, Gravelbourg sub-divisions.

Western District—First Division.

Dauphin to Humbolt, Dauphin to Prince Albert, Winnipegosis, Thunder Hill, Hudson Bay, St. Brieux, Assiniboine sub-divisions.

Second Division.

Regina to Prince Albert, Kindersley, Shellbrook, Crooked Lake, Delisle, Elrose, Battleford, Carlton subdivisions.

Third Division.

North Battleford to Edson, Sturgeon River, Cut Knife, Athabasca, Stony Plains, Sangudo sub-divisions.

Fourth Division.

Kindersley to Calgary, Vegreville to Munson, Brazeau sub-division, Strathcona to Alliance.

Pacific District.

Lines west of Edson.

Note.—By arrangement between general superintendent and general committee, this rule can be changed without the revision of this schedule and for promotion purposes the second and third divisions Central District may be considered as one promotion territory.

Rule 73.—Designation of trainmen.

The word "trainmen" in this schedule shall apply to baggagemen, brakemen and flagmen.

Rule 74.—Taken out of service account imperfection ear, or eye.

A trainman taken out of service on account of imperfection of sight or hearing will have an opportunity of re-examination in the presence of representatives of the company and organization, before an ear or eye specialist satisfactory to both parties, and if the specialist finds his sight or hearing to be within the requirements of the Board of Railway Commissioners, he will be reinstated and paid for time lost.

Rule 75.—Interpretation of schedule.

Any question of interpretation of this schedule which may arise will be taken up by the general committee with the assistant general manager, and if not adjusted, may be appealed to the higher officials.

Rule 76.

This schedule will constitute an agreement between the Canadian Northern Railway Company and its trainmen and shall not be changed or abrogated without the approval of the assistant general manager and the trainmen's general committee, and not then until thirty (30) days' notice in writing has been served by the party desiring the change on the other party thereto.

.....
For the Company.

.....
For the Trainmen.

Approved:

.....
Vice-President, B. of R. T.

CANADIAN NORTHERN RAILWAY COMPANY.

Western Lines.

SCHEDULE OF RATES AND RULES.

Yardmen.

Eight hour day effective;
Increase in rates effective;
Rules effective.

Rates of pay:

ARTICLE 1.

Hours of Duty.

Clause A.—Basic day.

Eight (8) hours or less shall constitute a day's work. Overtime to be paid *pro rata*, actual minutes to be counted.

Clause B.—Assignment of yard crews.

Yard crews will be assigned for a fixed period of time per day, not to exceed ten (10) hours except in isolated yards where only one yard crew is assigned and where the work requires it, the time of the assignments may be extended not to exceed twelve (12) hours; under this exception the minimum shall be ten (10) hours.

Clause C.—Allotting new work.

No new work will be given to a crew where the assignment is for nine (9) or more hours after the expiration of the period for which regularly assigned; overtime may be required in order to finish work that the crew is performing at the expiration of the assigned period or in emergencies. This will not be construed to extend the company's rights under similar existing rules for ten (10) hour assignments.

Clause D.—Overtime on eight hour assignments.

On assignments where the hours are limited to eight (8), overtime will be worked only in case of emergency; or in case of transfer crews or crews engaged in industrial work to finish assigned or programmed work, or in either case to get to regular relief points; the purpose being that if assigned or programmed service usually requires more than eight (8) hours' work, the assignment should be extended to meet the requirements of the service, either nine (9) or ten (10) hours.

Clause E.—Yard crews in extra service.

Sections (a), (b), (c) and (d) will also apply to yard crews called or used in extra service. They shall not be construed to require railroads to pay yard crews for more than the minimum day plus the actual time consumed in excess of eight (8) hours, except where the assignment is for either nine (9) or ten (10) hours the minimum shall be nine (9) hours exclusive of the meal hour.

Clause F.—Definition of word "emergency."

The word "emergency" as used in clauses (c) and (d) is defined as follows: wrecks, handling livestock, attending fires, or handling passenger trains.

RULINGS OF COMMISSION OF EIGHT.

ARTICLE 1.

Question 1: "May a yard crew be assigned to a ten hour shift for, say, four days in a week and an eight or nine hour shift for the remaining two or three days, specifying in the publishing of the assignment the days on which the crew would work ten hours and the days on which it would work eight or nine hours?"

Answer: "No, the assignment should be for the same hours daily."

Question 3, Decision No. 1, Article 1 (b): ". . . in isolated yards where only one yard crew is assigned and where the work requires it, the time of the assignments may be extended not to exceed twlve hours; . . ."

"Does this mean a spread of thirteen hours with one hour deducted for meal or does it mean a total spread of twelve hours?"

Answer: "The provisions for nine or more hour assignments apply to the hours of work and not the hours of spread of day produced by deductions of time for meals."

Question 5: "In a certain switching district, engine terminal is located at A. Engines work out of A, switching all day at B—2 miles from A; at C—3 miles, D—4 miles, E—5 miles. Can B, C, D and E be considered isolated yards?"

Answer: "Crews working out of a common terminal do not come within the exception relating to isolated yards."

Question 7, Article 1, paragraph (b) reads as follows: Yard crews will be assigned for a fixed period of time per day, not to exceed ten hours except in isolated yards where only one yard crew is assigned and where the work requires it, the time of the assignments may be extended not to exceed twelve hours; under this exception the minimum shall be ten hours."

"Is the foregoing intended to encourage the retention of nine or more hour assignment?"

Answer: "Nothing in Article No. 1 is intended to encourage the retention of nine or more hour assignment, nor to prevent eight hour assignments. The purpose of the decision was to make practicable eight hour assignments, where rules existing prior thereto prevented such assignments."

Question 6, paragraph (c): "Should the words "or in emergencies," Article 1, paragraph (c), Decision No. 1, be incorporated in the Chicago Memoranda of Agreement, and, if so, how should the said Article be written into the agreement, or in any schedule containing the rule reading: "No new work shall be assigned after the expiration of ten hours?"

Answer: "The words should be inserted in the Chicago Memoranda of Agreement, as well as in other agreements containing the rule, in the following manner:

"No new work will be given to a crew where the assignment is for nine (9) hours after the period for which assigned; overtime may be required in order to finish work that the crew is performing at the expiration of the assigned period or in emergencies.

"No new work shall be assigned to a ten (10) hour crew after the expiration of ten (10) hours."

Note.—Under schedules where in an isolated yard a twelve (12) hour assignment is worked and the

schedule contains the provision relative to "new work after ten hours," there should be inserted in the second line of the answer, following "nine (9) hours," the words "or twelve (12) hours."

Question 7, paragraph (c): "What constitutes new work as mentioned in this Article which stipulates that no new work will be given to a crew where the assignment is for nine (9) or more hours after the expiration of the period to which regularly assigned?"

Answer: "New work is such work as is not a portion of the regular programmed or routine work of a crew. If the regular work is made up of distinct portions, and a distinct portion remains to be performed after the hours of the assignment, such distinct portions are not new work. Work which is not a portion of the programme or routine may be added to the programme or routine prior to the end of the assigned hours, but not afterward.

Overtime may be worked to finish the programmed or routine work of an assignment. This is not to be construed as authority to work crews overtime when it can be avoided; nor is it to be construed as authority to programme work when it is clearly known that portions of the programmed work, under ordinary conditions, cannot be started until after the assigned period, or to require overtime on new work which is given to a crew prior to end of assigned period."

Question 11: "Is it permissible to have regular crew on an assignment for a given number of hours, and have one or more member thereof on an assignment of a less number of hours?"

Answer: "No regular member of the crew shall be assigned for a lesser number of hours than the number of hours for the crew as a unit."

ARTICLE 3.

Lunch Time.

Clause A.

Yard crews where the hours of work are limited to eight (8) will be allowed twenty (20) minutes for lunch between four and one-half (4½) and six (6) hours after starting work without deduction in pay.

Clause B.

In eight (8) hour yard assignments, yard crews will not be required to work longer than six (6) hours without being allowed twenty (20) minutes, and in nine (9) or more hour assignments thirty (30) minutes for lunch, with no deduction in pay or time therefor.

Clause C.

In nine (9) or more hour assignments, yardmen will be allowed one (1) hour for meals between the hours of eleven-thirty (11.30) and thirteen (13) o'clock, and between twenty-three thirty (23.30) and one (1) o'clock, but if required to work the meal hour, or any part thereof, they will be paid for one (1) hour in addition to the hours of their regular assignment and will be allowed thirty (30) minutes under pay for meals. Day crews not relieved by nineteen (19) o'clock, and night crews not relieved by seven (7) o'clock will be allowed thirty (30) minutes for meals, and paid continuous time after nineteen (19) and seven (7) o'clock respectively.

Clause D.—Time to be used.

At points where the time is changed, yardmen will work on the time used by the community.

RULINGS OF COMMISSION OF EIGHT.

ARTICLE 2.

Question 2: "If a yard crew, through some unforeseen circumstance, be on duty, say, fourteen (14) hours, would the crew be entitled to a second period of thirty minutes in which to eat, and, if so, when would it begin?"

Answer: "Article 2, paragraph (b) applies to both the first and second lunch periods. In the case cited, crew would be entitled to the second lunch period six (6) hours after completing the first lunch period. In either case, yardmen will not be worked longer than six (6) hours without being given an opportunity to eat.

Question 13, paragraph (b): "Under the several provisions for meal period, must they be given within the prescribed time?"

Answer: "Yes, the lunch period must be given, and completed within four and one-half (4½) and six (6) hours.

ARTICLE 3.

Starting Time.

Clause A.

Regularly assigned yard crews will each have a fixed starting time and the starting time of a crew will not be changed without at least forty-eight (48) hours' advance notice.

Clause B.

Where three (3) eight (8) hour shifts are worked in continuous service, the time for this first shift to begin work will be between six-thirty (6.30) and eight (8) o'clock; the second fourteen-thirty (14.30) and sixteen (16) o'clock, and the third twenty-two thirty (22.30) and twenty-four (24) o'clock.

Clause C.

Where two (2) eight (8) hour shifts are worked in continuous service, the first shift may be started during any one of the periods named in paragraph (b).

Clause D.

Where two (2) eight (8) or nine (9) hour shifts are worked not in continuous service, the time for the first shift to begin work will be between the hours of six thirty (6.30) and ten (10) o'clock, and the second not later than twenty-two (22.00) o'clock.

Clause E.

Where ten (10) or more hour assignments are worked, the rules or practices for time of beginning work are not affected by paragraphs (b), (c) and (d), and starting time will be seven (7) o'clock and nineteen (19) o'clock.

Clause F.

Day rates will be paid yardmen on assignments beginning as follows:

	Where time for meals is deducted.	Where time for meals is not deducted.
8-hour assignments		6.30K and 11.00K
9 hour assignments	6.30K and 9.00K	6.30K and 10.00K
10-, 11- or 12-hour assignments ..	6.30K and 8.00K	6.30K and 9.00K

Yardmen starting their assignments at other periods will be paid night rates.

RULINGS OF COMMISSION OF EIGHT.

ARTICLE 3.

Question 15: "Paragraphs (a) to (d) inclusive. Are paragraphs (a), (b), (c) and (d), Article 3, optional or mandatory on the part of the companies?"

Answer: "Said paragraphs are mandatory."

Question: "What is starting time for two (2) nine (9) hour shifts in continuous service?"

Answer: "Where two (2) nine (9) hour shifts are worked in continuous service, the starting time will be governed by Article 3, paragraph (d).

ARTICLE 4.

Clause A.—Piloting.

When pilots are required within yard limits, yardmen will be used and will receive foreman's pay. Yardmen will not be used outside of yard limits as pilots.

Note.—Yardmasters and assistant yardmasters may be used in cases of extreme emergency.

Clause B.—Transfer, construction, maintenance of way, and work service.

Yardmen will do all transfer, construction, maintenance of way and work train service exclusively within switching limits, and will be paid yard rates

for such service. Switching limits to cover all transfer and industrial work in connection with terminal.

Clause C.—Work other than that to which assigned.

Yardmen assigned to other than their regular duties will be paid the established rate for the service performed, but in no case shall the yardmen so assigned be paid less than on the basis of their regular rates.

Clause D.—Held off on company's business.

Yardmen held off on company's business or by order of the company's officials will be paid at schedule rates of pay and actual reasonable expenses while away from home. If they are required by the company to attend coroner's inquests, court cases, or other public investigations, they will be compensated as above. In such case the witness fees to go to the company.

ARTICLE 5.

Booking rest.

Yardmen will have the right to book rest after twelve (12) hours' service.

ARTICLE 6.

Time not allowed.

Yardmen will be advised at once in writing trrough the proper officer of the reason, if mileage of time claimed is not allowed in full. In case time is disputed, the mileage or time not in dispute will be paid in the current pay-roll.

ARTICLE 7.

Clause A.—Consist of yard crews.

A yard crew shall consist of not less than a foreman and two helpers, except where special arrangements are made by the general superintendent and the general committee.

Clause B—Laying off.

Yardmen regularly assigned who wish to lay off will give the yardmaster at least three hours' notice.

Clause C.—Spare yardmen.

Spare yardmen not called in order of their seniority will be paid a day's pay for each day not called.

Clause D.—Called and not used.

Yardmen who do not hold regular work will be called when required for duty, and, if called, and no service is performed, they will be paid for at least eight (8) hours at yardmen's rates. The senior spare yardman will be called.

Clause E.—Leave for spare yardmen.

Spare yardmen will be considered available for service unless leave of absence has been granted. In such cases they must notify the general yardmaster in writing when they are again ready for service.

Clause F.—Trainmen doing yard work.

Where no spare yardmen are kept, spare trainmen will be called, as per Rule 28 of Trainmen's Schedule to fill vacancies in yard.

ARTICLE 8.

Clause A.—Promotion.

The promotion of yardmen in their respective yards will be according to seniority and ability. Any yardman refusing promotion to position of foreman, or failing to qualify for such position, will thereafter rank junior to the man or men promoted ahead of him except that he will retain his seniority standing as a helper. Senior men to have preference for day work. Any man not promoted, or failing to qualify for promotion, will be promptly advised in writing by the general yardmaster the reason therefor.

Clause B.—Bulletining positions.

All positions shall be bulletined, and yardmen will have preference to assignments according to seniority. A man accepting assignment will hold same (unless conditions of assignments or hours are materially changed by the company) until he can move to fill a vacancy or accept a newly created position.

Note.—It is understood that vacancies of seven (7) days or less will not be bulletined, but will be filled by the senior yardman applying for same until such time as regular man returns to duty.

Clause C.—Appointing assistant yardmaster.

In appointing assistant yardmasters, selection will be made from the yardmen in their respective yards. Senior men will be given preference, but ability will govern in all cases. A yardman accepting appointment as assistant yardmaster will not lose his seniority standing as a yardman.

Clause D.—Leaving service.

Yardmen leaving the service of the company of their own accord forfeit all seniority rights.

Clause E.—Extended leave.

Yardmen will not be granted leave of absence for a longer period than six (6) months, except in case of sickness.

ARTICLE 9.

Clause A.—Discipline or dismissal.—Notice of appeal.
—Charges made against yardmen.

All accidents shall be investigated and yardmen may be held off not exceeding three (3) days for this purpose. Evidence of all parties concerned shall be taken and no yardman shall be disciplined until his case has been investigated, and if not satisfied with decision rendered he will be given an opportunity to review the evidence, and may appeal to the superintendent, and through his representative to the higher officials.

Notice of appeal to be served in writing on the superintendent within twelve (12) days.

Yardmen charged with offences involving discipline or dismissal will be advised the nature of such offences, and may have the assistance of a fellow employee at any and all investigations; when found blameless, will be paid for time lost at schedule rates. When a charge is laid against a yardman, said yardman may have the privilege, if desired, of meeting party or parties making the charge face to face in the presence of an officer of the company. It is understood that the investigation will be held as quickly as possible, and men will not be held off unnecessarily. Yardmen will be furnished with copies of their statements at the time of signing same.

Clause B.—Certificate of service.

When a yardman is discharged or resigns, he will, as soon as possible be paid and given a certificate on request, stating time of service, and in what capacities he was employed.

Clause C.—Fines.

No fines will be imposed on yardmen.

ARTICLE 10.

Seniority lists.

Yardmen shall have access at all times to seniority lists, to be posted in a convenient place, which will contain a correct list of all yardmen, and their age in the service. A new list will be posted every three (3) months.

ARTICLE 11.

Disabled yardmen.

Yardmen disabled in company's service will, as far as practicable, be given preference in filling vacancies as switch benders, signal operators, tower men, crossing flag men. Where a yardman's injuries are such as will not prevent him from taking a position as passenger brakemen or baggageman, he will be given preference to such service when vacancy occurs, if no disabled roadman requires it.

ARTICLE 12.

Working on construction lines.

Canadian Northern yardmen compelled to work on construction lines will be governed by rules and rates of pay governing yardmen on the Canadian Northern Railway.

ARTICLE 13.

Discharged and not re-employed within six months.

Men who are discharged and not re-employed within six (6) months will be regarded as new men, except that a man who has been discharged for more than six (6) months may be reinstated when such action has been sanctioned by the general superintendent and the general committee.

ARTICLE 14.

Relief and transportation for grievance committee.

Members of grievance committee will be relieved when required for committee work, and will be furnished necessary transportation. Sufficient notice must be given general yardmaster so that service will not suffer.

ARTICLE 15.

Clause A.—Condition of engines.

Yardmen will not be compelled to work with any engine that is not properly equipped with foot-boards, grab-irons, headlights, and automatic couplers, nor with an engine that blows steam, obstructing the observation of signals.

Note.—Foot-boards will be free of ice at beginning of each trick.

Clause B.—Shelters.

At points where two (2) or more yard engines are employed, suitable shelters will be provided to accommodate the number of yardmen employed, and will be equipped with lockers.

ARTICLE 16.

Coupling or uncoupling hose and chaining cars.

Yardmen will not be required to couple or uncouple air or steam hose on cars or chain up cars in yard or on repair tracks where carmen are employed.

ARTICLE 17.

Clause A.—Charge of incompetence.

A yard foreman making a charge of incompetence against a yardman shall report it in writing to the general yardmaster, and if said charge is sustained, after proper investigation, he will be furnished another man.

Clause B.—Discharged account past record.

No yardman will be discharged on account of past record after sixty (60) days from date of entering the company's service.

ARTICLE 18.

Clause A.—Loss of seniority if engaged in other service.

Yardmen entitled to regular work in yard service will lose their seniority standing after thirty (30) days' service in any other class of work, except by special arrangement with the approval of the superintendent and local committee, and in cases where yardmen accept positions with the Brotherhood of Railroad Trainmen.

Clause B.—Leave of absence account reduction of force.

Yardmen who are laid off on account of reduction of force will, upon requesting same, be paid and given leave of absence for six (6) months, and a letter stating the reason. Yardmen accepting leave of absence under this rule will keep superintendent or yardmaster advised as to their whereabouts, and superintendent or yardmaster will notify such yardmen by letter or wire when they are required. If not required for service at the end of six (6) months, leave of absence, when requested, will be extended.

Yardmen so notified will report for duty within fifteen (15) days, otherwise they will lose their seniority standing.

ARTICLE 19.

Clause A.—Work outside of yard limits.—Caboose for yard crews.

Yardmen will not be worked outside of yard limits in road service, only in cases of wrecks and washouts where no road crews are available. Yardmen performing special short runs outside of yard limits will be paid at yard rates. Nothing herein is to be construed as meaning that yardmen will not do switching at industries or transfer cars to and from a connecting road within a reasonable distance of the yard limits. Yardmen will be furnished with a caboose in transfer service, also on other extended runs justifying having same.

Clause B.—Seal records.

Yardmen will not be required to take seal records.

ARTICLE 20.

Taken out of service account imperfection ear or eye.

A yardman taken out of service on account of imperfection of sight or hearing will have an opportunity of re-examination in the presence of representatives of the company and organization, before an ear or eye specialist satisfactory to both parties, and if the specialist finds his sight or hearing to be within the requirements of the Board of Railway Commissioners he will be re-instated and paid for time lost.

ARTICLE 21.

Interpretation of schedule.

Any question of interpretation of this schedule which may arise will be taken up by the general committee with the assistant general manager, and if not adjusted, may be appealed to the higher officials.

ARTICLE 22.

This schedule will constitute an agreement between the Canadian Northern Railway Company and its yardmen and shall not be changed or abrogated without the approval of the assistant general manager and the trainmen's general committee, and not then until thirty (30) days' notice in writing has been served by the party desiring the change on the other party thereto.

.....
For the Company.

.....
For the Yardmen.

Approved:

.....
Vice-President, B. of R. T.

(As intimated, the above report was of an interim character. Only two points, however, remained to be dealt with in the supplementary or final report. This report was received shortly before going to press, and indicated agreement between the members of the Board as to the points at issue. The points related to (a) claims for compensation for time lost made by two employees who had been dismissed and later restored to their positions; and (b) a claim for through freight rates for the crew on a passenger train on which a flanger was operated. In the former case the Board expressed the view that the employees claims were justified, and in the latter that the crew in question was not entitled to through freight rates.)

INDUSTRIAL DISPUTES DURING MARCH, 1918

EIGHT strikes, affecting 659 workpeople, were reported as having commenced during March. There were in existence at some time or other during the month 13 strikes, directly affecting 1,008 employees. The total time loss on account of industrial disputes was estimated at 8,276 working days, as compared with 44,152 in February and 67,777 in March, 1917. The time loss occasioned by the eight strikes which began in March was 5,670 days, while a loss of 2,606 days is charged to the five strikes which commenced prior to March. Termination of dispute was reported in the case of two of the disputes commencing prior to March and five of the disputes commencing during March, leaving the six following unsettled strikes, affecting 313 workpeople, on record March 31: plumbers and steamfitters, St. John; machinists at Montreal; carpet weavers at Peterborough; metal polishers at Weston; moulders at Galt; hotel and restaurant employees at Calgary.

INDUSTRIAL DISPUTES, MARCH, 1918.

Industry or occupation	Particulars	No. of employees affected	Time loss in working days
	DISPUTES COMMENCING PRIOR TO MARCH, 1918		
MINES, SMELTERS AND QUARRIES— Coal mine employees, Rosedale Mine, Rosedale, Alta.	Commenced February 2, 1918. Employees of Rosedale Coal and Clay Products Co. demanded recognition of Union. Employees in fifteen other mines ceased work in sympathy on February 4 but returned to work February 26. Employees at Rosedale Colliery resumed work on March 6. Dispute adjusted through efforts of Director of Coal Operations.	220	880
BUILDING AND CONSTRUCTION— Plumbers and Steamfitters, St. John, N.B.	Commenced April 23, 1917. Demand for an increase in wages. Unterminated March 31.	12	312
METALS, MACHINERY AND CONVEYANCES— Moulders, Galt	Commenced May 17, 1917. Demand for nine-hour day. Unterminated March 31,	10	260
Metal Polishers, Weston,	Commenced February 12, 1918. Against reduction of wages. Unminated March 31.	33	858
MUNICIPAL EMPLOYMENT— Civic firemen, Edmonton	Commenced February 1, 1918. Protest against action of city council in the matter of the appointment of new chief of fire department. Matter referred to ratepayers by plesbiscite and firemen's protest upheld. On March 6, the firemen resumed work under chief appointed from fire department.	74	296
	DISPUTES COMMENCING DURING MARCH, 1918.		
MINES, SMELTERS AND QUARRIES— Coal Mine employees, Coalspur,	Commenced March 1. Demand for increase in wages for tipplemen Referred to Director of Coal Operations. Increased rate not granted Work resumed March 11.	85	680
BUILDING AND CONSTRUCTION— Bridge, structural and ornamental iron workers, Winnipeg.	Commenced March 1. Demand for increase in wages. Negotiations. Increase granted. Work resumed March 6.	26	104
METALS, MACHINERY AND CONVEYANCES— Stationary Engineers, Regina	Commenced March 5. Demand for standard rate of wages and an eight-hour day. Demands granted following negotiations. Work resumed March 12.	17	102
Boilermakers, heaters and helpers, (oil refinery) Regina.	Commenced March 18. Demand for increase in wages and a nine-hour day. Increased rate granted following negotiations. Work resumed March 30.	48	576

TEXTILE— Carpet weavers, Peterborough	Commenced March 5. Demand for increase in wages. Unterminated March 31.	15	345
TRANSPORTATION— Freight handlers (G.T.R.), Toronto	Commenced March 1. Demand for increase in wages. Work was resumed on March 14. Strikers accepting increase somewhat less than that demanded.	225	2,362
MISCELLANEOUS— Hotel and restaurant employees, Calgary	Commenced March 25. Increased wages and recognition of union. Unterminated March 31.	200	1,200

REPORTS OF EMPLOYMENT BUREAUS

THE steady decline in the demand for workers noted in the past four months was less pronounced in February. During the month there was a decrease not quite 1 per cent, as compared with January, on the basis of the daily average of vacancies notified to 110 employment bureaus (76 commercial, 18 public and 16 philanthropic). As compared with the demand reported for February of last year by practically identical bureaus, there was a decrease of 3.6 per cent. The total number of vacancies notified to all offices in February was 24,294, a daily average of 1042.5, as compared with 1051.9 in January and 1081.7 in February, 1917. The number of persons placed was 11,915, a daily average of 504.7, as compared with averages of 546.6 and 615.2 in the previous month and February of last year. The proportion of the total vacancies filled to the total vacancies notified was 48.4 per cent, as compared with percentages of 51.9 in January and 56.8 in February, 1917.

As to employment for woman and girl workers, the number of vacancies notified was 5,018, a daily average of 214.0, as compared with 187.0 in January and with 296.2 in February, 1917. The number of such workers placed was 1,880, a daily average of 80.5, as compared with 75.1 in the preceding month and with 105.1 in the corresponding period in 1917. The proportion of vacancies filled to vacancies notified for men and boys was 52.1 per cent, and for women and girls 37.4 per cent, as compared with 57.3 per cent and 40.7 per cent, respectively, for January, and with 56.3 per cent and 35.9 per cent, respectively, for February of a year ago.

Of the five principal centres of labour distribution—Montreal, Toronto, Winnipeg, Edmonton and Vancouver—Montreal, Edmonton and Vancouver showed increases in the demand for labour both as compared with January and with February, 1917. Toronto reported a very small increase as compared with January, and a decline in comparison with February of last year, while at Winnipeg decreases were recorded in both cases.

The number of persons who obtained casual employment through the Salvation Army, the Young Women's Christian Association and other agencies was 2,025, a daily average of 85.0, as compared with averages of 71.7 in January and 65.1 in February of last year. The number of casual jobs secured was 4,184, a daily average of 176.6, as compared with 180.5 in the preceding month and with 154.9 in February, 1917.

EMPLOYMENT FOR CIVIC EMPLOYEES IN SIXTEEN CITIES

REPORTS from 16 cities showing the number of workers temporarily engaged, and the wages paid these employees, during the first pay-roll period of two weeks in March, indicated decreases of about 9 per cent in the number of workers, and of nearly 6 per cent in the wages paid. In March, 10,245 persons were employed temporarily, and the pay-rolls amounted to $314,861.86, as compared with 11,293 employees, and an aggregate pay-roll of $333,630.00 in February. Halifax, St. John, Ottawa, Winnipeg, Brandon, Moose Jaw and Calgary all showed increases, both in the number of workers and in the wages paid. Toronto, London, Vancouver and Victoria reported smaller numbers of employees and smaller pay-rolls. Montreal, Regina and Edmonton recorded fewer employees but larger pay-rolls, while at Hamilton more men were engaged with a smaller pay-roll.

The accompanying table summarizes reports from the nine cities for which returns are available since July, 1916. The table shows that as regards the number of workers, a decline began in January, 1917, and continued almost without interruption to November. In December, January and February, however, an upward tendency is evidenced, and this continued in March. As to wages, the total for last month is the largest reported since September, 1916.

EMPLOYMENT (BOTH CONTRACT AND MUNICIPAL WORK) AFFORDED WORKPEOPLE TEMPORARILY EMPLOYED BY SIXTEEN CITY CORPORATIONS, FEBRUARY AND MARCH, 1918

EMPLOYMENT IN THE BUILDING TRADES AS INDICATED BY BUILDING PERMITS

EMPLOYMENT in the building trades, as indicated by the value of building permits issued in 35 cities, showed a substantial increase during March as compared with the previous month, the total value of permits rising from $901,933 in February to $2,133,781 in March, an increase of $1,231,848, or 136.6 per cent. Alberta was the only province to record a decline, and large gains were made in Saskatchewan, Manitoba, Ontario and Quebec. As compared with the corresponding month of 1917, there was a decline of 13.3 per cent, the value for March, 1917, being $2,461,162. In this comparison, gains were shown in Nova Scotia, Saskatchewan, Alberta and British Columbia.

ESTIMATED COST OF BUILDING WORK AS INDICATED BY BUILDING PERMITS ISSUED IN THIRTY-FIVE CITIES

Of the larger cities, Toronto and Vancouver recorded gains both as compared with February, 1918, and with March, 1917. Montreal-Maisonneuve and Winnipeg reported increases in comparison with the preceding month and declines as compared with March of last year. Of the smaller centres, Sydney, Fort William, Ottawa and Regina all showed considerable increases in both cases.

PRICES, RETAIL AND WHOLESALE, IN CANADA, MARCH, 1918, AND IN OTHER COUNTRIES

IN prices, there were slight advances in nearly all lines of staple foods with decreases in eggs and potatoes. Anthracite coal showed some declines, while hardwood advanced. Grain, hay, livestock and meat were higher, as well as some materials.

In retail prices, the average cost per week of a family budget of staple foods in nearly 60 cities rose to $12.65, as compared with $12.54 for February, $10.70 for March, 1917, and $7.68 for March, 1914. The only declines were in eggs and potatoes, while there were slight increases in nearly all the 29 articles included. In fuel and lighting, hardwood and coal oil were up, while anthracite coal was slightly lower.

The index number of wholesale prices rose to 269.2 for March, as compared with 263.5 for February, 270.6 for March, 1917, and 136.0 for March, 1913. The chief increases for the month appeared in the groups: Grains and Fodder, Animals and Meats, Building Materials, but there were increases also in Textiles, Metals and Implements, and Miscellaneous, while there were decreases in Dairy Products, Fresh Fruits and Vegetables, and in Hides, Leather, Boots and Shoes, Drugs and Chemicals. As compared with March last year, the only decreases appeared in the sub-group "Other Metals," and in Fresh Fruits and Vegetables.

The weekly budget for a family of five, including staple foods, laundry starch, coal, wood and coal oil, and rent, is based upon the estimated importance of the various commodities included, these being slight modifications of those employed in similar calculations by various official bodies. For some articles comparatively large quantities are included, owing to the omission of other important foods of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. As market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly the relative proportion of expenditure on the various foods therefore tends to be maintained. In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the difference in quality. It is estimated that these calculations represent from 60 to 80 per cent of the expenditure of an ordinary family, according to the total income.

The index number of wholesale prices is based upon the quotations of 271 commodities, one having been dropped in 1915, and is the simple average of the percentages which the current prices of the several commodities bear to their average prices for the base period, 1890-1899, these being therefore made equal to 100.

The accompanying tables and notes give details as to the prices movement during the month and as compared with the same month in the previous year. The table of retail prices shows the prices of some 30 foods at the middle of the month in 60 localities in Canada having a population of 10,000 or over. Quotations are obtained by the correspondents of the *Labour Gazette* from dealers doing a considerable trade with workingmen. All

*December only. †Saskatoon omitted.

prices are for delivered goods. The rates for rent are for six-roomed houses in districts occupied by workingmen .

Retail Prices

Beef advanced in several of the cities, chiefly in Western Canada. Mutton and veal declined slightly in a few of the cities, but were upward in others. There were several advances in pork and bacon. Prices of fish were lower in some localities, but were higher in others, while in lard there were many advances.

Eggs declined in many of the cities, but storage eggs were off the market in many localities. Milk declined only in Peterborough, Ont. Butter was comparatively steady, there being increases in several cities and decreases in only three or four.

Bread advanced at Three Rivers, St. Hyacinthe, St. John's, Hull, Brantford, Woodstock, Winnipeg, Brandon, Edmonton and Fernie. Flour was higher in many of the cities. Rolled oats also showed some advances. Rice advanced, but tapioca was almost unchanged.

Canned tomatoes, peas and corn were steady. Beans advanced in one city, but declined in two. Evaporated apples were higher in several of the cities, prices exceeding 25c per pound in many localities. Sugar, tea and coffee were steady.

Potatoes advanced at Halifax, St. John, Niagara Falls, St. Catharines, Brantford, St. Thomas, Chatham, Regina and Moose Jaw, but declined at Toronto, Charlottetown, Fredericton, Newcastle, Three Rivers, Sorel, Hull, Belleville, Peterborough, Chatham, Windsor, Cobalt, Winnipeg, Calgary, Fernie, New Westminster and Vancouver.

Anthracite coal declined at Quebec, Charlottetown, St. John's, Brockville, Belleville, Stratford, but advanced at Three Rivers, Orillia, Toronto, St. Catharines, and Cobalt. Bituminous coal showed only slight changes. Hardwood was higher in Hull, Ottawa, Kingston, Belleville, Peterborough, Orillia, Brantford, London, Port Arthur and Fort William. Soft wood was also higher in several of these localities.

Rents advanced at St. Thomas, Three Rivers, Truro, but in several localities leases were being made at higher rates than before for the next twelve months.

Wholesale Prices.

Grains and fodder. — Wheat was steady at the prices fixed in 1917. Barley rose to $1.98 per bushel at Winnipeg, but fell to $1.70. At Toronto, barley was up to $1.85, but fell to $1.80. Oats rose to 98¾c at Winnipeg and to 98c at Toronto. The Board of Grain Supervisors fixed the price for delivery in May and this tended to steady the market. At the end of the month the price was down to 94c. American corn rose to $2.05 at Toronto. Flaxseed rose to $3.97, but eased off 15c. Peas were down to $3.60-3.70, a drop of 10c. Rye advanced from $2.25 to $2.50. Hay was up to $17.00 per ton at Montreal for No. 2 and also advanced $1.00 at Toronto.

Animals and meats.—At Winnipeg, the best butcher cattle rose to $12.00 per hundred, a rise of 50c. At Toronto, the highest grade reached $12.75 at the end of the month. Dressed beef, hindquarters, was slightly easier at $20.00-22.00, as compared with $22.00-23.00 the month before. Forequarters, however, had fallen from $16.00-18.00 to $16.00-17.00 in February, but recovered to $16.00-18.00 in March. Hogs rose to $19.50-19.75 per hundred at country points in Ontario. Dressed hogs rose to $25.00-26.00. Ham advanced to 33-34c per pound. Lard rose to 30-31c per pound. Sheep continued at $14.50, but mutton advanced to $20.00-22.00. Fowl was down to 24-30c, and turkeys were steady at 35-36c at Montreal.

Dairy products.—In butter, the finest grade at Montreal declined from 51c to 48½c per lb., but rose to 49c. At Toronto, creamery butter reached 48-49c at the end of February and 49-50c at the middle of March, while dairy butter rose from 32-41 to 38-42c. Fresh eggs were down from 65c per dozen to 55c at the

*Preliminary figures. †Nine commodities off the market, fruits, vegetables, etc. One line of spelter was dropped in 1915.

beginning of the month and by the last week were down to 47c. Storage eggs declined to 38-40c in the second week and were then off the market at Toronto. Prices of milk at Montreal, Toronto and Victoria were unchanged in March, but the producers set the same price for the summer months as in the winter, the prices being much higher than the year before.

Fish.—The market for dried fish at Halifax was firmer, as prices were higher in the West Indies. Supplies of salt fish were exhausted and new supplies were not expected for about two months. The export of lobsters to Boston was reported to be curtailed by the lack of shipping.

Fruits and vegetables.—Apples were down $1.00 a barrel for No. 1 fruit at Toronto, being quoted at $4.50-6.00. Bananas, lemons and oranges were slightly higher. Prunes were also up. Potatoes were down to $1.90-2.10 at Toronto and to $1.55 at Montreal. Onions were down to $1.00 per hundred. Canned peas and tomatoes were slightly higher.

Miscellaneous foods.—Rice advanced to 8½c per pound. Glucose was 20c per hundred higher. Barbados molasses rose to 96c per gallon for choice.

Textiles. — Washed wool rose to 80-85c per pound at Toronto, and unwashed wool to 58-63c. Raw cotton was up to 33.65c per pound. Grey cottons and prints were also higher. Japan silk rose to $5.60 per pound. Spool silk was up to 48c per dozen. The price of jute and hessians was unchanged. Owing to restrictions on shipments, prices were only nominal.

Hides, leathers, boots and shoes. — Beef hides declined to 12c per pound, but horsehides were slightly upward at $5.50-5.60 each. Tallow was also up 1c to 14-15c per lb. In some lines of leather and boots in which there were large stocks, prices were easier.

Metals and implements.—Tin plates were lower, but wrought iron scrap was higher. Aluminium was down to 32c per pound at New York, having been fixed by the United States Government. Tin advanced to $1.00 per pound. Axes and coil chains were higher.

Fuel and lighting.—Prices were steady at the same levels reached in February.

Building materials.—New Brunswick spruce deals advanced to $27.00 per thousand and shingles rose to $4.40-4.65. Pine rose about $3.00 per thousand at Ottawa. At Toronto, No. 1 pine and hardwoods advanced about $10.00 to $12.00 per thousand. At Victoria, B.C., lumber rose about $3.00 per thousand. Brick advanced $1.00 per thousand at Toronto. Fire brick rose from $70.00 per thousand to $80.00. Cement, plaster of Paris, pitch, sash weights and wire fencing advanced, but hinges were down. Putty, white lead, linseed oil, Venetian red and window glass advanced, but turpentine declined.

House furnishings.—Celluloid and bone-handled knives were very scarce and difficult to obtain as well as high in price, being practically off the market. Wooden pails and tubs were higher, while brooms also advanced.

Drugs and chemicals. — Brimstone eased off ¼c per pound. Caustic soda was down to 9½c. Muriatic acid fell from 8c per pound to 7c.

Miscellaneous.—Muskrat skins rose to 75-85c each. Malt advanced to $2.30 per bushel. Ground wood pulp was slightly easier. Binder twine advanced to 23½c for the best grade. Laundry soap advanced to $7.25 per box.

Prices in Other Countries

In the United Kingdom, the retail prices of food averaged slightly lower at the first of March than a month before, eggs and butter having declined nearly two per cent. While food prices, weighted according to pre-war consumption, appeared more than twice as high as before the war, and the increase in prices of other items would make the general increase in the prices of supplies for a workingman's family 90 per cent, it was estimated by the Ministry of Labour that,

a July of each year. *b.* Foods. *c.* 1901-1000—. *Quarter beginning that month.

owing to the reduction in the consumption of some articles and the substitution of cheaper foods, the average expenditure on foods had increased by only 45 per cent over July, 1914. Rents were reported nearly unchanged. In wholesale prices the index numbers of the *Economist* and the *Statist* showed increases at the end of February.

In the United States, the Bureau of Labour Statistics reported in its Monthly Review for March that the retail prices of foods were higher in December, 1917, than in November. In wholesale prices, the index numbers of Dun and Bradstreet were higher at the first of March. Butter, eggs, hides, leather, naval stores, drugs and chemicals were lower, but increases were reported in other lines.

In France, the General Statistical Office reported the retail cost of food in French cities over 100,000 in population, not including Paris, to be 84 per cent higher in the third quarter of 1917 than in 1914. In Paris, food prices in October, 1917, were 84 per cent higher than in 1914. Both calculations were based on pre-war family budgets.

In Norway, the Department of Social Affairs reported the expenditure of a family in November, 1917, to be 1 per cent higher than in October, but 128 per cent higher than in July, 1914, food being up 130 per cent, fuel 725 per cent, lighting 108 per cent, clothing 194 per cent, and rent 10 per cent.

In Switzerland, the Swiss League for Reducing the Cost of Living reported the general level of retail food prices on Dec. 1, 1917, to be about the same as three months before, but 90 per cent higher than on June 1, 1914. Other necessaries rose about 2.8 per cent from September to December and were 97.4 per cent higher than on June 1, 1914.

In Portugal, the Ministry of Labour and Social Affairs reported its index number of the cost of living, based on the retail prices of 30 commodities in 1913, to be 165.0 in June, 1917, as compared with 158.3 in January, 1917, for Lisbon; and, for Oporto, 184.6 in June, as compared with 148.6 in January, 1917.

In Japan, the index number of the *Oriental Economist,* Tokyo, was reported to be 193.5 for January, 1918, as compared with 181.3 in December, 1917, and 140.0 in February, 1917.

LABOUR LAWS ENACTED OR IN PROSPECT DURING 1918

THE 1918 sessions of the legislatures have come to a close in the provinces of Quebec, Ontario and Manitoba, with Manitoba well to the fore in the labour legislation record for the year. The new Minimum Wage Act of that province is important as being the first of its kind in Canada. The Act provides for the appointment of a Board with power to make orders as to minimum wages, hours of employment and conditions of labour for female employees in mail order houses, shops and factories in any city of the province. By the enactment of an Employment Bureau Act, Manitoba becomes the fourth province to provide for provincial employment offices. Quebec was the pioneer in this field with the Act of 1910—"An Act Respecting the Establishment of Employment Bureaus for Workingmen." In the Trades and Labour Branch Act of 1916, the Ontario Government required the new branch to "establish and maintain in the various centres of population throughout Ontario employment bureaus and similar agencies for obtaining suitable employment for workingmen." The Government of the Province of British Columbia inserted a similar clause in the Act which created the new Provincial Department of Labour in 1917. The Manitoba act charges the new bureau with the establishment of employment offices at Winnipeg and such other places as may be designated by order-in-council. The service is to be entirely

free and the offices are to be strictly neutral in trade disputes. The act will come into force on proclamation by the Lieutenant-Governor-in-Council.

An amendment to the Fair Wage Act of Manitoba provides for the meeting of the Board in March instead of July. It is hoped that the holding of the meeting at the beginning rather than in the middle of the building season will save the industry from much of the unrest which accompanies the promulgation of new wage schedules. The Shops Regulation Act has been amended to include "fruiterers" and "confectioners," and any store selling groceries may now be required by municipal by-law to close at the same hour as stores wherein the principal or only trade is that of a grocer. Sections 39 and 41 of the Manitoba Factories Act dealing with the reporting of accidents have been replaced by new sections. Under the act as it now stands, accidents must be reported within 24 hours instead of within six days as formerly, and notice of fatal injury must be given immediately instead of within 24 hours.

The Ontario Factory Act has also been amended. The application of the principal act has been extended, and the sections permitting the employment of children in fruit canning and authorizing the employment of women in canning factories to a later hour than 6.30 in the evening have been repealed. The amending act also contains new provisions respecting sanitation, guarding of machinery, and boiler inspection. Another Ontario statute has in view the protection of the civil rights of railway employees. It enables those railway employees who expect to be absent, by reason of their employment, on a municipal election day, to vote before the regular polling day.

In Quebec the two bills noted in the February issue of the *Gazette* (p. 65) have become law. One of these increases the maximum amount of compensation payable under the Workmen's Compensation Act on account of fatal accidents from $2,000 to $2,500, and advances the maximum amount upon which compensation for injury is calculated to $2,500. The other act provides for a weekly day of rest for employees in hotels and certain other establishments.

A number of labour laws are under consideration by the provincial legislatures still in session at the date of writing. A bill before the Nova Scotia Legislature empowers municipal councils to pass by-laws regulating the hours for closing shops and directs that, upon being presented with a petition, signed by at least 60 per cent of the occupiers of shops of any class, asking for a by-law requiring the closing of shops of such class, a municipal council must give effect to the petition within one month. Another bill aims at the establishment of an eight hour day for the coal miners of Nova Scotia. A number of changes in the Workmen's Compensation Act have also been proposed, the most important being the repeal of section 4, which authorizes the substitution of other schemes of compensation under certificate from the Board, in the industries carried on in Cape Breton Island by the Dominion Steel Corporation and the Nova Scotia Steel and Coal Company. Another Nova Scotia bill deals with the examination of stationary engineers and with the issue of certificates of competency to such engineers.

At the time of writing, the proposed new Workmen's Compensation Act of Alberta was under discussion in the House. As it was first submitted to the legislature the bill embodied certain features radically different from the compensation laws now in force in the provinces of Ontario, Nova Scotia, Manitoba and British Columbia. For example, the amount of the periodical payments for death and permanent total disability must not exceed in the whole $2,500, whereas in the other provinces mentioned no limits are stated. As to permanent partial disability the Act specifies 10 different accidents and names the amount of compensation in each case;

for example,—"for the loss by separation of one arm at or above the elbow joint or the permanent or complete loss of the use of one arm, $1,000." In the other acts mentioned, no amount is stated, the section reading in each case—"the compensation shall be a weekly payment of 55 per cent of the difference between the average weekly earnings of the workman before the accident and the average amount which he is earning or is able to earn in some suitable employment or business after the accident and the compensation shall be payable during the lifetime of the workman." The act is to be administered by a commission and a separate accident fund is to be provided for each schedule of industries by assessments on all employers in the schedule. A boilers act, replacing former legislation on the subject, is also before the Alberta legislature.

Several important bills have been introduced in the British Columbia legislature, a number of which are concerned with hours of labour. One bill proposes the establishment of an eight hour day in all industries where the hours of labour are not already regulated by law, while bills to amend the Coal Mines Regulation Act and the Metalliferous Mines Inspection Act have in view the extension of the provisions regarding an eight hour day, already in force with respect to work under ground, to work above ground, at or about any coal or metalliferous mine. A further amendment to the Metalliferous Mines Inspection Act aims at the protection of workmen by the prevention of rockdust. The Minimum Wage Act introduced by the Minister of Labour is similar in principle to that enacted by the Manitoba legislature, although more limited in scope. A bill requiring an education test for all persons employed in dangerous industries, such as coal mines, powder-works, etc., is also under consideration.

At the time of writing there had been introduced in the Dominion Parliament legislation of labour interest as follows: An act to aid and encourage the organiation and co-ordination of employment offices; An act to amend the Industrial Disputes Investigation Act, 1907; An act to provide compensation where employees of His Majesty are killed or suffer injuries while performing their duties. The "Employment Offices Co-ordination Act" provides that $50,000, $100,000 and $150,000 shall be paid over to the provincial governments in the fiscal years 1918-19, 1919-20 and 1920-21, respectively, and $150,000 annually thereafter, in the proportion which their expenditure for the maintenance of employment offices bears to the total of the expenditure of all the provinces for such purpose, the allotment to a province in no case to exceed the amount expended by the province. The payments are made conditional upon an agreement between the Minister of Labour and the government of the province as to the terms and purposes for which the payments are to be made. The bill which proposes to amend the Industrial Disputes Investigation Act provides among other things that the Minister of Labour may refer to a Board of Conciliation other matters than those appearing in the application for the Board if they have a bearing on the dispute. The Minister, where a dispute has been long continued, may on the application of any municipality or of his own motion without application of either of the parties to the dispute, establish a Board of Conciliation and Investigation. The bill involves no changes in the principle of the act, but has in view improvement in its administration. The bill for the compensation of federal employees provides that such employees shall be entitled to "the same compensation as the employee or as the dependent of a deceased employee of a person other than His Majesty would under similar circumstances be entitled to receive under the law of the province in which the accident occurred."

REPORT OF THE COMMISSION APPOINTED IN NEW BRUNSWICK TO INVESTIGATE WORKMEN'S COMPENSATION

THE Commission appointed in New Brunswick, January 3, 1917, to investigate the subject of workmen's compensation in the province (see issues of June, 1917, page 422, and August, 1917, page 572), has submitted its report to the provincial legislature. In the summer of 1917 the Commission made an interim report in which it asked for enlarged powers, and on June 22 the legislature passed "An Act to Aid and Facilitate the Work of the Commission to Inquire into the Working of the Ontario and Nova Scotia Workmen's Compensation for Injuries Acts." The text of the final report submitted under date of March 14 is as follows:

To His Honour
the Lieutenant-Governor in Council:

Your Honour,—

We have the honour to present to you the conclusions at which we have arrived with regard to the operation of a workmen's compensation law in this province.

The order-in-council of Jan. 3, 1917, authorized us to consider the operation of the Ontario and Nova Scotia acts, in their respective areas, in regard to their applicability to this province. This was enlarged by the legislative assembly at its last session, and further power given to us under chapter 35 of the acts of this province, passed in the present year of His Majesty's reign. The consideration of these acts necessarily led to a greater or less degree, to the consideration of other acts in Europe, Australia, New Zealand, the United States and South America.

Before proceeding to discuss these, it may be well to explain fully, in express terms, the common law liability, as between the employer and the employee. Under the common law the employer is liable to the employee for certain injuries sustained by him in the course of, or arising out of the employment. This principle of the common law was enforced against the employer, but subject to three defences, which may be stated as follows:

First: Negligence on the part of the employee.

Second: The doctrine of common employment, which shortly stated means that if one employee is injured by the act of a fellow employee, an action would not lie against the employer.

Third: What is called the doctrine of the assumption of risk, wherein the employee was assumed to know the hazard upon which he entered, and therefore by accepting money for his services he contracted himself out of the liability by the employer. That, we think, is the common law doctrine. This, however, was modified by the passing in England of Lord Campbell's act, which was re-enacted in this province and which may now be found in the Consolidated Statutes, chapter 79. The effect of this act was to vest in the heirs of the injured person the right of action against the employer. At common law the right of action died with the death of the injured man, this statute gave the right to the injured man's heirs to proceed against the employer. There is, therefore, the common law right to consider, which we may discuss in this way; the liability of the employer to the employee, subject to the defenses which we have suggested above, and enlarged by Lord Campbell's Act.

In the year 1884, legislation was implemented in Germany by which the common law doctrine of that country was varied, and the Workmen's Compensation Act was passed. This was followed by Norway in 1887, and successively by nearly all the European nations as time went on.

In point of fact there are forty-six nations or peoples in Europe and portions of the British Empire, as well as in South America, which have accepted the principle of workmen's compensation. Turkey is perhaps the one European nation which has not yet passed legislation of this kind. In America and Canada during the last seven years about forty acts have been passed which adopt the principle.

Let us consider this principle. It means that there shall be fastened upon the industry in which the workman is engaged the hazard of that industry. Or putting it still more broadly, the right of the workman to be compensated, and the liability of the employer to pass assessments of some sort in order to meet his liability. So that the modern doctrine would seem to run in this wise, that the industry which has caused loss to the individual, whether it be that of life or otherwise, should pay the loss. Or practically that the statutary law should restore to the individual the loss occasioned by the industry itself, and this proposition we venture to suggest for Your Honour's careful consideration.

It is admitted, and we believe it will probably be found to be true generally, that modern workmen's compensation costs more than the old plan of employer's liability, but on the other hand it confers larger benefits upon the employee, while it relieves the employer of a heavy personal liability. The material question to consider is the expense of doing business by way of a Government Commission. It has been found, broadly speaking, that the Commissions have transacted the business at much less cost than the insurance companies, and in this connection it is necessary to say that we believe the Government of the province should pay part of the expense of the Commission, probably all of its administrative expenses.

In the province of Ontario, where of course the income of the Commission is large, the cost has only run to about 4½ or 5 per cent of the assessment, whereas the ratio of expense of insurance companies is probably not less than 35 per cent. It is therefore clear that of the total amount collected by a Commission, a much larger amount is returned to the employee than is returned by the systems at present in force. One reason, and probably it is a sufficiently sound one, why the province should contribute to the expense, is that in some cases those who are left behind by the injured workman become a charge upon the public, and the assessment which is made under the workmen's compensation plan upon all industries does away with the possibility of these public charities, and the contribution should, therefore, be made partly by the public. This is true in all the provinces of Canada where the Commissions are in force, but on account of the short time they have existed in British Columbia, Manitoba and Nova Scotia, it is not feasible to give exact details of cost.

The Nova Scotia Act runs in this wise: Fifty-five per cent of the injured workman's wages is paid when he is incapacitated, and less in proportion to the injury when partially incapacitated. If death ensue, $20.00 a month to his widow until death or re-marriage, in the latter event two years' annuity and $5 a month for each child, but the latter not in all to exceed $20 a month, no matter how many children, until each attain the age of sixteen years.

A certain number of occupations are excluded in Nova Scotia by regulation, on account of the smallness of the number employed, or for some other reason. For those which are so excluded, the Common Law Rights are preserved. In cases where the statutary right to collect is given to the employee, the Common Law right of action and all other statutary rights are taken away.

On the practical side of the question, and accepting as we do the principle of workmen's compensation, we venture to say that the act of Nova Scotia is more nearly applicable to this province than

any other. Without wishing to criticize, and in fact not criticizing, permit us to say that the acts of British Columbia, Manitoba, Ontario and Nova Scotia are, in our opinion, too drastic to be applied in their entirety, in this small province, in fact in those provinces there is generally assumed liability, ended in some cases only by death of the workman, or his or her dependent, if the latter is a widow. While all of these acts may be open to question at one point or another, yet each has strong features, and after full consideration we suggest that an act along the lines of that of Nova Scotia, modified in some particulars but enlarged in others, be submitted by Your Honour's advisers to the legislative assembly of this province; strict provision being made:

1. To limit, by way of weekly or monthly payments, the amount payable to any one person, or his or her dependents, to $3,500. This suggestion varies radically the other acts, but we believe the limit should be fixed in the public interest.

2. That the Nova Scotia Act be again varied by a provision for first medical aid of a character to be determined by the Commission itself.

3. That a system of merit rating be adopted so that the rate of assessment to each employer will be fixed to some extent upon the record of his own particular business. And therefore if the record of any particular industry were especially good, it could be noted in a general consideration of all rates.

4. If it is possible that consideration be given to a scale of specified payments in lieu of the weekly or monthly one as above described in case of certain specified injuries.

5. That the act only apply to those whose employers have filed their payrolls as may be provided by the act, but that failure to comply shall leave the employer open to action at law, and that he should be placed under heavy penalty as well for such failure.

6. That in order to keep as close watch over each industry as possible, that the provisions of the Factory Act be extended so that it will be necessary for each engineer to have a certificate for the special industry in which he is engaged which shall set forth the date of his employment, and notice to be given to the Government of the termination of his engagement; in other words, the Government should know at all times where each engineer is employed.

7. That negotiations be entered into with the Medical Society of New Brunswick to fix, if possible, fees for first medical aid or for other services which may be rendered under the act.

8. That provision be made to include occupational or industrial diseases.

9. That the $5 monthly to be paid to each child be not limited to any number.

10. When an employee is paid more than $1,500 a year, the act shall only apply on that basis; to those who are paid less than $6 a week, full wages shall apply.

11. That the waiting period be fixed at seven days, no payment to be made for any part of this time, unless incapacitated for that period when compensation shall be paid from date of injury.

12. That provision be made to pay burial expenses in case of death of workman, the amount of which shall be limited in the act to a special sum.

We therefore recommend to Your Honour that an act be passed embodying the above suggestions; believing, as we do, that from an economic point of view, each industry should carry its own burden so that every human life which is jeopardized in the process of creating should be paid by the industry affected. In other words, that human life, human thought, human action which have been impaired by injury arising out of, or in the course of employment, should be repaid by the industry which has caused the loss, which therefore would carry the burden of debt to the individual, it would also thereby relieve the employer

in many instances of his present heavy liability.

There is enclosed herewith a copy of the testimony taken at the different sessions of the Commission, as well as tabulated statements of the pay-rolls of the province. We estimated that these represent about 70 per cent of the yearly wages of the province, but we think they establish sufficiently nearly the full commendation which we have the honour to submit herein.

amount to justify us in making the re-

Yours respectively,

(Sgd.) F. J. G. Knowlton,
Chairman.
(Sgd.) L. W. Simms.
(Sgd.) J. B. Cudlip.
(Sgd.) J. L. Sugrue.
(Sgd.) Fred. W. Daley.

GOVERNMENT CONTROL OF RAILWAYS IN GREAT BRITAIN IN RELATION TO RAILWAY EMPLOYEES*

TWO memoranda have been prepared in the Library of Congress at Washington for the United States Committee on Interstate Commerce relative to Government control of railways in Great Britain in its financial aspects and in relation to railway employees. The present article is based on the memorandum on Government control in relation to railway employees.

A brief review of labour conditions on British railways before the war shows that long hours and low pay prevailed. A Member of Parliament, in 1907, declared that a 15½ hour day for firemen and an almost 16 hour day for engine drivers were still usual. In 1893, an act was passed authorizing the Board of Trade to investigate any complaints of railway employees as to unduly long hours of work, but it does not appear to have been effective in improving conditions. No direct attempt to regulate wages of railwaymen was made by the Government, but in the settlement of a strike in 1911 it agreed "that an increase in the cost of labour due to the improvement of conditions for the staff would be a valid justification for a reasonable general increase in charges." In 1913, an act was passed establishing the principle that the financial burden of improvements in the conditions of railway labour shall be borne by the shippers rather than by the shareholders. There was, however, little improvement in the wages of the railwaymen between the settlement of the strike and the outbreak of the war, and they continued to rank with the lowest in the country. In 1907, a crisis arose through the refusal of the railway companies to consider certain demands made by the men for higher wages and shorter hours, and a general strike was only averted by the acceptance of a scheme of conciliation and arbitration proposed by the Right Hon. Lloyd George, at that time president of the Board of Trade. This scheme, which was in the form of an agreement signed by representatives of the railway companies and the unions and countersigned by representatives of the Board of Trade, is still in force in an amended form. Trouble broke out again in 1911, the men declaring that the machinery of conciliation was being used by the companies to put them off and delay the settlement of their grievances. They presented an ultimatum to the companies to meet the union representatives in a discussion of wages, hours, and other pressing questions. On the rejection of the ultimatum by the employers, a strike was declared and 200,000 men walked out. On the next day, August 19, the Right Hon. Lloyd George again successfully intervened by inducing the union leaders to agree to an inquiry into their griev-

*Government Control of Railways in Great Britain. Memoranda submitted to the Committee on Interstate Commerce, United States Senate, relative to the Government Control of Railways in Great Britain in its Financial Aspects and in Relation to Railway Employees. Washington, 1918.

ances by a Royal Commission, and the strike was called off. The findings of the Commission, particularly with regard to recognition of the unions, were not acceptable to the men, and although some concessions were made, their dissatisfaction revived and caused serious difficulties to the companies and the Government after the outbreak of the war.

Immediately on the declaration of war, the Government assumed control of all the important railways of Great Britain, under Section 16 of the Regulation of the Forces Act, 1871. The Government control is exercised through an executive committee composed of general managers of railways, one of whom is the deputy chairman and working head. The nominal chairman is the president of the Board of Trade.

The policy of the Government has been not to interfere with the conditions and terms of railway employment beyond what has been necessary in order to carry on the war. The Government, however, has taken some action in the matter of wages, conciliation schemes, etc, in order to prevent the crippling of the railway service through strikes. Part I of the Munitions of War Act, 1915, provides for compulsory arbitration through the Board of Trade for the prevention of strikes or lockouts "directly or indirectly prejudicial to the manufacture, transport, or supply of munitions of war." This part of the act, which has been held to apply to railways, is now under the jurisdiction of the ministry of labour, which was established on December 22, 1916.

The decrease in the supply of labour due to enlistment and drafting into the army, together with the increased traffic due to the transport of men and munitions caused a great lengthening of the average hours of labour, and on June 15, 1915, it was stated by the secretary of the National Union of Railwaymen in the House of Commons, that since the war broke out the men had been working 20, 30, 40 and up to 46 and 48 hours a turn, many becoming ill from overwork. Very little complaint was made by the men on account of the increased hours and overtime, but in the summer of 1917 the Associated Society of Locomotive Engineers and Firemen launched an eight hour movement, accompanied by a strike threat. This trouble was settled by the Government giving a pledge that the control of the railways would be retained for a time after peace was declared, so that if, on the cessation of hostilities, a request for a shorter working day for railwaymen were put forward, the matter could be dealt with during the continuance of that control, and that if this course were adopted any reasonable request for a shorter working day would receive sympathetic consideration.

It had been expected that the railwaymen would make demands for higher wages in 1914, and it was admitted on behalf of the companies that "no doubt the men would have received some concessions," but on the outbreak of the war they forebore to press any demands, and consented to postpone the consideration of the questions which they had already given notice of their intention to raise, in particular with regard to the machinery for conciliation. But the steady increase in food prices made the wage question a pressing one, and demands were made by the railwaymen for wage increases or bonuses, generally accompanied by an alternative proposal that the Government take some action to control the price of foodstuffs. On five occasions since the beginning of the war, wage concessions have been made to railwaymen engaged in the manipulation of traffic. On February 13, 1915, there was granted a weekly war bonus of 3s. to men earning less than 30s. a week, and 2s. to those earning 30s. or more. On June 11, 1915, a weekly bonus of 1s. 6d. was granted to boys 18 years of age or under. On October 13, 1915, the bonus was increased by 5s. to men, and 2s. 6d. to boys. On September 20, 1916, it was again increased by 10s. to men, and 5s. to boys. On April 12, a further increase was granted of 15s. to

men and 7s. 6d. to boys. Finally, on August 1, 1917, the bonus was converted into wages. Railway shopmen were also granted concessions as follows: In March, 1916, they received an increase of 3s. on their weekly wage with a corresponding piecework rate increase. In June, 1916, there was granted a further increase of 4s., and on September 20 a bonus of 5s. was added, which was increased to 10s. on April 12, 1917. On August 1, 1917, the bonus was converted into wages.

When women were first introduced into the railway service to replace men taken for the war, their wages were lower than what had been paid to the men, but after protests had been lodged against this both by the women and the men, an agreement was made by which the women were to receive the lowest men's pay for similar work. When the first bonus was paid to the men, the women demanded a similar bonus, but they were refused, and it was not until after the third bonus had been granted to the men that the first women's war bonus was granted, on November 11, 1916, amounting to 3s. for women over 18 years of age and 1s. 6d. for girls. On April 12, 1917, it was increased by 5s. 6d. for women and 2s. 9d. for girls employed in the transportation branches, with bonuses of 2s. 6d. for women and 1s. 3d. for girls in shops. On August 1, 1917, an increased bonus for shop workers was granted, amounting to 2s. for women and 1s. for girls, while the bonuses for other classes of women and girls were converted into wage increases.

Concessions were also granted to railway clerks similar to those granted to the main body of railwaymen. In September, 1917, their bonus amounted to 15s. a week, which was changed to an increase of £40 a year on salaries up to £400, and a 10 per cent increase on salaries between £400 and £500.

PROPOSED REFORM OF THE ENGLISH POOR LAW*

LAST July, a Local Government Committee was appointed by the British Minister of Reconstruction "to consider and report upon the steps to be taken to secure the better co-ordination of public assistance in England and Wales and upon such other matters affecting the system of local government as may from time to time be referred to it." The first report of the committee, dealing with the functions of Boards of Guardians and other Poor Law authorities, has been issued by the Minister of Reconstruction in order to enable the public to form a considered judgment upon the general problem of the co-ordination of public assistance in England and Wales, which is covered by the committee's recommendations.

A review of the present situation with regard to public assistance, as set forth in the report, shows a great deal of overlapping in the work of various public bodies. There are, for instance, seven different public authorities giving money in the home, and at least six provide various forms of medical treatment. Three give educational training, and five give aid to the able-bodied unemployed. The committee, in this report, have limited themselves to the overlapping of the Boards of Guardians, on the one hand, and the county, municipal and other health and education authorities on the other. The recommendations made by the committee may be summarized as follows:

The Boards of Guardians and the Poor Law Union should be abolished, and all the functions of the Poor Law authorities should be merged in those of the county council and the county borough council. Provision for the sick and infirm should be made by the council under public health acts suitably extended. Provision

*Ministry of Reconstruction. Local Government Committee. Report on Transfer of Functions of Poor Law Authorities in England and Wales. London: 1918. Price, 3d. 26 pp.

for all children able to attend school should be made by the local education authority under the education acts suitably extended. Provision for the mentally deficient, and for persons of unsound mind, whether certified or not, should be made by the council under the lunacy and mental deficiency acts, suitably extended, and through the committee or committees administering their powers under these acts. For the benefit of the able-bodied unemployed, there should be appointed by each county or county borough council a Prevention of Unemployment and Training Committee, including in its membership representatives of employers' associations and of organized labour. This committee should exercise the powers of the council as to (i) preventing unemployment so far as practicable, by procuring such a re-arrangement of the council's works and services as to regularize the local demand for labour; (ii) facilitating through the employment exchanges the finding of situations; (iii) making use of any form of educational training in co-operation as much as possible with the Education Committee; (iv) assisting migration; and (v) creating and administering, whether by themselves or in federation with other local authorities, any specialized provision of the kind required by the unemployed.

For the benefit of applicants for charitable aid, each county or county borough council should appoint a Home Assistance Committee formed on the lines of the Education Committee, which should be charged with (i) the duty of making the necessary inquiries into the economic circumstances of applicants for or recipients of any form of assistance in money, kind, or service, wholly or partly provided out of rates or taxes, eligibility for which is dependent on the pecuniary need of the person or family concerned, or for which payment is legally recoverable; (ii) general supervision of recipients of such assistance and their dependants; (iii) the administration of all such assistance in money or kind given in the home of the applicant; (iv) the exercise of the powers of guardians as regards any children maintained by them who are orphans or whose parents are unfit to have care of them; (v) the duty of seeking in co-operation with the appropriate committee institutional treatment for any applicant or the dependant of any applicant for whom such treatment is required; (vi) the recovery from persons liable by law of expenses in respect of accommodation, maintenance, treatment and services rendered; and (vii) the duty of keeping a register (which should not be open to public inspection) of all families within the area, any member of which is in receipt of assistance, together with particulars of such assistance.

Further recommendations are made with the view to providing adequate compensation for officers of the poor law authorities who would suffer loss of office or fees, and allocating among the councils concerned the property and liabilities of the poor law authorities.

NEW AGREEMENT FOR THE ADJUSTMENT OF RAILWAY LABOUR DISPUTES IN THE UNITED STATES

THE following is the new agreement for the adjustment of railway labour disputes in the United States issued by Director General of Railways, W. G. McAdoo. The agreement is really a memorandum of an understanding between Messrs. A. H. Smith, C. H. Markham and R. H. Aishton, regional directors representing the railroads in the eastern, southern and western territories with the chief executive officers of the Brotherhood of Locomotive Engineers, Order of Railway Conductors, Brotherhood of Railway Trainmen and Brotherhood of Locomotive Firemen and Enginemen, the understanding being adopted and put into effect as of March 22, 1918.

Memorandum of an understanding between Messrs. A. H. Smith, C. H. Markham and R. H. Aishton, regional directors—representing the railroads in their respective regions—and Mr. W. S. Stone, grand chief engineer, Brotherhood of Locomotive Engineers; Mr. A. B. Garretson, president, Order of Railway Conductors; Mr. W. G. Lee, president, Brotherhood of Railway Trainmen; Mr. Timothy Shea, acting president, Brotherhood of Locomotive Firemen and Enginemen.

It is understood that all controversies growing out of the interpretation or application of the provisions of the wage schedule or agreements which are not promptly adjusted by the officials and the employees on any one of the railroads operated by the Government shall be disposed of in the following manner:

New Commission Authorized

1. There shall be at once created a Commission to be known as Railway Board of Adjustment No. 1, to consist of eight members; four to be selected by the said regional directors, and compensated by the railroads, and one each by the chief executive officer of each of the four organizations of employees hereinbefore named, and compensated by such organizations.

2. This Board of Adjustment No. 1 shall meet in the city of Washington within 10 days after the selection of its members and elect a chairman and vice-chairman, who shall be members of the Board; the chairman or vice-chairman will preside at meetings of the Board, and both will be required to vote upon the adoption of all decisions of the Board.

3. The Board shall meet regularly at stated times each month and continue in session until all matters before it are considered.

Will Meet in Washington

4. Unless otherwise mutually agreed, all meetings of the Board shall be held in the city of Washington, provided that the Board shall have authority to empower two or more of its members to conduct hearings and pass upon controversies when properly submitted at any place designated by the Board; provided, further, that such subdivision of the Board will not be authorized to make final decision. All decisions shall be made and approved by the entire Board, as herein provided.

5. Should a vacancy occur in the Board for any cause, such vacancies shall be immediately filled by the same appointive authority which made the original selection.

Powers of the Board

6. All authority vested in the Commission of eight to adjust disputes arising out of the application of the eight hour law is hereby transferred to the Railway Board of Adjustment No. 1 in the same manner as has heretofore been done by the Commission of eight. All decisions of a general character heretofore made by the Commission of eight are hereby confirmed and shall apply to all railroads under governmental operation, unless exempted in said eight hour law. Decisions which have been rendered by the Commission of eight, and which apply to individual railroads, shall remain in effect until superseded by decisions of the Railway Board of Adjustment No. 1, made in accordance with this understanding.

7. The Board of Adjustment No. 1 shall render decisions on all matters in dispute, as provided in the preamble hereof, and when properly submitted to the Board.

Railroad Wage Commission

8. The broad question of wages and hours will be considered by the railroad wage Commission, but matters of controversies arising from interpretations of wage agreements, not including matters passed upon by the railroad wage Commission, shall be decided by the Railway Board of Adjustment No. 1 when properly presented to it.

9. Wages and hours, when fixed by the Director General, shall be incorporated into existing agreements on the several railroads, and should differences arise between the management and the employees of any of the railroads as to such incorporation, such questions of differences shall be decided by the Railway Board of Adjustment No. 1, when properly presented, subject always to review by the Director General.

Personal Grievances

10. Personal grievances or controversies arising under interpretation of wage agreements, and all other disputes arising between officials of a railroad and its employees, covered by this understanding, will be handled in their usual manner by general committees of the employees, up to and including the chief operating officer of the railroad (or some one officially designated by him), when if an agreement is not reached, the chairman of the general committee of employees may refer the matter to the chief executive officer of the organization concerned, and if the contention of the employees' committee is approved by such executive officer, then the chief operating officer of the railroad and the chief executive officer of the organization concerned shall refer the matter, with all supporting papers, to the director of the division of labour of the United States railroad administration, who will, in turn, present the case to the Railway Board of Adjustment No. 1, which Board shall promptly hear and decide the case, giving due notice to the chief operating officer of the railroad interested and to the chief executive officer of the organization concerned of the time set for hearing.

11. No matter will be considered by the Railway Board of Adjustment No. 1 unless officially referred to in the manner herein prescribed.

12. In hearings before the Railway Board of Adjustment No. 1, in matters properly sub-

mitted for its consideration, the railroad shall be represented by such person or persons as may be designated by the chief operating officer, and the employees shall be represented by such person or persons as may be designated by the chief executive officer of organization concerned.

13. All clerical and office expenses will be paid by the United States railroad administration. The railroad directly concerned and the organization involved in a hearing will respectively assume any expense incurred in presenting a case.

14. In each case an effort should be made to present a joint concrete statement of facts as to any controversies, but the Board is fully authorized to require information in addition to the concrete statement of facts, and may call upon the chief operating officer of the railroad or the chief executive officer of the organization concerned for additional evidence, either oral or written.

15. All decisions of the Railway Board of Adjustment No. 1 shall be approvel by a majority vote of all members of the Board.

References to Director General

16. After a matter has been considered by the Board, and in the event a majority vote cannot be obtained, then any four members of the Board may elect to refer the matter upon which no decision has been reached to the Director General of Railroads for a final decision.

17. The Railway Board of Adjustment No. 1 shall keep a complete and accurate record of all matters submitted for its consideration and of all decisions made by the Board.

18. A report of all cases decided, including the decision, will be filed with the Director, division of labour of the United States railroad administration; with the chief operating officer of the railroad affected; the several regional directors, and with the chief executive officers of the organizations concerned.

19. This understanding shall become effective upon its approval by the Director General of Railroads and shall remain in full force and effect during the period of the present war, and thereafter, unless a majority of the regional directors, on the one hand, as representing the railroads, or a majority of the chief executive officers of the organizations, on the other hand, as representing the employees, shall desire to terminate the same, which can, in these circumstances, be done on 30 days' formal notice or shall be terminated by the Director General himself, at his discretion, on 30 days' formal notice.

Signed and sealed this twenty-second day of March, 1918.

R. H. Smith,
C. H. Markham,
R. H. Aishton,

Regional Directors for the Railroads under Government Control.

W. S. Stone,

Grand Chief Engineer, Brotherhood of Locomotive Engineers.

A. B. Garretson,

President, Order of Railway Conductors.

W. R. Lee,

President, Brotherhood of Railroad Trainmen.

Timothy Shea,

Acting President, Brotherhood of Locomotive Firemen and Enginemen.

MINISTERS AND OFFICIALS OF DEPARTMENTS AND BUREAUS OF LABOUR, WORKMEN'S COMPENSATION COMMISSIONS, ETC., IN CANADA

CANADA.

Department of Labour:

Honourable T. W. Crothers, K.C., M.P., Minister.

F. A. Acland, Deputy Minister.

Bryce M. Stewart, Chief Statistician and Editor Labour Gazette.

Address: Ottawa.

The Department of Labour administers the Conciliation and Labour Act, the Industrial Disputes Investigation Act, 1907, the Combines Investigation Act; fixes fair wages schedules to be inserted in Government contracts; collects and classifies statistical and other information relating to conditions of labour, and publishes monthly the *Labour Gazette* and periodically special bulletins on prices, strikes and lockouts, labour legislation, labour organizations, etc.

ALBERTA.

Inspection of Mines: (Under Department of Public Works.)

John T. Stirling, Chief Inspector.
Address: Edmonton.

Factory Inspectors: (Under the Attorney-General.)

Mrs. Robert Kneil.
Address: Parliament Buildings, Edmonton.
J. N. McLeod.
Mrs. Margaret Lewis.
Address: Calgary.

BRITISH COLUMBIA.

Department of Labour:

Honourable J. W. deB. Farris, Minister.
J. D. McNiven, Deputy Minister.
Address: Victoria.

The duties of the Department of Labour are to administer laws affecting labour; to improve relations between employers and employees; to place labour where the demand for same exists; to regulate sanitary and other conditions relating to the health and well-being of the industrial classes; to encourage the establishment of new industries in British Columbia; to provide for technical training, etc.

Workmen's Compensation Board:

E. S. H. Winn, Chairman.
Parker Williams, Commissioner.
Hugh Gilmour, Commissioner.
Address: Board of Trade Building, Vancouver.

Inspection of Mines:

R. F. Tolmie, Deputy Minister of Mines.
George Wilkinson, Chief Inspector.
Address: Victoria.

Inspection of Factories:

Robt. J. Stewart, Chief Inspector.
Address: Victoria.

Inspection of Boilers:

J. Peck, Chief Inspector.
Address: Court House, Vancouver.

MANITOBA.

Bureau of Labour: (Under Public Works Department.)

Honourable George A. Grierson, Minister of Public Works.
E. McGrath, Secretary.
Address: Winnipeg.

Inspectors:

A. MacNamara, Chief Inspector. (On active service.)
Miss Ida H. Bauslaugh.
Robert A. Stewart, Acting Chief Inspector.
Thomas Horn.
James L. Naylor.
William J. Restall.
Thomas A. Watts.
Charles E. James.
Address: 301 Boyd Block, Winnipeg.

The Bureau of Labour is established to co-operate with trade unions and others to bring about better relations between employers and employees, and is charged with the enforcement of the following acts:

The Manitoba Factories Act.
The Shops Regulation Act.
The Public Buildings Act.
The Bake Shops Act.
The Building Trades Protection Act.
The Passenger and Freight Elevator Act.
The Steam Boiler Act.
The Fair Wage Act.
The Electricians' License Act.

Fair Wage Board:

S. C. Oxton, Deputy Minister of Public Works, Chairman.
W. J. Davidson.
J. W. Morley.
Geo. Armstrong.
Walter Owens.
Address: Winnipeg.

Address: Halifax.

ONTARIO.

Trades and Labour Branch: (Under Department of Public Works.)

Walter A. Riddell, Superintendent.

Inspectors:

Harold C. Hudson, Inspector of Labour Agencies.
D. M. Medcalf, Chief Boiler Inspector.
James T. Burke, Chief Factory, Shop and Office Inspector.
Wm. C. McGhie, Chairman of Board of Examiners, Stationary Engineers.

Address: Parliament Buildings, Toronto.

Among the duties of this branch are included the collection of statistical and other information; investigation and research respecting trades and industries in the province; the establishment and supervision of employment bureaus; the administration of the Bureau of Labour Act, the Stationary and Hoisting Engineers Act, the Building Trades Protection Act, the Factory, Shop and Office Building Act, the Steam Boiler Act, the Employment Agencies Act, and generally the administration of all labour legislation other than the Workmen's Compensation Act.

Bureau of Mines:

T. F. Sutherland, Chief Inspector.
Address: Toronto.

Workmen's Compensation Board:

Samuel Price, Chairman.
A. W. Wright, Vice-Chairman.
Geo. A. Kingston, Commissioner.
J. M. McCutcheon, Secretary.
Address: Toronto.

QUEBEC.

Inspection of Industrial Establishments and Public Buildings: (Under Department of Public Works and Labour.)

Honourable L. A. Taschereau, Minister.
Address: Quebec.
Louis Guyon, Chief Inspector.
Address: 9 St. James Street, Montreal.

Registrar of Boards of Conciliation and Arbitration:

Felix Marois.
Address: Department of Public Works, Quebec.

Inspection of Mines: (Under Department of Colonization, Mines and Fisheries.)

Theo. C. Denis, Superintendent of Mines.
A. O. Dufresne, Assistant Superintendent of Mines.
Address: Quebec.

SASKATCHEWAN.

Bureau of Labour: (Under Department of Agriculture.)

Thos. M. Molloy, Secretary.
Address: Regina.

The Bureau collects and publishes statistical information regarding labour, operates employment bureaus, etc.

ADDITIONAL REGULATIONS AFFECTING WESTERN COAL MINES

DURING the month Mr. W. H. Armstrong, the Director of Coal Operations for the mines in Southeastern British Columbia and Southwestern Alberta, issued some additional orders respecting working conditions in several of the mines. (See issues of August, 1917, p. 613; December, 1917, p. 987; February, 1918, p. 142, and March, 1918, p. 225.) Two of the orders affected the mines of the Rosedale Coal and Clay Products Company, one re-instated five employees who had not been taken back upon the conclusion of the recent strike affecting the Rosedale mines, and the other fixed rates for various forms of contract work. Gladstone local union, composed of miners in the Fernie district, asked for an interpretation of the method of reckoning the minimum monthly wage provided for in the minimum wage clause of the agreement. The commissioner found that as the period used in estimating the make-up due the miners was two weeks in practically all of the mines in the district, two weeks should be taken as the period to be used in estimating the minimum wage. Hillcrest local union, having requested payment for pumpmen at a rate similar to that paid at the Galt mine, the commissioner found that the duties of pumpmen at Hillcrest were not as arduous as those at Galt and that the company was paying the rates provided in the tentative agreement. Another order affecting the Hillcrest mines provided that the mining rate in rooms where coal is loaded into the mine car should be 12 cents per ton in excess of that paid where coal is put into chutes. The commissioner directed that boys working as tipple dumpers at the Corbin mines should be paid the regular rate of $3.66 per day for tipple dumpers instead of $2.13 per day, the rate mentioned in the agreement as that to be paid boys, the commissioner holding that this rate referred to boys assisting tipple dumpers but not to boys acting alone as tipple dumpers. Another order direct-

ed the company at Corbin and the men's representatives to confer on the question whether drivers were entitled to pay for "wet places." The request of the Corbin men for a new classification of a part of the mine known as "The Big Showing," was disallowed, the commissioner holding that no classification was necessary and that the present rates were applicable. At Michel, claims for compensation by a hoistman and a rope rider for time lost when a portion of the mine was shut down were disallowed; the commissioner held that the company had offered the men work at other employment and had re-engaged them in their old places when the work was re-commenced. Other orders fixed contract prices at the Cadomin and Greenhill mines.

FAIR WAGES CONTRACTS, MARCH, 1918

DURING March the Department of Labour received for insertion in the *Labour Gazette* information relative to four fair wage contracts awarded by the Department of Public Works. Three of these contracts contained the usual fair wage clause, while the fourth one contained a fair wage schedule.

DEPARTMENT OF PUBLIC WORKS. — Supply and installation of an electric freight elevator in Postal Station "A," Winnipeg, Man. Name of contractors, Otis-Fenson Elevator Company, Limited, Toronto, Ont. Date of contract, March 2, 1918. Amount of contract, $4,140.

DEPARTMENT OF PUBLIC WORKS. — Supply and installation of two freight elevators in Government Printing Bureau, Ottawa, Ont. Name of contractors, Otis-Fenson Elevator Company, Limited, Toronto, Ont. Date of contract, March 5, 1918. Amount of contract, $7,935.

DEPARTMENT OF PUBLIC WORKS. — Reconstruction of steel roof trusses, etc., over the main hall of the Drill Hall at Halifax, N.S. Name of contractors, The Maritime Bridge Company, Limited, New Glasgow, N.S. Date of contract, March 19, 1918. Amount of contract, $4,100 for removal of present roof and unit prices for remainder of work.

The fair wage clause obtaining in such cases was inserted in the above contracts. 53 fatal industrial accidents, as compar-

DEPARTMENT OF PUBLIC WORKS. — Wooden freight shed and fireproofing of grain conveyor supports on west side of wharf, Vancouver, B.C. Name of contractors, J. P. Hodgson & F. T. King, Vancouver, B.C. Date of contract, March 5, 1918. Amount of contract, $128,274.

Trade or class of Labour	Rate of wages Not less than the following
Foreman carpenter	$5.00 per day of 8 hours.
Carpenters	4.50 " 8 "
Blacksmith	4.50 " 8 "
Blacksmith's helpers	3.50 " 8 "
Ordinary labourers	3.20 " 8 "
Foreman electrician	6.50 " 8 "
Electricians	6.00 " 8 "
Plumbers	5.00 " 8 "
Painters	4.50 " 8 "
Roofers (metal)	4.50 " 8 "
Bricklayers	6.00 " 8 "
Concreters	3.50 " 8 "
Pipe fitters	5.00 " 8 "
Steel erecters	5.00 " 8 "
Driver with 2 horses and wagon	8.00 " 9 "
Timekeeper	4.00 " 8 "

FATAL INDUSTRIAL ACCIDENTS DURING MARCH, 1918

DURING March the Department received reports of the occurrence of 52 fatal industrial accidents, as compared with 58 in February and 48 in March, 1917. The Department is unable to secure reports of all fatal industrial accidents, but reports are received monthly from all available sources.

TABLE OF FATAL INDUSTRIAL ACCIDENTS, DURING MARCH 1918.

Trade or Industry.	Locality	Date	Cause of fatality.
AGRICULTURE—			
Farmer	Parry Sound, Ont.	Mch. 12	Falling from loaded wagon.
Farmer	Komoka, Ont.	" 8	Falling from loaded wagon.
Farmer	Nottawa, Ont.	" 25	Falling tree.
LUMBERING—			
Feller	Flanders, Ont.	" 1	Falling tree.
Feller	Jocko River, Ont.	" 6	Falling tree.
MINES, SMELTERS AND QUARRIES—			
Miner	Springhill, N.S.	" 25	Fall of coal.
Copper miner	Weedon, Que.	" 21	Fall of rock.
Miner	Timmins, Ont.	" 13	Fall of ore.
Miner	Coal Creek, B.C.	" 16	Fall of coal.
Smelter employee	Trail, B.C.	" 11	Electric shock and fall.
Smelter employee	Thorold, Ont.	" 25	Scalded.
BUILDING AND CONSTRUCTION—			
Building laborer	Kingston, Ont.	" 4	Fell on head.
Laborer	Windsor, Ont.	" 14	Struck by swinging beam.
METALS, MACHINERY AND CONVEYANCES—			
Foundry employee	Ottawa, Ont.	" 13	Caught in shafting.
Foundry employee	Owen Sound, Ont.	" 1	Electrocuted.
Drill works employee	Sherbrooke, Que.	" 2	Fall.
Steel worker	Hamilton, Ont.	" 20	Scalded.
Metal worker	Toronto, Ont.	" 31	Struck by a boiler valve.
Machinist	Leaside, Ont.	" 29	Mangled by machinery.
Employee, separator manufacturing plant	Peterborough, Ont.	" 29	Struck by machinery.
Ship carpenter	Hantsport N.S.	" 9	Struck by flying knee of vessel.
WOODWORKING—			
Gluer, chair factory	Owen Sound, Ont.	" 5	Infection.
PULP AND PAPER—			
Paper mill employee	Sault Ste. Marie, Ont.	" 7	Fall of wood.
" " "	Smooth Rock Falls, Ont.	" 20	Fall of wood.
" " "	Sault Ste. Marie, Ont.	" 28	Drowned.
FOODS, TOBACCO AND LIQUOR—			
Cereal plant employee	Sudbury, Ont.	" 2	Caught in a cable.
Grist mill employee	Clarksburg, Ont.	" 18	Caught in shafting.
CHEMICALS AND EXPLOSIVES—			
Employee (chemical works)	Trenton, Ont.	" 12	Asphyxiated by nitric fumes.
Employee explosives (manufacturing plant)	Northfield, B.C.	" 9	Explosion
LEATHER—			
Leather worker	Penetanguishene, Ont.	" 1	Blood poisoning.
STEAM RAILWAY SERVICE—			
Engineer	M.P. 22½ (T. & N.O.Ry.)	" 2	Collision.
Fireman	Abbotsford, B.C.	" 4	Derailment of train.
Brakeman	Galt, Ont.	" 6	Crushed between cars.
Brakeman	Nanaimo, B.C.	" 1	Crushed between cars.
Brakeman	Kingscourt, Jct., Ont.	" 2	Fell from and run over by train.
Yardman	Smith's Falls, Ont.	" 11	Crushed between cars.
Yardman	Toronto, Ont.	" 30	Struck by a locomotive.
Section foreman	Dorchester, N.B.	" 11	Struck by a snow plow.
Sectionman	Toronto, Ont.	" 15	Struck by a locomotive.
Flagman	Rossport, Ont.	" 26	Run over by a train.
Car checker	Westmount, Ont.	20	Struck by a locomotive.
MISCELLANEOUS TRANSPORT—			
Carter	Kingston, Ont.	" 4	Fell while carrying bag of flour.
Mail driver	London, Ont.	" 13	Vechicle struck by automobile.
NAVIGATION—			
Deckhand	Halifax. N.S.	" 17	Drowned—fell overboard.
PUBLIC UTILITIES—			
Electrical worker	Winnipeg, Man.	" 22	Electrocuted.
Power-house employee	Reserve Jct., N.S.	" 28	Electrocuted.
MISCELLANEOUS—			
Soap factory employee	Toronto, Ont.	" 5	Electrocuted.
Gypsum works employee	Winnipeg, Man.	" 10	Flying piece of iron.
Linseed oil mill employee	Medicine Hat, Alta.	" 9	Bursting machinery.
Elevator operator	Toronto, Ont.	" 31	Crushed by an elevator.
Elevator operator	Toronto, Ont.	" 25	Fell from elevator.
Labourer	Winnipeg, Man.	" 28	Burns.

RECENT LEGAL DECISIONS AFFECTING LABOUR

Workmen not entitled to continuance of compensation if injuries prolonged by misconduct

A WORKMAN who had been seriously injured by an accident took proceedings for compensation under the Workmen's Compensation Act of Alberta. The employers admitted that the man was originally entitled to compensation, but submitted two contentions: (1) about the proper amount to be awarded, and (2) as to alleged misconduct by the applicant while in the hospital, whereby his complete and earlier recovery was prevented. On February 22, 1917, the arbitrator arrived at the following written conclusion: "From the facts above given I find that the present condition of the applicant's limb is due to his wilful misconduct in removing the splints; that if he had not done so his limb should have been fully restored by the thirtieth September, 1916, judging from the healthy bony union of the fractured bones, and that his full earning capacity would have been regained." Compensation was therefore allowed at the rate of $19.80 per week from the date of the accident to September 30, 1916, amounting to $376.30.

In January, 1918, a notice of motion was served upon the solicitors of the employers that a request would be made on behalf of the workman before the Appelate Division of the Supreme Court for: (1) an immediate order remitting the award in question to the arbitrator for reconsideration of the question of the amount of compensation which should be awarded to the applicant in respect of the incapacity caused to him by the accident, and calling his attention to section three of the first schedule attached to the Workmen's Compensation Act, and also to sections 13 and 16 of the said first schedule; and (2) an order for leave to appeal from the award.

In the judgment of the Court, it is declared that there does not seem to be any authority in the act for making the first order asked for, and with respect to that the application should be dismissed.

With respect to the leave to appeal, this is allowable under the statute only upon a question of law. It was claimed that upon an original application to fix compensation and the amount of weekly payments, the arbitrator had no power to fix a limit of time at the expiration of which the payments should cease, but that an employer who desires to have an order made ending the payments, must make a separate application for a review under section 13 of the first schedule to the act. It was held, however, by the Court that this is no doubt true with respect to fixing a date in the future when the payments shall cease, but it is otherwise with respect to a date in the past.

It was further argued that the arbitrator had no authority to deal with the question of the serious and wilful mis-

conduct of the workman in the manner adopted in this case. The contention was that the words of section 3, subsection 2 (c) of the act only refer to serious and wilful misconduct of the workman as having caused the original accident and injury, and that there is nothing in the act giving the arbitrator power to consider serious or wilful misconduct at a later time as being the real cause of the continuance of the incapacity, and, therefore, to fix the limit of the duration of the weekly payments at a time when but for such subsequent serious and wilful misconduct the incapacity would have ceased. This contention was not upheld by the Court. It was pointed out in the judgment that this section of the act says that "where total or partial incapacity for work results from the injury," a weekly payment during incapacity shall be awarded. If the arbitrator finds that the incapacity presently existing was not really the result of the original injury, but due to some other cause for which the workman was responsible, he cannot declare that the incapacity "results from the injury." It was therefore ruled that the arbitrator made no mistake in law in deciding that an incapacity existing after September 20, 1916, was not the result of the injury, and in ending the payments as of that date. The application was accordingly dismissed, with costs. (*Alberta—Ripka v. Georgetown Collieries, Limited.*)

Foreman road builder in Ontario responsible for acts of subordinates

A gang of men were engaged in building a road, and under instructions of the foreman they were in the habit of having a fire lit every day at noon for the purpose of making tea. One day, in the absence of the foreman, the fire got out of bounds and on the following day it spread to some farm buildings and destroyed them. The owner brought action against the foreman of the gang and was awarded damages of $217 with costs, the plaintiff alleging that the fire which destroyed his property had spread to his land from a fire negligently set in a highway by order of the defendant. This judgment was sustained on appeal. It was held by the Court of Appeal that there was negligence in lighting the fire in the first instance, and in failing to keep it within bounds, and that the foreman was negligent in that he had sanctioned the lighting of fires and had given no specific directions how or where a fire was to be made, and took no precautionary measures. The plea invoked by defendant that since the road-building was a public work of the province, the alleged wrongful acts or omissions were not his, but those of the Crown, and, therefore, by law, not wrongful, was not upheld. It was declared by the Court that the onus was upon the defendant to establish not only general authorization to do the work, but specifically that in committing the alleged wrongs he was executing the work in the manner authorized or directed by the Crown. No proof to this effect was offered. (*Ontario—Bigras v. Tasse.*)

REVIEWS

ONTARIO. — Department of Lands, Forests and Mines: Bulletin No. 32. The Bureau of Mines. Report on the Mining Accidents in Ontario in 1917. 32 pp.

Mining Accidents in Ontario

A REPORT of the Ontario Bureau of Mines on Mining Accidents in Ontario in 1917 shows that there were 36 fatalities last year in mines, metallurgical works and quarries, as compared with 51 deaths in 1916. The number of fatalities in the various occupations for the two years is shown in the following table:

	1916.	1917.
Mines, underground	30	19
Mines, surface	7	7
Metallurgical works	8	6
Quarries	6	4
Totals	51	36

The fatalities at the mines were divided among the several districts as follows:

	1916.	1917.
Gold mines of Porcupine and Kirkland Lake	14	8
Silver mines of Cobalt and adjacent districts	8	9
Nickel-copper mines of Sudbury	13	9
Iron mines of Michipicoten	2	0
Totals	37	26

The number of fatal accidents per 1,000 persons employed was 2.32 in 1917, as compared with 3.07 in 1916, and an average of 3.09 for the last 17 years. More efficient scaling methods have greatly reduced the number of fatal accidents caused by falls of earth and rock, there having been only four casualties of this nature in 1917. Four fatalities underground, due to explosives, occurred in 1917. This is also a reduction over previous years and is due to greater care in the handling and storage of explosives, reporting of missed holes, etc.

CANADA.—Profit-sharing and Producers' Co-operation in Canada. By H. Michell. Queen's Quarterly, January, February, March, 1918. 26 pp.

Profit-sharing in Canada

An article has appeared in the last issue of Queen's Quarterly, by Mr. H. Michell, on "Profit-sharing and Producers' Co-operation in Canada." Three systems are described by the author, and are defined as follows: "Profit-sharing is understood to involve an agreement between employer and his workpeople under which the latter receive, in addition to their wages, a share, fixed beforehand, in the profits of the undertaking." "Labour co-partnership is an extension of profit-sharing, enabling the worker to accumulate his share of profit in the capital of the business employing him, thus gaining the rights and responsibilities of a shareholder." "Producers' co-operation is that system by which the whole management of the business is turned over to the employees and the profits therefrom divided among them, the original owner of the concern retaining a share fixed by mutual arrangement beforehand."

There have been in Canada, according

to the author, 13 profit-sharing schemes, of which eight are now defunct, nine co-partnerships, two of which have been discontinued, and eight examples of producers' co-operation, all of which have failed. There has been a similar lack of success in other countries, such as England and the United States. The causes of so many failures are attributed to the disappointment of employers with the results, because of the employees showing no appreciation of the benefits extended to them, but looking upon the increased remuneration as their right; the hostility of the trade unions to any form of profit-sharing or labour co-partnership, and a change in the ownership or management of a business leading to the dropping of the scheme. Still other causes are given for the failure of profit-sharing in Canada. It is pointed out that labour in this country is very fluid, and the chances of a man being able to better himself are so great that the turn-over in the labour force is exceptionally high. Wages are high, and the chance of an ambitious man stepping from the wage-earning class to the employer or independent class are very good. Finally, the situation is described in the following quotation from "Co-partnership and Profit-sharing," by Dr. Aneurin Williams: "The material development of the country has been too rapid, the increase in the production of wealth too great, and the openings for men of ability, even without capital, too tempting, for many of the most active minds to concern themselves much with the improvements in industrial relations and the system of sharing wealth."

SWEDEN.—Sveriges Officiella Statistik. Socialstatistik. Kollektivavtal. I Sverige ar, 1916, av k. socialstyrelsen. 51 pp.

Industrial Agreements in Sweden

A report has been issued by the Statistical Office of Sweden on the industrial agreements in force in that country during 1916. In that year, 752 new agreements were made between employers and their employees, affecting 4,219 employers and 117,358 workpeople. At the beginning of 1916, there were 1,457 agreements in force, affecting 255,731 workmen. By the end of the year the number of agreements had increased to 1,586, and the number of workpeople to 265,517. Of the 752 agreements of 1916, 549 were signed by associations of employers and 203 by individual employers. For the employees the corresponding figures are 725 and 27. The majority of the agreements, 431 in all, applying to 46,412 workpeople, concerned only one or a few isolated employers. There were 313 local agreements affecting 34,496 workpeople, and eight national agreements with 36,450 employees. With regard to the settlement of disputes, 235 agreements provided that they should first be dealt with through negotiations between the parties concerned, and if this is not successful, that they should be referred to the organizations to which the parties to the dispute belonged. According to 396 agreements, disputes had to be submitted for settlement to the committees of conciliation and arbitration. In 228 agreements it was provided that these committees were to have cognizance only of disputes concerning the interpretation and application of the agreements, but in 168 others the powers

of the committees were to extend to all disputes. Agreements between 4,126 employers and 115,741 employees specified the hours of labour. 49,774 employees worked 60 hours per week, 27,681 worked 57 hours, and 11,468 employees worked 54 hours. In 670 agreements, affecting 109,183 workpeople, clauses were inserted providing for payment of indemnities in case of accidents. Insurance against accidents is stipulated in 376 agreements, applying to 40,180 workmen. In addition, 332 agreements affecting 71,295 employees, provide for indemnities in case of accident under the form of direct payment by the employers during the period of 60 days after the accident.

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

In this Issue

The percentage of the membership reported unemployed at the beginning of April by trades unions was 1.7 as compared with 2.2 at the same time last year and 2.4 at the beginning of January. Employment in the metal industries continued to improve. There was an advance over March in the value of building permits issued, but a decline in comparison with April, 1917. A falling off in civic employment as compared with March was indicated. While there was an increase over last month in the time loss on account of industrial disputes, the record was much better than in April of last year, and at the end of the month only five strikes remained unsettled. Of the twenty-six changes in wages and hours reported in the first quarter of the year, twenty-two were wage increases, three were reductions in hours and one an increase in wages with a reduction in hours. The cost of the weekly budget of staple foods dropped from the March level of $12.66 to $12.57. The cost of the budget in April, 1917, was $10.77. The index number of wholesale prices was practically unchanged, standing at 269.4 as compared with 269.2 in March, and 228.7 in April, 1917.

Proceedings under the Industrial Disputes Investigation Act

During the month of April reports were received of four Boards of Conciliation and Investigation which had inquired into disputes affecting (1) Collingwood Shipbuilding Company, Limited, Collingwood, Ont., and employees; (2) Corporation of the City of Ottawa and firemen; (3) Hamilton Street Railway Company and conductors and motormen; and (4) Corporation of the City of Ottawa and certain employees. In the first three cases settlements were effected, and in the fourth the award was declared acceptable to the employees, but the civic authorities had not stated their position at the close of the month. Settlement by direct negotiations was reported of a dispute between the Canadian Northern Railway (Eastern Lines) and the Halifax and South Western Railway and conductors, trainmen and yardmen. Ten applications for the establishment of Boards also received attention during the month.

Affiliation of Nova Scotia Amalgamated Mine Workers with U.M.W.A.

The Amalgamated Mine Workers of Nova Scotia have decided by a vote of nearly ninety-eight per cent of their membership to affiliate with the United Mine Workers of America. In the month of March, 1917, two applications for Boards of Conciliation were received in the De-

partment of Labour from employees of the Glace Bay Colliery of the Dominion Coal Company, one from employees members of the Provincial Workmen's Association and the other from employees members of the United Mine Workers of Nova Scotia, the two organizations which have divided the field in that district for some time. In view of all the circumstances, the Minister of Labour recommended the appointment of a Royal Commission to inquire into the causes of unrest in the coal mining districts of Nova Scotia, and to investigate the relations between the Dominion Coal Company and its employees. (See issues of May, June and July, 1917.) The Commission found that much of the unrest was due to the presence of the two rival labour organizations, and after several days' negotiations, on June 15, an amalgamation of the two bodies under the name of the Amalgamated Mine Workers of Nova Scotia, was agreed upon. By its affiliation with the United Mine Workers of America the new body becomes a part of an organization with a strength of half a million members, and at the same time adds to it a membership of over one thousand. It is expected that the miners of Inverness and Pictou counties, numbering about four thousand, will also affiliate with the United Mine Workers.

Supplementary Report of the Whitley Committee

Reference to the first and second reports of the committee on relations between employers and employed, the so-called Whitley Committee, a sub-committee of the Reconstruction Committee of the United Kingdom, has been made in previous issues of the *Labour Gazette* (August, 1917, page 570; April, 1918, page 232). The April issue of the British Labour Gazette has the following summary of a "Supplementary Report on Works Committees," which deals more fully with the proposal to institute such committees:

In this supplementary report, it is pointed out that, while in every industry there are certain questions such as rates of wages and hours of work, which should be settled by district or national agreement, there are also many questions closely affecting daily life and comfort in, and the success of, the business, and affecting in no small degree efficiency of working, which are peculiar to the individual workshop or factory. The purpose of a Works Committee is to establish and maintain a system of co-operation in all these workshop matters.

Throughout their recommendations the committee have proceeded upon the assumption that the greatest success is likely to be achieved by leaving to the representative bodies of employers and employed in each industry the maximum degree of freedom to settle for themselves the precise form of council or committee which should be adopted, having regard in each case to the particular circumstances of the trade; and, in accordance with this principle, they refrain from indicating any definite form of constitution for the Works Committees. Their proposals as a whole assume the existence of organizations of both employers and employed and a frank and full recognition of such organizations, and they remark that Works Committees established otherwise than in accordance with these principles could not be regarded as a part of the scheme recommended, and might indeed be a hindrance to the development of new relations in industry.

The report puts forward the opinion that the complete success of Works Committees necessarily depends largely upon the degree and efficiency of organization in the trade, and upon the extent to which the committees can be linked up with the proposed district and national councils, a matter in regard to which the national councils should determine a scheme. It is thought important to state that the success of the Works Committees would be very seriously interfered with if the idea existed that such committees were used, or likely to be used, by employers in oppo-

sition to trade unionism, and it is strongly felt that the setting up of Works Committees without the co-operation of the trade unions and the employers' associations in the trade or branch of trade concerned would stand in the way of the improved industrial relationship which it is now endeavoured to further. The Works Committees are regarded as the broad base of the industrial structure recommended, and as the means of enlisting the interest of the workers in the success both of the industry to which they are attached and of the workshop or factory where so much of their life is spent; the committee should not, in constitution or methods of working, discourage trade organizations.

Opinions are expressed that Works Committees should have regular meetings at fixed times, and, as a general rule, not less frequently than once a fortnight. They should always keep in the forefront the idea of constructive co-operation in the improvement of the industry to which they belong. Suggestions of all kinds tending to improvement should be frankly welcomed and freely discussed. Practical proposals should be examined from all points of view. There is an undeveloped asset of constructive ability—valuable alike to the industry and to the state—awaiting the means of realization; problems, old and new, will find their solution in a frank partnership of knowledge, experience and good-will. Works Committees should fail in their main purpose if they existed only to smooth over grievances. It is recognized that, from time to time, matters will arise which the management or the workmen consider to be questions they cannot discuss in these joint meetings, and it is anticipated that when this occurs nothing but good will come from the friendly statement of the reasons why the reservation is made.

The committee regard the successful development and utilization of Works Committees in any business on the basis recommended in this report as of equal importance with its commercial and scientific efficiency, and they think that in every case one of the partners or directors, or some other responsible representative of the management, would be well advised to devote a substantial part of his time and thought to the good working and development of such a committee.

A report of an enquiry made by the Ministry of Labour into the constitution and functions of existing Works Committees will be published shortly.

Rents in war time in France

The following summary of the text of a French law, dated March 9, 1918, relating to the cancelling or modifying of leases and the payment of rents in France during the war period, appears in the April issue of the British Labour Gazette.

Among the principal provisions of the new law is one stating that the tenants of small dwellings who are serving in the army, or who have been discharged on account of wounds or illness, or who are in receipt of military or certain other specified allowances, poor relief, or assistance in accordance with the law of 14th July, 1905, are entitled to claim exemption from payment of rent during the war and during the six months following its termination. "Small dwellings" in this connection are those the rent of which does not exceed the following limits:

	Rent per Annum	
	Unmarried Tenants	Married Tenants
Paris and District	20	24
Communes of over 100,000 inhabitants	14	16
Communes of 20,000 to 100,000 inhabitants	10	12
Communes of 5,000 to 20,000 inhabitants	6	8
Communes of 1,000 to 5,000 inhabitants	4	6
Communes of less than 1,000 inhabitants	3	4

If a tenant who is mobilized is killed

during the war or dies while serving with the colours, the lease may be cancelled without indemnity on a declaration of his widow or his heir made within a certain period. Questions as to compensation for fixtures, etc., will be determined by the arbitration committee concerned (see last paragraph). A lease may likewise be cancelled when, owing to wounds or illness arising out of the war, the tenant can no longer carry on his former occupation, or if his business capacity is permanently reduced. During the war, and for a further period of six months, all proceedings at law against mobilized tenants are prohibited. For twelve months from the promulgation of the law, this prohibition also applies to widows and dependents of soldiers killed since 1st August, 1914, to wives of soldiers officially reported as missing, and to soldiers discharged owing to wounds or illness due to the war. It also applies to the wives and families of men retained by the enemy in invaded districts or interned in enemy or neutral countries.

House owners and landlords, whose tenants have been freed from liability, wholly or in part, under this Act, or by mutual agreement, are entitled to an indemnity from the state not exceeding 50 per cent of their losses if their net annual income does not exceed £200 in small towns (under 100,000 inhabitants), £320 in large towns, and £400 in Paris and the Seine department.

An owner who has been deprived of a considerable part of his resources and is in consequence unable to pay mortgage instalments will be granted the delay considered necessary by the arbitration committee to meet the case, not exceeding a period of three years after the conclusion of the war. At the demand of the tenant, leases may be extended for a period equal to that from the tenant's mobilization up to the end of the war in the case of business premises and for two years in case of dwellings.

All disputes arising out of the operation of the law are to be settled by special arbitration committees to be set up in each district, upon which owners and tenants will be represented in equal numbers.

Fixing of Minimum Wages by the Agricultural Wages Board in England and Wales

The Agricultural Wages Board, established for England and Wales under the Corn Production Act of 1917 (see issue of January, 1918, page 3), is reported in the April number of the British Labour Gazette to have given notice that they propose to fix minimum time rates of wages for male workers over 18 years of age in certain counties. The rates will be fixed on the basis of 30s. for 54 hours (exclusive of meal times) for the period commencing the first Monday in March and ending on the last Sunday in October, and on the basis of 30s. for 48 hours (exclusive of meal times) for the remainder of the year. Objections to these rates will be heard for a period of one month dating from April 2, and no wages will be fixed until the expiration of this interval. Differential rates for overtime will be set at a later date after due notice in accordance with the provisions of the Act. The difficulties attending the establishment of all the District Wages Committees and the consideration of their recommendations regarding minimum wage rates applicable to their areas having caused some delay, the Board recommend that the minimum rates, when fixed, be made retroactive to the first of April, by mutual agreement between employers and workers.

On March 28th, the Board received the report of the Committee on "Cottage Rents," which suggested that the District Wages Committees should make recommendations to the Board as to the minimum rates of wages as affected by the question of cottage rents, and expressed the view that "a worker should be in a position should he so desire to provide himself with a proper and reasonable standard of accommodation . . .

and that any minimum rates fixed for adult male workers should accordingly be such as will enable an 'economic rent' for such standard of accommodation to be paid by the worker.'' The standard defined by the report includes a five-roomed dwelling in a proper state of repair, adequate water supply and satisfactory sanitary arrangements and having a garden of not less than one-eighth of an acre. It also outlined for the guidance of District Committees how the ''economic rent'' may be determined in certain districts. The final report of the Committee on ''Allowances,'' which was appointed to consider the general principles to be adopted as a basis for determining the value of allowances and benefits other than cottages received by workers, was also received. The committee were of the opinion that wages should be paid, so far as possible, wholly in cash, but they thought an attempt to abolish allowances at the present time would be detrimental. They therefore recommend a general order of the Board defining milk and potatoes as allowances which may be reckoned as part payment in lieu of cash in the fixing of minimum wages and a basis on which the value of these articles might be arrived at was suggested. This report was approved and adopted and the Board decided to invite district committees to consider its recommendations on the question of allowances in fixing wages.

District committees were formally established for twenty districts at a meeting of the Wages Board held in March, and a sub-committee of six members of the Board, together with three co-opted members appointed to ''enquire into the financial results of the occupation of agricultural land and market gardens in view of present conditions, and into the cost of living as affecting workers in rural districts, to collect data and receive evidence on these subjects and to report to the Wages Board as soon as possible.''

Conference of Coal Mine Operators and Miners' Representatives at Ottawa

At the request of the Minister of Labour a conference was held at Ottawa, April 17 and 18, for the purpose of discussing the fuel situation in Canada, with special reference to increased production. Mine operators and representatives from coal miners' organizations in all the coal fields of the country were invited to the conference. On the opening day the delegates were addressed by the Prime Minister and the Minister of Labour, and representatives from the Fuel Controller's Office also took part in the proceedings. In a ''round table'' discussion the various phases of the fuel problem were thoroughly canvassed. The following day was devoted to informal meetings between the Minister of Labour and the delegates and consideration was given to the causes of unrest among the miners in the different coal fields of the country. At the close of the conference the delegates were agreed that the meeting had been most satisfactory and that a larger measure of co-operation between capital and labour in the coal mining industry would result.

Labour Jottings

Announcement has been made of the fifteenth economic essay contest for prizes donated by the Chicago tailoring firm of Hart, Schaffner & Marx. Two prizes, a first of $1,000, and a second of $500, are offered in Class B, which includes undergraduates of any American college. Class A is open to any other American without restriction, a first priize of $300 and a second of $200 being offered in this class. Six topics are suggested, and a long list of ''available subjects'' is also given.

Industrial Service Sections have been created in the United States Signal Corps, the Quartermasters' Department,

and the Ordnance Bureau, by the War Department, to develop and maintain satisfactory relations between employers and employees engaged in production for the army. The work of these sections is to be carried on in close co-operation with the Department of Labour and is being co-ordinated with the Labour Administration through the office of the Secretary of War.

The April British Labour Gazette states that the *Correspondenzblatt* for 15th February, 1918, reports the results of "difficult and protracted conferences" between representatives of trade unions, of employers' associations and of Government departments in Germany in regard to the payment of compensation to workpeople for loss of wages consequent upon the shortage of coal.

On April 1, the United States Department of Labour announced that during the preceding week the Department had been successful in settling 11 disputes between capital and labour. The list includes six strikes, three controversies and two walkouts, and approximately 20,000 men were involved.

After investigations on the part of private citizens of Montreal into the conditions of employment for children, in which it was found that in many instances boys and girls of nine, ten and eleven years of age were among the workers, an Anti-Child Labour League has been formed in that city.

The United States Employment Service recently announced the appointment of federal directors of employment for Arkansas, Indiana, Maryland and New Mexico. Twenty-two states now have federal directors.

A French decree of February 22, 1918, establishes a permanent council attached to the Ministry of Labour and Social Thrift, whose functions shall be to study questions relative to the development of the co-operative movement.

A plan is being developed by representatives of the United States Department of Labour in conference with the National Shipping Board to provide for the periodic adjustment of wages in shipbuilding industries on the basis of the cost of living as reported by the Bureau of Labour Statistics.

At a recent joint meeting of the electrical workers and electrical contractors of Toronto, a conference Board was established to promote harmonious relations between employers and employed. The Board is composed of two representatives from the local electrical workers' union and two from the electrical contractors' association. It was decided that it should meet monthly to adjust any differences.

The Department of Labour of the United States has established a Speakers' Bureau to send speakers into the industrial districts of the country to urge patriotic speeding up of production by workmen. Already large audiences have been addressed and the Department reports that its corps has created much enthusiasm in the centres visited.

To insure against vessels under construction in their yards being held up at Point Ellice, B.C., on account of shortage of skilled caulkers, the Cameron-Genoa Mills Shipbuilders, Ltd., have decided to establish a school of instruction in this trade.

The Director General of state railways in Hungary has issued an order which restricts the right of railway servants to combine and to strike.

In the April, 1918, issue of the *Labour Gazette* (p. 231) reference was made to the friction which had arisen over the wage question in British Columbia shipyards and machine shops and to the appointment of a Commission to look into the same. The Commission, towards the end of the month, presented a report and it was understood a minority report would follow. Work in the shipyards in Victoria and Vancouver was continued, pending a consideration of the reports by the Dominion Government, but the employees of a number of machine shops in Victoria ceased work on May 1.

INDUSTRIAL CONDITIONS DURING APRIL, 1918

I.—GENERAL REVIEW

The Labour Market

In April employment in the steel works at the Sydneys was better than in March and the general improvement in the metal industries indicated last month was continued; the only slackness was reported from a few places in the Maritime Provinces. Employment was very brisk in ship-building yards in Quebec and the Maritime Provinces and also on the Pacific Coast. Employment in railway shops and locomotive works was well maintained and the large agricultural implement plants at Toronto, Hamilton and Brantford were very busy. Workers on electrical apparatus were generally well employed and some overtime was worked. Employment in automobile and carriage factories was reported good at all points. Munition workers were in demand at Toronto. In foods there was improvement, in sugar refineries in the East except in the beet sugar works of Western Ontario. The refinery at Vancouver was operating steadily. The confectionery trade was unsettled by new regulations of the Food Board, but establishments making aerated waters and similar beverages were generally busier. Workers in flour and provender mills in the East were well employed and in many of the Western mills operations were continued day and night. Abbatoirs and meat-packing establishments were busy in the West, but at a few points in Ontario there was difficulty in securing supplies. Employment for tobacco and brewery workers was generally only fair. The high level of employment in textiles indicated last month was continued in April, but at some points the workers were leaving for more remunerative employment in other lines and the mills were calling for hands. Employment for workers on tents and awnings continued to improve. Garment workers were generally well employed in Quebec and Ontario; whitewear operatives were busy, but at a few points there was some slackness in the cloak trade and in shirt and collar factories. Employment for pulp and paper workers continued very good, some of the mills working day and night. Employment in both newspaper and job printing was very good in the East and printers were wanted in different establishments in Western Ontario; in the West employment was good, especially at Edmonton and Vancouver. In wood-working, sash, door and planing mills in the East were much busier than in March and employment continued to improve in the West. Furniture workers were generally well employed. In the leather industries employment for workers in tanneries was good on the whole, but there was slackness in factories at several points in Quebec and in some Ontario factories. Workers on harness and horse goods were well employed because of the brisk demand for these lines in farm work. In clay, glass and stone employment continued generally dull, but brickyards at some points were busier. In chemicals employment was good and nitrators were in demand at Trenton. On the railways employment was better in the East than in the West and in the Maritime Provinces much overtime was worked; laborers for maintenance work were in demand at Winnipeg, Brandon and Calgary. Longshoremen continued well employed at Halifax and St. John. Navigation was open on the St. Lawrence to Montreal, but steamers had not begun to arrive; at other lake and river ports, however, activity was beginning and at Pacific ports employment for longshoremen continued good. In metal mining the workers in the Cobalt field were

well employed, but with costs increasing operators in the Porcupine gold field were not extending operations. The conditions for metal miners in British Columbia, however, showed improvement except at Nanaimo. Coal miners in Nova Scoia fields were well employed and in Crow's Nest Pass and on Vancouver Island employment was very steady. In lumbering, river driving operations were actively under way in Quebec, New Brunswick and Nova Scotia and some scarcity of hands was reported. Saw mills, which were beginning operations, also had difficulty in securing help. Lumbering in British Columbia continued very brisk. Farm hands were in demand at the different provincial employment offices of Ontario and also at points in the prairie provinces. Building operations were confined mainly to repair work, although some new construction was reported; carpenters were still in demand for Halifax. Employment in the building trades, as indicated by the value of building permits issued in 35 cities, increased 40.8 per cent as compared with March and decreased 6.9 per cent as compared with April, 1917. Reports from 16 cities, showing the number of civic employees temporarily engaged and the wages paid these employees during the first pay-roll period of two weeks in April, indicated a decrease of about .5 per cent in the number of workers, and a decrease of nearly 17 per cent in the wages paid.

Strikes

The loss of time in April on account of industrial disputes, while greater than in March was much less than in April, 1917. There were in existence at some time or other during the month 15 strikes, affecting 7,315 workpeople and involving a time loss of 15,671 working days as compared with 13 strikes, 1,008 employees and 8,276 working-days in March and 22 strikes, 10,008 employees and 122,008 working days in April, 1917. On April 1, there were on record six strikes affecting 120 workpeople. Nine strikes were reported as commencing during the month as compared with eight in March. Seven of the new strikes and two of the old disputes were reported terminated, while one was withdrawn from the record, leaving the five following unterminated strikes affecting 410 employees on record at the end of April: plumbers and steamfitters, St. John; machinists at Montreal; metal polishers and buffers, Weston; moccasin stitchers, Toronto, and civic employees at Vancouver.

Prices

In prices, decreases in grains, dairy products, fruits and vegetables, metals and implements, drugs and chemicals were offset by increases in animals and meats, in building materials and by slight increases in nearly all the other groups. The index number of wholesale prices therefore was practically unchanged, standing at 269.4 for April as compared with 269.2 for the previous month, 228.7 for April, 1917, and 136.7 for April, 1914. In retail food prices, eggs and potatoes showed considerable decreases and although meats and several other articles were slightly higher, the average cost of a budget of staple foods for a family of five averaged $12.57 at the middle of April in nearly 60 cities as compared with $12.66 in the preceding month, $10.77 in April, 1917, and $7.51 in April, 1914.

Changes in Wages and Hours of Labour

During the first quarter of 1918, twenty-six changes in rates of wages and hours of labour, affecting approximately 18,800 workpeople, were reported to the Department, as compared with thirty-three changes affecting approximately 21,400 workpeople, in the last quarter of 1917, and 61 changes affecting approximately 26,700 workpeople in the first quarter of 1917. Of the twenty-six changes twenty-two were wage increases, three were reductions in working hours and one an increase in wages with a reduc-

tion in hours. In the manufacturing and mechanical industries, eight changes were reported, affecting approximately 2,600 workpeople, of whom the majority were in the metals, machinery and conveyances group. In transportation there were seven changes affecting approximately 9,600 workpeople of whom 9,036 were steam railway employees.

II.—THE INDUSTRIES AND TRADES

Metals, machinery, conveyances

Sydney reported the production of the Dominion Steel Company for April in tons as follows: pig iron, 28,000; ingots, 31,000; billets, 12,000; rails, 13,000; rods, 7,200; merchant bars, 1,200; wire and products of wire, 2,300, as compared with a production in tons during March of: pig iron, 25,000; ingots, 30,000; blooms, billets and slabs, 24,000; rods, 9,600; merchant bars, 4,200; wire, 1,200, and wire products, 1,100. At the Sydney Mines steel plant the production of iron was 7,690 and steel 10,500 tons, as compared with 6,200 tons of iron and 9,100 tons of steel last month. Charlottetown reported machine shops active, and, at Amherst, metal working establishments were busy, with a shortage of labour in some departments of the Canada Car and Foundry Company. Westville reported steel manufacturers fairly busy, but there was some suspension of work at New Glasgow owing to a labour difficulty, and another company during the latter part of the month laid off most of its hands and was only operating on a small scale. At Moncton, steady conditions prevailed in the Government railway shops and there was a fair amount of activity in foundries in the city and at Sackville. Fredericton reported machine shops and foundries very active, and, at St. John, the rolling mills were working steadily; nail factories were busy, with a demand for labour, and shipyards were active, but hampered by difficulty in securing hands. Newcastle also reported shipbuilding plants very busy. Montreal reported many metal manufacturing establishments adding to plant and shipbuilding yards were increasing operations. Quebec also reported boat and shipbuilding yards very busy and machine shops and stove and furnace foundries active. Sorel and Three Rivers reported shipbuilding active. Sherbrooke reported a fair amount of activity in metal plants, and, at St. Hyacinthe, foundries and engine and boiler plants were well employed. St. John's and Iberville, however, reported the iron and steel industries quiet. At Toronto, the metal trades were active, with a decided shortage of skilled labour in many lines. Plants engaged upon special work for the Government were operating to capacity and many women and girls who had been laid off were re-employed. Shipbuilding yards were in full operation, and engine and boiler plants had a busy month. Automobile and bicycle plants were active and manufacturers of electrical apparatus and agricultural implements had large orders on hand. Hamilton reported a demand for labour in the manufacture of locomotives, cars and parts and electrical apparatus. At Niagara Falls all metal working establishments continued very busy, with skilled help constantly in demand; men and women without experience were being taken on in machine shops and cutlery factories. St. Catharines reported metal manufacture in all branches active. Ottawa reported foundries and machine shops busy and short of machinists and boilermakers. The Kingston Locomotive Company and the Kingston Shipbuilding Company were well employed. Belleville reported rolling mills and manufacturers of structural iron and steel active, and, at Peterborough, there was a demand for machinists and tool makers; the Canadian General Electric Company was working overtime.

Galt reported all branches of the metals group active, and foundries and machine shops in Kitchener and Waterloo were busy, with machinists in demand in several shops. At Brantford, the Waterous Engine Company was not as busy as during last month, though all hands were well employed; carriage and wagon companies and the Buck Stove Company and agricultural implement plants were very busy. At Guelph, machinists were well employed and skilled men were in demand; iron moulders generally were well employed, though in one plant a number of men were laid off. Stratford reported the agricultural implement plant very busy, with a demand for workmen. At Woodstock, there was a demand for painters in wagon factories, and for moulders, mounters and polishers in stove and furnace foundries. At London, the rolling mills were exceptionally busy, and all foundries and machine shops were active. St. Thomas reported iron works busy or normally employed, and there was a decided scarcity of skilled help in railway shops. At Chatham there was a constant demand for men in the metal industries. Windsor reported the Canadian Bridge Works employed day and night and advertising for men; automobile plants were working at full capacity. Metal working establishments at Owen Sound were generally active, though in a few instances working forces were slightly reduced owing to delay in the receipt of material; some companies were working overtime and reported a scarcity of mechanics. At Orillia there was a lack of men in the metal industries; early in the month the Electro-Foundries began operation with their new furnace, and between 20 and 25 tons of pig iron were being produced daily. Shipbuilding plants and iron working plants at Port Arthur and Fort William were very busy. Winnipeg reported all branches of the metal trades well employed, and, at Brandon, machine shops were busy. At Medicine Hat, rolling mills were busier than in the previous month and other metal establishments reported a slight improvement. Iron workers at Calgary were fully employed, and the Edmonton Iron and Machinery Company, while reporting trade quiet, expected improvement. At New Westminster, all shipyards were very busy and machine shops were advertising for men. Vancouver reported manufacturers of engines and boilers working at capacity with large orders ahead; boat and shipbuilding was absorbing all available men, and semi-skilled men were being employed in large numbers; stove manufacturers were quiet owing to difficulty in securing steel plates. Victoria reported iron shipyards and foundries fairly busy, chiefly on repairs; a large force of men were employed at the wooden shipyards and at the assembling plant.

Foods, liquors and tobacco

Sydney reported normal conditions in the food industries, but, at Halifax, bakeries and confectioneries were advertising for woman help and there was an improvement in employment in aerated water and soft drink establishments. Canning factories at Charlottetown were active and employing many women. Westville reported flour and feed mills busy. At St. John, flour and feed mills and the Atlantic Sugar Refinery were running steadily, confectioneries and bakeries were active and breweries were steadily employed. Fredericton reported packing houses and baking and confectionery establishments busy. The J. A. Marvin biscuit company at Moncton was extending its premises and installing more machinery; soft drink establishments were busier with the advent of warmer weather.

Sherbrooke reported meat packing houses active and tobacco factories and breweries fairly busy. Flour and feed mills at St. Hyacinthe had an active month and cigar and tobacco factories were very active; the distillery was quiet. Three Rivers reported tobacco workers only fairly busy.

Toronto reported flour mills, abattoirs and meat packing houses active; bakeries and confectioneries had plenty of work, but conditions were somewhat unsettled owing to recent regulations of the food

controller which were expected to considerably curtail production; soft drink manufacturers reported more activity than in the previous month, and cigarmakers were fairly well employed. At Hamilton, all branches of the foods group were busy, and there was a demand for cigarmakers in the large factories. At St. Catharines, flour mills and other branches of the foods group were busy. Brockville reported the foods group busy, and, at Kingston, flour, feed and cereal works were active. Belleville reported flour and feed mills well employed. At Peterborough, flour, feed and cereal mills were working overtime, and the Quaker Oats Company was about to commence operations in its new plant. Kitchener reported meat packing establishments and bakeries and confectioneries busy; there was some demand for cigarmakers and breweries were working full time. Galt reported considerable overtime in the foods group, and, at Brantford, milling companies and baking and confectionery establishments were active; the Waddell Preserving Company was making extensions and expected to give employment to a large number of hands. At Guelph, flour and feed mills and biscuit factories were well employed; breweries were quiet, but soft drink establishments were busy. Stratford reported flour and feed mills running steadily. London reported biscuit factories and confectioneries brisk, and the cigar factories of the city were active. Chatham reported flour mills busy, but the Dominion Sugar Company was still unable to obtain raw materials and was employing only a few men; abattoirs and meat packing houses were quiet owing to lack of stock. At Windsor, the Postum cereal company was running with a large force, but meat packing houses were quiet; cigar factories were active with a demand for workers.

At Winnipeg, all branches of baking and confectionery establishments were busy; breweries reported normal conditions; pickle and vegetable canneries had difficulty in securing sugar and laid off half their hands. At Brandon, flour mills and breweries were busy. Regina reported flour mills working day and night; help in demand in bakeries and confectioneries, and an improvement in soft drink establishments. Prince Albert reported flour mills running full time. At Medicine Hat, flour mills generally were active, though one mill was shut down for a few days. Lethbridge reported flour mills and the macaroni factory busy, and, at Calgary, flour mills were running day and night shifts; abattoirs and meat packing houses were fully employed; the cigar factory reported trade good. At Edmonton, the Swift-Canadian packing house reported normal conditions. Fernie reported breweries fairly well employed. At New Westminster, the abattoir was fully employed and evaporating plants resumed operations; there was some improvement in cigar factories, and the brewery was operating steadily. At Vancouver, flour mills were busy, and the sugar refinery was steadily employed, though shipments of raw sugar were irregular; the abattoir was working steadily and meat packing houses were active; fruit and vegetable canning were seasonally quiet and breweries were dull; women working in cigar factories were not as fully employed as in the previous month. At Victoria, fruit and vegetable canneries were making preparations for their busy season; cigar factories and breweries reported a falling off in trade.

Textiles, cordage and carpets

Amherst and Truro reported woollen mills well employed, and, at St. John and Fredericton, cotton mills were working full time. At Moncton, the Atlantic Underwear Company showed increased outputs and was advertising for additional help; Humphrey's woollen mills were active. Quebec reported cotton mills very busy, and, at Sherbrooke, cotton, woollen and knitting mills were active. Montreal reported that cotton manufacturers and other textile establishments had all the orders they could fill. Three Rivers reported the Wabasso Cotton Company very busy, and, at Hull, Hanson Brothers knitting mills reported a

rush of special orders. At Toronto, woollen, hosiery, underwear and knitted goods manufacturers were active and tent and carpet industries reported trade good. At Hamilton, there was a demand for weavers in cotton factories and other branches of the textiles group were active. St. Catharines reported manufacturers of silk goods, underwear and knitted goods well employed, and, at Welland, cotton mills were running day and night shifts and advertising for hands. Galt reported cotton, woollen and silk mills fully employed, and, at Brantford, woollen mills and knitting companies were very busy, but short of help. Kitchener reported the felt factory working full time and the Doon twine factory active and short of help. At Stratford, woollen mills, hosiery and knitting factories were well employed. London and St. Thomas reported knitting companies busy, and, at Windsor, the awning company resumed operations; button factories were busy. Orillia reported the demand for employees in some metal plants was drawing on the supply of labour in woollen factories. Owen Sound reported woollen mills and knitting companies fairly active, although one company shut down for about two weeks. Kingston reported cotton and woollen mills active, and, at Guelph, cotton, woollen and linen mills and carpet mills were busy and the whitewear factory was well employed. At Chatham, knitting mills and textile factories were active. Winnipeg reported bag companies well employed and knitting companies increased their staff; tent and awning firms continued normally employed. Vancouver reported manufacturers of tents, awnings and sails busier and all firms fully employed.

Clothing and laundering

Halifax reported that ready-made clothing factories had plenty of orders, but found difficulty in securing help. Truro and Moncton reported cap factories running full time, and, at Fredericton, garment workers were better employed, owing to improvement in spring trade. Quebec reported clothing factories busy, but laundries quiet; at Sherbrooke, ready-made clothing establishments were very active. At Hull, special orders resulted in the Woods Company taking on more help; Sparks Brothers also added to staff. At St. Hyacinthe, clothing factories had an active month and help was in demand in shirt and overall factories; steam laundries were very busy. Three Rivers reported glove factories active, but at St. John's and Iberville the Cluett-Peabody Company reduced its staff. At Toronto, the cloak trade was fair, but not as active as last month; workers in ready-made clothing factories had plenty of employment, and hat and cap workers and whitewear operatives and employees in steam laundries were well employed; experienced operators in all lines of clothing were in demand and some shortage of pressers and hand finishers was reported. At Hamilton, there was a demand for labour in steam laundries and dyeing and cleaning establishments; ready-made clothing factories and shirt and collar factories were busy. At Niagara Falls, hat and corset factories were busy, and woman help was in demand at suspender factories. At Ottawa, help was taken on by clothing manufacturers, who reported machine operators scarce; extra help was also employed at Parker's Dye Works. At Kitchener the robe and clothing factory was very busy, and shirt, collar and button factories were in need of hands; glove factories were busy and power machine operators were in demand; in the women's whitewear factory there was a demand for operators and girls in sewing and trimming departments; Brantford reported shirt and overall factories very busy. At Stratford the ready-made clothing factory was not as busy as during the previous month. Windsor reported the Peabody Overall and Shirt Company very active and help in demand. Dyeing and cleaning establishments were busy. At Belleville the shirt factory was busy and steam laundries and cleaning establishments reported an active month. Brockville reported the Walthosen Hat Corporation

and the glove factory fairly busy. At Winnipeg, manufacturers of ready-made clothing reported more employment and shirt factories were fairly busy; there was some increase in staff in cap factories, and glove manufacturers were active and in need of help. Furriers were experiencing an unusually busy spring and whitewear firms reported fair activity. Laundries were reported well employed, and cleaners and dyers were active. At Edmonton the Great Western Garment Company reported a demand for help and some 250 hands were fully employed. Vancouver reported the overall and shirt making trades were not as active as during the previous month, but steam laundries and dyeing and cleaning establishments were fairly busy. At Victoria, shirt and overall factories were working steadily.

Pulp, paper and fibre

Halifax reported the felt and tarred paper plant working to capacity. St. John reported the pulp mill working day and night, and, at Newcastle, pulp and paper makers continued busy. Sherbrooke reported pulp and paper mills active, and, at Hull, the demand for pulp and paper was well maintained. Pulp and paper mills at Three Rivers had a busy month. At Ottawa the J. R. Booth Company reported the demand for pulp and newsprint well maintained, and, at St. Catharines, pulp mills and manufacturers of pulp products were well employed. At Sault Ste. Marie, pulp and paper mills were hampered by a scarcity of papermakers and expected to be obliged to close down part of their plant. Port Arthur reported the pulp and paper mill fully employed and taking on men for camps and for the drives.

Printing, publishing and paper

At Halifax, printing establishments were active, with a shortage of help. Sydney reported printers active, and, at Truro, printers were very busy and help scarce. At St. John, newspaper and job printing was good, and some establishments were working overtime. Binderies were busy and paper box factories reported help scarce. Charlottetown reported the printing and allied trades well employed. At Newcastle, newspaper and job printing offices were active, though there was no overtime as in the previous month. Moncton reported newspaper and job printing offices very active. At Quebec, newspaper and job printing was dull, but, at Montreal, Sherbrooke and St. John's and Iberville, printing establishments had a good month. St. Hyacinthe reported all branches of the printing trades active and paper box factories were well employed. Three Rivers also reported printers well employed. At Toronto, printers, bookbinders and allied trades had steady work and paper box and bag manufacturers were active. At Hamilton, all branches of the printing trades were busy, and, at St. Catharines, employment continued good. Ottawa reported that the printing trades were not as busy as in the previous month, though prospects were good and no employees were laid off. Paper box factories reported business well maintained. Brockville and Kingston reported newspaper and job printing fair, and, at Belleville, the printing trades were busy. Peterborough, Galt and Brantford reported printing offices active, and, at Kitchener, Stratford and Guelph, printers were steadily employed. Woodstock reported some demand for linotype operators and job hands, and, at St. Thomas, machine operators were scarce. Chatham also reported a demand for men, and, at Windsor, newspaper and job offices showed an improvement over the previous month. Owen Sound reported printers in demand. At Winnipeg, all branches of the printing group were well employed and job hands in demand. Paper box manufacturers were not as busy as in the previous month and were employing the same staff. Brandon reported newspaper and job printing active, and, at Regina, there was a demand for help. Prince Albert reported printers moderately active, with help scarce. Medicine Hat

reported printers fairly well employed, and, at Lethbridge and Calgary, printers were steadily employed. Edmonton reported some overtime in the printing trades. Fernie reported job printing brisk, and, at New Westminster, printing offices reported business normal. Vancouver reported newspaper printing very busy and men in all branches were engaged full time; job printing was improving and showed better prospects than for several years; binderies were fairly busy. Victoria reported all branches of the printing industry fairly active.

Woodworking and furniture

Sydney, Amherst and Westville reported sash, door and planing mills well employed, and, at Halifax, sash and door factories were very active. Fredericton reported sash and door factories busy, and, at St. John, establishments in this line were working overtime; wooden box factories were active and brush and broom factories had a good month. Newcastle reported sash and door factories busier than in the previous month, and, at Moncton, also, activity was reported. Quebec reported sash, door and planing mills and box factories quiet, but, at Sherbrooke and St. Hyacinthe, employment was good, and, at St. Hyacinthe, organ factories had a good month. St. John's and Iberville and Three Rivers reported sash and door factories busy. At Toronto, the woodworking and furniture trades, including piano makers, had an active month and more women were employed. Hamilton reported sash and door mills fairly active and other branches of the woodworking group busy. St. Catharines reported sash and door factories and other branches of the woodworking group fairly active, but, at Niagara Falls, planing mills were quieter than usual for the season. Ottawa reported sash and door factories busy. Kingston reported sash, door and shingle mills busy, and broom factories fair; piano factories had a good month. Belleville reported sash, door and planing mills busily employed. At Kitchener, sash, door and planing mills were all running full time, and wooden box factories were also busy; in furniture factories, finishers, polishers, machine hands, stainers and fillers were wanted; broom factories were fairly quiet, but woodenware and cooperage factories were busy; the piano and organ factory was working full time; sash, door and planing mills at Galt were very busy and advertising for help, but, at Brantford, quietness was reported. Stratford reported sash, door and planing mills busy and furniture factories well employed; broom factories and cooperage shops were active. Guelph reported piano makers and sewing machine makers active, and sash, door and planing mills were well employed. Woodstock reported a demand for labour of all kinds, especially machine hands, bench hands and finishers in furniture and chair factories, and there was some demand for skilled hands in piano and organ factories. At London, planing mills were busy, and the Sherlock-Manning Piano Company was active. At Chatham, sash and door factories were working full time, and, at Windsor, sash and door factories were well employed, but box factories were somewhat quiet; the piano factory was fully employed. At Winnipeg, sash, door and planing mills reported improvement and a demand for experienced help. Brandon, Regina, Lethbridge and Prince Albert reported sash, door and planing mills active, and, at Medicine Hat, employment in planing mills showed considerable improvement over the previous month. Fernie reported an improvement in sash and door factories, and, at New Westminster, factories in this line were very busy on large orders from the Prairie Provinces; wooden box factories were also busy, one factory running overtime. Vancouver reported sash, door and planing mills and wooden box factories fully employed.

Amherst reported the Amherst boot and shoe factory fairly well employed and the trunk and bag factory very busy. At St. John, the tannery was busy, but reported help scarce; the boot and shoe factory was running steadily. Fredericton reported the shoe factory and larrigan factory steadily employed. At Quebec, boot and shoe factories were very dull, but trunk, bag and harness factories were very busy. Sherbrooke and Sorel reported the leather industry busy, and, at St. Hyacinthe, the leather industry had a fair month, though there was less activity than in the corresponding month of last year. Three Rivers reported the leather industry quiet. At Toronto, boot and shoe factories had a fair amount of work, and trunk, bag and harness factories were active. Rubber factories had large orders on hand and labour was in demand. Hamilton reported boot and shoe factories busy, and trunk, bag and harness factories active. St. Catharines reported rubber factories steadily employed. At Niagara Falls, the shoe parts factory was busy, and in need of women employees. Ottawa reported leather workers very busy, owing chiefly to the demand for horse goods. Kingston reported tanneries fairly busy. At Peterborough, leather workers were active, but, at Galt, boot and shoe factories were quiet. Brantford reported the Brandon boot and shoe factory running full handed, and, at Kitchener, both tanneries were busy; boot and shoe factories were active, with cutters and finishers in demand. Trunk and bag factories were working full time; the Dominion Tire Company was running double shifts and was in need of machinists and other help; rubber factories were very busy. Stratford reported the tannery fairly busy and harness workers steadily employed. At Woodstock, there was a demand for tanners. London reported the Hyman tannery exceptionally busy and shoe factories were active. St. Thomas reported shoe workers well employed. At Owen Sound, tanneries were busy and a new shoe factory began operations. Brandon reported tanneries fairly active and manufacturers of trunks and leather goods busy. At Vancouver, the boot and shoe factory was busy, with plenty of work ahead.

Leather, boots, shoes and rubber

St. John reported cut stone and granite workers quiet, and, at Quebec, stone cutting yards were very dull and brickmaking was just commencing for the season. Sherbrooke reported all branches of the clay, glass and stone group quiet, and, at St. Hyacinthe, while stone and granite yards were quiet, brick yards and lime kilns were in full operation. At St. John's and Iberville, the Clay Products Company was working with a reduced staff. Toronto reported that brick yards were commencing to show activity. In the glass bottle industry, operations were curtailed owing to difficulties in securing supplies. The Dominion Glass Bottle Company was replacing hand blowers with machines. Hamilton reported brick, tile and sewer pipe yards active, and a demand for labour in pottery and porcelain works. At Kitchener, stone cutters and marble workers were busy, but brick, tile and sewer pipe workers were quiet. Stratford reported brick yards fairly well employed, but, at London, brickyards were quiet. Chatham reported brickmaking dull, but tile and sewer pipe plants were very busy. Medicine Hat reported brick and tile yards showed improvement and that the stoneware industry continued brisk. At Lethbridge, brickyards were commencing work for the season. Vancouver reported cut stone and granite works very quiet.

Clay, glass and stone

Sherbrooke reported manufacturers of acids, drugs, etc., active, and, at Toronto, paint, varnish and chemical manufacturers were busy. Hamilton reported soap factories and manufacturers of drugs active; at Niagara Falls the cyana-

Paints, oils chemicals, explosives

mid company obtained additional power and was operating its plant at full capacity. Brantford reported the Scarf Varnish Company active, and, at Windsor, the Standard Paint and Varnish Company was busy; manufacturers of soaps were active, and the Canadian Salt Company was very busy. Soap factories at Winnipeg and Regina were active, and, at Regina, the oil works were running full time. Vancouver reported activity in paint factories and the petroleum refinery was active, although there was some irregularity in employment because of delays in the arrival of supplies. Victoria reported paint and soap factories working steadily, and the Kelp Products factory at Sidney very active.

Transportation

Earnings of the Canadian Pacific Railway during March were $12,427,914, as compared with $11,846,542 for the same month in the previous year. Sydney reported steam railways very active and repair shops busy. At Halifax, all branches of railway service were busy, and street and electric railways were active, with a shortage of motormen and conductors. Westville reported improvement in employment in steam and electric railways, and Truro reported railway employees working overtime owing to heavy freight traffic. St. John reported railways busy, but hampered by lack of rolling stock, and Fredericton and Newcastle reported active conditions. Moncton reported many special trains were being run in order to relieve the congestion of freight and railway operating crews were working much overtime. Quebec reported that railways were very active in freight service, but there was no increase in passenger service. Montreal, Sherbrooke, St. Hyacinthe and St. John's and Iberville reported railway men busy. Toronto reported railway and street car workers well employed. At Hamilton, steam railways were active and freight traffic was considerably in excess of the corresponding period of last year. At Niagara Falls all the railways were busy and electric lines were advertising for trainmen; car repairers were also in demand. Kingston reported railway repair shops active. At Belleville, passenger and freight traffic was brisk, but, at Peterborough, railway traffic was quieter as is usual at this season owing to the transport of grain by water. Brantford, Galt and Kitchener reported steam and electric railways busy. St. Thomas reported railway employees very busy throughout the month. Winnipeg reported railway shops fairly well employed and difficulty in obtaining men for street cars. Brandon reported steam railways busy and repair shops fairly active. At Regina, owing to the curtailment in train service, a few hands were laid off. Prince Albert railways were busy. Medicine Hat reported normal conditions on the Canadian Pacific, with a scarcity of men in some branches. Calgary reported railway men fully employed and freight traffic in farm implements heavy. Fernie reported a slight increase in freight traffic over March. New Westminster reported an improvement in electric railway business. At Vancouver, railways reported normal conditions. Sydney reported navigation and 'longshore work more active than in the previous month. Halifax reported 'longshore men busy, and, at St. John, 'longshore work was also active. Fredericton reported that the opening of navigation afforded employment for river men, and, at Newcastle, a large number of navigation workers were engaged; 'longshoremen, however, were not employed, as no steamers had arrived. Navigation was open at Quebec, but there had been no arrivals of ocean-going vessels. The first coasting vessel to leave Quebec sailed on April 9, and the first coasting schooner arrived on April 5, somewhat earlier than usual. Three Rivers reported that the river was clear of ice and that navigation was open to Montreal. Montreal reported most of the gas buoys laid and vessels passing up and down the Lachine canal at the end of the month. At Toronto, with the opening of navigation, marine engineers and sailors were busily engaged, and some scarcity of labour was anticipated. Hamilton re-

ported the commencement of navigation between that city and Toronto on April 3, and between Hamilton and Montreal on April 26. Belleville and Brockville reported navigation opened and the commencement of some 'longshore work. Vancouver reported navigation and 'longshore work active. Port Arthur reported that navigation opened on April 25, some two weeks earlier than last year, and many men were engaged for the boats. Men were being taken on also at the Fort William freight sheds.

Mining

Sherbrooke reported copper and asbestos mining in the district active, and there was a fair amount of activity in mills and concentrators. The Cobalt mines continued to work at full capacity. During April a total of 34 cars, containing 2,320,661 pounds of ore, were shipped, as compared with 38 cars, containing 2,879,423 pounds in March. Bullion shipments were 622,042 ounces, as compared with 898,668.26 ounces in March. At Porcupine, with the price of gold remaining the same and costs increasing, some of the mines were curtailing their work somewhat. In the Kirkland Lake gold camp three mills were producing, and, at Porquois Junction the Alexo nickel mine continued to ship about 10 cars of ore per month. In the Trail, Nelson and Rossland districts, metal mining continued active. During the month the Consolidated Company issued a circular to lead ore shippers announcing they would remove the restriction upon ore receipts and agreeing to accept normal shipments from the mine on and after May 1. This was expected to increase activity in the smaller mines. Nanaimo reported that quartz mines in the district continued quiet, owing to lack of smelter facilities.

Sydney reported the output of the Dominion Coal Company 290,000 tons against 267,000 tons in March. The output at Sydney Mines was 40,500, compared with 44,000 tons last month. The coke output of the Dominion Company was 48,000 tons, with 550 ovens in operation, and of the Sydney Mines plant 8,940 tons, with 183 ovens in operation. Westville reported that coal mines in the district increased their output; some slight labour difficulties resulted in a cessation of work for a short time. Amherst reported coal mines in the district well employed, and the mines at Minto steadily increased their output, though still short of men. Lethbridge reported coal mining very active, though there was still some shortage of labour. Calgary reported some slackness in coal mines in the district. Fernie reported coal mining very steady and only two unnecessary idle days during April. Nanaimo reported coal mines in the city and district working to capacity of the labour available.

Building and Construction

Sydney reported a fair amount of building work on dwellings and commercial and public buildings. Halifax reported building very active. At St. John, a large amount of repair work on dwellings was under way, but not much new work was started. At Fredericton, building tradesmen were well employed, and carpenters, masons and painters were in demand. Newcastle reported building operations active, but, at Moncton, building generally was quiet, though a considerable amount of repair work was being done. Montreal, Sherbrooke, St. Hyacinthe and St. John's and Iberville reported building quiet. At Quebec, there was an improvement in building operations, and Sorel reported employment in building good. Three Rivers reported fairly active conditions, with good prospects for the summer season. Toronto reported the building tradesmen fairly active, owing to a scarcity of dwelling houses, though there was comparatively little large construction. Hamilton reported building active, despite the high cost of materials. At Niagara Falls, building was quiet, and Brockville and Kingston also reported quietness, but, at Belleville, building was active, with good prospects for the summer. Kitchener, Brantford and Guelph reported quietness, but, at Galt, there

was some activity. At Woodstock and London, building was dull, and little was being done at Chatham and Windsor. Sault Ste. Marie reported building operations brisk; the construction of a compensating dam at the St. Mary's rapids was expected to give employment to about 50 skilled mechanics; the Algoma Steel Corporation were erecting a large coal bridge, which it was expected would require about 50 men. Winnipeg reported practically all classes of building tradesmen well employed, and, at Brandon, there was a fair amount of work in dwellings and commercial buildings. Regina reported there was prospect of a busy building season. At Prince Albert, building was fairly active. Lethbridge reported very little building in the city, but operations were becoming active in the country. At Calgary, there was a fair amount of building in progress. New Westminster reported building at a standstill, and, at Vancouver, building generally was quiet, though there was no unemployment among building tradesmen; some shipbuilding plants were making extensions.

The value of building permits issued in 35 cities increased from $2,133,781 in March to $3,005,785 in April, or 40.9 per cent. As compared with April, 1917, there was a decrease of $226,174, or 7. per cent.

Lumbering

Fredericton reported that rafting and milling operations were employing hundreds of men. St. John reported river driving and rafting started on the St. John river and that three sawmills commenced operations. At Newcastle, stream driving had commenced, but there was a scarcity of men for the work as well as for the sawmills, and it was expected that some of the Miramichi mills would not operate this season. Quebec reported river driving in full operation, but sawmills and shingle mills had not commenced operations. Sherbrooke reported river driving active and a fair amount of activity in sawmills and shingle mills. At Hull, the E. B. Eddy sawmill was opened towards the end of the month and gave employment to about 45 men. Ottawa reported that the J. R. Booth Company was preparing to open its mills and was experiencing difficulty in securing men. At Peterborough, the sawmills were getting ready for the season's cut and some mills were finding difficulty in obtaining experienced hands. Sault Ste. Marie reported that heavy rains towards the end of the month improved conditions on the drives. Prince Albert reported lumber camps closed, but river drivers and sawmill hands very busy. Calgary reported a good demand for men in lumber camps and sawmills. Nelson reported lumber mills in the district active. At New Westminster, sawmills were all busy and shingle mills were working to capacity. Vancouver reported lumber camps active and sawmills and shingle mills well employed. Victoria reported lumbering operations brisk, and large numbers of men employed. Nanaimo reported logging camps and sawmills active, but hampered by a shortage of labour.

PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT DURING APRIL, 1918

DURING the month of April reports were received of four Boards of Conciliation and Investigation which had inquired into disputes affecting (1) Collingwood Shipbuilding Company, Limited, Collingwood, Ont., and employees; (2) Corporation of the City of Ottawa and firemen; (3) Hamilton Street Railway Company and conductors and motormen; and (4) Corporation of the City of Ottawa and certain employees. In the first three cases settlements were effected, and in the fourth the award was declared

acceptable to the employees but the civic authorities had not stated their position at the close of the month.

Settlement by direct negotiations was reported of a dispute between the Canadian Northern Railway (Eastern Lines) and the Halifax and South Western Railway and conductors, trainmen and yardmen.

Ten applications for the establishment of Boards also received attention during the month. Details of these applications are given hereunder.

Applications Received

On April 3 an application for a Board was received from the conductors and motormen in the employ of the Hamilton Street Railway Company, members of Division No. 107, Amalgamated Association of Street and Electric Railway Employees of America. Particulars of the application, the personnel of the Board established in connection therewith, and the text of the Boards' report appear in the present chapter.

On April 4 an application for a Board was received from certain employees of the Corporation of the City of Ottawa, members of Federal Labour Union No. 15. Particulars of the application, the personnel of the Board established in connection therewith, and the text of the Board's report appear in the present chapter.

On April 8 an application for a Board was received from the trackmen employed on the Canadian Lines of the Pere Marquette Railway Company, members of the International Brotherhood of Maintenance of Way Employees. The dispute involved wages and conditions, a schedule of rates and rules as proposed by the employees being attached to the application. One hundred and fifty employees were said to be affected by the dispute. A Board was established by the Minister on April 29, Mr. J. G. O'Donoghue, Toronto, being appointed a member thereof on the recommendation of the employees. At the close of the month steps were being taken looking to the completion of the Board.

An application for a Board received on April 12 from certain employees of the Corporation of the City of Toronto, members of Civic Employees' Union No. 43, and on April 15 a further application was received from the oilers and fitters, members of Local No. 300 of the International Brotherhood of Stationary Firemen. The dispute involved wages, hours, and conditions of employment, and affected in all 3,000 employees. The Corporation of the City of Toronto did not agree to a reference of the dispute under the Act and no Board could be therefore established.

On April 15 an application for a Board was received from employees of the Nova Scotia Steel and Coal Company, Limited, members of Local No. 15345 of the American Federation of Labour, to deal with a dispute having to do with wages and union recognition. Nine hundred employees were said to be directly affected by the dispute and 2,500 indirectly. After due consideration it was thought that the interest of of all concerned would be best served by a reference of the dispute indicated in the application to a Royal Commission, this Commission to be charged also with the duty of inquiring into certain other industrial disputes in the Province of Nova Scotia. The personnel of this Commission is as follows:—the Honourable Mr. Justice Jos. A. Chisholm, Judge of the Supreme Court of Nova Scotia; Rev. Dr. John Forrest; and Mr. J. B. McLachlan, Secretary-Treasurer of the Amalgamated Mine Workers of Nova Scotia.

An application for a Board was received on April 19 from certain employees of the Grand Trunk Railway Company, members of the International Brotherhood of Railroad Stationmen and Railroad Employees' Alliance. The dispute resulted from a demand on the employees' part for increased wages and uniform working conditions throughout the system. The number affected was said to be 3,500 directly and several thousand indirectly. Prior to the application efforts were made to effect an adjustment by direct negotiation, and an officer of the Department visited the

locality and did what was possible to this end, but without success. A Board was established by the Minister on April 19 and was constituted as follows: His Honour Judge J. G. Wallace, Woodstock, Ont., chairman, appointed by the Minister in the absence of any joint recommendation from the other Board members; Mr. F. H. McGuigan, Toronto, employer's nominee; and Mr. Bernard Rose, Montreal, employees' nominee.

The Department received on April 20 an application for a Board to deal with a dispute between the Canadian Northern Express Company and employees, members of the Canadian Brotherhood of Railroad Employees. The application, which emanated from the employees, stated that the dispute had grown out of a demand for the adoption by the company of a proposed schedule providing for increased wages and improved working conditions. The number affected was given as 315.

On April 23 an application for a Board was received from the policemen in the employ of the City of Ottawa to deal with a dispute affecting 79 of their number. A number of the policemen had joined a union known as the Policemen's Federal Association No. 50 and had consequently been dismissed. A demand was made that these dismissed policemen should be reinstated without loss of pay, seniority rights or any of the privileges enjoyed prior to their dismissal. It was ruled that the police service did not fall within the jurisdiction of the Act except by joint consent of the disputants. The civic authorities refused, however, to agree to an inquiry by a Board of Conciliation and Investigation and no Board could be therefore established.

On April 30 the Department received an application for a Board to deal with a wages dispute between the Nicholas Chemical Company, Limited, and employees engaged in mining and stripping ore at the company's mines at Goudrea, Ont., to the number of 18. The employees concerned were members of the International Brotherhood of Steam Shovel and Dredgemen.

On April 30 an application for a Board was received to deal with a dispute between the Hull Electric Company and various classes of employees, being motormen, conductors, etc., numbering approximately 140. The dispute grew out of the men's demands for increased wages, reduced hours, and a refund of charges made for repairs to cars as a result of accidents. Steps were immediately taken looking to the establishment of a Board to inquire into the matter.

Other Proceedings under Act

In the April number of the *Labour Gazette* reference has been made to an application for a Board which was received on March 18 from certain employees of the Canadian Northern Railway Company, being clerks, stationmen, etc., members of the Canadian Brotherhood of Railway Employees. This dispute grew out of a demand on the part of the applicants for a schedule providing for increased wages and improved working conditions and affected 786 employees directly and 1,200 indirectly. As it was expected that the Canadian Northern Railway would shortly be controlled by the Dominion Government it wasdeemed advisable to defer action on this application until the relations between the Government and the Canadian Northern Railway had been definitely determined.

Under date of April 23 the Department was informed that an agreement had been reached by the Canadian Northern Railway Company (Eastern Lines) and the Halifax and South Western Railway and certain employees, being conductors, trainmen and yardmen, members of the Order of Railway Conductors and the Brotherhood of Railway Trainmen respectively. The application in this matter was received on January 23. It was stated that the dispute related to wages, hours and conditions of employment, and affected 650 employees directly and 1,400 indirectly. A Board had been established to deal with a dispute affecting similar classes of employees on the Western

Lines of the Canadian Northern Railway, and by joint consent of both parties to the dispute the powers of this Board were extended to include the dispute on the Eastern Lines. The members of the Board were as follows: the Honourable Mr. Chief Justice T. G. Mathers, Winnipeg, chairman; Mr. C. E. Dafoe, Winnipeg, employer's nominee; and Mr. T. J. Murphy, Winnipeg, employees' nominee. Negotiations, however, having brought about a settlement, the necessity of an inquiry by the Board was obviated.

Report of Board in Dispute between the Collingwood Shipbuilding Company, Limited, and certain Employees

On April 10 the Minister received the report of the Board which had been appointed on the application of certain employees of the Collingwood Shipbuilding Company, Limited, Collingwood, Ont., members of Georgian Bay Lodge No. 343 of the International Boilermakers, Iron Shipbuilders and Helpers of America, for the purpose of inquiring into a dispute growing out of the employees' demand for increased wages and improved working conditions in accordance with an agreement submitted by the employees to the company. The number affected was given as 375 directly and 200 indirectly. The application was received on February 15 and on February 20 the employees went out on strike as a result of the refusal of the company to reinstate an employee to his former position of foreman. An officer of the Department visited the locality with a view to using the good offices of the Department in an endeavour to settle the dispute. The company agreed to have the workman in question reinstated as foreman and the men returned to work on February 25 under the same conditions as existed prior to the strike, pending investigation under the Act. The members of the Board established in this matter were as follows:—Mr. Hamnett P. Hill, Ottawa, chairman; Capt. J. B. Foote, Toronto, employer's nominee; and Mr. Fred Bancroft, Toronto, employees' nominee. The appointment of Mr. Hill to the chairmanship was made on the joint recommendation of Capt. Foote and Mr. Bancroft.

The report states that shortly after the Board began its inquiry there appeared to be a possibility of settlement by the interested parties themselves. Direct negotiations ensued, and, with the assistance of the Board, an agreement was executed, the same to be effective for one year from April 9, 1918. The dispute was thus satisfactorily settled.

Report of Board

Honourable Thomas W. Crothers, K.C., M.P.,
Minister of Labour,
Ottawa, Canada.

Dear Sir,—

In the matter of the Industrial Disputes Investigation Act and in the matter of the Collingwood Shipbuilding Company, Limited, and the members of Georgian Bay Lodge, No. 343, International Brotherhood of Boilermakers, Iron Shipbuilders and Helpers of America.

The Conciliation Board appointed herein beg to report as follows:

A meeting of the Board was held at Ottawa on March 28 and at Collingwood on Wednesday, April 3. At this latter meeting the representatives of the company and of the men agreed that they would negotiate directly between themselves, as a possibility of a settlement was apparent. Negotiations between those representatives, assisted by Mr. Bancroft, a member of the Board, accordingly took place on the afternoon of April 3, and were continued during April 4 and 5, with the assistance of the Board. As a result of these negotiations we are very happy to report that an agreement has been entered into between the company and its employees, copy of which agreement we beg to enclose herewith.

The Board would like to take this opportunity of expressing its great pleasure at the good feeling which was apparent between the

company and its men and the fair spirit in which both sides conducted the negotiations.

We beg to remain, Sir,

Your obedient servants,

(Sgd.) H. P. HILL,
Chairman Conciliation Board.
(Sgd.) FRED BANCROFT,
Representing Men.
(Sgd.) JAMES B. FOOTE,
Representing Company.

Collingwood, April 5, 1918.

AGREEMENT.

This agreement made and entered into this fourth of April, 1918, between the Collingwood Shipbuilding Company, Limited, and the International Brotherhood of Boilermakers, Iron Shipbuilders and Helpers of America, Local Lodge, No. 343.

1. Nine hours shall constitute the day's work and shall be worked from seven a.m. till twelve noon and from one p.m. to five p.m., except Saturdays, when five hours shall be worked from seven a.m. till twelve at noon.

2. All overtime shall be paid at the rate of time and one half, on all new work and on the following holidays: New Year's Day, Good Friday, Victoria Day, Dominion Day and Thanksgiving Day, and double time on Sundays, Christmas Day and Labour Day, for all new and repair work. Should any of the above mentioned holidays fall on Sunday the day observed by the Federal or Provincial Governments will be observed.

It is understood that double time for overtime will only apply to men actually employed on repair work on the ships.

3. Men required to work a half turn overtime, will work from 5.30 p.m. to 8.30 p.m., and will be paid for four and one half hours for this time on new work and six hours on repair work.

4. Night shifts shall be worked from 7 p.m. until midnight and from 1.00 a.m. to 6.00 a.m., and shall be paid at the rate of time and one quarter. Any time worked by night shift outside of these hours shall be paid on overtime rate. Night shifts on Saturday night shall be paid time and one half from 7.00 p.m. to midnight and double time from 1.00 a.m. to 6.00 a.m. Sunday. Night shifts on Sunday night shall be paid double time from 7.00 p.m. to midnight and time and one half from 1.00 a.m. to 6.00 a.m. Monday.

5. Should a man work on shift to mid-day and then be notified to cease work and return to start on night shift that night, he shall be paid time and one quarter from 7.00 p.m. to midnight and time and one half from 1.00 a.m. to six a.m. for that night only.

6. Classification of work to be done by boilermakers or shipbuilders: All boilers, fitting up, laying out, patching, flanging, tubing, rivetting, chipping and caulking of same. All tanks, stacks, uptakes and casings, gas holders, smoke-consumers, brewery vats, digesters, all steel or iron structural work, and all flanging and bending of plates, frames, beams or other sections forming part of any of the above mentioned items.

Men who have served an apprenticeship, or who have had four years' varied experience at the trade and who are competent to do all or any of the work enumerated above in this clause shall be designated as boilermakers or shipbuilders, as the case may be.

The rates of wages in this schedule shall apply to boilermakers and shipbuilders as designated, and all men engaged on this work as classified in clause 6 who have had two years' service on any of the work specified. Others advanced from helpers' positions shall be paid 40c for first year, 45c for the second year, and at the commencement of the third year shall receive minimum rate. Helpers shall not be advanced to detriment of mechanics receiving the minimum rate.

7. Work classified as boilermakers' or shipbuilders' work in clause 6 will not be done by other trades.

8. Boilermakers or shipbuilders shall operate, or supervise, the operation of all pneumatic, hydraulic, punching, shearing, acetylene welding and burning tools used in carrying out all work classified as their work in clause 6.

9. Such grievances as do not relate to the subject of hours and wages covered by this agreement and which may arise shall be given consideration as follows: All complaints not satisfactorily adjusted by foremen to be taken up direct with the manager by a committee of the men or a committee of the men and their business representatives, to endeavour to settle the same.

10. The management will not discriminate against any employee or committee of employees who may from time to time be elected to represented their craft.

11. The minimum scale of wages shall be as follows:

Classification.	New work per hour.	Old work per hour.
Boilermakers	.50	.52½
Ship fitters	.50	.52½
Hand rivetters	.50	.52½
Holders-on	.45	.47½
Heaters	.35	.37½
Machine rivetters	.50	.52½
Holders-on	.45	.47½
Heaters	.35	.37½
Chippers and caulkers	.50	.52½
Reamers	.35	.37½
Drillers	.40	.42½
Bolting up	.32½	.35
Punch and shear men	.40	.42½
Punch shed helpers	.33½	.35
Furnace men	.50	.52½
Slab helpers	.40	.42½
Plate hangers	.40	.40
General helpers	.32½	.35
Acetylene burners	.47½	.50
Acetylene welders	.50	.52½

Packing to be done by mechanics only.

Heaters' minimum rates need not apply to youths under 21 years of age except at the discretion of the foreman.

12. On jobs where men are requested to work as though on piece-work, but on account of obstruction, etc., it is difficult to fix a straight piece-work price, the following rates will be paid:

Fitters	78c per hour
Chippers and caulkers	78c per hour
Drillers	60c per hour
Rivetting gangs:	
Hand gang, new work	2.65 per hour
Hand gang, old work	2.90 per hour
Machine gang, new work	2.10 per hour
Machine gang, old work	2.20 per hour

Note.—It is understood that in connection with Clause 12, piece-work shall prevail wherever possible.

13. In the event of there being a shortage of labour, such as not a sufficient supply of local men, this local lodge will endeavour to supply as far as possible competent men from other districts.

14. Provided that this agreement is faithfully adhered to by the men during the period named, the firm agree to give preference of employment as far as practicable to members of local lodge under the conditions described in Clause 13. It is distinctly understood, however, that the firm reserves the right to employ shipbuilders, boilermakers and helpers, any men who are capable of carrying out the work to the satisfaction of the management, whether they are members of the above named lodge or not.

15. The terms of this agreement shall be effective beginning April 9, 1918, and remain in effect until April 9, 1919, and thereafter unless 30 days' notice is given by either party of a desire to change.

16. Pay, regular pay-days at 12.00 noon.

17. It is understood that men covered by this agreement at present receiving a rate in excess of the rates of wages herein specified shall not suffer a reduction in wages.

(Sgd.) JOHN S. LEITCH,
For the Collingwood Shipbuilding Company, Limited.

(Sgd.) A. T. BARBER,
(Sgd.) T. C. PATTERSON,
(Sgd.) N. C. TURNER,
For I. B. of B. I. S. B. and H. of A., Local Lodge No. 343.

(Sgd.) J. P. MERRIGAN.

Report of Board in Dispute between the Corporation of the City of Ottawa and Firemen

On April 19 the Minister received the report of the Board which had been appointed on the application of the firemen employed by the Corporation of the City of Ottawa to inquire into differences relating to wages, classification, and other grievances, affecting 85 directly and 10 indirectly. A Board in this matter was established by the Minister on March 30 and was constituted as follows:—Lieut. Frank J. P. Crean, Ottawa, chairman, appointed by joint agreement of the other Board members; Mr. T. A. Beament, Ottawa, employers' nominee; and Mr. Wm. Lodge, Ottawa, employees' nominee.

The Board presented a unanimous report in which it was stated that a settlement of all matters at issue had been arrived at by the parties concerned. The dispute was thus satisfactorily adjusted.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Corporation of Ottawa, employer, and its firemen, being members of Federal Union, No. 24, employees.

To the Honourable T. W. Crothers, Esq., K.C.,
Minister of Labour,
Ottawa, Canada.

The Board of Conciliation appointed with reference to this matter has the honour to report as follows:

The members of the Board met for the first time at the City of Ottawa, on the fifteenth of April, 1918, and after each member taking the prescribed oath of office, proceeded to endeavour to effect an amicable settlement between the parties, and continued in session on the sixteenth and seventeenth days of April, 1918.

The members of the Board desire to report that the meetings were marked by an evident desire on the part of both parties to deal with the matters at issue in a businesslike manner, and, if possible, to arrive at an amicable settlement which ultimately resulted in the parties arriving at an agreement with regard to their differences, the terms of which are as follows:

1. The Corporation agrees to pass a By-law as follows:

Each fireman after one year's service in any class shall be promoted to the next higher class, unless the Chief of the brigade shall report in writing that such fireman is not deserving of promotion, and such report is after investigation confirmed by the Board of Control. This By-law to be operative from July first, 1918.

2. The Corporation agrees that each fireman is entitled to one full twenty-four hours in each eight days and every fourth night from 6 p.m. to 12 p.m. throughout the year, and where any man loses any part of this privilege through relieving, such time is to be made up to him.

3. With regard to other differences, it was found that there was a certain amount of misunderstanding on both sides and these are now arranged by mutual agreement.

This arrangement having been made by the parties, the Board unanimously approves of same and is pleased that such a satisfactory arrangement has been arrived at.

(Sgd.) FRANK J. P. CREAN,
Chairman.

(Sgd.) T. A. BEAMENT,
Member of the Board.

(Sgd.) WM. LODGE,
Member of the Board.

Dated at Ottawa, this seventeeth day of April, 1918.

Report of Board in Dispute between the Hamilton Street Railway Company and Conductors and Motormen

The Minister received on April 25 the report of the Board which had been established on April 4 to deal with a wages dispute between the Hamilton Street Railway Company and certain employees, being conductors and motormen, members of Division No. 107 of the Amalgamated Association of Street and Electric Railway Employees of America. The application in this matter emanated from the employees, 270 of whom were directly affected and 50 indirectly affected by the dispute. The members of the Board were as follows:—His Honour Judge L. B. C. Livingstone, Welland, chairman, appointed by the Minister in the absence of any joint recommendation from the other Board members; Mr. S. F. Washinghton, K.C., Hamilton, employer's nominee; and Mr. W. D. Robbins, Toronto, employees' nominee.

The report was unanimous and included an agreement on all points except that of wages. Recommendations were therefore made by the Board as to wages. It was further recommended that the agreement referred to and the rates of wages recommended should be effective for two years from April 1, 1918. The award was formally accepted on behalf of the employees. The company later informed the Department that an agreement had been executed under the terms of the award. The dispute was thus satisfactorily settled.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between Hamilton Street Railway Company, employer, and its motormen and conductors, being members of Division No. 107 Amalgamated Association of Street and Electric Railway Employees of America, employees.

To the Honourable,
The Minister of Labour,
Ottawa, Canada.

The Board of Conciliation and Investigation appointed herein under the provisions of the above mentioned Act, and composed of W. D. Robbins, of the city of Toronto, recommended by the employees; S. F. Washington, K.C., of the city of Hamilton, recommended by the employer, and His Honour Judge Livingstone, appointed by the Minister of Labour as chairman of the Board, have the honour to report as follows:

1. After preliminary meetings on the sixth and eighth days of April, 1918, between the first mentioned members, at which they failed to agree upon a chairman, the Board met on the nineteenth day of April, 1918, and after the members had duly subscribed and taken the oaths of office, a conference was held between the parties concerned at the city of Hamilton.

2. A further conference was held on the twenty-third day of April, 1918, at Hamilton, and after a full discussion it appeared that the parties had reached an agreement between themselves as to all matters pending between them except as to the question of wages and a copy of their agreement is hereunto annexed, marked "A," and signed by us.

3. It being found impossible to get the parties to agree as to the rate of wages, the Board met again on the 24th day of April, 1918, at Hamilton, and after a full discussion and consideration of the evidence the Board is of opinion that the wages which should be paid by the employer to the employees should be as follows:

To its motormen and conductors for the first year's service at the rate of 30 cents per hour;

For the second year's service at the rate of 34 cents per hour;

And for the third year's service at the rate of 37 cents per hour;

And we think these rates should take effect from the first day of April, 1918.

4. We think that the rate of wages recommended should prevail for a period of at least two years from the first day of April, 1918, and that the other terms set forth in the annexed agreement should also prevail for the same period.

5. We are glad to find that in spite of the dispute as to wages which under the existing circumstances might be expected, the relations existing between the employer and the employees concerned appear to be very friendly.

(Sgd.) L. B. C. LIVINGSTONE,
Chairman.
(Sgd.) S. F. WASHINGTON.
(Sgd.) W. D. ROBBINS.

Dated at Hamilton, this twenty-fourth day of April, 1918.

Agreement

This agreement made this day of March, in the year of Our Lord, nineteen hundred and eighteen, A.D., between The Hamilton Street Railway Company (hereinafter called the "Company"), party of the First Part; The Amalgamated Association of Street and Electric Railway Employees of America, Division No. 107 of Hamilton, Ontario (hereinafter called the "Association"), Parties of the Second Part.

Witnesseth, that in the operation of the line of the Party of the First Part, both parties hereunto mutually agree as follows:

Section 1.—That the Company, through its properly accredited officer, will continue to treat with its employees who are members of the Association through the properly accredited officers or representatives of the Association.

Section 2.—(Suggested that rate be left to arbitration.)

Section 3.—For all work performed on Sundays, motormen and conductors shall be paid four cents (4c) per hour extra.

(a) Motormen and conductors shall be paid time and one half for all overtime.

(b) One and one half hours shall be the minimum amount of time to be allowed for any one run.

Section 4.—When any authorized schedule run is not completed on account of failure or shortage of car equipment, the crew shall be allowed full schedule time for that day.

(a) If time claimed by any motorman or conductor is not allowed he shall be notified as soon as possible.

Section 5.—Motormen and conductors shall be paid five cents (5c) per hour extra for snow plows, sweepers and sand cars, and shall be supplied with overalls for use on such work.

Section 6.—Motormen and conductors shall be paid twenty-five cents (25c) per day or part of day extra for training students.

Section 7.—All extra motormen and conductors who report at car barn and for relief changes shall be paid a guaranteed minimum wage of eight dollars ($8.00) per week, but should an extra motorman or conductor fail to report at any time during the week, then the Company will not be required to guarantee him the eight dollars ($8.00) per week.

Section 8.—All work for extra men shall be divided as nearly as practicable equally among them.

Section 9.—Each motorman and conductor to hold his promotion in accordance with his continuance age in the service, and to have the right to select his run in accordance with his age in the service of the Company in the following manner;

(a) All runs must be posted for motormen and conductors to make their selection as to the runs they may desire, once in each three months, commencing the first day of January, April, July and October of each year. Should a permanent vacancy occur between the periods of selection the run will be filled for the remainder of the period by the first senior man on the extra list.

(b) As many runs as possible shall be scheduled and divided in runs, to be known as "Nights Off or Day Runs" and the balance of runs to be known as "Nights On Runs."

(c) When any change in schedule is made between the periods of selection which materially alters the conditions of service, an opportunity will be given to those affected to make a new selection from the schedules that are changed.

(d) Ten minutes will be allowed for each reporting time of conductors and motormen on regular schedule runs, in addition to their schedule or running time, to cover the time necessary to inspect cars and make reports.

(e) The Company shall post the quarterly boards in the James Street Office one month before the change takes place; the "Nights Off" men to sign up for their runs on a day during the first week, to be specified by either the Superintendent or the Association, and the "Nights On" men to sign up for their new runs on a day during the second week, to be specified by either the Superintendent or the Association, the Superintendent or officials of the Association to have the power to sign up a man that fails to sign on the day specified. Any member who is unable to sign on the specified day to leave a list with the Superintendent or officials of the Association of any runs he may prefer.

Section 10.—No regular man shall be compelled to do extra work after finishing his day's work if spare men are available, and the Superintendent shall do his best at all times to provide a sufficient list so that regular men will not be required to work extra time.

Section 11.—Any motorman or conductor wishing to exchange positions shall get permission from the Superintendent, who may allow such exchange.

Section 12.—Every motorman and conductor who has been continuously in the Company's service for a period of one year shall be supplied with a uniform suit of material and style to be selected by the Company upon the following conditions:

(a) The Company agrees to pay one half the cost of a uniform for each motorman and conductor who has been in the Company's service for a period of not less than one year and not more than two years, and to provide one uniform per year free to motormen and conductors who have been in the Company's service for more than two years.

(b) It is further agreed that in case any employee leaves the service of the Company within one month after receiving his uniform, the Company may retain from his wages one half the cost of the said uniform, and any employee leaving the service of the Company within three months of the time of receiving his uniform, the Company may retain from his wages one quarter of the cost of said uniform.

(c) Such uniform overcoats as may be necessary will be furnished under the general provisions of the preceding clauses of this Section, except that the Company will not be required in any case to furnish an overcoat oftner than one in two years and that when new coats are delivered the old coat will be returned to the Company.

Section 13.—Conductors to be supplied by the Company with a sufficient quantity of tickets to run their cars, provided that the said conductors pay to the Company one half of the cost of a guarantee bond covering the amount of tickets furnished.

Section 14.—Dropped.

Section 15.—Dropped.

Section 16.—Dropped.

Section 17.—In case any member of the Association is suspended or discharged for any cause whatsoever, the Company through its proper officials shall grant an interview to the Grievance Committee, and if upon investigation it is found that the man is not at fault, he shall be reinstated in his former position and paid for all time lost. It is also agreed that when a man is called into the office for investigation or discipline he may have the privilege of seeing the Superintendent or other official without the presence of a third party.

Section 18.—The Company will not give leave of absence of more than thrity (30) days to any employee for the purpose of engaging in other employment.

Section 19.—In cases where an employee is required by the Company to secure evidence in connection with accidents, collisions or for any other cause, or is taken off duty by the Company to give evidence in legal or other matters, the said employee shall be paid for loss of time the same pay he would have received had he been working at his regular employment.

Section 20.—Any member elected or appointed to an office in the Association shall be permitted to serve in such official capacity without prejudice to his service or line of promotion in the employment of the Company.

Section 21.—Dropped.

Section 22.—All differences between the Company and the Association shall be adjusted as follows: Any and all differences or disputes arising between them shall be

submitted through the properly accredited representatives of the Association to the General Superintendent of the Company, and if they cannot agree, the General Manager may be called into conference.

Section 23.—This agreement and the provisions thereof shall continue in force and be binding on the respective parties thereto for a term of two (2) years from the first day of April, 1918.

(Sgd.) L. B. C. LIVINGSTONE, Chairman.
(Sgd.) S. F. ASHINGTON,
and
(Sgd.) W. D. ROBBINS.

Report of Board in Dispute between the Corporation of the City of Ottawa and certain Employees

On April 25 the Minister received the report of the Board which had been established on April 6 to deal with a dispute between the Corporation of the City of Ottawa and certain employees, being members of Federal Labour Union No. 15. The application, which was made by the employees concerned, was received in the Department on April 4. The dispute had to do with wages, overtime and holiday rates, also with the employees' demand for a definite understanding as to which days were to be considered holidays. Fifty-two employees were said to be affected by the dispute. The Board established in this matter consisted of the following members:—His Honour Judge Colin G. Snider, Hamilton, chairman, appointed by joint agreement of the other Board members; Mr. T. A. Beament, Ottawa, employer's nominee; and Mr. Fred Bancroft, Toronto, employees' nominee.

The report of the Board was unanimous and contained recommendations for the settlement of the matters in dispute. The rate of wages recommended by the Board for each employee was set out in a schedule attached to the report, such rates to be effective from April 1, 1918. The findings were accepted on behalf of the employees concerned but at the close of the month the position of the civic authorities had not been stated.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and in the matter of a dispute between the Corporation of the City of Ottawa, employer, and certain of its employees, being members of Federal Union, No. 15, employees.

To the Honourable T. W. Crothers, K.C., M.P.,
Minister of Labour,
Ottawa.

The report of Colin G. Snider, T. A. Beament and Fred. Bancroft, members of the Board of Conciliation and Investigation herein.

The Board of Conciliation herein have the honour to report as follows:

Pursuant to appointment arranged by the members, the Board met at the City Hall in the city of Ottawa, at 10 o'clock in the forenoon of Friday, the nineteenth day of April, 1918, at which meeting all members were present. The parties to the dispute also attended by their representatives. Messrs. A. F. Macallum, commissioner of works; F. C. Askwith, deputy engineer, and W. E. MacDonald, assistant water works engineer, acted for the employer, and Messrs. W. E. Travers, president of Federal Labour Union, No. 15; Charles Clark, secretary of such union, and James McGurran appeared for the employees. All efforts to induce the parties to enter into an agreement as to the rate of wages to be paid to a number of the employees failed, but the employer had, before the matter came before us, agreed to give to a very considerable number of the employees the rate of wages they asked, and in some cases more than asked, and these men expressed themselves as being satisfied.

We took evidence submitted by both the employer and employees, being engaged continuously on the nineteenth, twentieth and twenty-second days of April, 1918. We also heard argument of the representatives of each side. The whole question to be determined is the amount of wages. All the conditions under which the men do their work are satisfactory to the employees and the city officials express themselves as well satisfied with men.

The question of pay for overtime remained to be decided by us, and we recommend that overtime shall be paid as follows: Each employee, not including those on the clerical staffs, who is paid by the day (9 hours) a daily rate of wages shall be paid time and a half for work performed by him after 6 p.m. and before midnight, and shall be paid double time for work performed by him after midnight and before 6 a.m., and also double time for work on Sundays and on the following holidays, namely: New Year's Day, Good Friday, Easter

Monday, Christmas Day, the day fixed by proclamation for the celebration of the birthday of the reigning Sovereign, Victoria Day, Dominion Day, Labour Day, Thanksgiving, and the day proclaimed for Civic Holiday. When any holiday, other than Sunday, falls on Sunday, the day next following shall be in in lieu thereof a holiday.

Some of the men classed as "helpers and labourers" have, by experience gained in long service for the city, become possessed of skill in certain branches of the work, and on this account a higher rate of wages has been recommended by us for them.

The Board recommend the rate of wages set down opposite each employee's name on the schedule attached to this report as being the rate which the Board thinks ought to be accepted by both parties to this dispute, and should come into effect as of the first day of April, 1918.

All of which is respectfully submitted.

(Sgd.) COLIN G. SNIDER,
Chairman.

(Sgd.) T. A. BEAMENT.

(Sgd.) FRED. BANCROFT.

Ottawa, twenty-second day of April, 1918.

SCHEDULE OF WAGES RECOMMENDED BY THE BOARD

WORK.	NAME.	
Turncocks	J. McGurran	$ 22.00 per week.

INDUSTRIAL DISPUTES DURING APRIL, 1918

NINE strikes, affecting 7,178 workpeople were reported as having commenced during April. There were in existence at some time or other during the month 15 strikes, directly affecting 7,315 workpeople. The total time loss on account of industrial disputes was estimated at 15,671 working days as compared with 8,276 working days in March and 122,008 in April, 1917. The time loss occasioned by the nine strikes which began in April was 12,229 days, while a loss of 3,442 days is charged to the six strikes which commenced prior to April. Termination of dispute was recorded in the case of three of the disputes commencing prior to April. Seven of the disputes commencing during

April terminated during the month, leaving the five following unsettled disputes, affecting 410 workpeople, on record April 30: plumbers and steamfitters, St. John; machinists, Montreal; metal polishers and buffers, Weston; moccasin stitchers, Toronto, and civic employees, Vancouver.

INDUSTRIAL DISPUTES, APRIL, 1918.

Industry or occupation.	Particulars.	No. of employees affected.	Time loss in working days
	DISPUTES COMMENCING PRIOR TO APRIL, 1918.		
BUILDING AND CONSTRUCTION—			
Plumbers and steamfitters, St. John,	Commenced April 23, 1917. Demand for an increase in wages. Unterminated.	11	286
METALS, MACHINERY AND CONVEYANCES—			
Moulders, Galt,	Commenced May 17, 1917. Demand for nine-hour day. Information reaching Department indicates conditions are no longer affected by this dispute.	....	....
Metal polishers and buffers, Weston,	Commenced February 12, 1918. Against a reduction of wages. Unterminated.	33	858
Machinists, Montreal,	Commenced March 23, 1918. Demand for an increase in wages and a nine-hour day. Unterminated.	46	1,196
TEXTILE—			
Carpet weavers, Peterborough,	Commenced March 5. Demand for an increase in piece-work rates. Following negotiations, increased rates granted. Work resumed April 22.	15	270
MISCELLANEOUS—			
Hotel and restaurant employees, Calgary,	Commenced March 25. Demand for increased wages and recognition of union. Majority of hotels and cafés granted increased wages.	32	832
	DISPUTES COMMENCING DURING APRIL, 1918.

MUNICIPAL EMPLOYMENT—			
Civic employees, Vancouver,	Commenced April 27. Demand for increased wages. Unterminated.	300	750

REPORTS OF EMPLOYMENT BUREAUS

THE steady decline in the demand for workers noted in the past five months was checked during March, there being an increase of over 22 per cent as compared with February, on the basis of the daily average of vacancies notified to 110 employment bureaus (77 commercial, 18 public and 15 philanthropic). As compared with the demand reported for March of last year

by practically identical bureaus, there was an increase of nearly seven per cent. The total number of vacancies notified to all offices in March was 29,297, a daily average of 1211.2 as compared with 989.1 in February, 1918, and with 1133.6 in March, 1917. The number of persons placed was 15,452 a daily average of 605.8 as compared with averages of 465.2 and 686.7 in the previous month and in March of last year. The proportion of the total vacancies filled to the total vacancies notified was 50.0 per cent, as compared with 47.0 per cent in February and with 60.5 per cent in March, 1917.

As to employment for woman and girl workers the number of vacancies notified was 6,384, a daily average of 253.5, as compared with 213.5 in February and with 298.5 in March, 1917. The number of such workers placed was 2,185, a daily average of 86.8, as compared with 80.0 in the preceding month and with 120.6 in the corresponding period in 1917. The proportion of vacancies filled to vacancies notified for men and boys was 54.2 per cent and for women and girls 34.3 per cent, as compared with 52.1 per cent and 37.4 per cent respectively, for February and with 65.9 per cent and 40.4 per cent respectively, for March of a year ago.

Of the five principal centres of labour distribution—Montreal, Toronto, Winnipeg, Edmonton and Vancouver—Winnipeg and Vancouver showed increases in the demand for labour, both as compared with February and with March, 1917, Toronto recorded an increase over February, and a decline as compared with March of a year ago. Edmonton reported a decrease in comparison with the preceding month and a gain over March, 1917, while at Montreal there were declines in both cases. Of the smaller centres, Regina, Saskatoon and Calgary recorded increases both as compared with February and with March of last year.

The number of persons who obtained casual employment through the Salvation Army, the Young Women's Christian Association and other agencies was 2,059, a daily average of 85.0 as compared with averages of 82.9 in February and 59.8 in March, 1917. The number of casual jobs secured was 4,375 a daily average of 179.1, as compared with 159.9 in the preceding month and with 154.4 in March of last year.

EMPLOYMENT FOR CIVIC EMPLOYEES IN SIXTEEN CITIES

REPORTS from 16 cities showing the number of workers temporarily engaged and the wages paid these employees during the first pay-roll period of two weeks in April, showed decreases of about 5 per cent in the number of workers, and of nearly 17 per cent in the wages paid. In April 9,748 persons were temporarily employed in the two weeks, and the pay-rolls amounted to $262,633.02, as compared with 10,276 employees and an aggregate pay-roll of $315,719.03 in March. Halifax, Hamilton, London, Winnipeg, Brandon, Regina, Calgary, Edmonton and Victoria all showed increases, both in the number of workers and in the wages paid. St. John, Montreal, Ottawa, Toronto and Saskatoon reported smaller numbers of employees and smaller pay-rolls. At Moose Jaw and Vancouver the number of employees was smaller and the amount of the pay-rolls was larger.

The accompanying table summarize reports from the nine cities for which returns are available since July, 1916. The table shows that as regards the number of workers a decline began in January, 1917, and continued almost without interruption to November. During December, January, February and March an upward tendency was evidenced, but in April there was again a decline. As to wages, the total for last month is smaller than was reported in the past two months.

EMPLOYMENT (BOTH CONTRACT AND MUNICIPAL WORK) AFFORDED WORKPEOPLE TEMPORARILY EMPLOYED BY CITY CORPORATIONS, MARCH AND APRIL, 1918

EMPLOYMENT IN THE BUILDING TRADES AS INDICATED BY BUILDING PERMITS

EMPLOYMENT in the building trades as indicated by the value of building premits issued in 35 cities showed an increase during April as compared with the previous month, the total value of building permits rising from $2,133,781 in March to $3,005,785 in April, an increase of $872,004, or 40.9 per cent. Saskatchewan was the only province to record a decline, and substantial gains

were made in Nova Scotia, Quebec and Alberta. As compared with the corresponding month of 1917 there was a decline of almost 7 per cent, the value for April, 1917, being $3,231,959. In this comparison increases are recorded in all the provinces except Quebec and Ontario.

The larger cities, Montreal-Maisonneuve, Toronto, Winnipeg and Vancouver all showed gains as compared with the preceding month. In comparison with April of last year, Toronto was the only one of these cities to report a decline. Of the smaller centres, Halifax, Three Rivers, Saskatoon and Calgary all recorded increases in both cases.

UNEMPLOYMENT IN TRADE UNIONS AT THE CLOSE OF MARCH, 1918

THE present article on unemployment among the members of local trade unions, which is the ninth quarterly report on the subject, deals with unemployment as at the end of March, 1918, and is based on returns received from 1,385 labour organizations with a total membership of 154,453, or about 76 per cent of the total trade union membership of the country. Trade unionists unemployed on account of trade disputes or disability were not included. For all occupations represented, 1.7 per cent of the members were unemployed, as compared with 2.4 per cent in December and 2.2 per cent in March, 1917. That the percentage unemployed at the end of March is smaller than was reported at the end of the previous quarter, and also than at the same time in 1917, is due principally to greater activity in the manufacturing and mechanical industries, the mining, quarrying and refining of ores group, and in the building and construction trades. Employment for transportation workers, however, was not as good as in December, but it was slightly better than in March of last year.

Employment in the manufacturing and mechanical industries, as reported by 379 unions having a combined membership of 44,276, was much brisker than in December, and it was also better than in March, 1917. The improvement in the first case is chiefly attributable to a greater volume of employment for the metals, machinery and conveyances workers, in the food, tobacco and liquors group, and in the clothing trades. Glass bottle blowers were also better engaged. As to the sub-groups, workers in leather, boots and shoes, woodwork and furniture, and printing, publishing and paper goods, were not so well employed, as were also in lesser degree the textile, carpets and cordage workers. There was no unemployment in the pulp, paper and fibre trades, as reported by 26 unions. As compared with March, 1917, the decrease in the volume of unemployment is due principally to better conditions among the clothing workers and in the food, tobacco and liquors

trades. The pulp, paper and fibre group remained stationary, while in the metals, machinery and conveyances group the alteration was inconsiderable. Woodwork and furniture tradesmen, leather, boot and shoe workers, glass bottle blowers and printing and publishing employees, however, were not as well engaged in this comparison.

Reports from 552 organizations of transportation workers, having a total membership of 57,194, indicate that 1.22 per cent of the members were out of work, as compared with .70 per cent at the close of December, and with 1.26 per cent in March, 1917. In this group, steam railway employees, constituting nearly 76 per cent of the total group membership reporting, were better engaged than in either December or March, 1917, while street railway employees and navigation tradesmen were not as well employed. In the latter sub-group, this may be attributed to seasonal slackness. Teamsters reported a small fractional percentage out of work.

In the mining, quarrying and refining of ores group, reports were received from 57 unions having an aggregate membership of 20,686. The percentage of unemployment was smaller than in the preceding quarter, and also than in the same period in 1917. Miners were much brisker, but mill and smeltermen showed a larger percentage out of work than in either quarter.

The percentage unemployed in the building and construction trades, according to returns received from 216 unions with 16,644 members, was 7.6 per cent, as compared with 9.6 per cent in December and with 7.5 per cent in March, 1917. The improvement as compared with the preceding quarter is due to a greater volume of employment for bricklayers, masons and plasterers, electrical workers, stonecutters, painters, decorators and paper hangers, tile layers, lathers and roofers, and bridge and structural iron workers. Carpenters and joiners, plumbers and steamfitters and steam shovel and dredgemen, however, were not quite as well employed. In comparison with March of last year, bricklayers, masons and plasterers, carpenters and joiners, granite and stone cutters, plumbers and tile layers, lathers and roofers were slacker, as were also bridge and structural iron workers. Improvement, however, was shown for electrical workers, painters, decorators and paperhangers, steam shovel and dredgemen and hod carriers and building labourers.

In the public employment group, as reported by 57 unions with a combined membership of 3,886, there were no members out of work, as compared with unemployed percentages of .17 and .47, respectively, in December and March, 1917.

Employment in the group of miscellaneous trades, as indicated by returns received from 123 unions with 11,517 members, was brisker than in either the preceding quarter or in the same month in 1917. The improvement is chiefly attributable to a greater volume of work for hotel and restaurant employees. Barbers, musicians and theatre em-

ployees and unclassified workers were also slightly better engaged, while stationary engineers and firemen were slacker than in December, though they were busier than in March, 1917. Retail clerks, as reported by 7 unions, appear to be uniformly well employed.

The percentages reported unemployed in the different groups of occupations are indicated in the following table:

Occupation.	Mar 1918	Dec. 1917	Sept. 1917	June 1917	Mar 1917	Dec. 1916	Sept. 1916	June 1916

The following table summarizes the returns by provinces. As compared with December, 1917, all the provinces except Quebec reported a smaller percentage out of work. Nova Scotia and Prince Edward Island and New Brunswick recorded the smallest percentages of unemployed, while it was greatest in Quebec. In comparison with March, 1917, Quebec and Ontario showed larger percentages of unemployment. Saskatchewan and Alberta remained practically stationary. In Nova Scotia, Manitoba and British Columbia, there was much less slackness.

Province.	Mar 1918	Dec. 1917	Sept. 1917	June 1917	Mar 1917	Dec. 1916	Sept. 1916	June 1916
Nova Scotia & Prince Edward Island	.03	2.64	.11	.23	2.72	.74	.47	.49
New Brunswick	.24	3.07	.11	.20	1.78	1.66	.09	.8
Quebec	3.90	2.96	4.66	2.23	2.95	3.62	2.43	1.8
Ontario	1.75	2.44	.99	.94	1.53	1.55	.72	1.7
Manitoba	.78	1.07	.86	.58	2.81	1.01	.83	1.2
Saskatchewan	1.72	2.41	.46	.25	1.77	1.63	2.19	2.6
Alberta	1.08	1.55	.17	.84	1.09	1.70	.92	3 03
British Columbia	1.59	3.05	2.05	2.50	3.00	3.86	3.37	5.3
Canada	1.68	2.42	1.71	1.25	2.16	2.17	1.47	2.1

The percentages reported idle in some of the largest industrial centres are indicated in the table which follows:

City	Mar	Dec.	Sept.	June	Mar	Dec	Sept.	June
Halifax	.14	.34	.42	1.03	.98	.24	0	4.03
St. John	.57	5.69	.16	.43	2.94	.47	.18	.09
Montreal	6.35	3.73	4.48	2.75	4.17	4.61	5.0	2.6
Toronto	.81	3.81	1.68	1.74	1.06	1.32	.63	1.8
Winnipeg	.76	1.07	1.02	.72	2.53	.98	.58	1.9
Regina	2.64	5.63	0	0	3.73	1.75	.65	1.38

MIGRATION AND SETTLEMENT

HOMESTEAD ENTRIES. — During the first quarter of 1918, there were 210 homestead entries in Manitoba, 294 in Saskatchewan, 365 in Alberta and 24 in British Columbia, a total of 863 for the three months, as compared with 2,158 for the last quarter of 1917, and 1,312 for the corresponding period of 1917. The following shows by provinces and nationality the number of those who took up homesteads during the first quarter of 1918:

PRICES, RETAIL AND WHOLESALE, IN CANADA, APRIL, 1918, AND IN OTHER COUNTRIES

GRAINS, except wheat and rye, eggs, potatoes, hides, metals, opium and malt showed considerable decreases, while there were increases in rye, livestock and meats, butter, canned vegetables, sugar, pepper, some textiles, gasoline, lumber, miscellaneous building materials and kitchen furnishings.

In retail prices the average cost of a family budget of staple foods in some 60 cities was $12.57 for April as compared with $12.66 for March, $10.77 for April, 1917, and $7.51 for April, 1914. There were important decreases in eggs and potatoes, but slight increases in meats and other articles. Fuel, light and rent were almost unchanged.

The index number of wholesale prices was almost unchanged, standing at 269.4 for April as compared with 269.2 for March, 228.7 for April, 1917, and 136.7 for April, 1914. The chief increases for the month were in animals and meats and in lumber and building materials, with many slight increases in other groups, but there were considerable decreases in grains, dairy products, fruits and vegetables, metals and implements.

The weekly budget for a family of five, including staple foods, laundry

starch, coal, wood and coal oil, and rent, is based upon the estimated importance of the various commodities, included, these being slight modifications of those employed in similar calculations by various official bodies. For some articles comparatively large quantities are included, owing to the omission of other important foods of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. As market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly the relative proportion of expenditure on the various foods therefore tends to be maintained. In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the difference in quality. It is estimated that these calculations represent from 60 to 80 per cent of the expenditure of an ordinary family, according to the total income.

The index number of wholesale prices is based upon the quotations of 271 commodities, one having been dropped in 1915, and is the simple average of the percentages which the current prices of the several commodities bear to their average prices for the base period, 1890-1899, these being therefore made equal to 100.

The accompanying tables and notes give details as to the prices movement during the month and as compared with the same month in the previous year. The table of retail prices shows the prices of some 30 foods at the middle of the month in 60 localities in Canada having a population of 10,000 or over. Quotations are obtained by the correspondents of the *Labour Gazette* from dealers doing a considerable trade with workingmen. All prices are for delivered goods. The rates for rent are for six-roomed houses in districts occupied by workingmen.

Retail Prices

Meats advanced in nearly all lines, there being advances in several cities throughout the Dominion, some increases being as great as 5c per pound. Pork averaged 1c to 1½c per pound higher. Lard was also considerably higher.

In eggs there was a general decline. Storage eggs were practically off the market. Milk was unchanged. Butter averaged slightly higher, being up in some of the cities and down in others. Cheese rose in several localities.

Flour was steady, but rolled oats advanced. Rice was slightly up and prunes and evaporated apples were higher. Sugar, tea and coffee were steady. Potatoes declined considerably, being lower throughout the Dominion. There were, however, some advances in British Columbia.

In coal and wood, prices were comparatively steady. In several cities in Ontario prices were down to $10.00 per ton where levels had been up to $11.00 and $12.00.

Rent was higher in Belleville, Peterborough, Toronto, Niagara Falls, Hamilton, Galt, Winnipeg, Medicine Hat and Vancouver.

COST PER WEEK OF A FAMILY BUDGET OF STAPLE FOODS, FUEL AND LIGHTING, AND RENT IN TERMS OF THE AVERAGE PRICES IN SIXTY CITIES IN CANADA.

Wholesale Prices.

GRAINS AND FODDERS.—All grains declined except rye and wheat. Barley was down from $1.70 per bushel to $1.50 at Winnipeg and from $1.72 to $1.52 at Toronto. Oats fell from 94c to 86c at Winnipeg and from 94c to 91c at Toronto. Corn was down to $3.00 per bushel. Flax seed fell from $3.84 to $3.78 per bushel. The price of peas was unchanged at $3.60-3.70 per bushel, the low level reached at the end of March. Rye advanced from $2.50 per bushel to $2.65. Prices of wheat were unchanged at the levels fixed in 1917. Hay, straw, bran and shorts were almost unchanged.

ANIMALS AND MEATS.—At Winnipeg, best butchers' cattle rose from $11.50 per hundred to $14.00, and at Toronto from $12.75 to $15.00. Dressed beef advanced from $22.00 to $27.00 for hindquarters and from $18.00 to $19.00 for forequarters. Hogs at Toronto advanced to $20.25 per hundred f.o.b. shipping points, but eased off each week, and at the end of the month were down to $19.25. Dressed hogs rose to $25.00-27.00 per hundred, but fell 50c toward the end of the month. Breakfast bacon rose from 40-41c per pound at Montreal to 40-42c. Ham also advanced from 33-34c per pound to 34-35c. Lard advanced from 30-31c per pound to 31-32c. Sheep rose from $14.50 per hundred to $16.00. Mutton rose from $22.00 to $25.00 per hundred. Dressed lamb advanced from $28.00-30.00 to $30.00-32.00. Fowl rose from 26-29c per pound to 30-34c.

DAIRY PRODUCTS. — Butter, finest creamery, at Montreal, rose from 48½c-49c to 52-52½c, but during the last two weeks fell to 45½-46c. Creamery solids at Toronto fell from 49-50c to 48-49c. Dairy butter rose from 38-42c to 38-43c. Cheese was steady at the prices fixed in the spring of 1917, but it was reported that a higher figure might be set for the ensuing season. Fresh eggs fell from 47c to 42c in Montreal, but later advanced 3c.

FISH.—Fresh halibut rose from 17c to 18c per pound on the Atlantic coast. At Toronto, lake trout was easier at 14-16c. The catch of the Lunenburg fishing fleet for the spring fishing trip was reported to average over 550 quintals per vessel and was expected to sell at $11.50 to $12.00 per quintal. The proportion of cod was estimated at 75 per cent, whereas last year nearly 75 per cent of the catch was haddock. The markets in the West Indies were reported to be very favourable owing to the large production and higher prices of sugar. In salt fish supplies were reported to be unobtainable. The lobster catch was reported to be curtailed by backward weather during April.

FRUITS AND VEGETABLES.—Bananas advanced again, reaching $4.50 per bunch. Lemons were lower at $5.50-6.00 per box. Evaporated apples declined 3c per pound to 20-21c. Currants advanced to 30-35c. Potatoes were down to $1.70-1.75 per bag at Toronto and to $1.50 at Montreal. Turnips were down to 50-55c per bag, and onions were down to $1.25 per bag. Canned vegetables were up, corn reaching $2.75 per dozen, peas $2.25, while tomatoes were steady at $2.75.

MISCELLANEOUS GROCERIES. — Rolled oats was slightly higher at $5.85-6.10. Sugar rose to $8.62-9.02 at Toronto for granulated and to $8.22-8.62 for yellow.

All commodities	262†	269.4	269.2	228.7	181.0	146.4	136.7	136.3

*Preliminary figures. †Nine commodities off the market, fruits, vegetables, etc. One line of spelter was dropped in 1915.

Maple sugar was a little easier at 20-21c per pound. Pepper rose to 38-42c per pound.

TEXTILES.—A line of beaver cloth advanced to $4.00 per yard. Raw cotton was lower at 30½c per pound. Japan silk advanced to $6.00 per pound. Oilcloths advanced about 10 per cent.

HIDES, LEATHERS, BOOTS AND SHOES.—No. 1 beef hides declined to 10½c per pound. Some lines of leather and boots in which supplies were good showed slight declines.

METALS AND IMPLEMENTS.—Iron black sheets were easier, also boiler plates. Wrought iron scrap advanced $1.00 per ton to $29.50. Antimony, copper, lead, spelter and solder were lower, while quicksilver and silver were higher. Coil chain was easier.

FUEL AND LIGHTING.—Gasoline rose to 33c per gallon and coal oil rose 1c to 17½c per gallon.

BUILDING MATERIALS. — In lumber there were steep advances in pine, some lines being up $3.00 per thousand. Hemlock rose to $25.00-27.00. Fire brick, plaster of Paris, coal tar, sash cord and wire fencing were higher. Linseed oil and turpentine were slightly easier, but benzine advanced.

HOUSE FURNISHINGS.—Wooden furniture was rising owing to the cost of materials and labour. Pails and tubs advanced nearly 10 per cent.

DRUGS AND CHEMICALS.—Opium fell from $40.00 per pound to $30.00.

MISCELLANEOUS. — Malt declined to $2.05 per bushel. Pulp ground wood declined to $29.00-30.00 per ton. Sulphite pulp, however, was higher at $75.00-80.00 per ton.

Prices in Other Countries

In the United Kingdom the cost of food as shown in the *Labour Gazette*, for April 1, 1918, was 206 per cent higher than in July, 1914, but it was estimated that expenditure on food had increased on the average only 44 per cent owing to the use of substitutes, etc. For the month there was a slight increase in imported meat and decrease in tea, while there was a seasonal decrease in eggs. In wholesale prices the index number of the *Economist* for the end of March was higher than a month before due chiefly to a rise in cotton.

In Portugal, the Ministry of Labour reported that the index number of the cost of necessaries consumed by workingmen's families in Lisbon was 200 for October, 1917, as compared with 189 in September, and 172 in July, the cost in 1913 being 100.

In Denmark, the Statistical Department reported the cost of maintaining a family in February, 1918, to be 66.1 per cent higher than in July, 1914, food being up 72.8 per cent and other items 60.1 per cent. As compared with February, 1917, the rise was 9.3 per cent in food and 18.3 in other items.

In the United States, foods were upward for April, but there were declines in some lines owing to the spring season. In materials, however, advances occurred in textiles, building materials, and miscellaneous products. Provisions, breadstuffs, leather and metals were down.

FAIR WAGES CONTRACTS, APRIL, 1918

DURING April the Department of Labour received for insertion in the *Labour Gazette* information relative to two fair wage contracts, one of which was awarded by the Department of Railways and Canals. One contract contained the usual fair wage clause while the other contained a fair wage schedule.

DEPARTMENT OF RAILWAYS AND CANALS.—Reconstruction and rebuilding of a portion of the breakwater wharf, known as the "Ballast Wharf", St. John, N.B., on the line of the Canadian Government Railways. Name of contractors, James E. Kane & Walter T. Ring, St. John. Date of contract, April 8, 1918. Amount of contract schedule rates.

The usual fair wage clause was inserted in the above contract.

DEPARTMENT OF PUBLIC WORKS.—Construction of two barracks for accommodation of two battalions of Infantry, Common, Halifax, N.S. Name of contractors, Bate, McMahon and Company, Ottawa. Date of contract, March 27, 1918. Amount of contract $249,524.00.

SCHEDULE No. 2.

Wages Rates at Halifax, approved by the Reconstruction Committee.

Trade or class of Labour	Rate of wages
Carpenters	40c per hour.
Glaziers	45c " "
Plumbers	45c " "
Stone Masons	50c " "
Bricklayers	50c " "
Labourers	30c " "
Single teams	40c " "
Double teams	65c " "

THE EMPLOYMENT OFFICES CO-ORDINATION ACT

THE Employment Offices Co-ordination Bill, which the Minister of Labour introduced into the House of Commons April 17th, 1918, has passed both Houses of Parliament. The legislation imposes on the Department of Labour the duty of formulating a national employment policy and of standardizing the work of the provincial employment systems in line with that policy through the subsidies provided in the Act. Since the beginning of the war the Department has given much attention to the problems of unemployment and the more efficient distribution of labour and the new legislation is one of the results of the Department's attention to these subjects. The measure does not propose any Dominion interference with the administration of the provincial employment offices. It is recognized that the administration at Ottawa cannot be as well acquainted with the labour market conditions in British Columbia, for example, as the provincial officials, and complete provincial autonomy in the work of organizing the labour market within the province is maintained. On the other hand, the exchange of labour between widely separated provinces cannot be carried on by purely provincial machinery and the object of the bill is to secure the co-ordination necessary to enable the provincial systems to function as parts of a national organization. It is hoped those provinces which as yet have no employment offices will be encouraged to enter the field and that the others will be stimulated to develop their systems rapidly.

The following indicates briefly the steps taken in the different provinces to establish employment offices:

MARITIME PROVINCES.—No public employment offices have been established in

the province of Nova Scotia, New Brunswick and Prince Edward Island.

QUEBEC.—In 1910 the province of Quebec passed an Act which provided for the establishment of provincial employment offices, and under this Act offices are now in operation at Montreal, Quebec and Sherbrooke.

ONTARIO.—Following the report of the Ontario Unemployment Commission, the province of Ontario established, in 1916, a Trades and Labour Branch, and one of its duties is—"to establish and maintain in the various centres of population throughout Ontario employment bureaus and similar agencies for obtaining suitable employment for working men." Offices are now in operation in Toronto, Ottawa, Hamilton, London, Brantford, St. Thomas, Port Arthur and Fort William, and other points.

MANITOBA.—While as yet there are no provincial employment offices in Manitoba, the Government at the session of the Legislature just passed, established a Government employment bureau. The bureau is required "to establish and maintain one or more employment bureaus in the city of Winnipeg and at such other places within the province as may be designated by the Lieutenant-Governor in Council.

SASKATCHEWAN.—The Bureau of Labour of the province of Saskatchewan operates an employment bureau in the cities of Saskatoon, Regina, Moose Jaw and Swift Current, and the head office of the Bureau at Regina has been active in securing farm help, especially during the harvest season.

ALBERTA.—While the province of Alberta has no legislation specifically authorizing provincial employment offices, the Department of Agriculture is at present organizing to meet the farm labour situation and has opened employment offices at Edmonton, Calgary, Lethbridge, Medicine Hat and Red Deer.

BRITISH COLUMBIA.—The only public employment offices now in operation in British Columbia are the municipal offices of the cities of Vancouver, Victoria and New Westminster. However, the new provincial department of labour, established in 1917, is required "to establish and maintain in the various centres of population throughout British Columbia employment bureaus and similar agencies for obtaining suitable employment for working men."

Replying to a question in the British Columbia House, April 8, 1918, as to whether the provincial government had established employment offices in the province, the Minister of Labour said: "Preparations are being made to establish a free employment bureau at Vancouver with the intention of extending the system to other centres of population as necessity requires. In the meantime the Department of Labour is doing what is possible to meet the demand for farm help, and has mailed circulars to the farmers and fruit growers of the province, informing them that all applications for help addressed to the Department will receive prompt attention. Arrangements have been made with the Young Women's Christian Association to register and distribute female help for fruit picking, packing and canning, and with the free municipal employment bureaus of Vancouver and Victoria to handle all requests for male help.. Many applications are now being received and orders filled through these sources."

The text of the Employment Offices Co-ordination Act follows:

An Act to Aid and Encourage the Organization and Co-ordination of Employment Offices.

His Majesty, by and with the advice and consent of the Senate and House of Commons of Canada, enacts as follows:

1. This Act may be cited as *The Employment Offices Co-ordination Act.*

2. In this Act and in any regulation made thereunder, unless the context otherwise requires,—

(a) "Minister" means the Minister of Labour;

(b) "employment office" means an employment office operated by any provincial government;

(c) "employer" includes a person seeking employees;

(d) "employee" includes a person seeking employment.

3. The Minister is authorized and empowered,—

(a) to aid and encourage the organization and co-ordination of employment offices and to promote uniformity of methods among them;

(b) to establish one or more clearing houses for the interchange of information between employment offices concerning the transfer of labour and other matters;

(c) to compile and distribute information received from employment offices and from other sources, regarding prevailing conditions of employment.

4. For the purposes of such organization and co-ordination, and subject to the conditions set forth in section seven, the following sums shall be appropriated and paid out of the Consolidated Revenue Fund of Canada during each fiscal year beginning with the fiscal year beginning the first day of April, one thousand nine hundred and eighteen, namely:

During the fiscal year beginning the first day of April, one thousand nine hundred and eighteen, the sum of fifty thousand dollars;

During the fiscal year beginning the first day of April, one thousand nine hundred and nineteen, the sum of one hundred thousand dollars;

During each succeeding fiscal year the sum of one hundred and fifty thousand dollars.

5. The moneys appropriated for each year shall be allotted and paid to the governments of the respective provinces in the proportion which their expenditure for the maintenance of employment offices bears to the total of the expenditures of all the provinces for such purposes, but in no case shall the allotment to any province exceed one half the amount expended for the maintenance of employment offices by such province.

6. The payments hereinbefore authorized shall, as to each province, be conditional upon agreement between the Minister and the government of the province as to the terms, conditions and purposes within the meaning of this Act upon and for which the payments are to be made and applied, and upon such agreement being approved by the Governor in Council.

7. In any agreement so made the following conditions respecting the operation of employment offices may be stated:

(a) That the offices shall endeavour to fill situations in all trades and for both male and female employees;

(b) That the offices shall make such returns and submit to such inspection as the Minister may require.

8. Such officers shall be appointed as are required for carrying out the provisions of this Act, and for such inspection, examination and report as are necessary to ensure the expenditure of the moneys paid in accordance with the intention of this Act and the agreements and regulations made under its authority. Such appointments shall be made under the provisions of the laws relating to the civil service, and the salaries and expenses of such officers shall be paid out of the moneys appropriated by Parliament for that purpose.

9. The Minister shall annually lay before Parliament during the first ten days of the session, a report of all proceedings under this Act for the last preceding fiscal year, which report shall contain a statement of the moneys expended, the purposes to which they have been applied, and the work done by the several provinces in the earning of the subsidies paid or authorized to be paid.

10. The Minister may make any regulations not inconsistent with this Act which he may deem necessary or convenient for carrying this Act into effect, subject to the approval of the Governor in Council.

EMPLOYMENT EXCHANGES IN GREAT BRITAIN IN 1917

THE information given below with regard to the work of employment exchanges in Great Britain in 1917 is derived from a recent issue of the British Labour Gazette.[1]

The most important development of the Employment Exchanges during 1917 was the establishment of local advisory committees, consisting of an equal number of representatives of employers and employees, nominated, as a rule, by their respective associations in the various localities, together with a few additional members nominated by the Ministry of Labour. It is proposed to form 250 of these committees, and nearly all of them have already been organized. The functions of the committees include the consideration of any matters arising in connection with the working of the Employment Exchanges, and it is hoped by this means to bring the ex-

(1) The Labour Gazette, February, 1918, page 53.

changes into the closest touch with employers and workpeople. An important part of their work will be in connection with the provision of substitutes to replace men needed for the army, and of employment for men discharged from the army or navy, and special problems in connection with the employment of women. Ultimately these committees will form an essential part of the national machinery for the resettlement of labour on demobilization.

The activities of the Employment Exchanges during 1917 fell little short of the previous year, which was the highest on record in the number of registrations, the number of vacancies notified, and vacancies filled. The number of registrations during 1917 was 3,575,380, relating to 2,837,650 individuals, while the number of vacancies notified was 1,999,442, of which 1,555,223 were filled by 1,375,198 separate individuals. Compared with these figures there were in 1916 3,658,689 registrations representing 2,843,784 individuals, and 2,049.018 vacancies notified, of which 1,557,235 were filled by 1,351,406 individuals. The influence of the war is shown in the proportion of registrations of men and women. In 1914, 64 per cent of the individuals registered were men and 22 per cent were women, while in 1917 the proportions were 33 per cent men and 52 per cent women. The number of Exchanges was increased from 378 to 388.

The following are some of the special schemes for obtaining and placing labour which are being worked out by the Employment Exchanges. For the purpose of securing and maintaining an adequate supply of labour for work of national importance or for releasing fit men for the army, the Exchanges co-operate with the Ministry of Munitions or the Ministry of National Service through the schemes of the War Munition Volunteers, War Work Volunteers, Army Reserve Munitions Workers, Registered Substitutes, and the Substitution Scheme generally. Since April, 1915, the Exchanges have been furnished by arrangement with particulars of men discharged from the Forces, with a view to assisting them in finding employment. Down to December 31, 1917, over 80,000 sailors and soldiers had been placed in their first employment since discharge, and further arrangements are being made to admit of a great extension of this branch of work. A large number of men from the Dominions and the Colonies have been recruited by the Employment Exchanges for munitions work in the United Kingdom, and alien labour was imported, subject to the proviso that aliens should not be introduced where British labour was available, and should not be paid wages inferior to or in excess of those normally paid to British workmen. Over 18,000 women were enrolled during 1917 in the Women's Army Auxiliary Corps, and over 15,000 women were placed in agriculture as ordinary Exchange applicants, while more than 6,000 women were recruited under the National Service Scheme for placing women on the land. This Scheme has been extended to include hay balers for the Forage Committee of the War Office, and women for timber work under the Timber Supply Department. In addition, the Exchanges have supplied about 4,000 women to the Army and Navy Canteen Board as manageresses and workers, and supplied over 167,000 women to the ammunition, explosives and chemical trades alone.

REPORTS ON TECHNICAL EDUCATION AND INDUSTRIAL TRAINING IN THE UNITED KINGDOM

THE departmental committees appointed by the British Government to inquire into the position of certain branches of industry have recently submitted their reports, and a summary of these reports, published in the Board of Trade Journal for January 10, 1918, is given below. The committees comprised one for the iron and steel trades, one for the engineering trades, one for the shipbuilding and marine engineering trades and one for the textile trades. The reports suggest many important changes.

"The general problem of education and technical training is now particularly before the House of Commons and the country in the Education Bill introduced by the President of the Board of Education. The reports of the departmental committees appointed by the Board of Trade to enquire into the position of certain branches of industry contain a number of important suggestions on the subject. There is in the reports evidence of a widespread feeling that, in spite of the progress which has been made in respect of technical education and industrial training, the general position is still far from satisfactory. Thus in the iron and steel trades the evidence submitted by groups of witnesses and tested by cross-examination tended to show a growing feeling of dissatisfaction with the lack of systematized technical training upon a scale commensurate with the needs of these two trades. In the engineering trades, also, the committee declare, "there is no doubt that this country has much leeway to make up on the side of higher technical education and scientific research." In the shipbuilding and marine engineering trades, the committee report that: "Boys who leave school at 14 have received only a superficial education, and many, before the age of 16, have forgotten nearly all they learned. It is unfortunately true that at the latter age many lads are incapable of writing an intelligible letter in a reasonably legible hand, or of making simple arithmetical calculations. Teachers engaged in the evening science classes complain that much of their time is taken up by a course of elementary education so as to enable lads to benefit by the technical training provided."

Neither is the position considered more satisfactory in the textile trades, where the committee elicited from the evidence of employers that boys coming to them from elementary schools are not so well grounded in the rudiments as used to be the case some years ago. On the other hand, this committee have a criticism to offer on the employers, as it finds that there is "a very insufficient appreciation on the part of those engaged in the textile industries as to the value and importance of technical education in industrial life." The report adds:

"We do not find any widespread demand on the part of individual employers for highly specialized education. The lack of appreciation by textile firms of the value of adequately educated assistants has a two-fold result—it brings it about that the staffs of British firms often occupy a lower intellectual place than their foreign competitors, and it discourages the British youth from taking a course of higher education when that qualification brings no advancement nor substantial reward in his industrial career."

Raising the School Age

The first essential in any scheme for future education in this country is laid down by the committee. The recommendation is by no means new; it is merely that the school age should be raised to the age of 16 (in the case of the engineering trades report, to 15).

This will inevitably interfere with the present social and industrial order, but the committees believe that the change can better be borne now than in normal times by both the heads of working-class families and by employers. That is, a balance must be found in the first year of the change, between the claim of education and the pressure of the economic situation. The committee of the iron and steel trades declare that it is possible to draw a broad distinction between higher technical or scientific education and the instruction, identical in kind yet differing in degree, which appertains to the industrial training of workmen. Technical education means the combined training of the mind and body in a special direction. The habits of mental discipline, which is the purpose of early education to form, are gradually focussed upon a particular range of knowledge, and it is important that there should be no break in the process.

The committee report broadly:

"The present system of technical education is rather a method of selection than a process of education, and for the greater part the existing system suffers from the defect of discontinuity. Between the age of 14, when a boy leaves the elementary school, and the age of 16, when he normally enters the works, there is a great gulf fixed. From an educational standpoint these two years are worse than useless since it may well be that discipline of the mind becomes seriously enfeebled if not temporarily destroyed."

The committee recommend that the limit of the school age should be raised from 14 to 16 years, and that during these two years instruction of a general scientific character should form the dominant portion of the curriculum, at first general and elementary, including chemistry, physics and mathematics, and then in the special direction dictated by the prevailing local industry. The problems of the economic disturbance and the financial loss to the family budget which this course will cause must be solved. Boys may only be partially withdrawn from work at the inception of the scheme, and "boys who are apprenticed under indenture in the trade will attend school until 16 years of age, and the employers should contribute a small apprenticeship wage of about 5s. per week."

Apprenticeship

The kind of apprenticeship which the iron and steel trades committee have in view is rather in the nature of a general agreement of service under a particular employer than an indenture as pupil to a particular specialized occupation. "Apprenticeship in the common acceptance of the term is fully applicable only to industries of which final product is the handiwork of a single craftsman, who can give individual instructions and supervision to one or more pupils or assistants." Industries of which the products are the results of labour co-operatively or collectively applied do not lend themselves to individual instruction of this simple kind, and to this latter class belong the bulk of the iron and steel industries, actual training in which for a specific occupation is scarcely possible, since each occupation is part of a definite scheme of collective labour, and only actual practice and daily contact with the other connected occupations can give the necessary training. The skill and craftsmanship of workmen in the British iron and steel industries are stated to compare very favourably with those of similar workmen in Germany and America, and the committee believe that in collective tasks experience is the best teacher. They recommend, therefore, that apprenticeship in the heavy iron and steel trades should take the form of a contract for 7 years, during the first two of which a lad should attend school. It is recommended that from 16 to 18 years attendance at technical classes for arranged hours by day should be a part of the ordinary routine of employment. This will serve as a means of linking together in a co-ordinated whole the existing system of elementary education with the

occupation which pupils will follow in later life. The committee believe that the system of pupil apprenticeship which obtains in many works should be brought into intimate connection with the scheme for technical education at a university. In addition, technical institutes should be built in convenient centres, and, in the opinion of Mr. John Hodge, M.P., promotion to a higher grade of workmanship should be made dependent upon the attendance and success at the classes, in order to provide an incentive to workmen to become efficient. Higher technical education of the university type must be available at these institutes to those who show aptitude for and are likely to derive benefit from further instruction, and there should be intimate co-operation between the technical universities, teaching centres, and workshops, pupils spending a portion of their training in each, equipping themselves for the practical and theoretical work.

The committee therefore recommend:

(1) That the limit of school age should be raised from 14 to 16 years.

(2) That a system of apprenticeship should be introduced into the iron and steel industries, in the nature of a general agreement of service under a particular employer, to begin at the age of 14; such apprenticeship to provide for the continuance of attendance at school until the age of 16, the employer paying during these two years a small apprenticeship wage. The term of apprenticeship in the heavy trades should be for seven years.

(3) That from the age of 16, when the boy enters the works, he should attend specially provided technical classes, until the age of 18.

(4) That the teachers in these technical classes should be selected with a view to their practical knowledge of works processes, that they should be duly recognized by the Board of Education, but that their selection for, and retention in, their posts should be made a matter for local committees consisting of manufacturers and workmen in the industries.

(5) That there should be intimate co-operation between the technical universities, the teaching centres, and those industries which they subserve, and that technical courses at the universities should provide for a period of practical training in an industrial centre, for which large employers should offer special facilities.

(6) That in each large individual centre there should be created a technical institute approximating to the university type.

Evening and Day Classes

The committee for the engineering trades observe that the value of education is not always appreciated. A few employers, recognizing that the majority of the boys are incapable of working or unwilling to work at classes after their day's work, have allowed a certain number of hours a week for school attendance, at the firm's expense. "It cannot be expected that the majority, who struggle against competition, will do this voluntarily." They state, "Scotland has an Act (The Educational Act, 1908) which enables the authorities, at their discretion, to impose compulsory education of a technical character on young male persons between the ages of 14 and 17 who are not otherwise receiving a suitable education, or who are not specially exempted. Up to the present this Act, which is necessarily largely dependent for its success on the cordial co-operation of the manufacturers, has not been strictly enforced." This committee consider that if such powers were general and were applied to enforce the attendance of all boys at evening classes, the result would probably be very unsatisfactory, partly because of the difficulty of getting good work from a tired boy, and partly because of cases of hardship due to residence far from work or school. A limited system of compulsory instruction at day classes is advocated, a feature of the scheme being payment to the employer for the time the apprentice is present at the class. The school age, as previously stated,

should, in the view of the committee, be raised to 15, during which period the boy should be properly apprenticed. The abolution of premium, a reasonable wage, and safeguards in the event of an apprentice proving unsuitable, are put forward.

Higher Technical Education

As regards higher technical education and scientific research, the committee for the engineering trades adopt the recommendations of the committee of the Privy Council for scientific and industrial research, and add that the financial position of engineers who are qualified from universities should be improved. They say:

"We are the more anxious to emphasize the lack of sufficient salary as an inducement to English graduates, because hitherto it has been possible in this country to employ the services of young German scientists — especially chemists — whose knowledge has been considerable and whose demands for pay have been limited. We think that the engineering trades should make a special point of employing, as far as possible, persons of British university training in all positions involving technical and scientific attainments."

The recommendations of this committee are therefore:

(1) (a) That the revival of an apprentice system on a large scale be encouraged, on the basis of abolition of premium, a reasonable wage to apprentice, and safeguards in cases of the apprentice proving unsuitable for his work.

(b) That a limited system of compulsory education at day classes be encouraged, particularly in the manufacturing centres of the country; a part of the scheme being payment by the employer for the time the apprentice is present at class.

(c) That the school age be raised to 15.

(2) That in the case of engineering university men,—

(a) The need for the improvement of their financial position in works should be recognized by the employers, and

(b) The introduction of post-graduate classes is recommended; further,

(c) That the status and financial outlook of the teacher be improved so as to render the profession attractive to the most capable persons.

Part-time Work

In the shipbuilding and marine engineering trades, it is recommended that, pending the raising of the school age to 16, a system of part-time education should be instituted, although this will dislocate the journeymen squads, and that at 16 there should be opportunities for boys to continue their education. Any fees charged for this should be refunded for good attendance and satisfactory progress. The local education authorities, employers, technical schools and universities should co-opt members to the governing bodies controlling this work. The committee also consider that a universal system of education and training for all lads, and applicable to all yards and engine works, can be introduced by employers without difficulty. This would ensure for all boys the same opportunity for improving themselves and would bring firms closer together in training the workmen of the future. As to higher education, firms should make more arrangements for their apprentices to attend sessions at a university or technical school, counting time so spent as part of apprenticeship. They add:

"A large number of bursaries are provided for naval architects, so that no really able lad need lack opportunity for advancement to the highest position. So far as marine engineering is concerned, some of these bursaries might be taken either by naval architects or marine engineers, but there seems to be a lack of specific courses for marine engineers of an exactly similar character to those for the naval architects. The number of openings available for the advancement

of marine engineers is much greater than for naval architects. We are aware that other bodies have been studying this question for the purpose of organizing the training of such men, but we are of opinion that a special university course should be organized for marine engineering designers—at any rate, in universities situated close to the important marine engine works."

Accordingly this committee recommended:

(a) Education of boys and apprentices; apprenticeship:

1. The school leaving age should gradually be raised to 16, and meanwhile there should be introduced a system of compulsory part-time education between the existing school-leaving age and the age of 16, such education to be imparted during the day and not in the evening.

2. Compulsory education should cease with the commencement of apprenticeship at the age of 16, when further education should become optional. There should be provided at evening classes: (a) facilities for higher technical education for apprentices able and willing to profit by it; and, (b) classes on subjects of a general educational character for other apprentices. Fees should be charged, but refunded subsequently if attendance has been satisfactory.

3. There should be a correlated system of control in the schools, and in the factory; education should be in the hands of the educational authorities, but those authorities should co-opt members of the industries to assist in the work.

4. The system of education and training introduced should be universal, with such variations as regards detail as may be necessary to suit different localities.

5. Apprentices of special ability or education should be encouraged to attend sessions at a university or technical school, if they so desire, as part of their apprenticeship.

6. A special course for marine engineering designers should be organized, at least in universities near important marine engine works.

7. Apprenticeship should not exceed five years.

8. There should be appointed throughout the industries supervisors or tutors, whose special function it should be to interest themselves personally in the boys and youths from the point of view of their work, their recreation, and their social life.

9. Employers should consider the possibility and desirability of introducing a system of deferred payments for apprentices.

10. Apprentices should be indentured, and should up to the age of 21 be members of separate approved societies formed by districts under the employers' associations.

(b) Industrial research:

1. Laboratories should be established by co-operative effort in convenient centres for the testing of materials. Such central laboratories might also become centres of research.

2. A publicly or co-operatively provided experimental tank in each centre of industry would be of advantage, and would encourage research; but such tanks should only be established when it is found that the tank at Bushey is being overburdened with outside work to the detriment of its research work.

3. With regard to such research work, more experiments should be directed towards the design of vessels of moderate speed and size.

Textile Trades: Art and Technical Schools

In the textile trades, the committee state, "it is essential that in all textile towns of importance there should be an art school and a technical school, which, if not actually under the same roof, should work hand in hand in the training of young people who will become manufacturers, managers or designers. In our opinion it should be made a con-

dition of Government grants that in the management of both schools practical men in the industry should have the opportunity of taking an active part." In these institutions, which should be equipped with the most modern type of machinery and appliances for testing materials and investigating processes, well-trained and well-paid teachers are required. They should provide opportunities equal to those to be found abroad for the most complete study of manufacture, and should afford a course of advanced training in design, with special application to the needs of the local industry.

"Thus Manchester, Leeds, Belfast, Macclesfield, Nottingham and Kidderminster might become seats of great schools, serving respectively the needs of the cotton, woollen, linen, silk, lace, and carpet-weaving trades. In scientific and technical research the industries offer great opportunities in the following lines of inquiry:

(1) Scientific investigation into raw materials.

(2) Scientific improvement of processes.

(3) Technical investigation for the improvement of machinery. With reference to (1) in the past, machinery and methods have been adapted to the various types of textile fibre commonly produced, but by means of research in connection with raw materials themselves special types might be evolved which are suited to the products required, and the cultivation of these might be encouraged."

The findings of the committee are:

Technical and art education:

(a) That our system of technical and art education should be thoroughly overhauled, in order to raise the standard of instruction and enable the schools to supply the textile industries with more highly trained workers and managers.

(b) That steps should be taken to ensure the provision of more highly trained teachers, with more liberal emoluments and improved status.

(c) That the managing bodies of technical and art schools should always include a considerable proportion of members connected with the industries which are taught in the schools.

(d) That employers should afford opportunities to promising young people to attend the courses at technical schools during the ordinary working hours, without deductions of pay.

(e) That in addition to local schools, a central institute should be established in connection with each of the textile industries, fully equipped with modern machinery and with the appliances necessary for testing materials and investigating processes, and capable of providing opportunities for the most complete study of manufacture and design.

In scientific and technical research:

(a) That there should be continuous and systematic research into the raw materials and various manufacturing processes of the several textile industries in order to stimulate their development and prosperity.

(b) That scientific and industrial research for the benefit of an industry should be directed by the industry itself, aided by funds from the Government, and that with this object the great trade associations we have suggested, or trade associations for research on the lines contemplated by the Department of Scientific and Industrial Research, should be established for the several branches of the textile industry.

FIRST REPORT OF THE NOVA SCOTIA WORKMEN'S COMPENSATION BOARD

THE Workmen's Compensation Board of Nova Scotia has issued its first report covering the period from its organization in October, 1916, to the end of 1917. The first work undertaken by the Board was an industrial census of the province which secured the names of over 4,000 industries. After the elimination of those not under Part I. of the Workmen's Compensation Act, and of others of a temporary character or employing a very small number of workmen, 1,704 industries remained to be classified, rated and assessed. The Board refused the applications made by the Dominion Coal Company, and by the Dominion Iron & Steel Company, for certificates enabling them to substitute other schemes of compensation for the provisions of the Act in their industries in Cape Breton Island.

The Act became effective for the payment of compensation on January 1, 1917. The Board has adjusted claims wherever possible on information obtained from the workman, from his physician if any, and from the employer. Workmen within the scope of the new act are able to obtain compensation without legal expense, and with the least possible trouble and delay. Various precautions taken by the Board to prevent malingering and fraud protect the employer from imposition, and employers in general are now favorably disposed towards the Act and ready to co-operate with the Board. The Board recommends, however, that the Act be amended to make assessments like taxes, a first lien on all the property and assets of an employer.

The Board reports that in administering the Act it has taken every opportunity to encourage accident prevention. It believes that many of the accidents in 1917 might have been prevented, and contemplates further action when the accident experience of the different industries has been ascertained.

The Act permits the Board to authorize special surgical operations to avoid heavy payment for disability, and the report describes an operation which saved the eyesight of a coal miner. The cost of the operation and the compensation during the period of disability amounted to less than $50, whereas the reserve fund required to cover payments during the workman's life would have been $4,800.

The Relief Commission appointed by the Dominion Government has undertaken the compensation payable in connection with the Halifax explosion, and the Stellarton disaster of last January is not included in the present report. In July, 1917, however, an explosion at New Waterford resulted in the death of 65 coal miners, and consequently in the table of accidents compensated during the year the figures for the coal mining industry are unusually high. The total number of claims disposed of by the Board was 4,812, of which 1,823 were in the coal mining industry and 1,666 in iron and steel manufacturing. The next highest number of claims was 325 in building and construction. Out of a total of 142 deaths, 92 occured in the coal mining industry as compared to 17 in the iron and steel manufacturing industry, 8 in lumbering and woodwork, and 7 in building and construction. Owing to the extra work caused by the Halifax and Stellarton disasters the staff was unable to prepare statements for the report showing the causes of the various accidents.

REPORT OF THE UNITED STATES NATIONAL WAR LABOUR BOARD

THE War Labour Conference Board of the United States which was appointed by Secretary of Labour Wilson in January last, to draw up a national labour policy for the duration of the war, submitted its report on March 29. Five members of the Board were named at the request of the Secretary of Labour by the National Industrial Conference Board, a federation of employers' organizations and five by the American Federation of Labour. Each group then appointed an additional member to represent the general public, the employers selecting former president William H. Taft, and the labour men Frank P. Walsh, former chairman of the United States Commission on Industrial Relations. From the report of the Board, which follows, it will be noted that some very important concessions were made by both the employers and the trade unionists. These include the recognition by the employers of the right of workers to organize and to bargain collectively through chosen representatives, and the declaration by the trade unionists that there shall be no strikes during the period of the war, and that there shall be a discontinuance until the coming of peace of all rules and methods of work tending to restrict or limit production. The report which was signed by the twelve members of the conference is given below.

(a) That there be created, for the period of the war a National War Labour Board of the same number and to be selected in the same manner and by the same agencies as the commission making this recommendation.

(b) That the functions and powers of the national board shall be as follows:

1. To bring about a settlement, by mediation and conciliation of every controversy arising between employers and workers in the field of production necessary for the effective conduct of the war.

2. To do the same thing in similar controversies in other fields of national activity, delays and obstructions in which may, in the opinion of the national board, affect detrimentally such production.

3. To provide such machinery by direct appointment, or otherwise, for selection of committees or boards to sit in various parts of the country where controversies arise, to secure settlement by local mediation and conciliation.

4. To summon the parties to the controversy for hearing and action by the national board in case of failure to secure settlement by local mediation and conciliation.

(c) If the sincere and determined effort of the national board shall fail to bring about a voluntary settlement, and the members of the board shall be unable unanimously to agree upon a decision, then and in that case and only as a last resort, an umpire appointed in the manner provided in the next paragraph shall hear and finally decide the controversy under simple rules of procedure prescribed by the national board.

(d) The members of the national board shall choose the umpire by unanimous vote. Failing such choice, the name of the umpire shall be drawn by lot from a list of 10 suitable and disinterested persons to be nominated for the purpose by the President of the United States.

(e) The national board shall hold its regular meetings in the city of Washington, with power to meet at any other place convenient for the board and the occasion.

(f) The national board may alter its methods and practice in settlement of controversies hereunder, from time to time as experience may suggest.

(g) The national board shall refuse to take cognizance of a controversy between employer and workers in any field of industrial or other activity where there is by agreement or Federal law a means of settlement which has not been invoked.

(h) The place of each member of the national board unavoidably detained from attending one or more of its sessions may be filled by a substitute to be named by such member as his regular substitute. The substitute shall have the same representative character as his principal.

(i) The national board shall have power to appoint a secretary, and to create such other clerical organization under it as may be in its judgment necessary for the discharge of its duties.

(j) The national board may apply to the Secretary of Labour for authority to use the machinery of the department in its work for conciliation and mediation.

(k) The action of the national board may be invoked in respect to controversies within its jurisdiction by the Secretary of Labour or by either in a controversy or its duly authorised representative. The board, after summary consideration, may refuse further hearing if the case is not of such character or importance to justify it.

(l) In the appointment of committees of its own members to act for the board in general or local matters, and in the creation of local committees, the employers and the workers shall be equally represented.

(m) The representatives of the public on the board shall preside alternately at successive sessions of the board or as agreed upon.

(n) The board in its mediating and conciliatory action, and the umpire in his consideration of a controversy, shall be governed by the following principles:

There should be no strikes or lockouts during the war.

1. The right of workers to organize in trade-unions and to bargain collectively through chosen representatives is recognized and affirmed. This right shall not be denied, abridged, or interfered with by the employers in any manner whatsoever.

2. The right of employers to organize in associations or groups and to bargain collectively through chosen representatives is recognized and affirmed. This right shall not be denied, abridged, or interfered with by the workers in any manner whatsoever.

3. Employers should not discharge workers for membership in trade-unions, nor for legitimate trade-union activities.

4. The workers, in the exercise of their right to organize, shall not use coercive measures of any kind to induce persons to join their organizations, nor to induce employers to bargain or deal therewith.

EXISTING CONDITIONS.

1. In establishments where the union shop exists the same shall continue and the union standards as to wages, hours of labour, and other conditions of employment shall be maintained.

2. In establishments where union and non-union men and women now work together, and the employer meets only with employees or representatives engaged in said establishments, the continuance of such condition shall not be deemed a grievance. This declaration, however, is not intended in any manner to deny the right or discourage the practice of the formation of labour unions, or the joining of the same by the workers in said establishments, as guaranteed in the last paragraph, nor to prevent the War Labour Board from urging, or any umpire from granting, under the machinery herein provided, improvement of their situation in the matter of wages, hours of labour, or other conditions, as shall be found desirable from time to time.

3. Established safeguards and regulations for the protection of the health and safety of workers shall not be relaxed.

The basic eight-hour day is recognized as applying in all cases in which existing law requires it. In all other cases the question of hours of labour shall be settled with due regard to governmental necessities and the welfare, health, and proper comfort of the workers.

The maximum production of all war industries should be maintained, and methods of work and operation on the part of the employers or workers which operate to delay or limit production, or which have tendency to artificially increase the cost thereof, should be discouraged.

For the purpose of mobilizing the labour supply with a view to its rapid and effective distribution a permanent list of the number of skilled and other workers available in different parts of the Nation shall be kept on file by the Department of Labour, the information to be constantly furnished:

1. By the trade unions.

2. By State employment bureaus and Federal agencies of like character.

3. By the managers and operators of industrial establishments throughout the country.

These agencies should be given opportunity to aid in the distribution of labour, as necessity demands.

In fixing wages, hours, and conditions of labour regard should always be had to the labour standards, wage scales, and other conditions prevailing in the localities affected.

1. The right of all workers, including common labourers, to a living wage is hereby declared.

2. In fixing wages, minimum rates of pay shall be established which will insure the subsistence of the worker and his family in health and reasonable comfort.

ADDITIONAL REGULATIONS AFFECTING WESTERN COAL MINES

IN earlier issues of the *Labour Gazette* (August, 1917, p. 613; December, 1917, p. 987; February, 1918, p. 142) references have been made to wage increases to coal miners in the Crows' Nest Pass district awarded by Mr. W. H. Armstrong as Director of Coal Operations, upon the findings of the commission appointed to inquire every four months into the cost of living in western coal fields. As a result of the first inquiry by the Commission the miners were awarded an increase of 20 cents per day on August 1, 1917, and on December 1, 1917, received a second increase of 14 cents a day. For the period December 1, 1917 to April 1, 1918, the commission found the average daily increase in the cost of living for a family of five to be .1993 cents per day, though Mr. W. F. McNeill, representative on the Commission of the coal operators, claiming that the average family in the district consisted of three persons, considered that the wages should be increased only three-fifths of the amount mentioned. The Director of Coal Operations ordered, on April 12, that all employees of the mines in District 18 should receive an increase of 20 cents per day from April 1, 1918. By a further order it was directed that for the purpose of ascertaining the amount of the increases granted by the

present and preceding orders the hours of work constituting the day for daymen should be as provided in the tentative agreement, and for contract men should be considered eight hours, and that workmen working more or less than a day should be paid in proportion to the hours worked, including Sundays, on the basis of the total of the various increases, namely, 54 cents per day.

In a dispute at the Federal Mines, Lethbridge, over the dismissal of a miner which resulted in a cessation of work for a couple of weeks, the Director after investigation found there had been a misunderstanding by the parties concerned and that the employee dismissed should be re-instated and paid day wages. By another order the Director fixed the contract rate to be paid at the Pembina mine of the North American collieries, Evansburg, Alta.

CHANGES IN RATES OF WAGES AND HOURS OF LABOUR DURING THE FIRST QUARTER OF 1918

DURING the first quarter of 1918, twenty-six changes in rates of wages and hours of labour, affecting approximately 18,800 workpeople, were reported to the Department, as compared with thirty-three changes affecting approximately 21,400 workpeople, in the last quarter of 1917, and 61 changes affecting approximately 26,700 workpeople in the first quarter of 1917. Of the twenty-six changes, twenty-two were wage increases, three were reductions in working hours and one an increase in wages with a reduction in hours. In the manufacturing and mechanical industries, eight changes were reported, affecting approximately 2,600 workpeople, of whom the majority were in the metals, machinery and conveyances group. In transportation there were seven changes affecting approximately 9,600 workpeople, of whom 9,036 were steam railway employees.

The particulars of each change, in so far as they are known to the Department, are given in the following table:

CHANGES IN WAGES AND HOURS DURING JANUARY, FEBRUARY AND MARCH, 1918

Class of workpeople affected.	Firm or establishment	Approximate number of workpeople affected	Date from which change took effect.	Particulars of change.
METALS, MACHINERY AND CONVEYANCES—				
Iron Moulders	Vulcan Co., London	18	Jan. 28	Increase of 50c per day; from $22.50 to $25.50 per week.
Machinists	Henry Hope & Sons, Peterborough.	30	Mar. 1	Hours reduced from 55 to 54 per week.
Machinists, etc	Canadian Gen. Elc., The DeLaval Co. & Wm. Hamilton Co., Peterborough.	1,700	Mar. 1	Hours reduced from 55 and 59 to 50 per week.
Repair men	Shipyards, Quebec	61	Mar. 1	Wages increased from $2.75 to $3.00 per week.
Shipbuilders, etc	Shipyards, Port Arthur.	500	Mar. 18	Wage increases ranging from 5 to 10 cents per hour.

CHANGES IN WAGES AND HOURS DURING JANUARY, FEBRUARY AND MARCH, 1918—*Continued.*

Class of workpeople affected.	Firm or establishment	Approximate number of workpeople affected	Date from which change took effect.	Particulars of change.
PRINTING & PUBLISHING—				
Compositors	Book and job offices Halifax.	88	Jan. 1	Wages advanced from $17.00 to $20.00 per week.
Compositors	Daily Newspapers, Winnipeg.	150	Feb. 1	Wages for day work increased from $27 to $29 per week; night work from $30 to $33.
Pressmen	Job offices, Hamilton	63	Feb. 1	Wages increased from $19.50 to $24. per week.
TRANSPORTATION—				
Trainmen, etc.	C. P. R. Western Lines.	4,000	Jan. 1	Wage increase of 25 per cent.
Trainmen	M. C. R. R., Canada Division.	340	Feb. 1	Increase in wage rate per mile.
Maintenance-of-way Employees	C. N. R., Western Lines.	3,000	Feb. 1	Wage increase of 45 cents per day for foremen and skilled labourers; others 35 and 40 cents per day.
Shop men	G. T. R. System	1,300	Mar. 1	General increase and 9-hour day granted.
Telegraphers	Government Railway lines.	396	Mar. 1	Wage increase of 9 per cent.
Motormen and Conductors	Kitchener and Waterloo Ry.	14	Jan. 1	Wage increase of 2½c per hour.
Longshoremen	Halifax Shipping Agents.	600	Jan. 1	Day wages increased from 35 to 40 cents per hour; overtime from 40 to 45 cents.
MINING AND QUARRYING—				
Coal Miners	Acadia and Intercolonial Coal Coys	1,200	Jan. 1	General increase averaging from 12 to 15 per cent.
BUILDING AND CONSTRUCTION—				
Painters	Employers, Vancouver.	600	Feb. 1	Wages increased from $22 to $27.50 per week.
LUMBERING—				
Loggers	Employers, B.C.	3,000	Mar. 11	Hours reduced from 10 to 8 per day.
PUBLIC EMPLOYMENT—				
Members of Police Department	Galt	6	Jan. 1	Increase in wages.
Members of Fire Department.	Peterborough	8	Jan. 1	Increase in wages.
Members of Fire Department.	Ottawa	80	Jan. 1	Increase in wages.
Members of Fire Department.	Kingston	15	Jan. 1	Increase in wages.
Members of Police Department	Brantford	15	Jan. 1	Increase in wages.
Teamsters and Labourers	Moncton	20	Jan. 15	General increase.
Members of Fire Department.	Vancouver	69	Mar. 1	Increase of $10 per month.
MISCELLANEOUS—				
Telephone Operators	Bell Telephone Co., Toronto.	1,500	Mar. 1	Increases ranging from 50 cents to $1.00 per week.

FATAL INDUSTRIAL ACCIDENTS DURING APRIL, 1918

DURING April the Department received reports of the occurence of 49 fatal industrial accidents, as compared with 52 in March and 77 in April, 1917. The Department is unable to secure reports of all fatal industrial accidents, but reports are received monthly from all available sources.

TABLE OF FATAL INDUSTRIAL ACCIDENTS DURING APRIL, 1918

Trade or Industry.	Locality	Date	Cause of fatality.
AGRICULTURE—			
Farmer	Omemee, Ont.	3 April	Flying piece of machinery.
Farmer	Millbrook, Ont.	" 4	Fall from windmill.
LUMBERING—			
Riverman	Quoddy River, N.B.	" 26	Struck by piece of ice.
Riverman	St. Francois, Que.	" 17	Struck by a canthook.
Riverman	Arnprior, Ont.	" 15	Drowned.
Riverman	Severn River, Ont.	" 15	Drowned.
Riverman	Grandview, Man.	" 26	Drowned.
Sawmill employee	Ottawa, Ont.	" 1	Drowned.
Water boy	Keewatin, Ont.	" 18	Fall of lumber.
MINES, SMELTERS AND QUARRIES—			
Miner	Thetford Mines, Que.	" 11	Fall of rock.
Miner	Asbestos, Mines, Que.	" 11	Crushed between car.
Miner	Merritt, B.C.	" 13	Fall of coal.
Miner	Michel, B.C.	" 24	Falling timber.
BUILDING AND CONSTRUCTION—			
Bricklayer	Gladstone, Man.	" 18	Fall.
Workman	Toronto, Ont.	" 12	Electrocuted.
Workman	Hespeler, Ont.	" 3	Falling tree.
METALS, MACHINERY AND CONVEYANCES—			
Iron worker	Brantford, Ont.	" 22	Fall.
Munition worker	Leaside, Ont.	" ..	Fall.
Munition worker	Renfrew, Ont.	" 7	Asphyxiated.
Munition worker	Longue Pointe, Que.	" 4	Falling machinery.
Shipwright	Port Arthur, Ont.	" 4	Crushed by a crane.
Steel worker	Sault Ste-Marie, Ont.	" 6	Burned.
PULP AND PAPER—			
Pulp mill employee	Donnacona, Que.	" 17	Fell into vat of boiling water.
Pulp mill employee	Sturgeon Falls, Ont.	" 13	Drowned.
FOODS, TOBACCO AND LIQUOR—			
Flour mill employee	Toronto, Ont.	" 2	Crushed by an elevator.
Cereal mill employee	Peterborough, Ont.	" 15	Crushed between cars.
Packinghouse employee	Toronto, Ont.	" 11	Fall.
CHEMICALS AND EXPLOSIVES—			
Amonia and tar works employees (3)	Hamilton, Ont.	" 25	Explosion.
STEAM RAILWAY SERVICE—			
Engineer and fireman (2)	Megantic, Que.	" 11	Collision.
Brakeman	Bigwood, Ont.	" 14	Crushed between cars.
Brakeman	Montreal, Que.	" 10	Runover by a train.
Brakeman	Montreal, Que.	" 11	Fall from a car.
Yardman	Winnipeg, Man.	" 5	Run over by locomotive.
Sectionman	L'Islet, Que.	" 6	Struck by a train.
Sectionman	Toronto, Ont.	" 20	Runover by a hand car.
Sectionman	Bowie, Ont.	" 15	Struck by a train.
Baggage solicitor	Toronto, Ont.	" 2	Runover by a train.
ELECTRIC RAILWAY SERVICE—			
Car repairer	Hamilton, Ont.	" 10	Fall.
Employee	Windsor, Ont.	" 6	Fall from a car.
MISCELLANEOUS TRANSPORT—			
Cabman	Montreal, Que.	" ..	Fall from a cab.
NAVIGATION—			
Deckhand	Trenton, Ont.	" 11	Fall.
PUBLIC UTILITIES—			
Lineman	Brampton, Ont.	" 24	Electrocuted.
Lineman	Renfrew, Ont.	" 22	Fall from a pole.
Power Company employee	Niagara Falls, Ont.	" 6	Electrocuted.
Power Commission employee	Stanford, Ont.	" 2	Crushed between railway cars.
MISCELLANEOUS—			
Elevator operator	Moose Jaw, Sask.	" 14	Crushed by an elevator.

RECENT LEGAL DECISIONS AFFECTING LABOUR

An injured workman may sue for either annual rent or capital under Workmen's Compensation Act of Quebec

A WORKMAN employed as a helper in the manufacture of shells cut one of the fingers of his right hand while handling shells. Blood poisoning set in, and as a consequence he almost completely lost the use of his right hand, and his right arm was also affected. He sued his employers in the Quebec Superior Court for $108 compensation to the date of the action and a capital sum of $1,500. The defendant company submitted that the plaintiff could not claim the capital, but must first sue for the rent to which he might be entitled. After this was determined, he might then make option for the capital representing such rent. It was further maintained by the defendants that it was for the plaintiff to show that the consequences of the accident were not due to any fault of his, and they alleged that the plaintiff's present condition was due not to the accident but to his refusal to be operated upon.

With regard to the first contention, it was declared by the Court that the jurisprudence was contradictory, conflicting judgments having been rendered, but the opinion was expressed that the plaintiff in an action under the Workmen's Compensation Act, as amended, may sue for either the annual rent or the capital, and even if he sues for the annual rent he may at any time, even after judgment is rendered, make option for and recover the capital representing such rent.

The Court also dismissed the second objection of the defendants. The medical evidence showed that blood poisoning is a natural consequence of an injury such as the plaintiff suffered. He did all that could be expected of him in going at once to the first-aid station provided by the defendants, and going to the hospital on the advice of a physician, when his condition became serious. There he was advised to have his middle finger amputated, but refused to let it be done. The only medical evidence before the Court was that if his finger had been amputated the plaintiff would have almost entirely recovered the use of his hand and arm. This evidence, however, was held by the Court to be merely an expression of opinion, which could not possibly be guaranteed, and as the plaintiff had already submitted to four or five minor operations, notwithstanding which he steadily grew worse, his refusal was not entirely unjustified. The Court therefore ordered the plaintiff's employers to pay him $108 compensation to the date of the action, and a sum of $1,500, representing the capital of the rent to which the plaintiff was entitled under the provisions of the Workmen's Compensation Act. (*Quebec —Freeman v. Montreal Locomotive Works.*)

Higher wages after accident evidence of no permanent partial incapacity

The plaintiff, as tutor to his minor son, sued under the Quebec Workmen's Compensation Act, claiming an indemnity of $54.25, being half of his son's salary during his partial incapacity to work, and $545.73, being the capital of an annual rent for the permanent partial incapacity resulting from the

loss of his little finger. The defendant company admitted the accident, but said the boy was earning 11½ cents per hour, that he was entitled to $40, being half his wages to April 10, 1917, when he was in a position to return to work if he had seen fit to do so, and to such rental as the Court might fix after hearing evidence at the trial. The Superior Court at Montreal granted plaintiff the sum of $60 by the following judgment:

"Considering that the evidence at the trial establishes that the said minor was in the employ of the defendant for about two months before February 21, 1917, when he met with an accident at his work as a result of which he lost the little finger of his left hand, that he was treated at the General Hospital as an out-door patient from that day until he was discharged as being well on March 28, 1917; considering that the wages of the said minor before the accident amounted with bonus to 14 cents per hour and that he had been working for 55 hours per week; considering that said minor was out of work for a period of 14 weeks after said accident, when he secured a position which he still occupies at wages of 20 cents per hour; considering that the right of the plaintiff to recover for permanent partial incapacity depends upon the amount by which the minor's wages have been reduced in consequence of the accident of which he was a victim; considering that the said minor since he resumed work is earning wages amounting to 50 per cent in excess of what he earned previous to the accident, and that therefore plaintiff has not established any claim for an indemnity for permanent partial incapacity; considering that the indemnity for temporary partial incapacity established in this case does not exceed the sum of $60; considering that the plaintiff has established his case to the extent of $60 only; doth maintain plaintiff's action for the sum of $60 and costs of action of that amount, including cost of stenography at the trial." (*Quebec — Smith v. Grand Trunk Railway Company.*)

REVIEWS

UNITED STATES.—Economic Effects of the War Upon Women and Children in Great Britain. By Irene Osgood Andrews, assisted by Margarett A. Hobbs. Carnegie Endowment for International Peace, Division of Economics and History. Preliminary Economic Studies of the War. New York: Oxford University Press, 1918; 200 pp.

Effects of the war on British women and children

THE Carnegie Endowment for International Peace has issued as the second volume in a series of preliminary war studies a monograph by Mrs. Irene Osgood Andrews, assistant secretary of the American Association for Labour Legislation, on the "Economic Effects of the War Upon Women and Children in Great Britain." The conclusions reached in this study are summarized below.

Owing to the dislocation of industry caused by the outbreak of the war, over 40 per cent of the working women were out of employment or on short time in September, 1914, the "luxury" trades being most severely affected. Then they began to take the places of the enlisted men, and they were also in demand for war work, but the pre-war level of em-

ployment was not reached until April, 1915. By July, 1917, however, the number of females gainfully employed was more than 1,000,000 over the number in July, 1914. There was also an increase in the amount of child labour. In August, 1917, it was stated in the House of Commons that in the past three years some 600,000 children had been put prematurely to work through the relaxation of child labour and compulsory school laws. During the first year of war, women took men's places in transportation, retail trade and clerical work. In the second year there was a rush of women into the munitions industry, and a decline in the number of women in domestic service, the printing trades, confectionery and laundry work. In the third year of war the substitution of women for men on a large scale was extended to numerous staple industries having a less direct connection with the war. In the engineering trades, skilled processes were subdivided and automatic machinery was introduced, thus eliminating the need of all round craft skill. In the summer of 1916, there was for the first time a marked increase in the number of women agricultural workers. About that time a women's army corps was recruited for military work as clerks, cooks, cleaners, chauffeurs and mechanics behind the lines in France. In October, 1917, 10,000 recruits a month were wanted for this corps. It was at first generally considered that women were not as efficient as men except on routine and repetition work, but as more and more women gained experience and were undertaking the whole of a skilled man's job, the testimony as to relative efficiency on work within a woman's strength became far more favourable. The wages of both women and children were raised under war conditions, the smallest increases being in the so-called "women's trades," like laundry work. On munitions work, the Government fixed the women's wages, and in so doing accepted the principle of "equal pay." In other industries covered by trade union agreements women also generally received "equal pay," but in the remaining cases of substitution, though increases were gained, the men's rates were by no means reached.

The women who entered the new fields of labour to meet the demands of war came for the most part from three different groups. First, workers changed from low paid women's trades and various slack lines of work to munitions and different kinds of men's work. Secondly, most of the additional women workers were wives and other members of workingmen's families, or soldiers' wives, who found their separation allowances insufficient. Finally, a comparatively small number of women of a higher social class entered clerical work, agriculture, and the munitions factories, for patriotic reasons. Many women and children were recruited through Women's War Employment Committees and County Agricultural Committees formed by the Government and working in close co-operation with the national employment exchanges. Trade union rules restricting the kinds of work that women might perform were set aside for the war period, and the dilution of labour by the admission of women workers was effected in many industries through conferences and agreements between employers and employees.

The attempted Government control of labour through the Munitions Acts, pro-

viding for compulsory arbitration and a system of "leaving certificates," caused a great deal of irritation among the munition workers, and the system of leaving certificates was consequently abolished in October, 1917.

Various steps were taken by the Government for the safety, health and comfort of munition workers. Before the war, the factory laws forbade the employment of women at night and on Sundays and for more than 10 and a half hours daily and 60 weekly in non-textile factories, and 10 daily and fifty-five weekly in textile factories. As the pressure of war work grew, the hours were lengthened, and women were frequently kept at work at night and on Sundays on special orders from the factory inspectors, or even in defiance of the law. This unsatisfactory situation led the Government to appoint the Health of Munition Workers' Committee, whose scientific studies on the effects of long hours on output were instrumental in securing a return to pre-war standards of hours. The Minister of Munitions also encouraged the engagement of "welfare supervisors" in establishments under his control, who looked after the interests of women, girls and boys. The owners were allowed to deduct the cost of special welfare provisions from the excess profit tax. Housing accommodation was provided on a large scale, and similar projects undertaken by municipalities and private organizations were subsidized by the Government. In August, 1916, a law was passed empowering the Home Office to make special regulations for additional welfare provisions in factories.

As to the effects of war work, it is stated that among women signs of injury to health were not generally apparent, higher wages enabling them to improve their standard of living in many cases to the benefit of their health. Among boy munition makers the evidences of over-work and a decline in health were said to be much more striking. Other effects that were observed were the undermining of home life, through the absence of parents and the consequent relaxation of the discipline of children, leading to a marked increase in juvenile delinquency. This was particularly noticed among boys of eleven to thirteen, the ages for which school attendance laws have been relaxed and premature employment allowed.

UNITED STATES.—Report of the Commissioner of Education for the year ended June 30, 1917. Vol. I.; 108 pp.

Education in relation to the war

An important part of the Report of the United States Commissioner of Education for the year ended June 30, 1917, deals with education in relation to the war. Soon after the declaration of war by the United States, steps were taken by the bureau to aid in marshalling the intellectual resources of the nation. By distributing among the higher educational institutions blank service forms of a kind that had been devised by Columbia University, the colleges and universities were en-

abled (1) to make a personnel index of the entire universities body; (2) to perfect an internal organization into larger and smaller subdivisions which should operate autonomously and in coordination with one another; and (3) to establish cooperative relations with governmental agencies of the Nation, the State, and city for patriotic purposes.

As the result of a conference between the Committee on Science, Engineering and Education of the Advisory of the Council of National Defence, and representatives of various educational organizations, a statement of principles was prepared and distributed by the Bureau of Education to colleges and universities. This statement suggested that all young men below the age of liability to the selective draft and those not recommended for special service, who could do so, should be urged to attend the colleges; that the colleges consider the advisability of dividing the academic year into four quarters and repeating the courses at least once a year, so that the college course might be best adapted to the needs of food production; that students pursuing technical courses such as medicine, agriculture, and engineering, should be considered as rendering services more valuable than if they were to enroll at once in the military or naval service; and that the Government should provide or encourage military training for all young college men and that the colleges should include teaching in military science. The colleges and universities of the United States are reported to be rendering six different types of special war services. These comprise: (1) Special courses for regular students, introduced as a result of the war; (2) special extension courses; (3) new schools or courses established for the benefit of the military or naval service directly; (4) extra academic service of students and professors; (5) changes in college calendars; (6) utilization by the Government of research laboratories and of professors in an expert capacity.

The Bureau has also taken steps to promote the cultivation of home gardens through the help of the schools. A letter was sent to secretaries of school boards in every city and town of more than 2,500 population, appealing to the boards to employ through the entire spring, summer and fall at least one garden teacher or director for every 100 children between the ages of 9 and 15 for whom land can be found and who can be induced to spend two or three hours a day in gardening. It is suggested that if funds for necessary expenses are needed, children who receive instruction or their parents might pay into a general fund ten or twenty per cent of the value of vegetables grown.

In cooperation with the Food Admininstration, the Bureau distributed pamphlets among the schools on the subject of food conservation, outlining courses in food economics, and urging instructors to teach the use of substitutes for certain of the more expensive foods, and to waste no time on fancy cookery. A pamphlet of the Food Ad-

ministration bearing the title of "Ten Lessons in Food Conservation" was also widely distributed by the Bureau among summer schools, teachers' institutes and individual teachers. A further development is the issuing to schools of lesson leaflets on the subject of "Lessons in Community and National Life," which discuss in a simple way the fundamentals of present-day world organization in special relation to the problems brought forward by the war.

The Report of the Bureau also contains chapters dealing with the general activities of the Bureau, and with educational conditions in the other warring countries.

THE

LABOUR GAZETTE

Prepared and edited in the Department of Labour, Ottawa

MINISTER—THE HONOURABLE T. W. CROTHERS, K.C.
DEPUTY MINISTER—F. A. ACLAND.
EDITOR OF 'THE LABOUR GAZETTE'—BRYCE M. STEWART.

Volume 18 JUNE, 1918 Number 6

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

The month in brief

Generally throughout the country there was a brisk demand for labour; more particularly for unskilled labourers, farm hands, machinists and munition workers. While there was a considerable increase in the number of industrial disputes during May and in the loss of time, the record was better than May of last year. There were in existence during the month 37 strikes, affecting 14,583 workpeople; as compared with 15 strikes, affecting 7,315 workpeople, during April. The time loss for May was 104,861 working days; as compared with 15,671 working days in April and 257,069 during May, 1917. At the end of the month 10 strikes remained unsettled. There was an advance over April of nearly 60 per cent in the value of building permits issued, and an advance of 26 per cent over May, 1917. The cost of the weekly budget of staple goods was $12.66; as compared with $12.57 for April, and $11.82 for May, 1917. The index number of wholesale prices was 275.8, as compared with 269.4 in April.

* * *

Proceedings under the Industrial Disputes Investigation Act

During the month of May the Department received reports from three Boards of Conciliation and Investigation which had been appointed to inquire into disputes affecting: (1) the Sandwich, Windsor and Amherstburg Railway Company and its motormen and conductors; (2) the Canadian Collieries (Dunsmuir), Limited, and certain of its employees at Union Bay, B.C., and (3) the Hull Electric Company and its conductors, motormen and various other employees. In the first and third cases the findings of the Boards were declared acceptable to both the employers and employees; in the Canadian Collieries dispute a minority report was made by Mr. Naylor, the nominee of the employees; but information to hand at the end of the month did not indicate that any cessation of work occurred. Ten applications for the establishment of Boards received attention during the month.

A Political Labour Party in Ontario

A meeting was called in Toronto a few weeks ago to organize a Labour Party for Ontario. Invitations to the meeting were sent to the various trades and labour organizations, socialistic and other societies; there were 420 delegates in attendance. The following party objects were adopted:

To organize and maintain in parliament, provincial and federal, a political labour party; to cooperate with kindred organizations, in joint political or other action in harmony with the party constitution and standing orders; to give effect as far as may be practicable to the principles from time to time approved by the party conference; to secure for the producers by hand or by brain the full fruits of their industry and the most equitable distribution thereof; gen-

erally to promote the political, social and economic emancipation of the people, and more particularly of those who depend directly upon their own exertions by hand or by brain for the means of life.

* * *

Censorship Regulations

Regulations governing the publication of statements or reports, or the verbal expression of opinion which may tend "to weaken or detract from the united effort of the people of Canada in the prosecution of the war," were embodied in an order-in-council which was passed on April 16, 1918. A further order-in-council, consolidating all censorship regulations, was passed on May 21. The spirit of the new order, however, was sufficiently well expressed by the original order of April 16, which was, in part, as follows:

It shall be an offence:

(a) To print, publish or publicly express any adverse or unfavourable statement, report or opinion concerning the causes of the present war or the motives or purposes for which Canada or the United Kingdom of Great Britain and Ireland or any of the allied nations entered upon or prosecutes the same, which may tend to arouse hostile feeling, create unrest or unsettle or inflame public opinion;

(b) To print, publish or publicly express any adverse or unfavourable statement, report or opinion concerning the action of Canada, the United Kingdom of Great Britain and Ireland or any allied nation in prosecuting the war;

(c) To print or give public expression or circulation to any false statement or report respecting the work or activities of any department, branch or officer of the Public Service or the service or activities of Canada's Military or Naval Forces, which may tend to inflame public opinion and thereby hamper the Government of Canada or prejudicially affect its Military or Naval Forces in the prosecution of the war;

(d) To print, publish or publicly express any statement, report or opinion which may tend to weaken or in any way detract from the united effort of the people of Canada in the prosecution of the war.

Any person found guilty of an offence against these regulations is liable to both fine and imprisonment. Provision is also made for the seizure of the printing plant and the destruction of material used in the publication of any matter which in the opinion of the Secretary of State constitutes a hindrance to united action.

* * *

"Anti-Loafing Law"

In view of the urgent need for labour to assist in the production of food and other articles essential for war purposes, and with the idea of utilizing for such purposes the human energy of Canada to the best advantage, an order-in-council was passed on April 4, 1918, in which it was ordered that every male person residing in the Dominion of Canada shall be regularly engaged in some useful occupation.

Exception is made in the case of a person who is:

(a) Under 16 years or over 60 years of age.

(b) A bona fide student proceeding with his training for some useful occupation.

(c) A bona fide student in actual attendance at some recognized educational institution.

(d) Usually employed in some useful occupation and temporarily unemployed owing to differences with his employer common to similar employees with the same employer.

(e) Physically unable to comply with the provisions of the law as herein enacted.

(f) Unable to obtain within reasonable distance any kind of employment which he is physically able to perform at current wages for similar employment.

In any proceedings that may be taken, the terms "useful occupation" and "reasonable distance" shall be determined by the magistrate trying the case.

For non-compliance with the regulations the offender is liable to a fine or imprisonment.

The order is not intended to prevent members of organized labour associations from discontinuing their work in the employment in which they have been engaged when such discontinuance is occasioned by differences actually arising between the employer and the employed. The purpose is to prevent persons capable of useful work from remaining in idleness at a time when the country most urgently requires the service of all human energy available.

Measures relating to idleness, similar to those now in effect in Canada, have been passed in four States of the American Union and it is now proposed that Congress enact legislation of this kind to apply to the whole of the United States.

* * *

National Registration

In the March issue of the *Gazette* (page 155) mention was made of the appointment of the Canada Registration Board, whose duties were to take an inventory, at some future date, of all the male and female persons over 16 years of age living in Canada. The date for registration has been fixed by proclamation as June 22. On that date all men and women, whether of British birth or foreign nationality, who are 16 years of age or over, must appear before the nearest deputy registrar and answer certain questions. A person failing to comply with the order is liable to fine; imprisonment; is disentitled, if an employer, to the services of any employee though liable for the wages earned by such employee; is disentitled, if an employee, to any wages that would otherwise be due to him; is deprived of the franchise; is deprived of the right to travel and of the right to demand board and lodging. Of particular importance to employers is another penalty which provides that anyone who continues to employ an unregistered person, or who pays him any salary while he remains unregistered, thereby renders himself liable to a penalty similar to that which the unregistered employee himself shall be liable to. Those who, through illness, accident or absence from Canada, are unable to register upon the day proclaimed are permitted to do so later at any post office. The questionnaires for men and women have been designed to find out the particular work for which each individual would be best fitted, in the event of the Government having to take steps to ensure that sufficient labour shall be available for the production and preservation of foods, manufacture of munitions and other war supplies, shipbuilding and other occupations essential to winning the war.

Opportunity is offered to employers of labour to have one or more of their office staff sworn in as deputy registrars; in which event the necessary cards will be supplied a few days in advance. The registration can then take place within the factories and workshops with a minimum of inconvenience to all concerned.

* * *

Canada Food Board

By an order dated April 25, 1918, the Canada Food Board provided that no person shall hold, have in his possession, or have under his control, flour or sugar more than sufficient for his needs for 15 days, except that persons living more than two miles from a dealer licensed by the Food Board might have supplies for longer periods according to the distance in each case from such a dealer. Regulations were also made as to the quantities dealers and manufacturers might have on

hand. A general system of licenses for dealers in food was put in force to cover the various classes of food, extending the license system previously adopted. On May 17 the Canada Food Board issued the following statement:

HOLDINGS OF FLOUR.

An Order has been issued by the Canada Food Board setting forth certain conditions under which persons may be allowed to hold flour in excess of the limited amounts prescribed by the Order of April 25th.

It is provided that a bona fide farmer may hold, subject to the Order of the Canada Food Board, the amount of flour made wholly or in part from wheat, which he may have in his possession in excess of the amounts prescribed by the Order of April 25, on the condition that, on or before June 15th, he report to the miller or dealer from whom it was purchased, or by whom it was manufactured, the excess amount held by him. It shall then be the duty of such miller or dealer to report all such holdings to the Canada Food Board, on forms to be supplied, and at such times as the Food Board may prescribe.

It is also provided that any person holding or having in his possession not more than 25 pounds of flour made wholly or in part from wheat, or who held or had in his possession on May 17th part only of one original package in which such flour was purchased, though the amount exceed 25 pounds, may retain the same. All flour held in excess of these amounts must be returned as required by the original Order.

Agreement between Builders' Exchange and Stonecutters' Association at Toronto

An agreement to be in effect for one year from May 1, 1918, has been entered into between the Builders' Exchange of the city of Toronto and the Toronto branch of the Journeymen Stonecutters' Association of North America.

The essential clauses of the agreement are as follows:

1. That the wages shall be 65 cents an hour.

2. That proper sheds and sanitary accommodation shall be provided in all yards and on all jobs. Also, during the months of June, July, August and September, sunshades and coverings must be provided when necessary.

3. That all stonework where a mallet, mash hammer and chisel is used on the cutting of all rock-faced ashlar and range ashlar over 10 inches in height; the cutting of all clean jambs, whether tooth-chiseled, chiseled, bush-hammered or crandeled, or any other finish of a clean character, the cutting of all corners with clean specified corner drafts and the cutting of all clean reveals upon rock-faced heads, sills, arches, etc., of the same character as above, and including artificial stone, shall be considerad practical stonecutting.

4. That the hours of labour shall be eight hours per day, from 8 a.m., except Saturday, when four hours shall be worked, from 8 a.m. to 12 noon.

Lunch time on all jobs and yards shall be arranged by mutual agreement.

5. Overtime shall be paid for the first two hours at the rate of time and one-quarter, from 7 p.m. to 10 p.m., time and a half; from 10 p.m. to starting time next morning, double time; Saturday, time and a half from noon till 5 p.m., after 5 p.m. double time.

Employment System of the Lake Carriers' Association

The United States Bureau of Labour Statistics, Bulletin No. 235, recently issued, reviews in detail the methods used by the Lake Carriers' Association in the employment of its seamen.

For some years the so-called 'welfare plan' has been the cause of serious dissensions between the vessel owners and their employees. The men charge that the plan was devised to "break strikes, to blacklist union men, and to crush unionism among the seamen." The 'welfare plan' provides, among other things, for the maintenance of assembly rooms at various ports to the privileges of which sailors are entitled on payment of an annual fee, which constitute membership in the 'plan.' Preference in employment is always given to welfare men. Each member is given a registration or record discharge book in which is kept a record of his services in the Association's ships. When applying for work each sailor must present this book to the local as-

sembly room or shipping office officials and to the captain of the boat on which he ships. The book is kept by the captains until he signs the sailor's discharge record for the trip. If the entry is favourable the book is returned direct to the man, but if not the book is handed by the captain to the secretary of the association with an explanatory statement. The association then considers the cancellation of the sailor's membership in the 'welfare plan.'

The sailors allege, according to the report, that the assembly rooms "are virtually employment offices for the shipment of, preferably, non-union men; that the registration and discharge book system constitutes an effective blacklist, and that the scheme thus becomes a wholesale strike-breaking system." In considering these allegations the report says: "There seems to be no doubt that the welfare plan, whether or not it was so intended, is admirably suited to limit the seamen's freedom of action and to preclude effective organization among them."

In view of the strike on the Great Lakes scheduled to take place on October 1, 1917, the United States Shipping Board intervened. Conferences took place, as a result of which the Shipping Board has been assured that the Lake Carriers' Association will accept any decision the Board may make, and while it will not "of its own motion abolish the welfare plan, it will abolish the discharge book or modify the welfare plan in any manner the Shipping Board may direct after fair investigation." In the meantime the strike has been postponed until the Shipping Board shall have had fair opportunity to make the investigation suggested.

State Fund Plan of Workmen's Compensation in Ohio

According to the December, 1917, Bulletin of the Industrial Commission of Ohio, a remarkable reduction in the cost of administering workmen's compensation insurance has been effected in that state. The earned premium of the Ohio State Insurance Plan for 1917 was approximately $8,000,000. The total cost of administering the Plan for 1917 is $312,279. Computing on the basis of their 40 per cent expense ratio, the Bulletin estimates that it would have cost the liability insurance companies $5,333,000 to have provided this $8,000,000 in compensation benefits. "One of the greatest revelations the Ohio State Insurance Plan has to offer," the Bulletin states, "is the economy with which it can be effectively administered. It is conservative to state, that for the single year of 1917, the Ohio State Insurance Plan has saved its subscribers as an absolute minimum, $5,000,000."

Labour Jottings

The Price-Fixing Committee of the United States War Industries Board has announced maximum prices on hides. It is reported that tanners will be called before the committee at once with a view to establishing fair prices on leather, in order that leather products may reach the consumer at the lowest possible figure.

In a test case recently tried before the United States Federal Trade Commission to determine whether a manufacturer had the right to fix the re-sale price of his product, a decision was rendered against the manufacturer, the Commission holding that no such right existed.

The Connecticut Chamber of Commerce has arranged with the State Manufacturers' Association for the release of employees in many of the large industrial plants for necessary farm work. The workers released will receive their regular wage from their employers, and the farmers using help of this kind will pay farm wages directly to the employers.

During the month of November, 1917, the Manitoba Mothers' Allowances Commission paid "salaries" amounting to $7,028 to 150 mothers without other support and with 516 children depending upon them, the average allowance to those living in the city of Winnipeg being $57.11 and to those outside of

Winnipeg, $37.13. The Commission has obtained the services of a woman investigator, whose duties also include instruction in scientific house management.

A large delegation of representative women from the cities of Vancouver, New Westminster and Victoria, recently waited upon the British Columbia Legislature to urge that a bill be introduced at the present session providing for mothers' pensions and that the new measure become operative this year.

A minimum wage bill designed to protect the lives, health and morals of women and minor workers in the District of Columbia, and to establish a minimum wage board to fix the minimum rates of wages in the district for women and minor workers, was introduced in Congress April 16. The bill has received two hearings before committees and has the strong support not only of the workers' organizations but also of the employers who will be most affected by its enactment.

It was announced recently that, beginning in April, wages for all common labour employed by the United States Steel Corporation and many independent steel mills throughout the country would be advanced 15 per cent. This is the sixth increase in the mills of the Steel Corporation since 1916, and makes an aggregate advance of 85 per cent since that year to this class of workers. The labourer under the new schedule will be paid at the rate of 38 cents an hour.

The plan for the settlement of all labour disputes in the war industries of the United States, submitted by the National War Labour Board in its report on March 29 (see *Labour Gazette* for May, page 365) has been approved by President Wilson, and while the programme has not the sanction of law, it has been announced as a national policy, and it is expected it will receive the hearty support of both workers and employers.

The United States Department of Labour has submitted a bill to Congress to provide housing accommodation in Washington for employees of the Federal Government engaged in war work. The bill sanctions an expenditure of $50,000,000 for the construction of houses for workers in industrial plants and authorizes a further expenditure of $10,000,000 to construct houses and hotels for the accommodation of Government clerks.

The German Reichstag has appropriated 500,000,000 marks for the construction of family barracks to provide shelter for families who cannot find houses. A member of the Reichstag states that there is a shortage of 750,000 small dwellings.

On March 24, the mediator appointed last December (Judge Samuel Alschuler) by the Federal Government of the United States to investigate the differences between the large Chicago packing houses and their employees submitted his findings. The report which creates a new minimum standard of living for labourers in the packing industry was read before a large assemblage of packing house officials and workers. It provides for a basic eight hour day with double time for Sundays and holidays. Substantial wage increases are granted and rates are to be the same for female as for male employees, and several minor points in dispute are satisfactorily dealt with.

The Lake Carriers' Association declined to be represented at a conference of marine workers, vessel owners and representatives of the United States Shipping Board to devise methods of meeting the demand for American sailors. The Lake Carriers control about 400 vessels on the Great Lakes. It has been suggested that their absence from the conference is in accord with their refusal to recognize organized labour.

Increases in teachers' salaries, amounting to more than $4,000,000 a year, have

been asked for in a report submitted to the Board of Education of New York City by the Teachers' Council. The report says that "the lure of better pay in other occupations demanding far less preparation and calling for much less exacting service has become so apparent that unless provision for better remuneration to teachers is immediately made there will be a steady and increasing diminution in the number of applicants for teaching service."

Records of the Vocational Branch of the Invalided Soldiers' Commission show that 4,031 returned soldiers were under instruction on March 1. Of this number 1,592 are taking re-educational courses because of disabilities which prevent them from resuming their pre-war occupations. The remaining 2,439 men are taking other vocational training work. In all 2,712 re-educational courses had been granted returned soldiers to March 1.

INDUSTRIAL CONDITIONS DURING MAY, 1918

I,—GENERAL REVIEW

The Labour Market

In the steel plants at the Sydneys, employment continued to improve; the conditions during May being better than in April and considerably better than in March. Machine shops and foundries generally were active throughout the country, more especially at the shipbuilding centres. Machinists, moulders, metal workers and blacksmiths were in demand at most places. Montreal was rather quiet in foundry work, but active in other lines, and some of the manufacturers proposed to extend their plants. Employment in locomotive works and railway shops was steady, while in automobile and carriage factories and agricultural implement plants much overtime was worked.

The shipbuilding yards in the Maritime Provinces were well employed. At Quebec, Sorel and Three Rivers, they were working overtime and in need of help. At Port Arthur, the shipyards employed over 1,400 men. On the West coast, boat building was very active, but shipbuilding was practically suspended owing to industrial conditions.

In the food group the sugar refinery at St. John was running steadily, while the refineries at Montreal were very busy. Owing to shortage of labour, the sugar company at Chatham imported some hundreds of Mexicans to work in the beet fields. The refinery at Vancouver was steadily employed. Workers in cereal mills were all well employed, and in some cases working overtime. The bakery and confectionery trades fell off slightly, owing to the restrictions of the Food Board. There was some demand for female help at the canneries in Ontario. Abattoirs and meat packing houses were active, but experienced some difficulty in getting supplies. Employment was very good in aerated water plants, but showed some falling off in breweries and cigar factories, although there was still some activity in these lines.

In the textile group, the woollen and cotton mills were well employed and were in many cases in need of additional help. There is at present, however, a shortage of wool, which, if it continues, will have a depressing effect on employment. Workers in hosiery and knitted underwear factories were very well employed and more female help was needed. Awnings and sail makers generally were busy. Garment workers were well employed throughout the country, and women workers were in demand. In steam laundries and dry cleaning establishments, employment was steady.

In the pulp and paper mills, employment continued to be good. Employ-

ment in both newspaper and job printing was good in the East and a scarcity of linotype operators and job compositors was reported; west of Winnipeg conditions were reported as fair, except at Vancouver, where job printing houses were very busy. Bookbinders were steadily employed and many of the paper box factories were in need of female help.

The sash, door and planing mills in the Maritime Provinces were very busy, but the Quebec mills reported a falling off in work. Employment generally was good in planing mills and furniture factories in Ontario and in the West, and some mills had difficulty in securing skilled labour. Piano factories were working full time.

In the leather group the tanneries were very well employed as a whole, but there was some slackness in tanneries at Quebec. Employment was good in the boot and shoe factories and the rubber plants were all busy.

Brickmakers were well employed at Toronto and Lethbridge, but slackness was reported from all other points. In clay, glass and stone, employment continued to be dull. In paint and varnish factories, employment was very good; chemical workers generally were active.

On the railways, employment was steady and the repair shops were very busy. On the Great Lake shipping was quiet owing to lack of steamers. 'Longshoremen were in demand at Halifax, Sydney, Montreal and Vancouver.

In metal mining, employment in the Cobalt area was good and more men were needed. Gold mining at Rossland came to a standstill. Coal miners in all the fields were very well employed and many more men were needed.

The lumbering industry showed activity in all its branches. Some of the sawmills were in full operation and working to capacity, while others reported a considerable shortage of labour. At Victoria, the industry continued to expand, thousands of men being taken on during the month.

Farm hands were generally in demand throughout the country. In British Columbia several hundred women and girls offered their services for the harvesting of fruit and other crops during the coming season. Applications from employers indicate that the full number will be employed.

In the building trades, employment was very good in Halifax and active in St. John, Fredericton and Hamilton. Montreal showed some improvement over previous months. At Ottawa, labourers were in demand. Winnipeg had enough employment for the labour available, but at all other points the building trades were very dull. Employment in the building trades, as indicated by the value of building permits issued in 35 cities, increased 59.9 per cent as compared with April and increased 26.2 per cent as compared with May, 1917. Reports from 16 cities, showing the number of civic employees temporarily engaged and the wages paid these employees during the first pay-roll period of two weeks of May, indicated a decrease of about 19 per cent in the number of workers, and an increase of nearly 2 per cent in the wages paid.

Strikes

The loss of time on account of industrial disputes during May, while greater than in April, was much less than in May, 1917. There were in existence at some time or other during the month 37 strikes, affecting 14,583 workpeople and involving a time loss of 104,861 working days; as compared with 15 strikes, 7,315 workpeople and 15,671 working days in April; and 39 strikes, 14,272 workpeople and 257,069 working days in May, 1917. On May 1, there were on record five strikes, affecting 439 workpeople. Thirty-two strikes were reported as commencing during May, as compared with nine strikes in April. Twenty-five of the strikes commencing during May, and two of those commencing prior to May, were reported terminated, leaving the following ten unterminated strikes, affecting 6,012 work-

people, on record at the end of May: plumbers and steamfitters, St. John; machinists, Montreal; boilermakers, Ottawa; metal polishers and buffers, Weston; moulders at Toronto and Hamilton; coal handlers at Ft. William and Port Arthur; labourers at Port Arthur; shipyard employees at Vancouver, New Westminster and Victoria; and machinists at Victoria.

Prices

In prices, the feature of the month was a general advance in meats throughout the Dominion; this advance was greatest in the western provinces. There were considerable decreases in potato prices in the Maritime Provinces. Dairy products were only slightly lower. Some grains were downward. The average cost of a family budget of staple foods in 58 cities was $12.66 at the middle of the month, as compared with $12.57 in April and $11.82 in May, 1917. In the Maritime Provinces there were decreases in the budget, but there were increases in the other provinces. The index number of wholesale prices was up to 275.8, as compared with 269.4 in April and 240.0 in May, 1917. The chief increases in wholesale prices appeared in livestock, meats, textiles, metals and hides, but there were slight increases in several of the groups.

II.—THE INDUSTRIES AND TRADES

Metals, machinery, conveyances

Sydney reported the production of the Dominion Steel Company for May, in tons, as follows: pig iron, 27,000; ingots, 32,000; billets and slabs, 26,000; rails, 18,000; merchant bars, 2,600; rods and nails, 1,600. At the Sydney Mines steel plant, production of iron was 8,800 tons, and steel 14,600 tons, as compared with 7,690 tons of iron and 10,500 tons of steel last month. At Halifax, the rolling mills, boiler shops, electrical apparatus and ship repairing plants were active, but with a shortage of skilled labour in all departments. Amherst reported metal working establishments working full time and shorthanded in many instances; the International Engineering Company received a large Government order that will keep the plant running full time for the greater part of the year. At Pugwash a new company known as the Cumberland Shipbuilding Company has been formed and work has already started on a vessel of some size. Westville reported that the steel plants worked steadily, but that one plant expects to close down in the near future. St. John reported the rolling mills working steadily, and also the galvanized iron and tin and sheet metal workers very busy with labour scarce, but shipbuilding seriously handicapped on account of the shortage of labour. Truro reported that the steel plants are working overtime. At Moncton the Government railway shops remained steady, and confined chiefly to repair and remodelling of rolling stock, and the local foundries were working steadily, and machine shops active. Newcastle reported shipbuilding plants active. Fredericton reported all branches of the machinery group active, particularly at the New Brunswick foundry and machine shops where many new hands have been taken on and where more are needed. Montreal reported general foundry work showed only a fair amount of activity for May, but general activity in other lines of metal manufacturing. Many orders from the American Government were reported, necessitating in some cases the enlarging of existing plants. Quebec reported boat and shipbuilding very busy; architectural iron works, machines and engineering shops very busy; stoves, furnaces, metal roofing and sheet iron work quiet. Sherbrooke reported architectural and structural iron and steel, stationary and portable engines and

boilers active, and, at St. Hyacinthe, the foundry, machine shops and automobile factories were well employed. Three Rivers reported foundries and machine shops and engineering companies working overtime, and also shipyards in great need of additional help. Sorel reported great activity in the shipbuilding yards, due to orders from the United States Government for the construction of steel and wooden ships. The foundries were also busy. Toronto reported that the engineering and boiler factories, shipbuilders, agricultural implements and automobile plants were all operating steadily, the supply of raw material having considerably improved. Structural steel manufacturers were somewhat quiet; the bicycle industry was busy, the demand for bicycles having lately shown a large increase, especially from Western Canada. The sheet metal, tool and hardware industries were active. At Niagara Falls, the foundries, automobile and metal can factories need both male and female help, skilled and unskilled. St. Catharines and Brockville reported metal manufacturing in all branches active. Ottawa reported foundries and machine shops busy and short of skilled labour. At Kingston, the locomotive company was very active. At Belleville, the rolling mills, foundries and machine shops and carriage manufacturing concerns were busy and good business was done in parts of automobiles and motorcycles. The Canadian General Electric Company at Peterborough was working overtime and the machine shops in general were very busy. Galt reported all branches of the metals group very busy, with a general shortage of mechanics of all kinds. At Brantford, the Waterous Engine Company was rather quiet, but other companies working on Government orders continued to be busy, while the carriage and wagon works were very busy. At Kitchener and Guelph, machinists were well employed, with a demand for moulders in several shops. At Stratford, the foundries and machine shops were active, but short of men, especially machinists and blacksmiths. At Woodstock, there was a demand for painters and ordinary labourers at the wagon factories. At London, the rolling mills were especially busy, but the manufacturing companies were held up by the shortage of raw material in both their stove and tinware departments, while all the plants engaged in Government contracts took on additional hands during the month. St. Thomas reported iron works engaged at full capacity. At Chatham, the various branches of the metal industries were active, but were having difficulty in securing material. The automobile factories were very active, turning out 30 machines daily. Canadian Bridge Works at Windsor were working overtime on Government contracts. At Owen Sound, the metal working establishments were active, though short of skilled labour and raw material, pig iron being very scarce. At Orillia, the stove factory reported an active demand, but great difficulty in getting moulders, toolmakers, etc. Girls are being used for some operations and are being paid $2 to $2.50 a day. Port Arthur reported a very busy month in the shipbuilding yards, over 1,400 men being employed. The car works at Fort William had over 1,000 men employed. At Winnipeg, the automobile industry reported business active, but the Ford plant, being ahead of orders, laid off their staff for one week. Brandon, Regina and Moose Jaw reported great activity in agricultural implements and in machine and repair shops. At Medicine Hat, the metal working industries, with the exception of those working on Government contracts, were rather quiet; the Alberta Rolling Mills closed down for a couple of weeks on account of fire, but subsequently reported business very brisk. Lethbridge and Calgary reported automobile and motor engine firms very busy, and cycle firms fully employed, and a shortage of machinists and blacksmiths. Vancouver reported stationary and portable engine works and boilermaking active, though interfered with to a certain extent by the shipbuilders' strike. Boat building and repairing were very active, but shipbuilding practically suspended owing to the strike.

Automobile business very busy, but stove and furnace plants quiet owing to difficulty of getting plates. Electrical equipment and sheet metal workers were active, and the tin can manufacturers very busy. At New Westminster, the shipyards were very dull, over 300 men being laid off during the month, with a further reduction expected. Machine shops were very busy and short of skilled labour. Victoria also reported the wooden shipbuilding yards laying off men, but it was expected that when labour troubles were disposed of the yards will again be active.

Foods, liquors and tobacco

Sydney reported the abattoirs, packing houses, baking and confectionery establishments busy. Halifax and Westville both reported that the aerated water and soft drinks establishments had had the busiest month in several years. At Westville, the flour mills were very active, but the feed and grinding mills were dull. At St. John, the flour and feed mills and the Atlantic Sugar Refinery were running steadily; baking and confectionery establishments reported business only fair owing to the restrictions placed upon the use of lard and sugar; creameries and dairies were active and aerated water and soft drink establishments reported business fair. At Moncton the flour and feed mill worked part time only, but the rest of the food industries reported business very brisk. At Newcastle, the flour mills were dull, but, at Fredericton, the flour mills and packing houses were steadily employed. At Montreal, the food establishments were all busy; sugar refineries were very busy, manufacturers of jam having received large orders from the British Government. Quebec reported the abattoirs active, but a falling off in the baking and confectionery trades due to the present restrictions on food. The aerated water and soft drink establishments reported a very busy month. At Sherbrooke, St. Hyacinthe and Three Rivers, the food groups reported business active. At Toronto, the flour, feed and cereal products had an active month; abattoirs and meat packing houses were working on large export orders, but found difficulty in securing sufficient stock to fill their contracts. The production of oleomargarine showed a considerable increase, amounting to about 60,000 pounds per day. The fruit canning industry was very busy and suffered from a shortage of female labour. Breweries and soft drink manufacturers were quiet, while the cigar manufacturers were laying off men preparatory to closing some of their plants for an indefinite period. St. Catharines, Brockville and Kingston all reported the food groups active. Belleville reported the flour and feed mills exceptionally busy, due to a great demand for feed. The cigar factory was very active during the month. Peterborough reported flour and feed mills very active; the new plant of the Quaker Oats Company having begun operations, were in need of help, both male and female. Galt and Brantford both reported the flour and feed mills very busy and working overtime, while the rest of the food groups were active. The Patterson Biscuit Company at Brantford have received a large order for biscuits from the Y.M.C.A. in France. The flour mills at Kitchener reported trade good, but the sugar factory was closed down. Wholesale meat and sausage factories were very busy; cigar factories were all running full time and short of cigarmakers, while the breweries were working full time both in Kitchener and Waterloo. Guelph and Stratford reported the flour and feed mills working to capacity, but soft drink establishments and breweries were quiet. The Tuckett Cigar Company at London have closed down their works, and cigarmaking in general was quiet. At St. Thomas and Chatham, flour mills were running full time, while the rest of the food groups reported business normal. The cereal company at Windsor reported business good. Creameries and dairies were exceptionally active, the cigar factories, though still busy, reported that business was falling off. At Owen Sound, the cigarmakers reported

business good, but experienced cigarmakers very scarce. At Winnipeg, the food groups reported business up to the average, but the canneries found it necessary to reduce their staffs owing to shortage of sugar. At Brandon, the mills, bakeries and creameries were all actively employed, but the cigarmakers and breweries were dull. At Regina, the flour mills were running day and night. The flour mills at Moose Jaw were running to full capacity, but the packing houses complained of a shortage of cattle, hogs and sheep. The baking trade at Lethbridge was very busy, a quantity of bread being sent out to outlying districts; the brewery was also very busy. At Calgary, the flour mills were running day and night, abattoir and packing houses were fully employed; breweries and distilleries reported trade good; cigar factories were dull. The Swift Canadian Packing House Company at Edmonton reported business fair. At Vancouver, the flour, feed and cereal mills were all busy, the aerated waters and soft drink manufactories were running at capacity, while the rest of the food groups reported business normal. A number of new factories were opened up in and around Vancouver for the manufacture of "dried products" for food, and a number of girls and women were engaged in the preparation and packing of vegetables, etc. At New Westminster, the evaporating plant was running to capacity, while cigar factories were fully employed for the first time for a long period; the breweries were running to full capacity. At Nanaimo, the breweries were running on a small scale, making the prescribed non-intoxicating drinks. At Victoria, the flour, feed and cereal mills reported business very active. The fruit and vegetable canneries were making preparations for putting up a record crop; cigarmakers and breweries reported business quiet.

Textiles, cordage and carpets

The Amherst woollen mills reported business good, but a difficulty in securing material. At Truro, the mattress factory was working to full capacity. At St. John, the Cornwall and York cotton mills reported a brisk demand; also that the installation of new machinery would increase their output. At Moncton, Humphrey's woollen mills and the Atlantic Underwear Company were both in active operation. The cotton mills at Montreal were fully employed, some of them having sufficient orders to keep them going throughout the year. Woollen manufacturers had plenty of orders on hand, but complained of the shortage of wool. At Quebec, the cotton mills, knitting and underwear factories were all very busy; the sail makers were also very busy. Sherbrooke reported the textile group as all being active. At St. Hyacinthe, the Penman Manufacturing Company worked day and night and were in need of labour. The Wabasso Cotton Company at Three Rivers ran full time with about 1,200 hands, but had employment for a few hundred more. At Toronto, the textile plants were in steady operation, with large orders on hand for woollens, underwear and knitted goods; tent and sail makers were active; carpet factories reported business good. At Galt the cotton and woollen mills were working overtime and advertising for help. The silk mill was also busy, while the bleaching and dyeing business was active. At Brantford and Kitchener, the textile groups were all active. At Guelph, the carpet mills were advertising for weavers. At Stratford, the woollen, hosiery and knitting factories reported a slight decrease in business, but nevertheless had a good month. At London, the Holeproof Hosiery and the Peerless Hosiery Companies were very busy, while the dyeing mills were active. At Owen Sound, the knitted

goods were active, but tent and awning manufacturers very quiet. At Orillia, the woollen factory was very much handicapped by the shortage of female labour; they cannot fill more than a third of the orders offered. At Winnipeg, the textile groups reported business normal. At Vancouver, the knitted goods factories were steadily employed, mainly on Government orders, but they reported yarn hard to obtain. Tent, awning and sail makers reported business very brisk, with a shortage of labour.

Clothing and laundering

At Halifax and St. John, the ready-made clothing establishments reported business good considering the high price of cloth; female help is in demand. At Moncton, the cap factory ran full time, while at Newcastle and Fredericton the clothing establishments were very busy and in need of help. Montreal reported ready-made clothing and shirt and collar factories did a fair business, while the manufacture of gloves was being very materially extended. Fur manufacturers reported business better than during May, 1917, and the waterproof clothing manufacturers reported this as the best year in their history. Quebec, Sherbrooke and St. Hyacinthe all reported ready-made clothing, and laundry, dyeing and cleaning establishments active. At Toronto, the ready-made clothing workers were well employed; women's garment workers were starting on fall work; the hat and cap trade was steady; whitewear operatives and laundry workers were active. Overall and glove factories were busy. Brockville and Kingston both reported business fair in the clothing group. Steam laundries, dyeing and cleaning establishments at Belleville had a busy month. At Peterborough, the women's whitewear factory was busy. At Brantford, the overall and shirt company and the Dominion Dress Company worked to full capacity, while the laundries and cleaning establishments reported a very busy month. At Kitchener, the shirt and collar, glove and whitewear factories were all in need of female help. The Dominion Twine factory worked some overtime. At Guelph, the whitewear factory was active, with a shortage of operators, and, at Brantford, ready-made clothing factories were busy. At London, the Green Swift Company reported wholesale trade in ready-made men's clothing to be only fair. The Peabody Overall Company at Windsor was very busy and in need of more female help. At Orillia, the ready-made clothing factories have almost been put out of business by the shortage of female labour, one firm closing up altogether for more than a week. At Winnipeg, the ready-made clothiers reported business for the month good; shirt and overall factories reported business fair, while in the laundries and dry cleaning establishments business was normal. At Regina the steam laundries were busy, a new laundry commenced business during the month and reported a fair amount of work, while, at Prince Albert, laundries were quiet. At Lethbridge, laundries and cleaning establishments were very busy, much work being received from outside points. At Edmonton, the Great Western Garment Company reported trade good, with some 250 employees fully engaged and an increasing demand for more help. At Vancouver, the shirt making industry was quiet, while laundries, dry cleaning and dyeing establishments were reported to be fairly busy. The ready-made clothing industry manufacturing men's garments and ladies' suits were reported as being exceptionally busy. At Nanaimo, the steam laundry was rather dull, owing to Chinese competition. At Victoria, the shirt and overall industries and steam laundries were all busy.

Pulp, paper and fibre

St. John reported the pulp mill running continuously. At Newcastle, the pulp and papermakers were very busy, and were in need of unskilled labour. Sherbrooke reported pulp and paper mills active. At Three Rivers, the Wayagamack Pulp and Paper Company were employing 700 men continuously and could have

used an additional 200 men, and, at Hull, the demand for pulp and paper was well maintained. At St. Catharines, the pulp, paper and beaverboard companies were well employed. At Ottawa, the new J. R. Booth sulphite mill was reported as not being in full operation. Owing to scarcity of logs in reserve, the full operation of their paper plant was not assured for this year. At Victoria, the pulp mills were working continuously.

Printing, publishing and paper

Sydney reported newspaper and job printing offices active. St. John and Halifax reported business good, but a scarcity of machine operators. Newcastle and Truro reported an exceptional amount of job printing done, but labour very scarce. Fredericton reported printing, publishing and bookbinding firms busy. Montreal reported employment was exceptionally good in newspaper and job printing plants, due to the number of enlistments for overseas service. The newspaper and publishing houses, and paper box factories in Quebec had a busy month. Sherbrooke and St. Hyacinthe printing firms and paper box factories were fairly busy. At Three Rivers, St. Johns and Iberville, newspapers and job printing establishments had plenty of work. At Toronto, printers, bookbinders, engravers and lithographers were all well employed. At Niagara Falls, the paper box and fibre basket factories were in need of female labour. At St. Catharines, Brockville and Kingston, job printers were well employed, while, at Belleville, the bookbinders were very busy during the month. At Galt and Brantford, the paper box factories and printing establishments were all very busy. Woodstock reported a shortage of linotype operators and job compositors. The paper box factories at Guelph and Stratford were very busy, while the job printers were only fairly well employed. At London, the job printing establishments reported work less than usual; the paper box companies were busy, but found difficulty in getting cardboard. St. Thomas reported printers very scarce, particularly machine operators; the job printers were very busy. At Windsor, the paper box manufacturers were busy and in need of female help. Owen Sound reported the printing and binding business very active in all departments. Winnipeg reported bookbinders and publishers very active, with a slight increase in the number of girls employed. The paper box factories reported business to be normal. Brandon and Regina reported job printing fair, while, in Prince Albert, a slight decline was reported. Medicine Hat and Lethbridge reported job printing as fair, but Calgary reported that job printing firms were fully employed. At Vancouver, the newspaper and job printing houses were employing all the printers available, but the bookbinding establishments were only moderately busy. Victoria reported paper box and bag industry well employed and business increasing rapidly.

Woodworking and furniture

At Halifax, the woodworking factories were very busy, with orders ahead for several months. Sydney reported sash, door and planing mills well employed, while at St. John they were working overtime. At Moncton, the output was not so great as last year. The Moncton cooperage firm also reported reduction in business. At Fredericton, the woodworking factories were very busy. At Quebec, the sash, door and planing mills reported a falling off in work, but that they were having difficulty in obtaining enough men for the work in hand, due to the demand for carpenters in the wooden shipbuilding yards. Sherbrooke reported the planing mills as very active and chair factories busy. At St. Hyacinthe, the wooden box factory and the chair and furniture factory were active, while the organ factory was fairly busy. In Toronto, the woodworking plants in all lines were active; the manufacture of gramaphone cases gave employment to a large number of hands, while piano firms were working full time. St. Catha-

rines and Kingston reported the various woodworking trades as being active, while at Brockville they were reported as fair. At Belleville, the sash, door and planing mills reported a busy month, but some difficulty in securing mechanics. At Peterborough and Galt, the planing mills were reported as very active, and some of them were advertising for help. At Kitchener, the piano and organ factories ran full time. Woodstock reported a demand for both skilled and unskilled labour in furniture and chair factories, and for skilled labour in piano and organ factories. At Guelph, the planing mills and piano factories were active. Stratford reported the planing mills and furniture and chair factories continued active, while broom makers, cooperage and stave workers were steadily employed. Sash, door and planing mills at Chatham reported business fair, but a shortage of stock. At Windsor, planing mills were dull, and the piano manufacturers not very busy. Owen Sound reported the wooden box and broom factories very busy and furniture and chair factories fairly active, but the planing mills quiet. At Orillia, the furniture factory was suffering from a shortage of labour. At Winnipeg, the sash, door and planing mills reported that business was not up to the average for the season of the year. Brandon, Regina and Prince Albert reported that the planing mills were all running full time. At Fernie, the planing mills were fairly well employed, while, at Vancouver, the woodworking industries were busy in all branches. At New Westminster, the wooden box factories were fully employed; one of the factories is making arrangements to enlarge its plant.

Leather, boots, shoes and rubber

At St. John, the Humphrey boot and shoe factory was running steadily, while at Fredericton the leather trade was reported as being in a flourishing condition. Montreal reported some improvement in the leather business and in the boot and shoe trade, but the local manufacturing activity was still rather dull. Jute goods were difficult to secure, because manufacturers found it hard to get raw materials. At Quebec, the tanneries were quiet, the variation in the prices of hides and leathers being given as the reason; the boot and shoe factories were reported as active. Sherbrooke reported the leather goods as fair, while, at St. Hyacinthe, the boot and shoe factories reported a slight decrease in business, though saddlers and other leather workers had a very active month. Three Rivers and Sorel reported business fair. At Toronto, the boot and shoe establishments and harness and horse goods manufacturers were active; the rubber plants were very busy. At Niagara Falls the shoe parts factory was very busy, and, at St. Catharines, the rubber factories continued to be active. At Brockville and Kingston, harness, belting, boots and shoes were reported as fair. At Peterborough and Galt, the boot and shoe business improved a little duing the month and some of the factories were in need of help. Brantford reported the Brandon Shoe Company very busy with another large war order. At Kitchener, both tanneries were running full time. Work at the boot and shoe factories was held up for 12 days by a strike, but are now reported as working full time. The rubber factories were fully employed and the Dominion Tire Company was still working overtime in several departments; the trunk and bag factories were also busy. At Woodstock, unskilled labour was in demand at the tanneries. At Stratford, the tannery and harness shops were well employed, and, at London, the tanneries and shoe companies were exceptionally busy. St. Thomas reported a scarcity of skilled shoe workers. At Windsor, the harness makers were quiet, but, at Orillia, the tannery was working to capacity. Brandon and Calgary reported the tanneries and trunks and horse goods manufacturers busy. At Vancouver the boot and shoe factories were very busy, and, at New Westminster, the tannery was fully employed.

St. John reported the cut stone and granite workers dull. At Moncton, the Humphrey glass factory, a newly established industry, was in active operation, employing about 25 hands. Quebec reported stone quarrying active. Sherbrooke reported cut stone, granite and brick yards quiet. At St. Hyacinthe, the stone and granite cutters were quiet, but the brick yards and lime kilns were active. Brickmakers at Toronto were busy. At Brockville, the brick and tile industries were quiet. At Kingston, the stonecutters and granite quarries were fairly well employed. At Belleville, the pottery was active in the manufacture of tiles and small pottery ware. At Brantford, the brickyards reported business slightly better than last month, and Stratford reported the brick and tile business well engaged. At Kitchener, the stone and granite cutters at the marble works were all busy. At London, the brickyards were at a standstill, there being no demand for bricks. At Windsor, business in cut stone, granite, lime, etc., was very quiet, and Owen Sound reported the cement works very dull. The brick plants at Brandon have been closed down. At Regina, business in cut stone and granite improved. Medicine Hat reported the brick and tile business somewhat improved, and Lethbridge reported brickmakers busy and in need of help. At Nanaimo, the brickyards were doing nothing.

Clay, glass and stone

Halifax reported the Brandram-Henderson paint factory running to capacity and in need of additional help. At Montreal, paint manufacturers reported the usual rush of business at this time of the year. Sherbrooke reported gunpowder active, and good business in acids, extracts, drugs and medicines. At Toronto, the paint manufacturers reported continued activity and increased orders for export. The chemical works were active, some of them engaged in new lines of manufacture to take the place of goods hitherto imported. At Niagara Falls, the cyanamid and graphite plants were busy, though short of male labour. At Brantford, the manufacturers of high grade varnishes were very active. At Windsor, the Standard Paint Company reported business good, but had difficulty in getting good materials. Winnipeg reported that business in oils and varnishes was not up to the average this season of the year. The oil refinery at Regina was running full time, and the soap works reported business fair. Vancouver reported the petroleum refinery running steadily, but the future outlook as uncertain, due to the announcement that the United States Fuel Board proposes to prohibit export of raw product to British Columbia. Lubricating products were greater in demand than in supply. Paint manufacturers reported business flourishing, and the soap works were running steadily. Nanaimo reported that the powder works within that district were running to capacity. At Victoria, the paint, varnish and soap factories were steadily employed, and the chemical and powder works were working to capacity.

Paints, oils chemicals, explosives

Earnings of the Canadian Pacific Railway during April were $13,328,848, as compared with $12,355,519 for the same month in the previous year. Halifax reported an increasing demand for 'longshoremen and freight handlers. Sydney reported steam and electric railways and railway repair shops active, with an increasing demand for 'longshoremen. At Halifax, the shortage of men interfered with the street railway service during the first part of the month. At St. John, the steam railways reported traffic lighter than usual at this season, owing to the withdrawal of some of the steamers of the Eastern Steamship Company. The street railway company had decided not to operate one of its summer lines, but in other respects it was doing business as usual. 'Longshore work was dull, due to the falling off in navigation. At Newcastle,

Railways, shipping and 'longshore work

the railway transport workers continued to be busy, while tug boat men and passenger steamer employees were in demand. Fredericton reported railway employees well employed. Montreal reported great activity in all departments of railway work, including the shops. 'Longshoremen were in great demand. Quebec reported steam railways busy, railway repair shops very busy, street railways active, but navigation and 'longshore work dull; garages very busy. Sherbrooke and St. Hyacinthe reported railway men well employed. Toronto reported steam and street railways active, while navigation was active during the latter part of the month; garages busy. Brockville reported steam railways active and navigation and 'longshore work fair, while at Kingston the 'longshoremen were well employed. Belleville reported that railway, passenger and freight traffic was brisk, but that navigation was rather dull, owing to lack of steamers. Peterborough reported very heavy traffic on both the Grand Trunk and Canadian Pacific Railways due to the increased navigation on the upper lakes. Stratford reported the railway workers, freight handlers and repair shop employees very active. Port Arthur and Fort William reported that shipping was quiet owing to the slow movement of grain. At Winnipeg, the street railway transportation business increased and a steady demand for help was reported. Brandon reported steam and street railways and railway repair shops active, and Prince Albert reported that the railways were busy. At Medicine Hat the Canadian Pacific Railway reported a scarcity of unskilled labour. At Lethbridge, the railway repair shops were fairly busy, but, at Calgary, they were fully employed. Fernie reported that there has been a slight increase in railway freight traffic during May, which was due to an increase in lumbering operations. At Vancouver, the steam and electric railways were normal, but navigation and 'longshore work was active. Victoria reported a steady improvement in coastal navigation.

Mining

Sherbrooke reported copper and asbestos mining in the district active; mill concentrators were active and the granite and gravel pits were also busy. The Cobalt mines during May produced about the usual amount of silver, but the scarcity of labour was making itself felt. During May a total of 53 cars, containing 4,084,150 pounds of ore were shipped, as compared with 34 cars, containing 2,320,661 pounds, in April. Bullion shipments were 690,762 ounces, as compared with 662,042 ounces in April. At Kirkland Lake, the Lake Shore gold mine produced on an average of about $1,500 daily. During April, the Alexo nickel mine at Porquois Junction shipped 13 cars, containing 1,089,200 pounds of nickel ore, as compared with 12 cars, containing 880,000 pounds, during March. At Rossland, the gold mines were closed down, releasing about 350 men for employment elsewhere. This was said to be due to high wages, increased cost of mining materials and taxation. At Trail, only one copper furnace was running, but the lead furnaces and refineries were operating as usual.

Sydney reported the output of the Dominion Coal Company as 293,000 tons against 290,000 tons in April. The output at Sydney Mines was 45,000 tons, compared with 40,500 tons last month. The coke output of the Dominion Company was 44,000 tons, with 545 ovens in operation, and of the Sydney Mines plant 9,300 tons, with 178 ovens in operation. Westville reported that the Drummond colliery worked full time during the month and raised about 17,000 tons; also that the Acadia Coal Company worked full time, though the reputed condition of the pits made it hard to procure men. Fredericton reported that the coal mines at Minto continued to increase their output. Lethbridge reported coal mining very active, with a constant demand for more miners. Calgary reported that the coal mines in the district were not as yet being worked to anything like their full capacity. Fernie reported continued activity in coal min-

ing and coke manufacturing; there were no unnecessary idle days during May. Nanaimo reported the coal mines in the district working full time, but were handicapped by the scarcity of both skilled and unskilled labour.

Building and Construction

Sydney reported that building work on dwellings and commercial buildings was rather dull. Halifax reported building very active. St. John reported that a considerable amount of building and repair work was carried on. At Moncton, the building trades were dull, owing to the high cost of all classes of material. At Fredericton, building tradesmen were well employed and skilled labour was in demand. At Montreal, the building contractors were busier in the latter part of May than they had been for some time. Quebec, Sherbrooke and St. Hyacinthe all reported business very quiet. At St. Johns and Iberville, the building tradesmen had to look for employment in other industries. Sorel reported building active and carpenters in demand. In Toronto, the building trade was quiet, being mainly confined to the erection of dwelling houses. Hamilton reported a large number of dwellings under construction, with a shortage of building labourers. Niagara Falls reported that at Welland several factory enlargements were projected. At St. Catharines, building was reported active, but at Brockville and Kingston it was quiet. At Belleville, there was some activity in the erection of dwelling houses, while at Peterborough building operations were more active than they have been for the past two years. At Galt, building was active, and many foundry extensions have been projected. At Brantford, building was reported as very active. At Windsor, the building trades were very quiet, and at Sault Ste. Marie a few cheap dwellings were being erected. At Winnipeg there was sufficient work in the building trades to use the available labour. Brandon reported many dwellings being built, but no public buildings. At Regina the building trades were fairly well employed. Vancouver reported a slight improvement in the building trades, but that it was still dull. New Westminster reported building at a standstill. The value of the building permits issued in 35 cities increased from $3,024,785 in April to $4,838,953 in May, or 59.9 per cent. As compared with May, 1917, there was an increase of $1,005,889, or 26.2 per cent.

Lumbering

Westville reported the lumbering industry extremely active. St. John reported that all the drives on the upper St. John river were in safe waters; the saw and shingle mills were running full time. The lumber mills at Newcastle were handicapped by shortage of labour, some of the mills had decided not to cut this year on that account. Stream driving was hampered by lack of sufficient water and many of the drives were checked and will not be brought into the booms until next spring. Forest fires caused some damage. At Fredericton, the river booms employed a large number of men, and the mills were working to capacity. At Montreal, the lumber firms were fairly busy working on orders from the United States. Quebec reported a very favourable season at log driving, the water not having risen too rapidly and its height having been maintained by heavy rains. Some of the sawmills in the district had already started their season's cut, but reported difficulty in obtaining men. Sherbrooke reported lumbering quiet and saw and shingle mills fairly busy. Lumbering operations at Peterborough were very brisk, all the mills having started cutting. Owen Sound reported sawmills idle as the supply of logs had not come in. Fort Arthur and Fort William reported a very busy month for river driving, the abundant rains having cleared the rivers and given the lumber camps a chance to get their logs down; many men joined the summer camps as tie makers. At Prince Albert, the lumber mills were operating by day and

night shifts. Calgary reported a constant demand for men in the lumber camps and sawmills. Fernie reported that the Olson camp of the Elk Lumber Company suffered considerable damage by fire. Vancouver reported lumbering very busy, with scarcity of skilled workers in all branches; wages paid were very high, in some cases $5 for semi-skilled, and $7.50 for skilled labour. Saw and shingle mills were running day and night. At New Westminster, the saw and shingle mills were very busy. Nanaimo reported logging camps and sawmills in the district were working to capacity and very short of men. At Victoria, the logging and lumbering industry continued to grow; thousands of men were employed last month cutting spruce timber in Northern British Columbia.

PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT DURING MAY, 1918

DURING the month of May the Department received reports from three Boards of Conciliation and Investigation which had been appointed to inquire into disputes affecting (1) the Sandwich, Windsor and Amherstburg Railway Company and its motormen and conductors; (2) the Canadian Collieries (Dunsmuir), Limited, and certain of its employees at Union Bay, B.C., and (3) the Hull Electric Company and its conductors, motormen and various other employees. In the first and third cases the findings of the Boards were declared acceptable to both the employers and employees; in the Canadian Collieries dispute a minority report was made by Mr. Naylor, the nominee of the employees, but information to hand at the end of the month did not indicate that any cessation of work occurred.

Ten applications for the establishment of Boards received attention during the month, details of which are given hereunder.

Applications Received

An application was received from the machinists, specialists, etc., in the employ of the Toronto Railway Company, members of the International Association of Machinists. The dispute involved wages, overtime rates and hours, and 25 employees were said to be directly affected and all other employees indirectly. After the application was received, direct negotiations were renewed looking to a working agreement. No agreement being reached, however, a Board was established, Mr. H. H. Dewart, K.C., Toronto, being appointed on the recommendation of the company, and Mr. Fred. Bancroft, of Toronto, on that of the employees. At the close of the month the chairmanship had not been filled.

An application was received from the employees of the Canadian Express Company, members of the Canadian Brotherhood of Railway Employees, for a Board to deal with a dispute resulting from the dismissal of certain employees and the removal of a messenger from the Edmonton-Prince George run. The number affected was given as 1,300. This application was the occasion of considerable correspondence. The situation disclosed at the end of the month was held not to justify the establishment of a Board.

An application for a Board was received from the motormen, conductors and barnmen of the London Street Railway Company, members of Local Division No. 741 of the Amalgamated Association of Street and Electric Railway Employees of America. The dispute resulted from a demand of the employees for the acceptance of certain amendments to a proposed schedule concerning wages, hours and working conditions. The Minister established a Board as follows: His Honour Judge L. B. C. Livingstone, Welland, chairman, appointed by

the Minister in the absence of any joint recommendation from the other Board members; Mr. F. H. McGuigan, Toronto, the company's nominee, and Mr. Chas. Ferguson, London, the employees' nominee. The number affected was given as 197.

An application was received regarding a dispute as to wages, hours and working conditions between the Goold, Shapley and Muir Company, Limited, of Brantford, and its employees engaged in the manufacture of munitions and farm implements. The application came from the employees, members of Local No. 607, International Association of Machinists, the number affected by the dispute being given as 49 directly and 115 indirectly. Mr. Fred. Bancroft, of Toronto, was appointed a member of the Board on the recommendation of the employees concerned, but further Board procedure became unnecessary, a settlement being effected by direct negotiations between the parties concerned.

An application was received from the leather workers, to the number of 101 directly and 100 indirectly, members of the Leather Workers Union, employed by Messrs. A. Davis and Sons, Limited, of Kingston, on certain war work. The dispute arose out of the alleged dismissal of an employee on account of his connection with the union, the employees demanding his reinstatement without loss of pay. A Board was established as follows: His Honour Judge R. D. Gunn, Ottawa, chairman, appointed by the Minister in the absence of a recommendation from the other two members of the Board; Mr. J. F. Whiting, Kingston, appointed on the recommendation of the company, and Mr. Tom Moore, Niagara Falls, on the recommendation of the employees.

An application was received from the civic employees of the Corporation of Winnipeg, members of Civic Employees Federation No. 4, for a Board to deal with a dispute growing out of a demand on the part of the employees for the acceptance of a proposed schedule involving increased wages. The employer in this case being a municipality, a Board could not be established only by the mutual consent of the parties concerned, and under Section 63 of the statute. The Corporation of Winnipeg agreed, however, to the reference of the dispute under the terms of the statute, and a Board was accordingly established as follows: Mr. F. N. Black, Winnipeg, chairman, and Messrs. James Auld and Rowland F. McWilliams, both of Winnipeg, nominees of the Corporation of Winnipeg and the employees, respectively. The chairman was appointed on the joint recommendation of the other members.

It may be remarked that the application was received at the time of much industrial unrest in Winnipeg consequent upon strikes which had been declared by civic employees, members of other organizations than Civic Employees Federation No. 4. An application was received by telegraph from the Corporation of Winnipeg for the establishment of a Board to deal with these various disputes, namely: (1) electrical workers, (2) waterworks employees, (3) teamsters and chauffeurs, and (4) firemen. This dispute also fell within the statute only by mutual consent of the parties concerned, and the employees not concurring no action could be taken. An inquiry before the Board in the matter of the dispute between the Corporation of Winnipeg and members of Civic Employees Federation No. 4 proceeded, but the report had not been received at the close of the month.

An application was received from the dining car employees running between Calgary and Vancouver on the Canadian Pacific Railway, members of the Canadian Brotherhood of Railway Employees, in connection with a dispute arising from the alleged dismissal of certain employees who were union members and their replacement by negroes, the number affected being given as 205 directly and 500 indirectly. A Board was established, and Messrs. A. E. James and V. R. Midgley, both of Vancouver, were apponted members thereof, the former by the Minister in the absence of a recommendation from the company, and the

latter on recommendation of the employees. At the close of the month the chairman had not been appointed.

An application was received from the motormen and conductors of the Brantford Municipal Railway Company, members of Local No. 685 of the Amalgamated Association of Street and Electric Railway Employees of America, the employees affected numbering 36. The dispute related mainly to a demand for increased wages. The employer being a municipality, a Board could be established in this case only by mutual consent of the parties, and while this point was under discussion the dispute was settled by direct negotiations between the parties.

The employees of the Vancouver Gas Company, engaged in the manufacture and distribution of gas, members of the International Brotherhood of Stationary Firemen, Oilers and Gas Workers, made application for a Board to deal with a dispute involving a demand for increased wages. The number affected was stated to be 65. At the close of the month the application was under consideration.

On May 31 an application was received from the civic employees of the City of Victoria, members of the Civic Employees Protective Association, in connection with a dispute affecting approximately 250, and having to do with a demand for increased wages. This application was under consideration at the close of the month.

Other Proceedings under Act

Reference is made in the May number of the *Labour Gazette* to an application in connection with a dispute between the Canadian Northern Express Company and its employees, members of the Canadian Brotherhood of Railroad Employees. The application grew out of a demand for the adoption by the company of a schedule providing for increased wages and improved working conditions, the number of employees affected being 315. A Board was established, Messrs. C. E. Dafoe and D. Campbell, both of Winnipeg, being appointed members thereof, on the recommendation of the employer and the employees respectively. Shortly after the close of the month the chairmanship was filled by the appointment by joint agreement of the Honourable Mr. Justice Mathers, of Winnipeg.

In the May issue of the *Labour Gazette,* mention is made of an application relating to a wages dispute between the Nicholas Chemical Company, Limited, and employees engaged in mining and stripping of ore at the company's mines at Goudreau, Ontario, to the number of 18, members of the International Brotherhood of Steam Shovel and Dredgemen. Further communications received in this matter indicated that direct negotiations promised to secure a settlement.

In the May issue of the *Labour Gazette,* reference is made to an application from the trackmen employed on the Pere Marquette Railroad lines in Canada, and to the appointment of Mr. J. G. O'Donaghue, Toronto, as a member of the Board which was established on the recommendation of the employees. During the month of May the Board was completed, His Honour Judge Dromgole, Sandwich, Ontario, being appointed to the chairmanship by the Minister in the absence of a joint recommendation from the other two members of the Board, and Mr. R. L. Brackin, a member on the recommendation of the company.

Report of Board in Dispute between the Sandwich, Windsor and Amherstburg Railway Company and its Motormen and Conductors

THE report of the Board of Conciliation and Investigation, to which had been referred certain differences between the Sandwich, Windsor and Amherstburg Railway Company and its motormen and conductors, members of Division 616 of the Amalgamated Association of Street and Electric Railway Employees of America, was received. The dispute was said to affect 80 employees and resulted from the latter's demand for the adoption by the company of a schedule providing for increased wages and improved working conditions. Subsequently word was received from one of the employees alleging that one of their number, Stanley Wardell, had been unjustly dismissed, and asking that this matter should be included in the Board's investigation. A Board was established by the Minister, Mr. Malcolm G. Campbell, Windsor, being appointed chairman on the joint recommendation of the other two members—Messrs. E. G. Henderson and F. C. Kirby, both of Windsor, who were appointed on recommendations received from the employer and employees respectively. The report of the Board was unanimous, and included an agreement signed by both parties concerned, all points in dispute being settled with the exception of that having reference to the dismissal of Stanley Wardell; it was decided that this last question was not within the jurisdiction of the Board.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Sandwich, Windsor and Amherstburg Railway Company, employer, and its employees, being motormen and conductors, members of Division No. 616, Amalgamated Association of Street and Electric Railway Employees of America, employees.

Windsor, Ont., April 30, 1918.

Sir,—

Your Board of Conciliation and Investigation in these matters beg leave to advise the Minister that the matters in dispute have been adjusted and reduced to agreement in writing, in triplicate, one original of which is enclosed herewith, signed by the manager of the company and by the representatives of the employees authorized to enter into the agreement by resolution of a general meeting of the employees, held April 22, 1918.

This disposes of all matters referred to your Board, except the dismissal of Stanley Wardell, which matter you have been pleased to withdraw from the Board by your telegram of April 20, 1918, for the reason that it is beyond the jurisdiction of the Board under Section 2, Sub-Section "E" of the Act, it being definitely disclosed to the Board that the cause of dismissal involves matters constituting an indictable offence.

The sessions of the Board were held April 3, 8, 9, 10, 11, 12, 15, 16, 17, 19, 20 and 22.

The Board has notified the employees and the company that it shall not proceed with the Wardell investigation for the reasons above stated.

We enclose herewith memo. of disbursements, etc.

We have the honour to be,
Sir,
Your obedient servants,

(Sgd.) M. G. CAMPBELL,
Chairman.
(Sgd.) ERNEST G. HENDERSON.
(Sgd.) FREDERICK E. KERBY.

The Hon. Thos. W. Crothers, K.C.,
Minister of Labour,
Ottawa, Ontario.

(NOTE.—It should be perhaps remarked with reference to the Wardell case that the reply made to the enquiry received by the Minister was not precisely in the nature of a direction to the Board and was not intended to be regarded as a direction, but rather as a statement of fact, the message in question, dated April 20, and signed by the registrar, being as follows "Your message received. Minister was of course unaware of cause of dismissal. If enquiry discloses cause to have been of nature you indicate, dismissal becomes a matter outside jurisdiction of Board. Situation is covered by Section two, paragraph E.")

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute btween the Sandwich, Windsor and Amherstburg Railway Company, employer, and its employees, being motormen and conductors, members of Division No. 616, Amalgamated Association of Street and Electric Railway Employees of America, employees.

At a general meeting of the motormen and conductors, employees of the S. W. & A. Railway, held at Windsor, Saturday evening, April 20, 1918, for the purpose of considering the adoption of the agreement submitted by the Board of Conciliation and Investigation constituted under the Industrial Disputes Investigation Act, 1907, it was resolved that the said agreement be ratified and adopted by the employees, and that Richard Burgess and Arthur Chenier, recording secretary, be delegated and appointed and fully accredited to sign the said agreement in triplicate, on behalf of the employees.

Dated at Windsor, this twenty-second day of April, 1918.

(Sgd.) RICHARD BURGESS.
(Sgd.) ARTHUR CHENIER,
Recording Secretary.

This agreement entered into in triplicate the twentieth day of April, A.D. 1918, between the Sandwich, Windsor and Amherstburg Railway Company, their successors and assigns, hereinafter called "the company," parties of the first part, and the motormen and conductors, employed by the said company, represented by the parties who sign this agreement, being their duly accredited representatives, hereinafter called "the employees," parties of the second part.

Witnesseth—1. That for the purpose of enabling harmonious operation of the company's system for the period hereinafter set out, the parties mutually agree that should any difference arise out of this agreement, or should any other matters arise which may not appear to be provided for in this agreement, the company's properly accredited officers shall at all reasonable times receive and give hearing to such officers and representatives which the employees shall nominate from their own number, regardless of the fact that such officers or representatives may be a member of a committee, or a member of Division 616 of the Amalgamated Association of Street Railway Employees of America.

2. That the day's work for all motormen and conductors shall be from nine (9) to ten (10) hours, to be completed within twelve (12) consecutive hours, so far as practical and possible. The runs to be as nearly equally divided as possible between two crews, to be known as early and late runs, and when practical to do so the present schedule shall be arranged to provide for this.

3. The company will not discriminate against any employee by reason of his being a member of Division 616, and any employees who are members of any committee of the employees, or are officers of any association of the employees, or delegates to conventions of street railway men, shall be entitled to leave of absence for the purpose of attending conventions or of doing such committee work without losing any privilege.

4. If any man is off duty during a "sign up" and cannot be present, someone appointed by him shall make choice for him and he shall work the run so chosen until the next "sign up."

5. Any employee against whom charges may be received will be required to report when off duty to the superintendent. His case will be considered by the proper officers and dealt with according to the rules and regulations of the company, but any employee against whom such charges are made shall have the right of appeal to the general manager or president and may bring with him any committee or delegation of his fellow employees as defined in Section 1, and if upon such investigation it is proven there was not sufficient cause for his suspension or dismissal, he shall be reinstated in his former position and paid for all time lost at schedule rate.

6. All cars shall be properly cleaned, oiled and equipped and fires laid by barn men at Windsor barns, prior to the car men taking out car for the run.

7. All cars shall be properly equipped with good brakes, fenders and modern sanders, as required by the provisions of the Ontario Railway Act.

8. The rate of wages to be paid shall be as follows for the motormen and conductors:

First six months	35c per hour,
Second six months	37c per hour,
Second year	38c per hour,
Third year and after	40c per hour,

and an additional allowance of 1 cent per hour, exclusive of overtime, shall be paid to all classes of conductors and motormen in lieu of uniforms. Caps and badges will be supplied free by the company and all men will be expected to be in suitable uniform clean and tidy when on duty.

9. No regular motorman or conductor after finishing his run shall be required to do extra work if there are competent extra men available, and the company will endeavour at all times to provide sufficient extra men so that the regular men will not be required to do extra work except when it is absolutely necessary. In such cases regular men will be paid 6 cents per hour extra. All motormen and conductors training students shall be allowed 40 cents per day extra for such work.

10. All spare men who have been notified and show up at the barn for work at 5.45 a.m., 11.00 a.m. and 4.00 p.m., and who fail to procure work, shall be paid no less than one (1) hour's time for each such attendance.

11. That all conductors and motormen shall have their respective positions on the Board in accordance with their seniority and that they shall be entitled to select runs according to their length of service with the railway in the following manner:

Schedule shall be posted (5) days before going into effect. Each motorman and conductor shall have the right to select his run thereon according to his continuous age in the service of the railway, and he shall thereafter hold the run thus selected until the next sign up. There shall be a sign up at each change of schedule, also about New Year's. Provided, however, that in the event of any vacancies, the first extra shall fill said vacancy for a period not to exceed five days, whereupon motormen and conductors being next in rank below such vacancy shall have the right to re-select their runs.

12. Men called up to do tripper work shall not receive less than one hour's time for each tripper they are required to operate. If the time required for run exceeds one hour then one and one-half hours shall be allowed, unless it exceeds one and a half hours and is under two hours, in which case two hours shall be allowed.

13. Claims for shortage against conductors shall be made within seven days after the date of said shortage and the claim for shortage shall be accompanied by the trip sheet of the day said shortage

occurred. Each conductor on cars equipped with Ohmer registers will, upon request, be shown the register reporting sheet for the day of said shortage.

14. That all bulletins, notices and rules not appearing in the book of rules of the said company shall be posted in the barns and office during the time they are in force and signed by the proper officials.

15. That there be placed in the office at the car barns an open book, said book to be dated three (3) days ahead, in which each man can register the particular day or days on which they wish to get off, and the men registering first for any particular day or days shall have first privilege, provided, however, that in case of officers and committeemen of the association having business for the association the station foreman shall make a special effort to release them.

16. All employees to be furnished with transportation over the company's lines.

17. Men who are required to go to either Amherstburg or Tecumseh to relieve men stationed there shall be paid for deadheading both ways.

18. Schedule freight cars that run daily shall be posted as regular runs.

19. That in the case of the schedule on the interurban lines becoming irregular, the despatcher shall remain in the office until the schedule is readjusted.

20. That the office of the car barns be supplied with tickets, change and stationery at all times and the main office to be open from 7.30 a.m. until 9.30 p.m.

21. Motormen shall not be used as conductors or vice versa except in case of absolute necessity.

22. That signals shall be placed at approaches of derail at Amherstburg and a light shall be placed at loop in Sandwich.

23. That a new and up-to-date rule book be provided.

24. That all new headlights installed shall have modern adjustable dimmers.

25. This agreement and the provisions hereof shall be deemed to be in force and binding on both parties as from the first day of April, 1918, and shall continue in force and be binding upon the respective parties hereto until the first day of April, 1919, and from year to year thereafter unless changed by the parties hereto.

Either party desiring a change in any section or sections of this agreement shall notify the other party in writing of the desired change or changes 30 days prior to the end of the year, which is the first day of April. In the event of such request, the agreement will be opened for the consideration of the change or changes requested. In the event that by conference an agreement does not obtain as to the said requested changes, the subject matter in dispute shall be submitted to arbitration in accordance with the law of the Dominion of Canada governing such disputes. In the event that no change is requested, this said contract to continue from year to year with the provisions that changes will be subject to the procedure as outlined for the first year.

In witness whereof the parties hereto have set their hands and seals, this twentieth day of April, A.D. 1918.

Sandwich, Windsor and Amherstburg Railway Co.:
(Sgd.) SIDNEY S. ANDERSON.

Signed on behalf of the employees:
(Sgd.) RICHARD BURGESS,
(Sgd.) ARTHUR CHENIER,
Their accredited representatives.

In the presence of:
(Sgd.) M. G. CAMPBELL.

On behalf of the employees:
(Sgd.) FREDERICK E. KEEBY.

Report of Board in Dispute between the Canadian Collieries (Dunsmuir), Limited, and certain Employees

THE report of the Board established in connection with the dispute between the Canadian Collieries (Dunsmuir), Limited, Union Bay, B.C., and certain of its employees was received. The report was signed by the chairman, the Honourable Mr. Justice D. M. Eberts, and Mr. Thomas R. Stockett, the employer's nominee. About 30 of the employees were directly affected by the dispute, which had to do with a demand for the payment for overtime. The Board did not concede the demand. A minority report was received from Mr. Naylor, the nominee of the employees.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Canadian Collieries (Dunsmuir), Limited, employers, and certain of its employees, being machinists, blacksmiths, moulders, carpenters and their helpers and outside labourers at Union Bay, B.C., employees.

To the Honourable T. W. Crothers, K.C.,
Minister of Labour,
Ottawa.

The Board of Conciliation and Investigation appointed herein under the provisions of the above mentioned Act, and composed of Joseph Naylor, of Cumberland, B.C., miner, representative of the employees; Thomas R. Stockett, M.E., of Vancouver, B.C., representative of the employers, and the Honourable Mr. Justice

David McEwen Eberts, appointed by the Minister of Labour in default under Section 8, subsection 4 of said Act, beg to report as follows:

The sittings of the Board were held at the school house, Union Bay, on the fourth and fifth of April. The employers were represented by Frank Sawford, the company's master mechanic, and Thomas Graham, their general superintendent, and the employees were represented by John William Hill, machinist, Edward H. Wilkinson, machinist, and A. C. Dunn, moulder.

The scope of the matter of the investigation asked for by the employees was that there might be "a resurrection of a system of paying overtime which was taken from them during the days of depression in 1914." At the ouset of the proceedings the chairman suggested the advisability of a further conference between all parties concerned with a view of arriving at a satisfactory understanding without an arbitration, and after some short discussion it was agreed to adjourn until 2 p.m. with the above object in view. At 2 p.m. Mr. Hill, one of the employees' representatives, reported that the boys had talked it over and had decided to let it go to the arbitration board. Mr. Graham, representing the employers, wished to have the scope of the Commission defined as it was never intended that the scope of the Commission included carpenters and moulders who had made no application for any change in their condition, nor was it to include outside labour, as time and a half and double time never existed as far as they (outside labour) were concerned. After some further discussion it was finally agreed that the scope of the arbitration should extend to the contention of the machinists, blacksmiths, boilermakers, moulders and car shop carpenters, all of whom belong to the shop, but did not include outside labour of any kind.

A short history of the case as it appears to us from the evidence placed before us is this:

The coal mines of the company are situated on Vancouver Island and are from 10 to 15 miles inland. The docks where all the coal from the mines is shipped are at Union Bay and the mechanical shops of the company have always been at Union Bay. The mines of the employers, the railway from them to Union Bay, the wharves and chutes and workshops at the latter place were purchased in November, 1910. At the time of the purchase the men in the machine shops of the employers at Union Bay were being paid time and a half for overtime until 10 oclock and double time after, and double time Sundays and holidays. Eventually there was friction caused in this way: It was often necessary to send men from the Union Bay shops to carry out repair work in conjunction with the local repair men at the mines (who were paid straight time) and the employers finally decided the only fair way to do was to drop the overtime rate of pay at the Union Bay shops so that all the men would be on the same basis, and a notice to that effect was posted and came into effect the first of December, 1914 (see Exhibit A), and this has been carried out since, except a concession (which has been in force since the first of December, 1914) to the effect that overwork on Saturdays was to be paid 8 hours work 9 hours pay, and on Sundays and holidays (the latter being Christmas Day, New Year's Day, May 24th (Victoria Day), First of July (Dominion Day), the pay for overtime was to be at the rate of 9 hours per day for 7 hours work, and the pay (if the men left the shops) to commence from the time of leaving till return to shops, including payment for meals while working away from the shops, and sleeping accommodation in case the work they were engaged on necessitated their absence from home for a night or nights, and transportation to and fro. In August, 1916, there was an increase in pay to the machinists, boilermakers and blacksmiths, but the rates were graded covering first class machinists and second class machinists, and similarly with boilermakers and blacksmiths. The first class machinists were advanced from 38 8/9ths cents per hour to 41⅔ cents—$3.75 per day; the boilermakers from 44 4/9ths cents to 47 29ths cents per hour=$4.25, and the blacksmiths the same. This advance was made without demand on the employers. In January, 1917, the employers added a war bonus of 5 per cent on the wages. In June, 1917, there was dissatisfaction in the car shops of the employers at Union Bay, and a demand made for increase in pay, and it was then agreed that the men in the shops at Union Bay should be paid the same as those in similar employment in Nanaimo, that is, those men who were working in shops operated in conjunction with the coal mines, as part and parcel of the mines. This seemingly has been carried out to the letter since, any advance in pay in shops at Nanaimo a similar advance was immediately made at Union Bay. By this arrangement the base for machinists was counted at 39 cents plus 10 per cent at Nanaimo, and at Union Bay shops the pay was made to compare with the Nanaimo scale of wages, Union Bay men thus getting 42 9/10ths plus the war bonus of 5 per cent=$4.04. In July, 1917, the base rate at Nanaimo was increased 2 cents and correspondingly Union Bay was increased the same. This additional rate of 2 cents at Nanaimo was granted in lieu of overtime and was accepted in Union Bay according to the agreement, in other words any change taking place in the shops at Nanaimo would automatically take effect in the shops at Union Bay. In December, 1917, there was a further war bonus given by the employers of 10 per cent, making in all by way of war bonus 25 per cent. At present the rate of wages paid to machinists is $3.69 base wage plus a war bonus of 25 per cent and the ten per cent of August, 1916, making together $4.98 per day (it may be here noted that while the Commission was sitting, an

advance of 50 cents a day was posted in Nanaimo to take effect on April 16, which automatically applies to shops at Union Bay, the daily pay now being $5.48). It was advanced with some force by the employers that employees at Union Bay have free water, and best coal at $2.50 a ton, with free transportation from the mines to Union Bay, a distance of 17 miles. It was strongly urged by the employees that the shops at Union Bay were custom shops instead of as contended by the employers "as shops in connection with and part of their coal mining operations." It did come out in evidence that from time to time a little outside work was done, but in analyzing it it will be found, we think, that any such work was done for persons in distress, and in the vicinity of their shops, which are a long way from regular custom shops at Vancouver and Victoria. This, we think, is the correct view, as the employers discountenance custom work of every kind as they have no way of recouping themselves for overtime as is done in regular in custom shops by an additional charge to the customer, and, in fact, the employers assert that the custom shop hires and discharges its employees with the fluctuation of work on hand, while their employees are steadily employed every day the year round, and while they admit that overtime is now asked for by the employees with a legacy that came to them in purchasing the mine they discontinued that mode of payment on the first of December, 1914, as it was a custom not allowed by any shop operating in connection with coal mines in British Columbia or any province in Canada nor in the United States.

The Board have not touched in this report on the question of the wages of the moulders as they are paid in a different way, their wage base being increased in keeping with the weight of metal produced, which appeared to be satisfactory to them from the remarks of their representative. It will be seen by the evidence that heretofore Christmas Day, New Year's Day, May 24 (Victoria Day), and July 1 (Dominion Day) were the holidays observed by the employers. At the meeting, Mr. Graham made the announcement that from then on Labour Day would be added to the list of holidays and observed by the employers.

The arbitration was carried out in a most friendly spirit, the men speaking most highly of the company and its officials. The employees appeared to be very satisfied with their environment.

The majority of the Board, after giving the whole of the matters placed before them their best consideration, have come to the conclusion that it would be inadvisable at the present time to report in favour of any change in the manner of pay to the employees, and regret exceedingly that they are unable to make their report unanimous.

Dated at Vancouver, B.C., the tenth day of May, A.D. 1918.

(Sgd.) D. M. EBERTS,
Chairman.

(Sgd.) THOS. R. STOCKETT.

Minority Report

Cumberland, B.C., June 4.

Mr. T. W. Crothers,
Minister of Labour.

Hon. Sir,—

Being compelled to make a minority report through my inability to agree with Mr. Eberts and Mr. Stockett, I hereby give my opinions in brief as to the reasons why I cannot agree with them. To be candid, I cannot agree with them in one instance—why these men should be turned down, for it seems to me that if they had had an impartial Board there was only one conclusion, for although they claim that overtime is not paid extra in the coal industry, it was proven without a doubt by "Exhibit A" that it had been paid for years in these shops where this controversy took place. It was also proven that the system of payment of overtime was taken away from these men in the days of depression in 1914, when there was no overtime being worked, and at a time when it was almost impossible for the men to get a job elsewhere. It was claimed by Mr. Sawford, a witness for the company, that the system of payment of this overtime was causing friction, but when I pressed him to name the individuals who were dissatisfied, he had to admit that the friction was between the officials of the company and not the men, and, furthermore, I have lived in this community for quite a number of years and been president of the local union for a few years and I have never been notified of this

friction, and where is a complaint most likely to be lodged, in a union hall or outside? There is no doubt left in my mind but that these men were taken advantage of at a time when they were economically bound. And, again, Mr. Sawford and Mr. Graham admitted they had paid overtime in the shape of putting in extra shifts to the men, and it is done to-day both inside and outside of the mines and every man engaged in the industry knows it, but the fact of the matter is they have an autocracy and intend to hold on to it. They don't want any recognized condition which gives to the employees the slightest privilege. They want to forever hold the bleeding lash above the backs of the workers. They want favourites who they can pay overtime, and others that they can ride roughshod over in any fashion. And in taking the evidence, Mr. Graham many times stated that this controversy had to be considered from conditions as they existed when this trouble commenced, but instead of us taking it from this position, Mr. Eberts and Mr. Stockett insist on harping on a 50 cents increase that the employees have received since this investigation started and which is not and cannot be a part of this controversy. For these reasons, firstly: Mr. Graham's stubbornness for the investigation to be taken on conditions as they existed when this trouble started; secondly: this 50 cents is in no way connected with an overtime basis. This controversy is not on a wage schedule, but a demand by the men to resurrect a system of payment that had been taken from them at a time when it was impossible for them to make an objection; thirdly: that if this 50 cents is taken into consideration, then their whole wages should be taken into consideration, and by doing this we find that their straight wages are away below Vancouver or Victoria, without bringing into consideration the loss of overtime; so where Mr. Eberts gets his decision from I don't know. And, again, Mr. Eberts and Mr. Stockett claim that these men received 2 cents per day on their base rate, when Mr. Graham clearly states in his evidence that he never mentioned overtime to these men when giving them this magnificent raise, but told them it was to bring their wages up to Nanaimo, and the men had not the slightest idea before this investigation opened that it was in lieu of overtime. And, again, at the present time the flat rate is $3.69 per day, while in Vancouver and other places the flat rate is $6.00 or over. These men are brought a little nearer the schedule by war bonuses, but not equal to their craftsmen in other places, and should the war cease to-morrow these men are liable to be struck down to $3.69, while in other places the wage will still be $6.00, besides their overtime, and putting these two items together it would leave the men at the shops at Union Bay 100 per cent below their fellow craftsmen in other places; and, taking the supposed concessions these men are receiving, it is This means that out of this about 20 tons per month are being transported for these men, and, according to Mr. Eberts, this needs great emphasis, and, furthermore, when this coal is only imaginary, for the water is entirely a natural thing, being taken from a creek that ran before there was any thought of the Canadian Collieries, but the company had to build a dam for their locomotives and other accessories to the plant, while the tenants did the other work, such as digging ditches and laying pipes, etc., etc. And I also maintain that the company loses nothing on the coal at $2.50 per ton, and Mr. Graham never showed, nor attempted to show, any proof of this. He just made an assertion, and I am sorry that just mere assertions should be taken in cases of such significance. There are 30 men in this controversy and great emphasis is being laid on transportation. Now there is not more than 20 of these men that are directly getting coal, and they are allowed one ton per month, or 12 tons per year, and this company is bringing down from 1,000 to 2,000 tons per day to the wharf. delivered it is $3.50 per ton and not $2.50; and these men are paying 14 cents a kilowatt for electric lights, the highest figure that I know of on this continent. And when this controversy opened the company claimed that these shops were repair shops, but when shown that they were construction shops as well they changed their argument along different channels and called them service shops; and, again, it was proven without a doubt that they did custom work as well, and it may be true that custom shops hire and discharge their men according to the fluctuations in trade, and so will the Canadian Collieries unless they have a value or a potential value. In submitting my minority report, I am exceedingly sorry that the Government was unfortunate in not appointing an impartial Board.

I remain,

Yours for true justice,

(Sgd.) JOE NAYLOR.

P.S.—I have had a meeting of the men and they unanimously turned down the decision and believe they have been treated extremely unfair.

Report of Board in Dispute between the Hull Electric Company and its Motormen, Conductors, etc.

A REPORT of the Board of Conciliation and Investigation appointed to deal with the dispute between the Hull Electric Company and various classes of its employees, being motormen, conductors, etc., numbering approximately 140, was received. The dispute grew out of the men's demand for increased wages, reduced hours and refund of charges made for repairs to cars as a result of accidents. The Board was composed as follows: His Honour Judge R. D. Gunn, Ottawa, chairman; Messrs. G. D. Kelley, Ottawa, and Fred. Bancroft, Toronto, nominees of the company and the employees respectively. The chairman was appointed by the Minister in the absence of a joint recommendation from the other two members. The report is signed by the chairman and Mr. Bancroft, and contains a schedule of proposed increase in wages, also recommendations of means by which the other matters in dispute may be overcome. A minority report was received from Mr. Kelley, the company's nominee. Word was received that both parties had accepted the majority award in this matter.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Hull Electric Railway Company, employer, and its Conductors and Motormen and various employees, employees.

To the Honourable
The Minister of Labour.

The Conciliation Board appointed by you to investigate this dispute have at a time and place agreed upon in the city of Hull been in session and were attended by Mr. Joseph Gibbons, Vice-President, Amalgamated Association of Electric Railway Employees of America, Mr. Joseph A. Noel, Chairman of Men's Committee and William A. Sutherland, Napoleon Seguin, Moses Renaud and Joseph Noel, members of Men's Committee, representing the employees, with Mr. Gordon Gale, Vice-President, and Mr. Meach, Superintedent of Company, representing the company.

It appeared and should be stated that there are one main line and two branches operated by the company as an electric railway, having the main terminal at or near the Chateau Laurier, with turn around points for main line at Queen's Park, Aylmer, P.Q., and for branches on Chelsea Road and for Belt Line at covering a total distance of thirty miles. There are about 140 men directly affected in the various employments as conductors, motormen, trackmen, switchmen, shop and substation employees, trolley and line men, station agent, and others. It is generally conceded that the holiday and Sunday traffic in season provides the most revenue producing results, while the ordinary or week-day traffic is subject to fluctuation and conditions exist that are not duplicated, and no other system gives a fair comparison on many of the subjects submitted to us.

There has been a very full and complete set of rules approved by the Board of Railway Commissioners for Canada in force for direction of the employees since A.D. 1913, and by agreement made about the same time rates of pay were fixed and remained in force until June, A.D. 1916, when a further agreement was made whereby the present rates of pay were put in effect until the 30th day of April, A.D. 1918, and in the result it appears that an advance equivalent to two cents per hour for the men paid by the hour and $5.00 per month for the men paid by the month was granted in June, 1916, and that is the only increase in rates since 1912 that has taken place.

It is not out of place to state here that the coaches, electrical equipment, power plant and substation, machinery, road and tracks, are all first class and up to date and demand a high degre of skill, efficiency and responsibility from the trained staff of employees. Nor have we overlooked the possibilities and earning power of the system.

The demand made by the employees requires an advance of sixty per cent in present rates of pay in all the various employments and the usual time and one-half for Sunday, holiday and all overtime work beyond a nine-hour per day basis, and some amendment to the working rules that carry increases in rates and provide betterment in working conditions and re-arrangement of the operating schedules that will give uniformity in working hours.

The Board have very carefully and exhaustively examined and investigated all the different demands of the men in presence of the parties above mentioned and have made every effort to obtain an adjustment of the differences in the dispute by negotiation that was reached on the running schedules, which we understand have been arranged to suit the employees.

The demands of the employees are based on the two well-known grounds: (1) rapidly increasing cost of living, and (2) rates for similar services in other company schedules operating electric railways, and many other fields of labour. The employees are all members of Division 591 of Amalgamated Association of Street and Electrical Railway Employees of America and are well-informed and have presented much evidence in support of their representations and claims.

The company in their answer practically admit or concede an increase of thirty-two per cent in the cost of iving since A.D. 1913, or the time when rates of pay were first fixed, but claim that a ten per cent increase, as before mentioned, was granted the employees in 1916, and represent that "the company might be asked to assume an additional expense represented by an increase of 11 per cent in wages and the employees 'carry on' with these additional wages and undergo some of the hardships which are being experienced and self-denials which are being made by our soldiers," and submitted as well many other arguments and representations in support of their opposition to serious or costly increases, all of which have been very carefully considered and weighed.

It is the opinion of the undersigned members of the Board after the most full deliberation upon and earnest analysis of the representations of the parties and all the other circumstances and contentions, that the claims of the employees that the present rates are inadequate and their demands for increased rates of pay are well founded, and we have concluded after reviewing all the circumstances that the rates set out in schedule "A" hereto be recommended as the rates of pay for the various employments mentioned and should be accepted by all concerned.

In view of the increase in rates recommended and for other reasons that are apparent to the parties, we are of te opinion that the overtime rates of time and one-half should only apply to such service rendered as the company requires from any employee in excess of his regular working hours as agreed upon by the parties and as at present in force.

The other amendments proposed carrying increased rates are not of such material importance to the employees that under present conditions we can recommend the adoption of any of them. To avoid disputes we respectfully suggest and recommend that the Superintendent or other officer of the company arrange so that the bundles of newspapers may be delivered to the conductor on the car if he is to be held responsible for their safe delivery at some convenient point and that the practice as to receipt and delivery of mail be continued without extra cost to the company.

We also recommend that the practice as to supply of uniforms as at present arranged be continued and that the men whose length of service entitled them to free uniforms be supplied with pants and overcoats for winter seasons without extra charge.

We also further consider that the demand made for a return of any moneys paid for damages to company's property by the employees is not a matter we can here further entertain. The amendment to the rules proposed by the employees to ensure justice in the investigation of complaints has been considered and we recommend the addition to the rules of the one following:

"That any employee charged with and suspended for any offence against the rules be furnished with a copy of the charge in writing and granted an investigation by the Superintendent promptly upon request, at which he may be represented by any two members of the Grievance Committee and if the charge be not sustained he be reinstated and paid for lost time, and all complaints of the employees be presented by the Committee, or a member thereof selected by them, to the Superintendent or other officer having authority to redress same."

It is our judgment that these recommendations be effective and remain in force for one year from the First day of May, 1918, and thereafter unless terminated by 30 days' previous notice given by the party desiring to change same.

Dated 25th May, A.D. 1918.

(Sgd.) FRED. BANCROFT,
For the employees.

(Sgd.) R. D. GUNN,
Chairman.

SCHEDULE "A" TO REPORT.

Freight crew—	per month
Motorman and conductor	$105.00
Brakeman	80.00
Trolleyman	75.00

Power plant employees—

	per month
Runners or operators	80.00
Oilers	65.00
Sub-station employees	80.00

	per hour
Trackmen	31 cents
Labourers	30 cents
Linemen	36 cents
Trolley linemen	33 cents

Car barn and shop men, among whom are truck repairers, carpenters, cleaners, blacksmiths, helpers, machinists, troublemen, air inspectors, apprentices, and metermen—a general increase per hour of 10 cents.

Conductors and motormen—

First six months,	per hour	29 cents
Second six months,	per hour	31 cents
Second year men,	per hour	34 cents
Third year men,	per hour	36 cents

Snow plow and sweeper work,	per hour	39 cents
Flagmen or switchmen,	per day	$2.25
Aylmer station agent,	per month	110.00

Minority Report

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Hull Electric Railway Company, employer, and its Conductors and Motormen and various employees, employees.

To the Honourable,
The Minister of Labour.

I regret that I cannot concur in the finding of the other members of the Conciliation Board appointed to deal with the above dispute. Careful consideration of the evidence submitted and of the possibilities and the earning power of the Hull Electric Railway Company forces me to the conclusion that the wage increases recommended by the other members of the Conciliation Board are not justified.

In Schedule "A" I have set out the wage list that I believe would be fair to all parties concerned and I have attached thereto explanatory remarks.

I would suggest that the following amendment to the rules governing the operations of the road be made so that the employees may feel they are in a position to have any grievances fully inquired into:

"That any employee charged with and suspended for any offence against the rules be furnished wiht a copy of the charge in writing and granted an investigation by the Superintendent promptly upon request within three days of delivery of copy of charge at which he may be represented by any two employees he selects, and if the charge be not sustained be reinstated and paid for lost time, and all complaints of the employees be presented by such employee or employees as may be selected by them, to the Superintendent or other officer having authority to redress same."

It should be borne in mind in dealing with wages from the Hull Electric Railway Company that cost of living in the City of Ottawa is considerably higher than in the Town of Aylmer, the Village of Deschesnes or even in the vicinity of Hull, the employees of the Hull Electric Railway Company residing principally in these three last mentioned places. Wages paid in Ottawa have therefore in the past always been on a higher scale than those paid in Hull and the villages along the line of the Hull Electric Railway.

In my judgment, the recommendation that I have made should remain in force for two years from the first day of May, 1918, and thereafter from year to year unless terminated by thirty days previous notice given by the party desiring to change the same.

Dated June 4th, 1918.

(Sgd.) G. D. KELLEY,
Member of Conciliation Board.

SCHEDULE "A" TO REPORT.

Freight crew—

	per month
Motormen and conductor	$95.00
Brakemen	75.00
Trolleyman	70.00

Power plant employees—

	per month
Runners or operators	75.00
Oilers	60.00
Sub-station employees	75.00

Trackmen and labourers—

I do not believe that it is possible to fix a definite rate per hour for trackmen and labourers. Works of considerable magnitude have just commenced in the vicinity of Hull, and these works being of national importance, are being rushed to completion, resulting in much higher wages being paid than would ordinarily be the case. For the time being this has upset the local labour market. When these works are completed, which is a matter of but a few months, no doubt normal conditions will again prevail.

To bind the Hull Electric Railway Company to pay a rate of wages now being paid under such special circumstances to men capable of performing duties to be performed by labourmen and trackmen would be unfair.

Car barn and shopmen—

No evidence was submitted on behalf of these men as to the duties performed by them in the car barn and shops of the Hull Electric Railway Co. The company, however, submitted a statement showing the duties of each man, his rate of wages, and submitted a statement showing the current rates of wages which were being paid in the vicinity to men in similar occupations.

According to the statement submitted by the company, but a very few men so employed are skilled workmen and wages run from 15c to 16c per hour for apprentices to 34c per hour for skilled men. An increase of 10c per hour to a boy apprentice would be entirely disproportionate. Considering the likely increase in the cost of living and having regard to the agreement herein continuing for two years, I would recommend an increase to car barn and shopmen of 15 per cent.

Conductors and motormen—

First year,	per hour	26c
Second year,	per hour	28c
Third year,	per hour	30c
Fourth year,	per hour	32c

Having regard to the position of the Hull Electric Railway Company, and considering different railways occupying a like or similar position, the above rates would include a justifiable increase. The wages of motormen and conductors employed by the Hull Electric Railway Company in the past have been higher than a number of other roads operated in Canada under somewhat similar conditions, as shown by statements submitted by the Hull Electric Railway Company.

Local conditions have been carefully considered in arriving at the above figures. The operation of the line of the Hull Electric Railway Company differs from that of a company operated within a large and populous city. According to the evidence submitted on behalf of the company, and not seriously contradicted, about 80 per cent of the men now in the employ of the Hull Electric Railway Company are men in fourth year class.

Snow plow and sweeper work—
Two cents increase over ordinary hour pay.

Flagmen and switchmen—

I see no reason for increase herein. The duties performed are exceptionally light, consisting of a fractional part of a day. The positions are given to men who have passed the prime of life and cannot engage in ordinary pursuits owing to some physical defects, disability, etc.

Aylmer station agent—

No mention was made of this position at the hearing and no evidence given in regard to the duties performed, remuneration paid or otherwise.

I am at a loss to deal with the situation existing.

I do not know how the other members of the Board arrive at the amount fixed herein as I had not the benefit of their views on the subject.

(Sgd.) G. D. KELLEY,
Member of Conciliation Board.

INDUSTRIAL DISPUTES DURING MAY, 1918

THIRTY-TWO strikes affecting 14,144 employees were reported as having commenced during May. There were in existence at some time or other during the month 37 strikes directly affecting 14,583 workpeople. The total time loss on account of industrial disputes was estimated at 104,861 working days as compared with 15,671 in April and 257,069 in May, 1917. The time loss occasioned by the 32 strikes which began in May was 101,297 working days, while a loss of 3,564 days is charged to the five strikes commencing prior to May. Termination of dispute was reported in the case of two of the disputes commencing prior to May. Twenty-five of the disputes commencing during May terminated during the month, leaving the ten following unsettled disputes, affecting 6,012 workpeople, on record May 31: plumbers and steamfitters, St. John; metal polishers and buffers, Weston; machinists, Montreal; boilermakers, Ottawa; moulders at Toronto; moulders at Hamilton; coal handlers, Port Arthur and Fort William; labourers at Port Arthur; shipyard employees at Vancouver, New Westminster and Victoria, and machinists at Victoria.

INDUSTRIAL DISPUTES, MAY, 1918

Industry or occupation	Particulars	Number of employees affected	Time loss in working days
	DISPUTES COMMENCING PRIOR TO MAY, 1918		
BUILDING AND CONSTRUCTION— Plumbers and steamfitters, St. John, N.B.	Commenced April 23, 1917. Demand for increased wages. Unterminated.	11	286
METALS, MACHINERY AND CONVEYANCES— Metal polishers and buffers, Weston, Ont.	Commenced February 12, 1918. Against a reduction in wages. Unterminated.	33	858
Machinists, Montreal	Commenced March 23. Demand for increased wages and nine-hour day. Unterminated.	45	1,170
CLOTHING— Moccasin stitchers, Toronto	Commenced April 25. Demand for increased wages and shorter hours. Increased wages and shorter hours granted following negotiations. Work resumed May 2.	50	50
MUNICIPAL EMPLOYMENT— Civic employees, Vancouver	Commenced April 27. Demand for increased wages. Increased wages granted. Work resumed May 6.	300	1,200

INDUSTRIAL DISPUTES, MAY, 1918

Industry or occupation	Particulars	Number of employees affected	Time loss in working days
	DISPUTES COMMENCING DURING MAY, 1918.		
BUILDING AND CONSTRUCTION—			
Carpenters, Moose Jaw	Commenced May 1. Demand for increased wages and shorter hours. Increased wages and shorter hours granted following negotiations. Work resumed May 4.	70	210
Granite cutters, Montreal	Commenced May 1. Demand for increased wages. Increased wages granted and work resumed May 27.	35	635
Carpenters, Regina	Commenced May 1. Demand for increased wages. Increased wages granted. Work resumed May 17.	12	168
Carpenters, painters and labourers, Guelph	Commenced May 28. Demanded time and one half for time worked in excess of eight hours. Work resumed May 31 pending investigation.	40	115
Labourers, Port Arthur	Commenced May 29. Demand for increased wages. Unterminated.	50	125
METALS, MACHINERY AND CONVEYANCES—			
Machinists, Victoria	Commenced May 1. Demand for increased wages. Unterminated	180	4,680
Munition workers, Owen Sound	Commenced May 2. Demand for weekly payment of wages. Following negotiations employees accepted company's offer providing for payment of wages every two weeks, with privilege of drawing on wages earned. Work resumed May 9.	115	632
Moulders, Toronto	Commenced May 4. Demand for increased wages. Unterminated.	340	7,480
Moulders, Hamilton	Commenced May 5. Demand for increased wages. Unterminated	200	4,200
Sheet metal workers, Toronto	Commenced May 7. Demand for increased wages. Following negotiations increased wages granted. Work resumed May 22.	150	1,950
Shipyard employees, Ft. William	Commenced May 8. Protested proposed removal of shipbuilding material to another location. Work resumed May 10. following decision to continue construction at Ft. William	240	240
Ship carpenters, Montreal	Commenced May 15. Demand for increased wages. Work resumed May 28 under conditions prevailing prior to strike.	250	2,500
Boilermakers, Ottawa	Commenced May 23. Demand for increased wages. Unterminated	53	403
Shipyard employees (Vancouver, New Westminster, Victoria	Commenced May 23. Demand for increased wages and 44-hour week. Unterminated.	4,800	33,600
Stationary engineers, Winnipeg, Man	Commenced May 22. Ceased work in sympathy with civic employees. Work resumed May 27.	140	420
Machinists, Winnipeg, Man	Commenced May 24. Ceased work in sympathy with civic employees. Work resumed May 25.	150	450
WOODWORKING—			
Woodworkers, Alexandria	Commenced May 22. Demand for increased wages. Increased wages granted following negotiations. Work resumed May 27.	38	152
CLOTHING—			
Felt shoe workers, Kitchener	Commenced May 1. Demand recognition of union. Company rejected demands. Majority of employees returned to work May 8, under same conditions as prevailed before strike.	52	312
FOODS, TOBACCO AND LIQUOR—			
Brewery workers, Winnipeg	Commenced May 24. Ceased work in sympathy with civic employees. Work resumed May 27	150	450
TRANSPORTATION—			
Railway shopmen, Canadian Pacific Railway, Canadian Northern Railway, Winnipeg and	Commenced May 21. Ceased work in sympathy with civic employees. Work resumed May 27.	2,148	10,740
Railway carmen, Canadian Pacific Railway, Canadian Northern Railway, Winnipeg,	Commenced May 22. Ceased work in sympathy with civic employees. Work resumed May 27.	1,800	7,200
Freight handlers, T. H. & B. Railway, Hamilton	Commenced May 1. Demand for increased wages. Work resumed May 2 pending adjustment.	40	40
Freight handlers, Canadian Pacific Railway, Fort William	Commenced May 10. Demand for increased wages. Increased wages granted and work resumed May 21.	344	3,440
Freight handlers, Canadian Pacific Railway, Canadian Northern Railway, Winnipeg	Commenced May 18. Ceased work in sympathy with cartage teamsters. Work resumed May 31.	250	3,097
Railway storemen, Canadian Pacific Railway	Commenced May 22. Ceased work in sympathy with civic employees. Work resumed May 27.	160	640
Cartage teamsters, Winnipeg Man	Commenced May 17. Demand for increased wages. Increased wages granted. Work resumed May 30.	170	1,870
Coal handlers, Port Arthur and Ft. William	Commenced May 27. Demand for increased wages. Unterminated	300	1,500
Electric Railway employees, Winnipeg	Commenced May 22. Ceased work in sympathy with civic employees. Work resumed May 25.	910	3,180
PUBLIC UTILITIES—			
Electrical workers, London	Commenced May 1. Demand for increased wages. Increased wages granted and work resumed May 7.	11	55
Telephone operators, Winnipeg, Man	Commenced May 16. Ceased work in sympathy with civic employees. Work resumed May 27.	567	5,103
MUNICIPAL EMPLOYMENT—			
Civic employees, Employees Light and Power Dept., Works Dept. and teamsters	Commenced May 2. Demand for increased wages. Settlement effected through mediation, Department of Labour. Increased wages granted. Work resumed May 27.	201	3,930
Civic firemen, Winnipeg	Commenced May 14. Demand for increased wages and recognition of union. Settlement effected through mediation, Department of Labour. Increased wages and modified demand for recognition of union granted. Work resumed May 25.	178	1,780

SETTLEMENT OF WAGES DIFFICULTIES IN B.C. SHIPYARDS

IN earlier issues of the *Labour Gazette* (see *Labour Gazette,* April, 1918, p. 231, and May, 1918, p. 310) reference was made to friction which had arisen over the wage question in British Columbia shipyards and machine shops and to the appointment of a Commission to look into the same. The Commission has since made a report, which while signed by all members, is stated to be the work of the chairman, Hon. Mr. Justice Murphy, who assumes responsibility for it, and states that throughout the report the words "the Commission" are used for convenience in phraseology. The attitude of the other members of the Commission in regard to the various points is noted with each question discussed.

The report states the Commission assumed two functions (1) to give decisions on the various points in controversy, and (2) to make recommendations with a view of stabilizing labour conditions in the shipbuilding industry in British Columbia for the period of the war. The decisions, as distinguished from the recommendations (it is stated) "are founded on the evidence and exhibits and are not to be taken as expressing the views of the Commission on the points decided as to what would be fair and just if the Commission were a Conciliation Board and not a Board of Inquiry."

The Questions at Issue

After stating the purposes for which the Commission was appointed and reviewing the shipbuilding industry in British Columbia and the relation of the shipbuilding firms and machine shops to the Imperial Munitions Board, for which Board most of the shipbuilding was under construction, the report points out that organized labour, through the Metal Trades Council of Victoria and Vancouver, put four demands before the Commission, namely:

1. That they were entitled to an all-round 10 per cent increase in the wages then being paid in wooden and steel shipyards.
2. That the differentiation in pay which existed in the yards as between men classed as house carpenters and those classed as shipwrights was unjust and should be abolished.
3. That ordinary labourers should be paid $4 a day.
4. That an agreement should be entered into between the Imperial Munitions Board and organized labour.

In addition to these specific questions, other matters put before the Board were: (1) the question of the shortage of caulkers and the attitude of the Caulkers' Union in regard thereto, (2) the efficiency of organized labour, (3) as to whether the night shift should receive an increase over the rates paid the day shift, and (4) as to the position of the machine shops which had contracts to supply material to the shipyards in the event of wages being increased.

The Board's Decisions and Recommendations

After a lengthy review of the circumstances leading up to the men's demands and to the evidence taken before the Commission, the report finds:

"That the men in the wooden shipyards are entitled to the 10 per cent increase demanded, retroactive from February 1, provided they are willing to work 48 hours a week on straight time in all yards except during June, July and August," and provided that they accepted the ruling as to carpenters and the wage rate for labourers contained in the Macey award. (The award thus referred to is the decision given by the United States Wage Adjustment Board

—sometimes called the Macey Board, from the name of the chairman—which fixed the rates to be paid all classes of labour in the shipbuilding districts of the United States Pacific coast. Under this decision the rate for carpenters was to be $6 per day for those men who had worked three continuous months at house carpenters' rates, which meant that all house carpenters should serve three months in the shipyards at the rate of $4.50 per day before being entitled to the $6 rate. The Macey award fixed labourers' wages at $3.25 per day.)

To this finding of the Commission, Mr. Tonkin, the commissioner identified with the shipbuilding interests, dissented, and Mr. Kelly, the commissioner identified with the labour interests, while agreeing that on the evidence the chairman was right, stated he would submit recommendations in regard to the hours.

In regard to the 10 per cent increase in the iron shipyards, the Commission found that in the case of the Coughlan yards there were three fair courses which should have been taken by the men: (1) to abide by the existing contract until it lapsed by effluxion of time on August 1, (2) to open it up by giving 15 days' notice required by the agreement, and (3) to apply to the Imperial Munitions Board at Ottawa to fix a new wage scale under the clause in the contract which makes the decision of the Board an operative factor in fixing wages. The Commission submitted, however, that "the Coughlan firm have a moral claim to be fairly treated, which means that they should be allowed a fair profit on their operations in so far exclusively as such profit would be impaired by the granting of this 10 per cent increase." The Commission recommended that if the 10 per cent increase were put into effect in the Coughlan yards it should be put in force at the Wallace yards and that the Imperial Munitions Board should favourably consider any application for relief on the part of this firm on thorough accounting as to curtailment of profits owing to the forced adoption of the new scale. While finding that the men were not entitled to the increase from February 1, the Commission recommended that the matter of back pay should not be an obstacle in the way of establishing industrial peace. Mr. Kelly agreed with the conclusions of the Commission on the question, but was of opinion that the Coughlan firm should have informed the men when they made the demand for the 10 per cent increase that under the contract they should have applied to the Imperial Munitions Board at Ottawa and that the Coughlan firm should have informed the Imperial Munitions Board at Ottawa of the demand, and should have told the men they would do so. He also stated he would make a recommended as to hours as in the case of the wooden shipyards. Mr. Tonkin dissented.

While referring to the 10 per cent increase as dependent on the acceptance of the Macey decision as to carpenters and labourers, the Commission recommended that carpenters doing shipwright's work in shipyards should receive the minimum rate for shipwrights ($6 per day) and that the 50 cents per day which had been deducted from some of the carpenters' pay by some yards following advice of the Macey Board's decision on the question should be refunded. Mr. Tonkin assented to the refunding of 50 cents per day to these carpenters, but dissented from the main body of the finding. Mr. Kelly assented. The Commission also recommended that common labour be paid a rate of $3.85 per day of eight hours, and that it should be based on the acceptance of the 48 hour week. Mr. Kelly agreed as to the rate; Mr. Tonkin, while dissenting, recommended $3.60 per day.

The demand of the Metal Trades Council that the Imperial Munitions Board should enter into an agreement with organized labour was refused, as in the Commission's opinion the agreement called for a closed shop and as the money contributed to the munitions industry was raised by taxes on the people of Canada generally there should be no in-

terference with the right of any individual to obtain employment. Mr. Tonkin agreed, but Mr. Kelly dissented.

All members of the Commission were agreed that the situation in regard to the caulkers was a regrettable one, it being found that on the evidence the caulkers' organization as a body distinct from the Metal Trades Council, had sought to unduly impede the efforts of the employers to remedy the shortage of caulkers either by the training of apprentices or the establishment of schools to teach caulking. It was considered regrettable, however, that certain negotiations, which had taken place at the outset of difficulties between the Caulkers' Union and the representative in British Columbia of the Imperial Munitions Board in which the union proposed to increase the number of apprentices, had not been pressed to a definite conclusion.

On the question of an additional 10 per cent to the night shift, the Commission found the men were entitled to it, but suggested that where three shifts were worked an additional 5 per cent be paid to the second and third shifts on the understanding that the shifts were changed every two weeks, and, failing the swinging of the shifts, that they be paid 10 per cent above the day shift.

All members of the Commission were agreed that the efficiency of organized labour in the shipyards was fully equal to that in any yard on the coast, the Commission, however, holding that there must be a fair day's work for a fair day's pay and a full day's work for a full day's pay.

While the Commission pointed out there was no obligation on the part of the Imperial Munitions Board to reimburse contract shops for added costs in consequence of the 10 per cent increase, it recommended that the Imperial Munitions Board "should favourably consider any application made by these firms to it for relief" in the event of the increase going into effect. Mr. Kelly concurred, and Mr. Tonkin, although holding against the increase, was of opinion that if the Dominion Government put the increased rates into effect in the shipyards, there was a strong moral obligation on the part of the Government to pay the increased labour costs to outside shops who had based their contracts on the lower rate.

The Commission also made the following suggestions supplementary to the foregoing:

That a Dominion Government Wage Adjustment Board be appointed to deal with the shipbuilding industry in its relation to labour, composed of one representative nominated by the contractors, one by organized labour and the third, the chairman, by the Dominion Government.

That all restrictions against what is termed unfair material should be eliminated with the qualification that where fair material were obtainable in British Columbia, other things being equal, it should be purchased there.

That agreements be entered into for the duration of the war.

That the question of open or closed shops be left to the negotiations of each party to the agreements.

That full freedom be given to the employer to take men from the ranks of labour to train them as mechanics, and that these men be graded and paid according to ability.

That the question of new grades of labour with corresponding increases be dealt with by the proposed wages adjustment board.

That agreements contain the usual clauses as to the settlement of disputes and grievances, and, failing a settlement between the parties, that the matters be referred to the proposed wages adjustment board and no strike or lockout take place until this board, after a public hearing, hands down a decision.

Settlement of Dispute

Following the Board's report, which was handed out April 23, the Metal Trades Association held a number of meetings and finally took a ballot of the

unions concerned on the question of accepting the Board's recommendations. The men voted against accepting the Board's award, and, on May 23, declared a strike. All employees of the various coast shipyards, with the exception of Coughlan's, the Vulcan Iron Works and the British Columbia Marine Company, which had agreements with the unions, went out, about 5,000 workmen being affected. The men remained on strike until June 4, when the dispute was adjusted through the efforts of Hon. G. D. Robertson, who had proceeded to Vancouver at the request of the Dominion Government, and after full conference with the Minister of Labour. An agreement was arranged between employers and employees covering the shipbuilding industry, the settlement representing a slight improvement for the men over the terms of the findings of the Commission, and having the additional feature of continuity until the end of the war. It was agreed that wage rates should be advanced quarterly as might be warranted by fluctuation in the cost of living and that all grievances arising which the parties were unable to settle between themselves would be referred to an adjuster, whose decision should be final. It also provided that during the life of the agreement there should be no strikes or lockouts. The full text of the agreement which governs "the operations of shipbuilding and allied manufacturing plants in the province of British Columbia as from June 1st, 1918," follows:

Text of Agreement

SHOP RULES.

1. Eight hours shall constitute a regular day's or night's work, and 44 hours shall constitute a regular week's work.

2. All time worked over eight hours will be considered overtime and be paid for at the rate of double time until workman is relieved. Sundays and Dominion holidays, including the following, New Year's Day, Good Friday, Victoria Day, Dominion Day, Labour Day, Thanksgiving Day, Christmas Day and Saturday afternoons will be paid for at the rate of double time. Under no circumstances shall any work be performed on Labour Day, except to preserve life or property.

3. Where second and third shifts are worked the employer will allow 30 minutes for meals in each of these shifts. Where a double shift is worked double time will be paid if the job does not last longer than three nights.

4. Should a man be working during the day, then be transferred to a night shift, he shall receive the regular rate of overtime for the first night.

5. Men sent to work outside city will receive first-class transportation, board and wages while travelling and an allowance of $2.50 per day for board while working or waiting.

6. If a man has worked all day and is requested to travel at night, he shall receive the regular day's pay. Sleeping accommodation not being provided, the overtime rate shall prevail.

7. The employees in each craft or calling in a shop or yard shall have the right to select three of their number to represent them as members of the shop committee. Each member of this committee shall be chosen by majority vote in such manner as the employees shall direct. The chairman of each craft committee shall be a member of the joint shop committee.

8. Any committeeman appointed in the manner provided in the preceding clause who shall be found to have been discharged without just and sufficient cause after due investigation in the manner herein provided for the adjustment of grievances shall be reinstated with full pay for all time lost.

9. It is agreed that all work done in city districts and adjoining municipalities where it becomes necessary for a workman to travel from shop to job and job to shop, said travelling to be in the company's time and carfare to be supplied.

10. All grievances which arise in any shop or yard shall be given consideration as follows:

(a) All complaints and grievances to be adjusted by the foreman in charge if possible.

(b) When such adjustment cannot be made between the foreman and the men directly interested, the matter will be taken up by the company direct and the shop committees representing the craft having the grievances, and they shall endeavour to reach a mutual understanding.

(c) If the matter cannot be adjusted between the shop committee and the employer, the shop committee may call in to conference with the employer a representative chosen by the committee.

(d) In the event of an adjustment of such grievance not being reached under the provisions of the foregoing clauses, then the matter shall be referred to the ad-

juster, whose decision shall be final, and in the meantime there will be no lockout on the part of the company or strike on the part of the men.

11. All employees shall be paid at least every two weeks and arrangements shall be made to pay in cash. In no case shall more than three days' pay be held back.

12. Any employee being laid off, discharged or quitting of his own volition, shall receive all wages and personal property within 24 hours of the termination of his employment.

13. Men required to work in oil tanks, or tanks of boats carrying oil, or acid tanks, the same shall be cleaned and steamed according to Government regulations. Time and one-quarter shall be paid for exceptionally dirty work.

14. Men now receiving rates in excess of the minimum rates herein quoted will suffer no reduction, except as justified under provisions of clause 15.

15. These rules to remain in effect for the period of the war. The wage rates will be revised every three months according to official information on the cost of living as published in the *Labour Gazette* of the Department of Labour of the Dominion of Canada as applicable to the Province of British Columbia.

16. The adjustment of grievances and of rates as provided in clauses 10 and 15 of these regulations shall be made by an adjuster appointed by the Federal Government on the joint recommendation of parties concerned. In the event of their being unable to agree, the adjuster shall be named by the Federal Government on the joint recommendation of the Minister of Labour and Senator Robertson.

RATES OF PAY.

Machinists	$6.00
Machinists' specialists	4.50
Machinists' helpers	4.00
Boilermakers	6.00
Shipfitters	6.00
Riveters	6.00
Chippers	6.00
Caulkers (steel)	6.00
Flange turners	6.60
Pressmen	6.00
Planermen	5.00
Angle and frame setters	6.00
Punch and shear men	4.95
Countersinkers	4.65
Drillers and reamers	4.50
Holders on	4.65
Slab helpers	4.30
Anglesmiths	6.60
Anglesmith heaters	4.50
Machine flange helpers	4.50
Plate hangers (leading hand)	5.50
Plate hangers' helpers	4.30
Flange fire helpers	4.50
Boilermakers' helpers	4.30
Shipfitters' helpers	4.00
Rivet heaters	4.00
Blacksmiths	6.00
Blacksmiths' helpers	4.50

Painters	5.50
Painters (bitumastic)	6.60
Electrical workers	6.00
Electrical workers' helpers	4.00
Operators of locomotive cranes	6.60
Operators of Gantry cranes	6.60
Operators of double cable ways	6.60
Operators of all double machines	6.60
Operators of electrical, steam or air operated winches and donkeys	6.60
Operators of single aerial cable ways	6.00
Operators of overhead cranes (in shops)	6.00
Steam and electrical operators in power houses	6.00
Engineers in charge of boilers	5.50
Firemen	4.40
Oilers	5.00
Furnacemen	5.00
Operators of single drum steam, electric or air winches and donkeys not hoisting	5.00
Caulkers (wood)	7.70
Shipwrights, joiners, millmen and boat-builders	6.60
Riggers	6.00
Air machine tool men	4.95
Planking men	4.95
Ceiling men	4.95
Beetlers	4.95
Hook tenders	4.40
Degree men	4.40
Hand hammer clinchers	4.00
Woodworkers' helpers, general	4.00
Labourers	3.85

REPORT OF THE MEDIATION COMMISSION OF THE PRESIDENT OF THE UNITED STATES[1]

IN September last, President Wilson appointed a Commission to visit the mountain region and the Pacific coast for the purposes of studying and reporting on the causes of existing discontent among workers in that section, and of adjusting differences by conferences and by "lending sympathetic council and aid" to employers and employees. The following is a summary of a report submitted to the President by the Commission under date of January 9, 1918:

The strikes in the Arizona copper districts and the disturbed labour conditions in the Pacific Northwest had resulted in a serious diminution of the copper supply available for ammunition and a general hampering of the war programme both as to ships and aircraft. The chief objects before the Commission, therefore, were to open the copper mines of Arizona to their maximum output and to ensure that the war production programme of the nation should proceed at the necessary pace as far as labour is an element.

Disputes in Arizona Copper Districts

In the early summer of 1917, strikes became widespread in these districts, the causes of which, according to the report, were found to be (1) "the underlying labour conditions of the mining industry of the state, which were devoid of safeguards against strikes, and, in fact, provocative of them," and (2) distant ownership of mines and the failure on the part of the resident managers "to understand and reach the heart and mind of labour . . . The managers are technical men . . . There is no responsible executive whose sole function is to deal with labour problems."

As a result, apparently, of this lack of understanding of the employees on the part of the managers, the labour turnover was appallingly large. This signifies, too often, "men without responsibility of home or home-making, men possessed of a feeling of injustice against lack of continuity of employment, serving as inflammable material for beguiling agitators to work upon." To this was added the difficulty of racial diversities. In one camp 32 nationalities were represented. "The industry contains within itself the Balkan problem on a small scale . . . The movement toward Americanization, so fruitful in its results in different parts of the country, has hardly penetrated into these outposts of industry."

The trade union movement, according to the report, "is the most promising unifying spirit among the workers. The progress of the movement, however, is impeded by the traditional opposition of the companies, by difficulties due to racial divisities and by internal dissensions in the miners' International."

The labour difficulties were further complicated by factors created by the war. Doctrines of internationalism were strongly held. The belief that all wars are made by capitalists was encouraged by heavy profits of the copper companies previous to the entry of the United States into the war. "The limitation of profiteering through price fixing and taxation had been only too recently accomplished to have made itself felt."

The three basic claims urged by the men and resisted by the companies are given in the report as follows:

> (a) While not expressed in so many words, the dominant feeling of protest was that the industry was conducted upon an autocratic basis. The workers did not have representation

[1]See March issue, page 158, for previous report.

in determining those conditions of their employment which vitally affected their lives as well as the company's output. Many complaints were, in fact, found by the Commission to be unfounded, but there was no safeguard against injustice except the say-so of one side to the controversy. In none of the mines were there direct dealing between companies and unions. In some mines grievance committees had been recently established, but they were distrusted by the workers as subject to company control, and, in any event, were not effective, because the final determination of every issue was left with the company. In place of orderly processes of adjustment, workers were given the alternative of submission or strike.

(b) The men sought the power to secure industrial justice in matters of vital concern to them. The power they sought would in no way impinge on the correlative power which must reside in management. Only by a proper balance of adequate power on each side can just equilibrium in industry be attained. In the minds of the workers only the right to organize secured them an equality of bargaining power and protection against abuses. There was no demand for a closed shop. There was a demand for security against discrimination directed at union membership. The companies denied discrimination, but refused to put the denial to the reasonable test of disinterested adjustment.

(c) The men demanded the removal of certain existing grievances as to wages, hours and working conditions, but the specific grievances were, on the whole, of relatively minor importance. The crux of the conflict was the insistence of the men that the right and the power to obtain just treatment were in themselves basic conditions of employment, and that they should not be compelled to depend for such just treatment on the benevolence or uncontrolled will of the employers.

To establish the framework of sound industrial relations between labour and management, four specific adjustments were made by the Commission, the general principles of which were as follows:

(a) An orderly and impartial process for the adjustment of all grievances inevitable in modern large-scale industry was substituted for the strike. In asking labour, for the period of the war, to forego its ultimate weapon, a compensatory means of redressing grievances had to be supplied. Therefore, there are established in each district United States administrators to decide all disputes where the parties themselves fail of agreement. The Commission in effect applied the principle of trade agreements, making the duration of the war the time limit, and, through the mechanism of a United States administrator, provided for the means of determining any claims of breach of the agreement.

(b) Working conditions of industry should normally be determined by the parties themselves. Therefore channels of communication between the management and men were created through grievance committees free from all possible company influence. Through these representative contacts between management and men, disputes find expeditious and informal settlement. Still more important, the contract engenders a spirit of mutual understanding and therefore of co-operation.

(c) The right of the men to organize was made effective by providing administrative enforcement for the prohibition against discrimination because of union affiliation.

(d) In view of the dislocation of the labour supply of the country, it was important to husband the available man power. Therefore a re-employment of the men on strike before employing newcomers was assured, excepting only those—few in number—who were guilty of seditious utterances, who had been proved ineffi-

cient, or who were members of any organization whose principles were opposed to belief in the obligation of contract. By casting the burden of re-employment of all the strikers upon the district instead of upon the individual company the beginning was made toward recognizing the responsibility of the industry as an entirety for the solution of its problems.

Administration under this settlement had proceeded in the Arizona districts for more than two months previous to the writing of the report and the results are encouraging.

California Oil Fields Dispute

During the summer of 1917, and again in November, strikes were threatened in the fields of some of the independent companies.

The Commission found upon investigation that the major demands of the men were for an eight hour day and a minimum wage of $4; they also sought protection against alleged discrimination of union men.

In providing for an eight hour day the Commission simply adopted the hour standard which has been proved by the experience of the Standard Oil Company to be the most effective. The minimum wage of $4 on an eight hour basis was also introduced. The company also agreed not to discriminate against members of any unions affiliated with the American Federation of Labour.

The results of such action have proved most satisfactory.

Pacific Coast Telephone Disdute

For several months a tie-up of the telephone system of the entire Pacific coast was threatened, and in November a strike actually became effective in Oregon and Washington.

The dispute affected about 9,000 girl operators and about 3,200 men. The recognition of the girls' union was the main issue, and the men, being favourably situated because of the demand for skilled electricians, made the recognition of the girls' union their controlling principle.

There were two other issues: A demand for a wage increase and for a closed shop, subsequently modified into a desire for a preferential shop. The men demanded a 25 per cent wage increase. The company offered a 12½ per cent increase. The closed shop demand was used as a leverage in bargaining, but the preferential shop idea vigorously urged.

What the Commission was able to achieve in adjusting this dispute is set forth in the report as follows:

(a) The girls' locals were included in the trade agreement between the company and the brotherhood. In some other parts of the country the company had heretofore recognized the girls' union, and the plea that this made for inefficiency was the speculation of fear rather than the judgment of experience.

(b) Wage increases, obviously necessary, were provided for, leaving the extent of further increases to negotiation between the parties. In default of agreement, the issue was to be determined by an arbiter, to pass upon the complicated facts of a proper wage scale.

(c) The recognition of the girls' union, as well as the enforcement of all future grievances, was made effective by the establishment of impartial administrative machinery. United States administrators in the various districts were provided for the settlement of all issues which the parties themselves could not adjust.

(d) For the period of the war at least, in place of the resort to strike or lockout, there was thus established an effective peaceful process for the redress of grievances, secured by the authority of the United States Government.

(e) In effect there were involved a reversal of the labour policy of the company. New currents of co-opera-

tion were created. It takes some time, however, for such a change of policy to permeate through all the stages of an industrial hierarchy. Partly, therefore, through this delayed adjustment to a new industrial regime on the part of the local subordinate officials, partly by reason of obstructive suspicion of some of the radical labour leaders in the Northern States, partly because of the limited facilities for labour administration on the part of the Government, considerable difficulty was experienced in the early days following the ratification of the Commission's settlement. The Commission was constantly appealed to. The quick exercise of administrative action by the Commission and the new administrators, and a strict eye to the enforcement of the settlement in co-operation with the more conservative union leaders and the higher officials of the company, succeeded in tiding over—by a process of flexible administration rather than adjudication—the obstructions and difficulties inevitable in such a situation. Before the Commission left the coast signs of a new order of good relationship were already evident. Since then the representatives of the company and the brotherhoods have necessarily negotiated a new wage scale without resort to arbitration.

Unrest in the Lumber Industry

The lumber industry of the Pacific Northwest, employing about 70,000 men, suffered a breakdown throughout the summer of 1917, and, in fact, is still in a state of seething unrest." The report sums up the situation as follows:

> We are dealing with an industry still determined by pioneer conditions of life. Hardy contact with nature makes certain rigours of conditions inevitable, but the rigours of nature have been reinforced by the neglects of men. Social conditions have been allowed to grow up full of danger to the country. It is in these unhealthy social conditions that we find the explanations for the unrest long gathering force, but now sharply brought to our attention by its disastrous effect upon war industries. The unlivable condition of many of the camps has long demanded attention. While large improvements in camp life have recently been made, many of the camps still require much betterment to make them fit human habitations. A number of employers have shown a most commendable understanding of the implications of operating camps unfit for men. Unfortunately, however, the old abuses were so long continued and so widespread that even after physical conditions are bettered a sense of grievance remains. This discontent gradually translated itself into demands not merely for physical comforts but for certain spiritual satisfactions.
>
> Partly the rough pioneer character of the industry, but largely the failure to create a healthy social environment, has resulted in the migratory, drifting character of workers. Ninety per cent of those in the camps are described by one of the wisest students of the problem, not too inaccurately, as "womanless, voteless and jobless."
>
> The fact is, about 90 per cent of them are unmarried. Their work is most intermittent, the annual labour turnover reaching the extraordinary figure of over 600 per cent. There has been a failure to make of these camps communities. It is not to be wondered, then, that in too many of these workers the instinct of workmanship is impaired. They are—or, rather, have been made—disintegrating forces in society.

Efforts to rectify evils by means of the trade union movement have failed, due mainly "to the bitter attitude of the operators towards any organization among their employees. This uncompromising attitude on the part of the employers has reaped for them an organization of destructive rather than

constructive radicalism. The I.W.W. is filling the vacuum created by the operators."

The demand for an eight hour day was doggedly opposed by the operators. "Opposition to the eight hour day is carried to the point of binding members of an employers' association on the Pacific coast by agreement to discriminate against such mills as introduce the change."

In the judgment of the Commission the introduction of the eight hour day in the Pacific Northwest lumber industry is indispensable. "With specific grievances removed, destructive propaganda extensively preached in the Pacific Northwest will lose its strongest advocate. Counter propaganda and positive education will then have an easy opportunity to supplant fanatical doctrines.

Packing Industry Dispute

In December a strike radiating from Chicago, affecting 100,000 men, threatened the meat packing industry.

The two important grievances involved low wages and long hours, coupled with the systematic opposition of the packers to the organization of its workers. One of the factors that influenced the wage demand was the belief on the part of the workers that the companies had been making excessive profits despite the Government regulation of prices. The companies conceded the principle of an eight hour day, but claimed to be obstructed in its adoption by reason of difficulties in connection with shipments. These conditions "depend for correction upon action both by the Government and by the industry."

The Commission's settlement proceeded along general lines, as follows:

(a) The principle of adjustment through negotiation and arbitration was established to take the place of strike and lockout during the period of the war.

(b) Prohibition of discrimination for union affiliation is rendered effective by its enforcement through administrative machinery.- It is not sufficient to recognize in the abstract the right of workmen to organize. Therefore, effective means were provided to secure to the union the right to live and to grow.

(c) The unfairness of compelling workmen to deal individually with employers of large-scale industries, particularly emphasized in the case of non-English speaking workmen, is recognized in practice by allowing workmen to voice their claims through representatives.

(d) The specific demands of the workers as to changes in hours, wages and conditions of employment were all left for determination by the United States administrator.

Here, as elsewhere, a tense situation threatening breakdown of a vital war industry was relieved by establishing machinery for adjustment. Under this machinery the parties are now proceeding to work out their difficulties. The hope is entertained that not only will specific grievances be justly dealt with, but healthier permanent relationships will be created in the very process of seeking to reach adjustments.

Recommendations

The report analyses the various causes of labour unrest, giving consideration to those arising out of the war, and in conclusion the President's Mediation Commission submits the following recommendations:

1. The elimination to the utmost practical extent of all profiteering during the period of the war is a prerequisite to the best morale in industry.

2. Modern large-scale industry has effectually destroyed the personal relation between employer and em-

ployee—the knowledge and co-operation that come from personal contact. It is therefore no longer possible to conduct industry by dealing with employees as individuals. Some form of collective relationship between management and men is indispensible. The recognition of this principle by the Government should form an accepted part of the labour policy of the nation.

3. Law, in business as elsewhere, depends for its vitality upon steady enforcement. Instead of waiting for adjustment after grievances come to the surface there is needed the establishment of continuous administrative machinery for the orderly disposition of industrial issues and the avoidance of an atmosphere for contention and the waste of disturbances.

4. The eight hour day is an established policy of the country; experience has proved justification of the principle also in war times. Provision must of course be made for longer hours in case of emergencies. Labour will readily meet this requirement if its mis-use is guarded against by appropriate overtime payments.

5. Unified direction of the labour administration of the United States for the period of the war should be established. At present there is an unrelated number of separate committees, boards, agencies and departments having fragmentary and conflicting jurisdiction over the labour problems raised by the war. A single-headed administration is needed, with full power to determine and establish the necessary administrative structure.[1]

6. When assured of sound labour conditions and effective means for the just redress of grievances that may arise, labour in its turn should surrender all practices which tend to restrict maximum efficiency.

7. Uncorrected evils are the greatest provocative to extremist propaganda, and their correction in itself would be the best counter-propaganda. But there is need for more affirmative education. There has been too little publicity of an educative sort in regard to labour's relation to the war. The purposes of the Government and the methods by which it is pursuing them should be brought home to the fuller understanding of labour. Labour has most at stake in this war, and it will eagerly devote its all if only it be treated with confidence and understanding, subject neither to indulgence nor neglect, but dealt with as a part of the citizenship of the state.

[1]Since this report was written, the direction of the labour administration for the war has been delegated to the Secretary of Labour.

UNITED STATES FIXES HOURS AND WAGES FOR EMPLOYEES OF RAILROADS UNDER GOVERNMENT CONTROL

LAST February it was announced that the Director-General of Railroads in the United States had appointed a railroad wage commission to study and report on the broad question of wages and hours of employment in the railroad service (see April, 1918, issue, page 292). On April 30, the Commission submitted its report to Director General McAdoo; and, on May 25, the Director General, acting upon the recommendations of the Commission, issued a General Order fixing wages and hours of work for employees of railroads under Government control.

The report of the Commission is printed below in full, excepting that the appendices to the report have been omitted. The report is followed by a summary of the Director General's order.

Report of the Railroad Wage Commission to Director-General McAdoo

To the Director General of Railroads:

To make an investigation of the wages and hours of the more than 2,000,000 railroad workers now in the employ of this Government has been a matter of engrossing interest. To ask of a man, "What wages should you in justice receive?" is to ask perhaps the profoundest of all human questions. He is at once compelled to an appraisement of his own contribution to the general good. He must look not selfishly on his own material needs, but take a far view of the needs of those dependent upon him. He must go into the whole involved problem of his relationship with his fellows, and to answer the question aright he must in the end come to a judgment which will be nothing less than a determination of what policy or plan of wage adjustment will make for the permanent well-being of the State.

No Practical Answer

We have searched for no such ultimate answer, if there can be one. But our investigation sought to reveal the insistent problems that confronted these workers, and such recommendations as we make are the practical answers to an immediate and direct question: What does fair dealing at this time require shall be done for these people who are rendering an essential service to the nation in the practical conduct of this industry?

That question to the mind of the Commission is qualified materially by the phrase "at this time." The existing state of war prohibits anything approximating a determination of ideal conditions. The exceptional call that has been made upon the railroads, and upon practically all other forms of industry in the country, since the United States entered the war over a year ago, has created an abnormal demand for labour.

Law of Supply and Demand

Wages have always responded, to a degree, to the law of supply and demand. As a result of the war, the prices of the necessities of life have been mounting to unheard of levels. The railroads, with the pressure upon them for greatly increased transportation facilities, have been confronted with the problem of asking increased exertion on the part of labour at a time of extreme competitive labour demand and at a time when the purchasing power of the pay is shockingly small. The Commission has consequently considered the railroad wage problem with the idea that the Government must courageously direct its attention toward the maintenance of rates of wages for the railroad employees which are still adequate for those who, as they patriotically labour, recognize the war has brought to us all the necessity for sacrifice.

In undertaking its comprehensive labour of determining, in a broad spirit, what fair dealing at this time does require to be done by the Government for the railroad employees, the Commission held a large number of public hearings. It requested to appear before it at those hearings, representatives of all classes of employees, organized and unorganized, in the service of the railroads. Those who came to speak for these employees were given a full opportunity to present their views concerning the character and conditions of the work performed by those for whom they spoke, and the necessity for an increased compensation to be paid them. In addition to the statements presented at the hearings on behalf of the employees, hundreds of letters, written statements, and petitions which were sent to the Commission by individual employees and by organizations of employees, were classified, analyzed, and considered by the Commis-

sion in connection with the oral statements.

Testimony of Experienced Men

Men in the service of the railroads who, during the period of operation and control by the private owners thereof, had directly to do with the work performed by the various classes of employees, and with the determination of the rates of compensation and conditions of employment, were also heard, not in controversy with the employees, but to give all the information they could concerning the work of the various classes of employees, the reasons for the existing differentials in wages between different classes, the extent to which increases in wages had already been given to meet the present exigency, and the extent to which increases ought to be given at the present time.

Extent of Wage Demands

The requests which have come to us for wage increases would, if fully granted, involve an additional outlay in wages of somewhat over $1,000,000,000 per year in excess of the wage fund of last year, which exceeded two billions. Some asked for an increase of 100 per cent in their pay, and from this they graduated downward to 10 per cent. None were satisfied with their present wages.

If we assume that this total sum should be given, the problem would at once arise as to its distribution. Quite evidently the need or the desert of each class of labour is not to be measured by its demands. The bolder should not be given all they ask merely for their boldness, while the more modest are insufficiently rewarded for the service they render because of their modesty. Some had evidently thought out their claims with particular respect to their power to compel concessions, while others based their demands upon the exceptional character of the services given, the long experience, and the training or character required. Still others found this a proper time to put forward claims which they felt were but a slender part of what justice would award were the whole scheme of wage making to be taken up afresh under a new order of things.

To reclassify the many hundreds of employments in which the 2,000,000 railroad workers engage would be a task calling for more time, skill, insight, and knowledge than we possess. At the outset, it was seen that there were grave inequalities in the rates of wages paid. But who should say what relationship each class of employees should bear to the other? Abstractly, why should an engineer receive $170 per month and a telegraph operator $90 per month? What ratio should the messenger boy's wage bear to that of a brakeman or that of a machinist's helper to a section boss, or that of a billing clerk to a train dispatcher? Or to be still more particular, what should be the proportionate wage of trainmen and stationmen? Should there, in fact, be, or could any scientific scheme be devised by which there might be arrived at some proper and certain method of determining the wage of a carpenter as against that of an electrician? So if the full amount of the claims were granted we should still be met with a problem impossible of certain solution—the proportionate share out of the total wage fund that should go to anyone.

In the world of economics this situation has been met by the simple application of supply and demand, which is in turn now varied, affected, and modified by those limitations arising out of the artificial, but necessary and historic, methods of collective bargaining.

One Dominating Fact

These forces have classified employments. In the growth of the railroads there has consequently been evolved no other plan for such classification, and no scientific relationship between the wages paid. The proposal that a new classification should be attempted is one which, to say the least, may not be accepted now. Nevertheless, there stands out one dominating fact, recognized by railroad work-

ers as well as by railroad officials—a conclusion compelled by that large sense of equity which governs where logical processes fail—that the lower grades of railroad employment, those in which the supply of labour has been less restricted, and where organization has been difficult, if not impossible, deserve wage increases out of proportion to the increases for those in superior grades.

Treatment of Different Crafts

In treating of different crafts, it is not without interest to recall that each of those workers who appeared made claim, with a quite manifest and very proper pride, that without his kind of labour the railroads could not be operated. And being essential to the large scheme, each asked that this pivotal nature of his work should be recognized in the wages paid. The train dispatcher spoke with enthusiasm of the large responsibilities that he bore, and he was followed by the section man, ready for call at every moment, a minuteman, without whom train dispatcher and train would alike be useless. So by slow steps as our inquiry proceeded we came to see that the only practicable way of dealing with a problem so indented with detail and so complex was to meet it on a large scale.

Should there be any increase in wages to these men in the railroad service? The railroads themselves have for the past two years been answering this question by yielding, some with a wise provision, and others too slowly for their own good, to the requests of their employees. It took neither tables nor charts nor briefs to make evident that, if the roads were to hold those men they had, concession must be made to the imperious demand of rising prices for the staples of living.

Call for Men in Certain Trades

Furthermore, an unprecedented call had come for men of certain trades in connection with the new industries that had been created by the war in Europe, and this long before our entry into the conflict. Machinists and ironworkers of all kinds found themselves to be essential to the great munition plants, and day labour of the most unskilled character rose into high demand. To meet this competition the roads had advanced wages by slow steps at first, and later more rapidly. It is hardly realized that the roads themselves have in two years, 1916 and 1917, increased wages approximately $350,000,000 per year, if applied to the present number of their employees.

But these advances were not in any way uniform, either as to employments or as to amounts or as to roads, so that one class of labour benefited much more than another on the same road, and as between roads there was the greatest divergence. The situation had been dealt with as pressure made necessary, and naturally those who, by organization or through force of competition, could exert most pressure fared best. Things came to a head just before the Government took over the railroads. Another three months of private management and we would have seen much more extensive concessions in wages, or there would have followed an unfortunate series of labour disturbances. The Government, therefore, has now to meet what would have come about in the natural course.

Indeed, the impatience of the men was only allayed, after Government intervention, by the assurance that the matter of wages would be promptly taken up and that the awarded increases would be retroactive as of January 1 of this year.

Government's Distinctive Position

The Government now enjoys this position of distinction—it is not yielding to threats; it is not compelled to a course by fear of any unpatriotic outburst; it is not making concessions to avoid disaster. There has been no hint that such a policy would be pursued by those who have it within their power. The right thing "at this time," a measure of justice, consideration for the needs of the men, whether organized or unorganized, whether replaceable or not replaceable—these are the standards that we have sought to

meet. By what amount have the railroad workers been disadvantaged by reason of the war, and how may that disadvantage be overcome with the largest degree of equity, assuming that, in common with all who do not wish to exploit the opportunities which the war affords, these workers can not have and will not expect a full meeting of the entire burden?

The course of first suggestion is to allow a uniform increase of so many dollars per month to each worker. This is the policy England has pursued, as is shown in Appendix I[1] of this report. It has the advantage of simplicity; but to our minds it fails primarily in drawing the distinction between those whose need is greatest and those who have largest leeway for sacrifice. To make a uniform wage increase of, say $20 per month, would increase the railroad budget by nearly $500,000,000 a year. It would be a boon to many whose wages are low, but in its uniformity it would fail to adapt itself to the varying needs of those whom it is intended to serve.

Cost of Living Studied

We have had a most exhaustive study made of the cost of living to-day as contrasted with the cost of living in the latter part of 1915, when by the reaction of the European war the American people first felt keenly the increase in the burdens of life and the need for higher wages. This study has been made without reference primarily to those quite thorough investigations which have been carried on by the Department of Labour and other governmental and many private agencies. And to our minds it conclusively establishes two things, (1) that the cost of living has increased disproportionately among those of small incomes, and (2) that there is a point up to which it is essential that the full increased cost shall be allowed as a wage increase, while from this point on the increase may be gradually diminished.

This study of the cost of living was not made from paper statistics exclusively, by the gathering of prices and comparisons of theoretical budgets. It was in no inconsiderable part an actual study from life, one of the most interesting and valuable groups of figures having been gathered by the newspapers of the country, by interviews with those of the working class, and the inspection of their simple books of accounts. Roughly, it may be said that the man who received $85 a month on January 1, 1916, now needs 40 per cent additional to his wage to give him the same living that he had then. Below that wage a larger percentage must be allowed, because the opportunity for substitution and other methods of thrift decline almost to a vanishing point, while above that wage a growing proportion of the increase will go to those things essential to cultured life, but non-essential to actual living.

Increase to Meet Living Cost

In fairness, therefore, a sufficient increase should be given to maintain that standard of living which had obtained in the pre-war period, when confessedly prices and wages were both low. And upon those who can best afford to sacrifice should be cast the greater burden.

Another argument that is compelling as against the uniform increase in existing wages is the unalterable fact that to give an equal amount, now, to all, would be giving to some a double increase, that which they had received from the railroads during the last two years, and that which the Government might award. For not all of the railroads made increases to the same classes, and no two made awards in the same percentages, even within the same groups of employments. The line of increases drawn upon a chart looks like a deeply serrated mountain chain. To add to all uniformly would be but to accentuate the inequalities resulting from the promptness of some roads as against the backwardness of others in meeting their workmen's needs.

There is high authority for saying that "to him that hath shall be given, but from him that hath not shall be taken

[1]The appendices to the report have not been included in this article.

away even that which he hath." This dictum as to the way of the world we take to have been the recognition of a fact, not the indorsement of an ideal. And the plan we recommend is an expression of the reverse policy. We take from no man that which he hath, insuring him as much as he has now (for no wages are to be lowered), but we would add materially to the fund of those who have least. And of these there are many.

Average Railroad Wages

It has been a somewhat popular impression that railroad employees were among the most highly paid workers. But figures gathered from the railroads disposed of this belief. Fifty-one per cent of all employees during December, 1917, received $75 per month or less; and 80 per cent received $100 per month or less. Even among the locomotive engineers, commonly spoken of as highly paid, a preponderating number receives less than $170 per month, and this compensation they have attained by the most compact and complete organization, handled with a full appreciation of all strategic values. Between the grades receiving from $150 to $250 per month, there is included less than 3 per cent of all the employees (excluding officials) and these aggregate less than 60,000 men out of a grand total of 2,000,000.

The greatest number of employees on all the roads fall into the class receiving between $60 and $65 per month, 181,693, while within the range of the next $10 in monthly salary there is a total of 312,761 persons. In December, 1917, there were 111,477 clerks receiving annual pay of $900 or less. In 1917 the average pay of this class was but $56.77 per month. There were 270,855 section men whose average pay as a class was $50.31 per month; 121,000 other unskilled labourers, whose average pay was $58.25 per month; 130,075 station service employees, whose average pay was $58.57 per month; 75,325 road freight brakemen and flagmen, whose average pay was $100.17 per month; and 16,465 road passenger brakemen and flagmen, whose average pay was $91.10 per month.

These, it is to be noted, are not pre-war figures; they represent conditions after a year of war and two years of rising prices. And each dollar now represents in its power to purchase a place in which to live, food to eat, and clothing to wear, but 71 cents as against the 100 cents of January 1, 1916. That there has been such steadfast loyalty to the railroads, and so slight a disposition to use the lever of their necessity and their opportunity to compel, by ruthless action, an increase of wages, is not without significance and should not be passed without public recognition.

With the various conditions which have been detailed all in mind, the Commission has reached the conclusion that the fairest method of dealing with the problem of wage increases is to award increases on the following scale:

The Scale Recommended

1 To the monthly rate of pay of men receiving in December, 1915, the amounts named in this column.	2 Add the per cent named in this column.	3 Equivalent to amount named in this column.	4 Making new rate per month as shown in this column.
Under $46.00		$20.00	
$ 46.01 to $ 47.00	43.00	20.21	$67.21
47.00 " 48.00	43.00	20.64	68.64
48.01 " 49.00	43.00	21.07	70.07
49.01 " 50.00	43.00	21.50	71.50
50.01 " 51.00	42.35	21.60	72.60
51.01 " 52.00	41.73	21.70	73.70
52.01 " 53.00	41.00	21.73	74.73

Columns 2 and 3 in the above table are explanatory of the method of arriving at the "new rates" included in column 4. The roads will substitute for the "old rates" of December, 1915; scheduled in column 1, the "new rates" listed in column 4.

In applying the increases prescribed in the preceding tables to the wages of men paid on a monthly basis, the roads will substitute for each group of monthly wages of 1915, as listed in column 1, the amount named in column 4, on the same line.

The inclusion of the percentages contained in column 2 is merely to explain the method of arriving at the amounts contained in column 3, which added to the maximum amount for each group named in column 1 produces the "new rate per month" shown in column 4, on the same line.

Application of these new wages to the present pay rolls of the railroads, as nearly as may be, indicates that the net wage increases granted will approximate $300,000,000 a year. The magnitude of this amount is not staggering when the whole expenditure for wages on the railroads is considered. And whatever its effect upon the mind may be, we regard such an expenditure as necessary for the immediate allaying of a feeling that can not be wisely fostered by national inaction, and as not one dollar more than justice at this time requires. It will make hard places smoother for many who are now in sore need. It gives no bounty. It is not a bonus. It is no more than an honourable meeting of an obligation.

Application to the Scale

These increases are to be applied to the rates of wages in effect on December 31, 1915. They do not represent a net increase at this time. Because our figures as to the increase of living costs have been gathered with reference to the two-year period January, 1916, to April, 1918, the wage increases are reckoned with respect to the same dates. The telegrapher who holds the same position to-day that he did the last day of December, 1915, and who then received $75 a month and has received no increase since, will receive an additional wage of $30.75 per month. If he has received an increase in these two years of $10 per month, the recommended increase of his wage will be cut down by that much, making his net advance $20.75. The section hand who on December 31, 1915, received a wage of $50 per month, will receive an increase of $21.50 per month, less whatever his monthly wage as section man may have been advanced in the intervening two years.

Based on Rate of Increase

In the application of the scale the wage runs with the place. If in the past two years an employee has been promoted,

his new wage is based upon the rate of increase applicable to the new schedule governing the new place.

Reductions in hours are not to be regarded as increases in pay. This rule is made necessary, first, by its justice, for it is not to be contemplated that hours are reduced to decrease earnings; and, second, by the impracticability of applying any other rule. In some cases the decrease in daily hours did affect an increase in total wages paid, by reason of overtime, but in other cases, where the railroads adjusted themselves to an eight or a nine hour day, there was no increase in the monthly compensation. To differentiate between these cases would be an interminable task. Moreover, we assume the good faith of all reductions in hours as being what they pretend to be.

There are some few cases where the roads, by reason of abnormal conditions, largely local, and arising out of the extreme competition in certain trades, have granted wage increases which will wellnigh cover, if not altogether cover, the increases here made. As to those who have received such increases, we advise no other course than that the scale be adhered to, for it has its foundation in principle and not in the compelling force of any unusual competitive conditions. In no event, however, should there be any reduction in wages from those now obtaining.

Must Maintain Complement

The railroads must, however, maintain their complement of workers, and if, by meeting fairly, as here, the needs of the time, this end can not be secured, there must be allowed play for other forces than those we have recognized.

In the application of the scale, that percentage of increase is to be applied which is awarded to the normal time wages paid to the individual in each position in the railroad service on December 31, 1915. There are, however, employees of certain classes, and upon a number of roads, whose wages are paid upon a piecework basis, and there are also numbers of employees on practically all the roads whose hours of service at times run beyond the straight hours of service established for a day's work of the kind they perform. A practical plan for wage increases, in harmony with the scale, has been devised for application to piecework wages and wages for recognized overtime.

Simplicity of Method

While the method of increasing wages here devised is manifestly one of simplicity when applied to the straight schedules of hourly, daily, or monthly pay, we have found much difficulty in adapting the plan to the elaborate and intricate schedules of the trainmen, from which there is apparently no desire on the part of the railroad operators or the trainmen to depart. This, however, we have succeeded in doing in such manner as to translate the increase into mileage rates, thus maintaining the existing schedules relating to the method of pay. Accepting the average monthly earnings of employees in the train and engine service for the fiscal year ended 1915 as accurately reflecting the rates paid to those classes we have adopted, as the percentage of increase to be applied to the mileage rates obtaining for the several classes of trainmen, that percentage of increase which is awarded to employees generally whose earnings are equal to the average earnings of each of the several classes of trainmen. Thus, in the case of road passenger engineers, their average earnings in 1915 were $178.46. The individual employee in any other branch of the railroad service whose monthly wage is $178.46 will receive a wage increase of 11¼ per cent, and the road passenger engineers as a class will receive an increase of 11¼ per cent in their existing mileage rates. And the same method obtains for each of the classes of trainmen paid on the mileage basis.

At the outset of the hearings it was manifest that the matter of hours of

service is lodged deep in labour's mind. A standard day of reasonably limited length is as much a part of the measure of justice with the workingman as is his rate of wage.

Slowly and steadily, by force of law somewhat, but also by the voluntary act of the employers, a shorter workday is being put into effect. This tendency will continue, and the shorter day will come to be regarded, not as a means of minimizing the returns which the worker gains, but as a conserver of the human material upon which industry rests. This matter of work time must be submitted to the pragmatic test. Society will come to see that there is a maximum which is beyond the Plimsoll mark of wisdom, and a minimum that makes society in many ways the sufferer. The line of moderation, the medial line, is one that must be proved by experience. The wise employer will look with sympathetic eye to find it, and the wise employee will attempt in good faith to make it manifest. It would be a splendid achievement if we could at this time crystalize the experience of the world into a conclusion concerning the length of the workday that would be of universal application. But this is not possible now for many reasons, not the least of which is an insufficiency of data touching so many and such diverse employments which call for such differing strains upon human nerves and muscles.

This, moreover, is not the time, in the judgment of the Commission, to make experiments which might lessen the output of that commodity which railroad men produce—tons of freight hauled and numbers of passengers carried. The one thing now imperative is volume of and speed in railroad output. Since the Commission's work began, as before, our needs as a nation, and the vital needs of those nations with whom we are allied, have been imperilled by the shortcomings of our transportation system. There is no one who wishes to risk a repetition of this condition. On the contrary, all desire that naught shall be done which will make it likely.

Position of the Employees

The railroad employees have asked for the shorter day, saying frankly that they did not wish an increased rate for overtime save as a means of compelling the observance of shorter hours—a penalizing of the employers for too long a work day. At this time, however, when urgent and serious necessity compels sacrifice from all, to penalize the Government for working its men as long as they have been in the habit of working under their private employers, the railroad companies, is to take advantage of the two-fold embarrassment of the Government —its need for the work and its inability to call in outside men. The Commission does not believe that the railroad employees really want thus to hamper the transportation facilities of the country in its hour of need.

Manifestly, therefore, at this time, when men must be constantly taken from the railroads, as from all other industries, to fill the growing needs of the nation's army, hours of labour can not be shortened and thereby a greater number of men be required for railroad work. The nation can not, in good faith, call upon the farmers and the miners to work as never before and press themselves to unusual tasks, and at the same time so shorten the hours of railroad men as to call from farm and mine additional and unskilled men to run the railroads. While the Commission is strongly disposed to a standard day, in so far as the nature of the service will permit it, its firm judgment consequently is that the existing hours of service in effect on the railroads should be maintained for the period of the war.

Exhaustive Study is Urged

But with this we earnestly urge that a most exhaustive study be made of this matter of hours of service, not with a view to the adoption of some arbitrary and universal policy which shall have no regard to the kind of work done, or to the effect upon the railroad service, but with these very considerations in mind.

And we have gone into this matter far enough to justify to ourselves the belief that by the steady application of such sympathetic consideration, the railroad service may be improved, and at the same time fuller opportunity be given for lifting a burden that falls disproportionately upon some of the less favoured of the railroad workers.

Overtime Pay

Closely allied to the matter of hours of service is that of extra pay for overtime. In fact, the whole theory of those who speak for labour is that extra pay for overtime is the logical way to force the standard day of reasonable hours with no work thereafter. In that theory there may or may not be force; but quite apart from such view, certain it is that in harmony with the broader idea that fair hours of rest and recreation are the labourer's right, the use of those hours in industry may well be obtained only at a wage much above the normal. With overtime as with hours of service, however, the Commission believes that the existing rules and conditions of payment should not be disturbed during the period of the war. But at the time when the study of the matter of hours of service is made, that study must sympathetically cover also the broad and kindred field of compensation for the overtime which is necessary in certain classes of service.

Apprentices

Organized labour realizes that at a time when men are being speeded up in the colleges by being given special courses in chemistry and other scientific subjects necessary for war work, the rules of inhibition touching the term of apprentices must be liberalized so that those who are competent shall the more quickly be enabled to place their full skill at the nation's service. It is the view of the Commission that the full measure of the increases herein suggested shall go only to those above 21 years of age, and that those from 18 to 21 shall have three-fourths of such increases, and those under 18 one-half of such increases. This rule, however, might well be modified to this extent, that if apprentices are graduated into the full status of journeymen before they have reached 21 years they shall have the full pay of this new status.

Floating Equipment Employees

This award shall be construed to apply to employees of railroads operating ferries, tugboats, lighters, barges, and any other floating equipment operated as terminal or transfer facilities, but shall not be construed as applying to railroad employees on, or in connection with the operation of, cargo and passenger carrying equipment on lakes, rivers, or in coastwise or ocean traffic.

Wage Adjustments by Other Boards

The award of the Commission shall not be applicable to those employees whose compensation is the result of adjustments by or through any agency established for the purpose by the Navy Department, the War Department, the Department of Commerce, the United States Shipping Board, or any other Government agency created since the entry of the United States into the war.

Effective Date of Increases

The wage increases provided for in the scale shall be effective as of January 1, 1918, and are to be paid to all who were then in the railroad service or who have come into such service since and remained therein, according to the time served. The proper rateable amount shall also be paid to those who have been for any reason since January 1, 1918, dismissed from the service, but shall not be paid to those who have left it voluntarily, because remaining in the service was the consideration of the promise to make the increases effective from the date mentioned. Men who have left the railroads to enter the Army or Navy shall be entitled to the pro rata increases accruing on their wages up to the time they left, as they have continued in the service of

the nation. The same rule shall apply to those who have passed from one branch of the railroad service or from one road to another.

The increases as to the employees of any road shall be effective only from the time the railroads were taken over by the Government.

Employment of Women

The employment of women is one of the important problems confronting those in charge of the actual operation of the railroads. Up to the time of the abnormal demand for labour created by the European war, women were not extensively employed by the railroads except as stenographers and clerks in the offices, and as charwomen, car washers and cleaners, and other employments of like character. Since the war they have entered the shops, have engaged in handling freight and baggage, and have even been employed upon the tracks. Much of this work requires a physical effort beyond the strength of women, and some of it is carried on under conditions menacing to health, safety, and morals.

The labour in our shops and elsewhere must be diluted as the war takes to itself an increasing number of men. Women must, to some degree, take these places. They should be cared for. Their burden should not be such as to hazard their health. Their hours should be reasonably short. Their working conditions should be healthful and fitted to their needs. And their pay, when they do the full work of men, should be the same as that of men.

Nearly all the States have laws which restrict the hours of service of women. The exigency of war work is not so great that the railroads should be permitted to employ women except under the restrictions of those laws and in classes of service comprehended by them unless the restrictions prescribed by the laws are extended to the service and all proper moral and sanitary surroundings are provided.

Discrimination Against Employees

The investigation of the Commission disclosed many inequalities of pay in the same branch of service, not only as between different sections of the country but in the same section. The attention of the railroad managers should be directed to these inequalities, with a view to removing them whenever the discrimination is not justified by differences in the efficiency of the labour, the cost of living, or other conditions legitimately affecting the rate of wages. In every case where the same service is rendered there should be the same pay without regard to sex or race.

Members of organizations and nonmembers must stand upon the same footing. In some branches of the service, and this is peculiarly true of those least paid, there are no organizations, or, if any, they are limited in their membership and restricted in their locality. But, whether organized or unorganized, the purpose must be duly to consider every branch of the service and to accord fair treatment to all.

Salaries of Officials

In carrying out the direction to the Commission to "make a general investigation of the compensation of persons in the railroad service," the investigation obviously included a consideration of the compensation of those persons who are classed as officials. The Commission, therefore, by an individual "questionnaire" which all officials were required to answer, and also by a report obtained from each railroad, secured the names of all persons receiving a compensation of $5,000 and upward, together with a full statement of the services performed by each of them.

The total compensation for the year ending December 31, 1917, paid to such officials is approximately $30,000,000. The individual salaries varied from $5,000 to $100,000. It is reasonably certain from the facts gathered by the Commission that a substantial readjustment

of such salaries may be made and the efficient operation of the railroads promoted thereby. Such readjustment of salaries, however, presents an individual proposition as applicable to each official. Some salaries may well be abolished altogether, others greatly reduced, while in some cases of lesser paid officials an increase would be warranted.

The Commission recommends that during the period of Government conduct of the railroads no salaries paid to officials who are not essential to the operation of the roads shall be charged as part of the operating expenses, and that a careful study be made of the proper relation between the salaries of the higher officials and those of their subordinates with a view to readjustments in the interest of the highest efficiency of the service.

There should be constituted a tribunal or tribunals to continue the study of railroad labour problems composed, in part at least, of men experienced in this kind of work, for as to these problems there can be no finality. Conditions are ever changing, and new adjustments must from time to time be made, and there should always be an existing tribunal authorized to take present appropriate action. Many complaints have been made to us by individuals and groups of men which it was impossible for us to investigate, and which should be investigated and redress afforded if the complaints are well founded. Among these are differences of pay where there are no, or only negligible, differences in the services rendered. Conditions of employment are described which, if the descriptions be true, demand amelioration. A Commission for each of the general divisions of the railroad system would undoubtedly be fully occupied for a long time in dealing with such matters. In the meantime the managers or others officials operating the several roads could do much to improve the situation by dealing with the conditions on their respective roads.

Importance of Railroads

It would be impossible to magnify the importance of the American system of railroads in the conduct of this war. The country is vast, and has been developed upon a plan which makes each section dependent upon all others. In no other one particular are we so truly interdependent as in our industrial life. No one section lives to itself alone, and none of our great industries draws its materials from the vicinage or finds its markets near at hand. In a word, our industries are national in an uncommon sense. The steel that is fabricated into a shell in Pennsylvania comes from Minnesota and the copper from Montana. The spruce struts that support the wings of our aeroplanes grow in Oregon, while the cotton which covers the wings comes from the South. These will serve to make clear how entire is our dependence upon the railroads and those who operate them.

That England should want for bread because American railroad equipment was unwisely distributed or unnecessarily immobile is a thing not to be explained to the Englishman, who regards our system of railroads and our method of railroading as the model for the world, excelling either public or private systems elsewhere.

For our needs and for our pride this standard of superiority must be maintained, and to this end no other one thing will so greatly conduce as wisdom and justness in dealing with the actual workers on the roads. What has been here done is perhaps all that can be done now. The spirit which prompted the Commission should not be permitted to languish or to flatten out into expansive inefficiency. The labour problem is never one exclusively of wages or hours. When it does become no more then the human element has gone out of the management, it has become too remote in space or in spirit to make good. The table of wage increases presented in this report we urge should be constructed in the largest spirit of liberality, so as to draw forth from the men a recognition

of that sense of reciprocity which it speaks—good wages for good service. The policy comes from above; its sympathetic application must be left to those below.

Appreciation of Services

We desire in closing this report to express our most sincere appreciation of the services rendered to the Commission by Frederick W. Lehmann, as counsel; by William A. Ryan, as secretary; by Edward J. Barcalo, Riley L. Redpath, and Lathrop Brown, as the board of examiners; and by William A. Hathaway, J. C. Bowen, Charles P. Neill, Fred. A. Burgess, A. O. Wharton, and C. W. Hillman, as special statisticians.

Respectfully submitted,

FRANKLIN K. LANE.
C. C. MCCHORD.
J. HARRY COVINGTON.
WILLIAM R. WILLCOX.

General Order Fixing Wages and Hours

On May 25, Director General McAdoo issued a General Order, which, with certain modifications, put into effect the recommendations of the Railroad Wage Commission. The Order applies to the employees of 164 railroads, and, in addition to such roads, "all terminal, union station, and switching companies, all or a majority of whose stock is owned by railroads named." The Order states further that other railroads may be added to the list, and that the Pullman company, whose status is now being considered, will also be added if it should be decided to place the Pullman company under Federal control.

The Director General deviates from the Railroad Wage Commission on the question of the eight-hour day. "I agree," he says, "with the Commission that it is not applicable at this time, . . . to reduce the actual hours of labour to eight in every line of railroad work. Nevertheless, I am convinced that no further enquiry is needed to demonstrate that the principle of the basic eight-hour day is reasonable and just, and that all further contentions about it should be set at rest by a recognition of that principle as a part of its decision. Recognition of the principle of the basic eight-hour day in railroad service is, therefore, hereby made."

In connection with the employment of women, the order states that "when women are employed their working conditions must be healthful and fitted to their needs. The laws enacted for the Government of their employment must be observed, and their pay, when they do the same class of work as men, shall be the same as men."

Rates of Wages and Methods of Computation

The wage increases have been subdivided in the order as follows:

Rates of wages of railroad employees paid upon (a) monthly basis, (b) daily basis, (c) hourly basis, (d) piece-work basis, (e) mileage basis.

The tables by sections are given below:

Section A.—*Rates of wages of railroad employees paid upon a monthly basis.*

The Director General adopts the scale recommended by the Commission which appears on pages 424-426 of this issue.

Section B.—*Rates of wages of railroad employees paid upon daily basis.*

("Old rates" are those of December, 1915.)

Old rate per day.	New rate per day.	Old rate per day.	New rate per day.	Old rate per day.	New rate per day.
$0.75	$1.52	$3.05	$4.30	$5.35	$6.34
.80	1.57	3.10	4.36	5.40	6.38
.85	1.62	3.15	4.41	5.45	6.43
.90	1.67	3.20	4.48	5.50	6.47
.95	1.72	3.25	4.55	5.55	6.51
1.00	1.77	3.30	4.60	5.60	6.55
1.05	1.82	3.35	4.65	5.65	6.60
1.10	1.87	3.40	4.70	5.70	6.64
1.15	1.92	3.45	4.72	5.75	6.68
1.20	1.97	3.50	4.77	5.80	6.73
1.25	2.02	3.55	4.81	5.85	6.77
1.30	2.07	3.60	4.85	5.90	6.81

1.55	2.32	3.85	5.07	6.15	7.02
1.60	2.37	3.90	5.11	6.20	7.06
1.65	2.42	3.95	5.15	6.25	7.11
1.70	2.47	4.00	5.20	6.30	7.15
1.75	2.52	4.05	5.24	6.35	7.19
1.80	2.57	4.10	5.28	6.40	7.23
1.85	2.65	4.15	5.32	6.45	7.28
1.90	2.72	4.20	5.36	6.50	7.32
1.95	2.77	4.25	5.40	6.55	7.36
2.00	2.83	4.30	5.45	6.60	7.41
2.05	2.89	4.35	5.49	6.65	7.45
2.10	2.96	4.40	5.53	6.70	7.49
2.15	3.03	4.45	5.58	6.75	7.53
2.20	3.10	4.50	5.62	6.80	7.58
2.25	3.17	4.55	5.66	6.85	7.62
2.30	3.24	4.60	5.71	6.90	7.66
2.35	3.31	4.65	5.75	6.95	7.70
2.40	3.38	4.70	5.79	7.00	7.75
2.45	3.45	4.75	5.83	7.05	7.79
2.50	3.53	4.80	5.88	7.10	7.83
2.55	3.60	4.85	5.92	7.15	7.88
2.60	3.67	4.90	5.96	7.20	7.91
2.65	3.74	4.95	6.00	7.25	7.96
2.70	3.81	5.00	6.05	7.30	8.00
2.75	3.88	5.05	6.09	7.35	8.04
2.80	3.95	5.10	6.13	7.40	8.08
2.85	4.02	5.15	6.17	7.45	8.13
2.90	4.09	5.20	6.21	7.50	8.17
2.95	4.16	5.25	6.26	7.55	8.21
3.00	4.23	5.30	6.30	7.60	8.25

For common labour paid by the day the scale of new rates per day shown shall apply, with the provision, however, that as a minimum 20 cents per 8-hour day, 22½ cents per 9-hour day, 25 cents per 10-hour day, 27½ cents per 11-hour day, and 30 cents per 12-hour day will be added to the rates paid per day as of December 31, 1917.

METHOD OF APPLYING INCREASES TO DAILY RATES.

(1) Employee, December, 1915, $3:

Increased to new rate of $4.23 per day	$109.98
January 1, 1918, his pay was raised for same work to $3.50 per day, equal per month to	91.00
Difference in pay: 1 month	18.98
5 months	94.90
An 8-hour 26-day month both years. Worked 62 hours overtime, at new 1918 rate .....52.9c. —$32.80	
Was paid 62 hours overtime at..37.5c. — 23.25	
	9.55
Total back pay due January 1 to May 31, 1918	104.45

(2) Employee "C" was employed in 1918, but not in 1915. Rate of pay on the district where he is employed in 1918, in 1915 was $1.10 per day. The 1918 rate of pay is, on the same district, $1.50 per day. The new rate is $1.87 per day. He will, therefore, be entitled to receive from January 1, 1918, to May 31, 1918, 37 cents per day additional for each day he worked in that period.

Section C.—*Rates of wages of railroad employees paid upon hourly basis.*

While it is expected that the Board of Railroad Wages and Working Conditions hereinafter created shall give consideration to all questions of inequality as between individuals and classes of employees throughout, sufficient information is available to justify certain conclusions with respect to the mechanical crafts, and in the case of machinists, boilermakers, blacksmiths and other shop mechanics who have been receiving the same hourly rates, the increases named in this order shall apply, with a minimum wage of 55 cents per hour.

It is recognized that this may still leave among shop employees certain inequalities as to individual employees, to which the Board of Railroad Wages and Working Conditions will give prompt consideration.

For common labour paid by the hour, the scale named herein shall apply, with the provision, however, that as a minimum 2½ cents per hour will be added to the rates paid per hour, as of December 31, 1917.

METHOD OF APPLYING INCREASES TO HOURLY RATES.

(1) Machinist worked in January, 1918, 8 hours per day, 27 days, total 216 hours straight time.

The rate of pay for this position in December, 1915, was 34 cents per hour; new rate under this order 48 cents per hour, but with minimum rate of 55 cents per hour as herein ordered, will receive	$118.80	
In January, 1918, his rate of pay was 37½ cents per hour, for 216 hours, equals	81.00	
Difference 1 month	$37.80	
On basis of working same amount straight time each, month for 5 months (January 1 to May 31)	189.00	
Also worked in same period 90 hours overtime at time and one-half, new 55 cents minimum rate, or 82½ cents, equals	$74.25	
Was paid 56¼ cents (time and one-half)	50.63	
		23.62
Balance due January 1 to May 31, 1918		$212.62

(2) Machinist worked in January, 1918, 10 hours per day, 26 days; total, 260 hours straight time.

The rate of pay for this position in 1915 was 34 cents per hour; new rate under this order, 48 cents per hour, but with minimum rate of 55 cents per hour as herein ordered will receive	$143.00	
In January, 1918, his rate of pay was 37½ cents per hour; 260 hours equals	97.50	
Difference 1 month	$45.50	
On basis of working same amount of straight time each month for 5 months (January 1 to May 31)	227.50	
Also worked in same period 90 hours overtime at pro rata rate, new 55-cent minimum rate, equals	$49.50	
Was paid at 37½-cent rate pro rata overtime, on	33.75	
		15.75
Balance due January 1 to May 31, 1918		$243.25

(3) Machinist "D" was employed in the same shop in December, 1915, and in 1918 on the same class of work. His hourly rate in December, 1915, was 35 cents for 9 hours, 26 days a month. He was paid for overtime and Sunday work at time and one-half. On January 1, 1918, his hours were reduced to 8 and his rate increased to 40 cents. The new hourly rate applicable to his 1915 rate, viz., 49½ cents being less than the minimum of 55 cents, his new rate will be 55 cents per hour. In 1918, from January 1 to May 31, he worked 234 hours per month, or an average of one hour overtime daily on the 1918 schedule. This for five months gives him 130 hours overtime. He has been paid as follows:

1,040 hours straight time, at 40 cents	$416.00
130 hours overtime, at 60 cents	78.00
Total	$494.00
His back pay will be compulsed as follows:	
1,040 hours straight time, at 55 cents	$572.00
130 hours overtime, at 82½ cents	107.25
Total	$679.25
Deduct payment at 1918 rates	494.00
Back pay due	$185.25

and his future rate per hour will be 55 cents.

(4) In the case of employee "E," who was employed in a shop where the rate for his position was 35 cents per hour for 8 hours' work in 1915, with time and one-half for overtime, but in the same position and same shop with the same hours in 1918 his rate is 45 cents per hour; his earnings in 1915 in the standard 208-hour month would be $72.80 per month, and he would be entitled to the new hourly rate of 49½ cents per hour. His straight time and overtime earnings and back pay would be computed in exactly the same manner as machinist "D." The principles illustrated will apply to all men paid by the hour, whatever their occupation may be.

Section D.—*Rates of wages of railroad employees paid upon piecework basis.*

METHOD OF APPLYING INCREASES TO PIECE RATES.

(1) The pieceworker shall receive for each hour worked the same increase per hour as is awarded to the hourly worker engaged in similar employment in the same shop.

(2) If the hourly rate has been increased since 1915 to an amount greater than the increase herein fixed, then the higher rate shall prevail.

(3) Where there was no piece rate for an item or operation in the piece-rate schedule of 1915, adjust the current price by such an amount as a similar item or operation has been increased or decreased since December 31, 1915, or as near such a plan as practicable.

(4) It is understood that the application of this order shall not, in any case, operate to reduce current earnings.

(5) When a pieceworker works overtime or undertime, he shall receive that proportion of the increase provided in the schedule which the time actually worked bears to the normal time in the position.

(6) Overtime is not to be considered solely as the number of hours employed in excess of the normal hours per month in the position, but rather the time employed in excess of the normal hours per day.

(7) Employee "F" was employed under a piecework schedule in a shop where the basic hourly rate was 35 cents for eight hours, with time and one-half for overtime. This rate under the plan illustrated above will be increased to 49½ cents per hour. Difference, 14½ cents.

Regardless of the schedule of piece rates under which he is paid, under this order "F" will be entitled to receive 14½ cents per hour in addition to his piecework earnings for every hour worked in 1918 unless the hourly rate shall in the interim have been raised and a proportionate increase made in the piecework schedule.

For example: Assume that "F" made $90 in December, 1915, at his piecework. At the hourly rate he would have earned only $72.80, and his hourly rate must therefore be increased to 49½ cents.

If, in January, 1918, he has attained sufficient skill to earn $100 on the same piecework schedule, he will be entitled to receive, nevertheless, 14½ cents per hour for each hour of straight time worked, and for each hour of overtime, 21¾ cents additional (if time and one-half for overtime is in effect).

Assume that in the five months, January 1 to May 31, "F" has worked 1,040 hours straight time, and 130 hours overtime, and has, at his piecework schedule earned $500. He will be entitled, nevertheless, to receive as back pay, the following amount:

1,040 hours at 14½ cents per hour	$150.80
130 hours at 21¾ cents per hour	28.28
	$179.08

But if in January, 1918, the basic hourly rate had been increased to 50 cents, and this increase had been correspondingly expressed in his piecework schedule, he would be entitled to no back pay. If, on the other hand, the hourly rate had been increased from 35 cents in 1915 to 45 on January 1, 1918, and this increase had been expressed in a corresponding increase in the piecework schedule, then "F" would be entitled to receive back pay at 4½ cents per hour for straight time and 6¾ cents per hour overtime.

If the practice in the shop, however, had been to pay pro rata for overtime, then the rate for such overtime since January 1, 1918, would be pro rata at 4½ cents, or 14½ cents per hour, according to whether piece rates had been or had not been increased.

(8) Employee's December, 1915, rate was 38½ cents, which rate in this order for 8 hours per day entitles him to 54¼ cents per hour. His basic rate had, on January 1, 1918, been raised to 42½ cents per hour. Piecework rates had not been raised in the interval. This man earned in 208 hours $100. He is entitled to a raise of 11¾ cents per hour.

11¾ cents x 208:
1 month.....$ 24.44
5 months..... 122.20

The following rates will apply "per day" or its established equivalent in "miles":

2.75	3.84	3.21	4.48	5.37	7.49
2.78	3.88	3.25	4.53	....	....

If there were mileage rates in effect in December, 1915, which are not included in the above tables, they shall be increased in accordance with the following percentages:

	Per cent.
Road passenger engineers and motormen	11¼
Road passenger firemen and helpers	28¾
Road passenger conductors	15½
Road passenger baggagemen	38¼
Road passenger brakemen and flagmen	39½
Road freight engineers and motormen	15½
Road freight firemen and helpers	34¼
Road freight conductors	20½
Road freight brakemen and flagmen	39½

METHOD OF APPLYING INCREASES TO MILEAGE BASIS.

(1) Rates for overtime as now in effect, whether providing for pro rata basis or in excess thereof, shall be increased by same percentage as straight time rates.

(2) Miles run, in excess of the established equivalent of a day (or of a month where such basis prevails) shall be paid for pro rata.

(3) If any increase has been made in the mileage rates of employees paid on that basis in December, 1915, it will be understood that the per cent of increase allowed by this order is inclusive of such interim increases and that the new rate is computed from the base rates of December, 1915.

(4) Example (1): Engineer "G," passenger service, received $4.25 per day of 100 miles in 10 hours in December, 1915. According to this plan, although in 1918 this rate was $4.25 per 100 miles in 8 hours, the rate will be increased 11¼ per cent to $4.73 per 100 miles ($4.7281 equalized as $4.73). He will be entitled to back pay for every 100 miles run at the rate of 48 cents per 100 miles.

Example (2):

Conductor through freight:		
2,950 miles at 4 cents, at new rate, would entitle him to 4.82 cents, or		$142.19
He was paid		118.00
Leaving to be paid		$2419
He made 26 hours and 10 minutes overtime, equivalent, on basis of 12½ miles per hour, to 327 miles, which, at the increased rate of 4.82 cents per mile, entitles him to	$15.76	
Was paid, at 4 cents per mile	13.08	
A difference of		2.68
One month		$26.87
Five months		134.35

This principle will apply to all employees of the train and engine service who are paid on the mileage basis. There are some railroads in the United States upon which men in the train and engine service are paid on a monthly wage. Such employees will be entitled to the increased rates named in section A.

(5) Since the application of the increases hereby granted will tend in individual cases to give increases greater than is appropriate or necessary to those train and engine men who make abnormal amounts of mileage and who, therefore, make already abnormally high monthly earnings, the officials of each railroad shall take up with the respective committees of train and engine men the limitation of mileage made per month by employees paid upon a mileage basis, so as to prevent employees now making such abnormal mileage profiting by the wage increases herein fixed greatly in excess of employees habitually making a normal amount of mileage. It shall be understood that any such limitation of mileage so arrived at shall not preclude the officials of a railroad from requiring a train or engine man to make mileage in excess of this limitation when the necessities of the service require it. The officials of each railroad will report to the regional director such arrangements agreed upon and any cases of failure to reach such agreements.

Basic Eight-hour Day

The recognition of the basic eight-hour day, as established in the Order, does not reduce the hours of employment as at present worked, nor does it increase the total compensation fixed in the Order for the number of hours now worked in excess of eight hours. The following examples illustrate the methods of applying the wage increase to the basic eight-hour day:

(1) Position which in December, 1915, paid $2 per 9-hour day:

Old rate, $2 per day.
New rate, $2.51 for 8-hour basic day.
Overtime, 31.4 cents per hour.
New rate, $2.83 for 9-hour service; 83 cents increase.

(2) Position which in December, 1915, paid $2.40 per 10-hour day:

Old rate, $2.40 per day.
New rate, $2.70 for 8-hour basic day.
Overtime, $0.68—2 hours, at 34 cents per hour.
New rate, $3.38 for 10-hour service; 98 cents increase.

(3) Position which in December, 1915, paid $75 per month, working 10 hours per day for 26 working days:

Old rate, $75 per month.
New rate, $84.60 per month basic 8-hour day.
Overtime, $21.15—52 hours, at 40.67 cents per hour.
New rate, $105.75 for same service; increase $30.75.

(4) Position which in December, 1915, paid $100 per month, working 11 hours per day for 31 working days:

Old rate, $100 per month.
New rate, $95.82 per month basic 8-hour day.
Overtime, $35.93—93 hours, at 38.64 cents per hour.
New rate, $131.75 for same service; increase $31.75.

While this does not actually reduce the hours of employment now in effect, or increase the compensation recommended by the Wage Commission, it does establish the basic eight-hour day upon which further wage adjustments will be based.

Wherever wages or rates of overtime are now higher than those fixed by the Order they will remain undisturbed, and no adjustment of hours of work will be permitted which will serve to deprive any employee of the full amount of the increased compensation to which he is now entitled under the Order.

The Order also creates a Board of Railway Wages and Working Conditions, whose duties will be to hear and investigate matters presented by railway employees, or their representatives, af-

fecting wages and working conditions; and to also hear and investigate matters referred to it by the Director General. The Board is solely an Advisory Board, and will submit its recommendations to the Director General for his determination.

Questions arising out of an order of the Director General will be referred to the Railway Board of Adjustment No. 1, and other similar boards when created; but decisions shall not be rendered by such boards until after approval by the Director General.

FURTHER REGULATIONS AFFECTING WESTERN COAL MINERS

DURING the month, Mr. W. H. Armstrong, Director of Coal Operations for the mines in southeastern British Columbia and southwestern Alberta, issued a number of orders in regard to working conditions and scales of pay in several of the mines. (See May, 1918, issue, page 367, and preceding issues.)

An order affecting the Crow's Nest Pass Coal Company provided that at No. 8 mine at Michel the drivers in certain wet places should be paid according to the "wet places" clause of the tentative agreement until such clause ceases to be applicable to the places in question.

Another order issued affects the Crow's Nest Pass Coal Company. A controversy arose between the company and the miners in connection with the erection of, and payment for, centre-posts put in at a greater distance than required by the special rules. The Director has ordered that all centre-posts in entries put up further from the face than the special rules demand shall be paid for.

Another order applied to all the mines of the Crow's Nest Pass Coal Company at Michel. An application having been made for a price where dump cars are used in lieu of the ordinary mine cars going to the work face; the Director, upon investigation, found that at the Michel mines no rate had been provided for pushing the coal in the dump car from the face and dumping it into the regular mine car. He, therefore, ordered that when small dump cars are used in this manner, the price of 60 cents per lineal yard shall be paid up to a distance of 100 feet.

An order affecting the Pacific Pass mine at Lovett. A fireman working 10 hours per day claims that he should be paid at the rate per hour as specified in the wage schedule for nine hours per day. The Director sustained the fireman and ruled accordingly.

Another order affecting the Pacific Pass mine at Lovett is in connection with contract mining, and fixes rate for pushing cars, over-shovelling and unavoidable loss of time.

An order affecting the Franco-Canadian Collieries, Limited, in Frank, Alta., applies to contract mining, and fixes the sliding scale to be paid miners working on the shaft counter-entry.

REPORTS OF EMPLOYMENT OFFICES

DURING April there was an increase of 56.4 per cent in the demand for labour as compared with March on the basis of the daily average of vacancies notified to 110 employment offices (81 commercial, 17 public and 12 philanthropic). As compared with the demand reported for April of last year by practically identical offices, there was an increase of 16.6 per cent. The total number of vacancies notified to all offices in April was 46,157, a daily average of

1789.9, as compared with 1144.5 in March, 1918, and with 1534.5 in April, 1917. The number of persons placed was 22,536, a daily average of 882.1, as compared with averages of 607.6 and 882.9 in the preceding month and in April of last year. The proportion of the total vacancies filled to the total vacancies notified was 49.3 per cent as compared with 53.1 per cent in March and with 57.5 per cent in April, 1917.

As to employment for woman and girl workers, the number of vacancies notified was 6,831, a daily average of 268.7, as compared with 240.7 in March and with 296.4 in April, 1917. The number of such workers placed was 2,471, a daily average of 97.4, as compared with 85.7 in the preceding month and with 119.5 in the corresponding period of 1917.

The proportion of vacancies filled to vacancies notified for men and boys was 51.0 per cent, and for women and girls 36.2 per cent, as compared with 54.2 per cent and 34.3 per cent, respectively, for March, and with 60.4 per cent and 39.7 per cent, respectively, for April of a year ago.

The five principal centres of labour distribution—Montreal, Toronto, Winnipeg, Edmonton and Vancouver—all showed considerable increases in the demand for labour as compared with March, while of these cities Montreal was the only one to report a decline in comparison with April of last year. Of the smaller centres, London, Fort William and Port Arthur, Saskatoon and Calgary all recorded increases, both as compared with the preceding month and with April, 1917.

The number of persons who obtained casual employment through the Salvation Army, the Young Women's Christian Association and other offices, was 1,779, a daily average of 70.5, as compared with averages of 69.8 in March and 62.7 in April, 1917. The number of casual jobs secured was 5,955, a daily average of 237.9, as compared with 163.9 in the preceding month and with 166.7 in April of last year .

EMPLOYMENT FOR CIVIC EMPLOYEES IN SIXTEEN CITIES

REPORTS from 16 cities showing the number of workers temporarily engaged and the wages paid these employees during the first pay-roll period of two weeks in May, showed a decrease of about 19 per cent in the number of workers and an increase of nearly 2 per cent in the wages paid. In May, 7,897 persons were temporarily employed in the two weeks and the pay-rolls amounted to $269,227.65, as compared with 9,758 employees and an aggregate pay-roll of $264,060.87 in April. St. John, Ottawa, Toronto, Hamilton, Moose Jaw, Saskatoon, Calgary and Victoria all showed increases, both in the number of workers and in the wages paid. Montreal, London, Brandon, Regina, Edmonton and Vancouver reported smaller numbers of employees and smaller pay-rolls, while at Winnipeg fewer men were engaged, but the amount of their wages was larger.

The accompanying table summarizes reports from the nine cities for which returns are available since July, 1916. The table shows that as regards the number of workers a decline began in January, 1917, and continued almost without interruption to November. During December, January, February and March, an upward tendency was evidenced, but in April and May there was again a decrease. As to wages, the total reported for May is smaller than any recorded since January, 1918.

EMPLOYMENT (BOTH CONTRACT AND MUNICIPAL WORK) AFFORDED WORKPEOPLE TEMPORARILY EMPLOYED BY NINE CITY CORPORATIONS, JULY, 1916—MAY, 1918.

EMPLOYMENT IN THE BUILDING TRADES AS INDICATED BY BUILDING PERMITS

EMPLOYMENT in the building trades as indicated by the value of building permits issued in 35 cities showed an increase during May as compared with the previous month, the total value of building permits rising from $3,024,785 in April to $4,838,953 in May, an increase of $1,814,168, or 59.9 per cent. None of the provinces recorded a decline, while large gains were made in New Brunswick, Saskatchewan, Ontario and Manitoba. As compared with the corresponding month of 1917, there was an increase of 26.2 per cent, the value for May, 1917, being $3,833,064. In this comparison, Manitoba and Alberta were the

ESTIMATED COST OF BUILDING WORK AS INDICATED BY BUILDING PERMITS ISSUED IN THIRTY-FIVE CITIES.

only provinces to report decreases. Noteworthy gains were made in British Columbia, Saskatchewan and New Brunswick.

Of the larger cities—Montreal-Maisonneuve, Toronto, Winnipeg and Vancouver—Toronto and Vancouver showed increases, both as compared with the preceding month and with May, 1917, while at Montreal and Winnipeg gains were recorded in comparison with April and declines in comparison with May of last year. Of the smaller centres, St. John, Quebec, Brantford, Port Arthur and Moose Jaw all reported considerable increases in both cases.

PRICES, RETAIL AND WHOLESALE, IN CANADA, MAY, 1918, AND IN OTHER COUNTRIES

THE feature of the month in prices was the advance in meats and live-stock. Dairy products were slightly lower, but were beginning to rise in some markets. The usual spring decrease in milk did not occur, nor in coal.

In retail prices of food the cost of a list of 29 staple foods for a family of five averaged $12.66, as compared with $12.57 in April, $11.82 in May, 1917, $8.37 in May, 1916, and $7.42 in May, 1914. Anthracite coal was slightly lower, also bituminous coal and soft wood, but hardwood and coal oil were slightly higher. Rent advanced in several of the cities. In Nova Scotia the family food budget averaged $12.46, as compared with $12.80 in April, there being substantial decreases in eggs, butter and potatoes. In New Brunswick there was also a decrease. In Quebec the decrease was slight, but in the other provinces there were substantial increases, as the rise in meats was greatest in the West and the decreases in potatoes were greatest in the Maritime Provinces.

In wholesale prices the index number reached 275.8 as compared with 269.4 in April, 240.0 in May, 1917, and 136.3 in May, 1914, indicating that the level of wholesale prices was twice as high as at the beginning of the war. The chief increases for the month appeared in the groups: Animals and Meats, Hides, Leathers, Boots and Shoes, Metals, and Textiles, with slight increases in several of the other groups. In Grains and Fodder and Fruits and Vegetables, there were substantial decreases with a slight decrease in dairy products.

The weekly budget for a family of five, including staple foods, laundry starch, coal, wood and coal oil, and rent, is based upon the estimated importance of the various commodities included, these being slight modifications of those employed in similar calculations by various official bodies. For some articles comparatively large quantities are included, owing to the omission of other important foods of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. As market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly the relative proportion of expenditure on the various foods therefore tends to be maintained. In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the difference in quality. It is estimated that these calculations represent from 60 to 80 per cent of the expenditure of an ordinary family, according to the total income.

The index number of wholesale prices is based upon the quotations of 271 commodities, one having been dropped in 1915, and is the simple average of the percentages which the current prices of

the several commodities bear to their average prices for the base period, 1890-1899, these being therefore made equal to 100.

The accompanying tables and notes give details as to the prices movement during the month and as compared with the same month in the previous year. The table of retail prices shows the prices of some 30 foods at the middle of the month in 60 localities in Canada having a population of 10,000 or over. Quotations are obtained by the correspondents of the *Labour Gazette* from dealers doing a considerable trade with workingmen. All prices are for delivered goods. The rates for rent are for six-roomed houses in districts occupied by workingmen.

Retail Prices

In meats a considerable increase occurred. Sirloin steak averaged 36.7c per pound for the Dominion as compared with 33.9c in April and 31.9c in January. In British Columbia the average price was up to 43.3c as compared with 32.2c in January. Similar advances occurred in round steak, rib roast, and shoulder roast. At Sydney, sirloin steak was up from 35c to 38c per pound. At Belleville the price rose from 32c to 40c. At Galt the price was up from 30c per pound to 35c; at Winnipeg from 35c to 42c; at Nanaimo from 35c to 45c; and at Nelson and Trail from 40c per pound to 48c. In Alberta cities the price was up from 35c to 40c, except at Edmonton. Toward the end of the month advances occurred in many of the cities. The least increases in meats appeared in veal. Mutton was higher in many of the cities, the average being up to 34.2c as compared with 33.2c in April and 31.2c in January. Pork products were up on an average of 2c per pound. Bacon averaged 50c per pound as compared with 48.1c in April and 44.8c in January. Fish averaged higher. Lard averaged 36c per pound as compared with 34.7c in April.

Eggs were substantially lower in the average, fresh eggs being down to 43.9 as compared with 46c in April and 51.2c in January. Milk was unchanged in the average, whereas a substantial decrease usually occurs in the spring. The price was lower at Sherbrooke, St. Hyacinthe and Montreal, but advanced at Nelson, B.C. Butter averaged slightly lower, being down in several of the cities. New cheese was slightly lower.

Bread and flour were steady. Tapioca was up to 25c per pound in several cities in the Maritime Provinces and to 20c per pound in several of the Ontario cities. In the Western provinces, however, 17½c a pound was the prevailing price.

Canned vegetables changed very little, advances occurring in only a few cities. Beans were steady, with slight increases at Sorel, Ottawa, Belleville, St. Catharines and Windsor. Evaporated apples were off the market in many of the cities, but were steady in price. Sugar was unchanged in most of the cities, but showed slight increases in 11 cities. Tea was considerably higher, owing to the war tax of 10c per pound. In some localities this increase in price occurred earlier than in others. Coffee was also higher. Potatoes were lower in the average as a considerable decrease occurred in the Maritime Provinces, and there were decreases in several Ontario cities.

Anthracite coal was slightly higher in some of the cities, but slightly lower in others. The usual decrease in the spring did not occur in most of the cities owing to the higher costs of transportation and delivery, and the wholesale price was down only 10c per ton instead of 25c or more. Soft coal was also higher in some cities and lower in others. Hardwood advanced in several localities, but there were reductions in others, so that the average was almost unchanged. Soft wood averaged slightly lower.

Rent, for six-roomed workingmen's houses, was higher in Moncton, St. John, Kingston, Orillia, Chatham, Regina and Vancouver.

*December only. †Charlottetown and Saskatoon omitted. §Saskatoon omitted.

Wholesale Prices.

GRAINS AND FODDER. — Wheat was steady at the levels fixed in the autumn of 1917. The opening of lake navigation lowered the cost of freight from Fort William to Toronto and Montreal, reducing prices of western grain slightly. Barley and oats declined considerably at Winnipeg, the former being down to $1.30 per bushel and the latter to 81½c. Ontario barley declined from $1.55 to $1.42 and oats from 87c to 81c. American corn was down from $1.90 to $1.80 per bushel at Toronto. Flaxseed fell from $3.86 to $3.70. Rye declined from $2.65 per bushel to $2.10. Hay declined $1.00 at Toronto to $16.00-17.00 per ton, and at Montreal the price also fell toward the end of the month. Bran and shorts fell to $35.00 and $40.00 per ton at Toronto, the same level as prior to April, the 40c per ton added in April for increased freight being removed on the opening of lake navigation.

ANIMALS AND MEATS. — Considerable advances occurred in nearly all lines. At Winnipeg the best butcher cattle rose from $15.00 to $16.50, and at Toronto from $15.00 to $16.35. In the last week, however, prices eased off slightly. Dressed beef, hindquarters, advanced from 27c per pound to 30c. Live hogs were up to 19½c per pound. Dressed hogs advanced to 27½c per pound. Mess pork was up to $58.00 per barrel. Sheep advanced from $16.00 per hundred to $19.00. Lamb and mutton continued at the high levels reached in the last week of April.

DAIRY PRODUCTS. — Butter, finest creamery, at Montreal, eased off from 46c to 43c per pound in the first week but rose to 45c in the second week. In the following week the price receded 1c, and in the last week ½c, leaving the level at 43½c. Creamery solids at Toronto declined from 48-49c per pound to 44-45c. Dairy prints were steady at Toronto, at 38-43c. Cheese was higher, the price having been fixed by the Commission at 23c instead of 21¾c, the price fixed in the spring of 1917. Eggs were down to 43-44c at Montreal, but rose to 44-45c. At Toronto eggs declined from 44-46c to 44-45c.

FISH.—The price of new Lunenburg bank cod rose to $12.50 per quintal. The export market was reported firm, although conditions at Porto Rico were uncertain, while other West Indian and the South American markets were good. The prevalence of ice in the Gulf of St. Lawrence was reported to be keeping back the Lunenburg fleet from reaching the banks for the summer catch. The catch of lobsters was reported to be fairly good. At Toronto, salmon trout was selling at 15-16c per pound and whitefish at 17-18c.

FRUITS AND VEGETABLES.—Apples at Toronto were selling at from $4.50 per barrel to $7.00 according to variety. Bananas were higher at $4.00-4.50 per bunch. Difficulty in securing transportation from the West Indies continued. Lemons were firmer at $5.75-6.00 per box, and oranges were higher at $6.00-7.00 per box. Currants were higher at 29-32½c for Grecian and 30-35c for Californian varieties. Potatoes were down to $1.65 per bag at Toronto for Ontario stock and to $1.75-1.90 for New Brunswick stock. At Montreal, potatoes were down to $1.50 in car lots for Green Mountains, but rose to $1.60. Other varieties were as low as $1.45.

INDEX NUMBERS OF WHOLESALE PRICES BY GROUPS OF COMMODITIES FOR MAY, 1918, APRIL, 1918, MAY, 1917, 1916, 1915, 1914, AND 1913.

(Average price 1890–1899—100.)

*Preliminary figures. *Five commodities off the market, fruits, vegetables, etc. One line of spelter was dropped in 1915.

Onions were steady at $2.50 per 100 pounds at Montreal. Canned corn and peas were slightly lower.

MISCELLANEOUS FOODS.—Spring wheat and blended flour were slightly lower at Toronto owing to cheaper freight after the opening of navigation. Oatmeal and rolled oats were also lower. Rice was firmer at 9c per pound. Tea advanced 10c per pound owing to the war tax recently imposed, and coffee was higher from 5c to 6c per pound. Sugar was higher in price for the products of some refineries, selling from $8.87 to $9.02 per hundred at Toronto in barrels. Molasses was also higher at $1.00-1.03 per gallon at Montreal. Maple sugar was up to 22-23c per pound. Cream of tartar rose to 90-92c per pound.

TEXTILES.—Unwashed wool was up to 60-63c at Toronto. Raw cotton declined to 26-27c per pound at New York. Gray cotton, prints and coloured cottons averaged higher. Raw silk, Japanese, advanced to $6.85 per pound. Spool silk advanced from 48c per dozen to 52c, and machine silk from $10.90 per pound to $11.25. Jute was unchanged on the basis of the price fixed in Scotland. Flax fibre advanced to 55-65c per pound, a rise of 5c, and tow was firmer at 22-25c per pound. Oilcloth, table and floor, advanced about 10 per cent.

HIDES, LEATHER, BOOTS AND SHOES. — The market had been very weak for some months, but owing to heavy purchasing by Governments and the trade, and also owing to restrictions on shipments, prices of hides advanced steeply, recovering the loss in recent months, and the leather markets became firmer. At Toronto, the best hides had sunk to 10½c per pound, but rose to 16c, nearly as high as in January. Calfskins rose from 20c to 38c. Some lines of boots were higher, particularly coloured leathers, advancing from 10c to 25c per pair. Kip boots rose 25c per pair, and black box calf 5c per pair.

METALS AND IMPLEMENTS. — Black sheets were higher at $8.05 per hundred. Copper was down 1c to 29-30c per pound. Lead was firmer at 9½-10c per pound. At New York the price of nickle was settled at 40-45c per pound for the trade. Quicksilver was up at $117.50-120.00 per flask of 75 pounds. Bar silver was higher at 99½c per ounce. Solder bar was higher at 66-70c per pound. Tin rose from $1.00 per pound to $1.50. Coil chain was up to $12.15, the same level as in March.

FUEL AND LIGHTING. — Bituminous coal rose to $8.50 per ton at Montreal. Anthracite coal was down 10c to $8.90. On the Pacific coast bituminous coal averaged higher at the different mines. Calcium carbide was higher at $85.00 per ton. A line of matches were slightly higher at $6.75 per gross.

BUILDING MATERIALS.—In lumber the demand was lower in Ontario, as there were plenty of cars and the retailers had been able to get delivery of stock previously ordered. Little building, however, was being undertaken owing to the high cost of labour and materials. Hardwood was in better demand for furniture factories, agricultural implements, and piano and gramophone industries. Oak and ash were reported scarce. The export trade to the United States was reported fair. Reports as to the fixing of prices by the United States Government on certain grades indicated that the export from Canada might not be pro-

fitable. In New Brunswick the drives were reported to have had good water conditions. The logs in the St. John river were bringing the highest prices ever known, spruce deal logs commanding $20.00 per M. feet. Mills were reported to be competing for supplies owing to the restricted cut. Turpentine was high at 72½-78c per gallon. Paints rose to $3.80 per gallon.

HOUSE FURNISHINGS.—Wooden furniture advanced 10 per cent owing to the high cost of labour and materials. Wooden pails rose from $4.00 to $4.20 per dozen. Sad irons advanced from $1.90 to $2.30 per set. Sulphur was down from 4½c to 3¼c per pound.

MISCELLANEOUS.—In raw furs, muskrat advanced to $1.00-1.10 per skin. A line of smoking tobacco advanced from 92c to $1.44 per pound, following the imposition of an additional tax by the Dominion Parliament. Sulphite pulp rose to $120.00 per ton for bleached, and sulphite, news grade, rose to $65.00-75.00 per ton. Raw rubber advanced to 55-58c per pound.

Prices in Other Countries

In the United Kingdom the retail prices of food were reported to be less than one per cent higher on May 1 than on April 1. In the *Labour Gazette* of the Ministry of Labour, the principal changes were a decrease of 18 per cent in the price of milk, when summer prices were fixed, and an increase of 18 per cent in sugar, owing to an increase in the duty. It was estimated that while the cost of a uniform budget of foods had risen 107 per cent since the war began, owing to changes in consumption, the average expenditure on these foods had risen by only 41 per cent. The general increase in the prices of goods for a workingman's family since the war began was estimated to be between 95 and 100 per cent, of which 7 per cent was due to taxes. The index number of wholesale prices of the *Economist* showed the general level of prices at the end of April to be above any previous record, but it was pointed out that except in the miscellaneous food group, higher levels than in April had appeared previously in each group. In cereals and meats the level was substantially lower than in 1917, being down from 1432 in June, 1917, to 1244 at the end of April, 1917, which, however, was higher than in January, 1918, when the level was 1221½. In textiles there was a decline in cotton.

In the United States the wholesale prices of foods were lower, as shown by the *Annalist* and *Gibson* index numbers, but the food groups in the index numbers of *Bradstreet* and *Dun* showed lower levels for breadstuffs and dairy products, but higher levels for livestock, meats and other foods. All the groups of materials showed higher levels. Extensive purchasing of supplies by the United States Government was reported as an important factor in raising prices, while on the other hand increasing regulation of prices by the Government caused decreases in some commodities and prevented increases in others.

In France, the index number of whole-

a July of each year. *b* Foods. *c* 1901-1900—. *Quarter beginning that month.

sale prices of the General Statistical Office reached 288.2 for December, 1917, as compared with 120.3 for the third quarter of 1914. The group index number of 20 foods reached 288.2 as compared with 114.1 in 1914, and 25 materials rose to 402.6 as compared with 114.1 in 1914.

FAIR WAGES CONTRACTS, MAY, 1918

DURING May the Department of Labour received for insertion in the *Labour Gazette* information relative to seven fair wage contracts, four of which were awarded by the Department of Railways and Canals and the remaining three by the Department of Public Works. All but one of the contracts contained the usual fair wage clause, a fair wage schedule being contained in the other.

DEPARTMENT OF RAILWAYS AND CANALS.—Manufacture and delivery of one standard 85 ft. through plate girder turntable at Fairview, N.S., for the Canadian Government Railways. Name of contractors, The Canadian Bridge Company, Limited, Walkerville, Ont. Date of contract, May 10, 1918. Amount of contract, $14,626.50.

DEPARTMENT OF RAILWAYS AND CANALS.—Erection of a modified No. 5 station building at St. Octave, Que., for the Canadian Government Railways. Name of contractor, Arthur L. Landry, St. Octave, Que. Date of contract, May 20, 1918. Amount of contract, $5,900.

DEPARTMENT OF RAILWAYS AND CANALS.—Erection of a mail baggage and express building at Sackville, N.B., for the Canadian Government Railways. Name of contractor, Peter G. Clark, Summerside, P.E.I. Date of contract, May 20, 1918. Amount of contract, $6,950.

DEPARTMENT OF RAILWAYS AND CANALS.—Construction of a timber guard for cribs 7 and 8 at Port Borden, P.E.I., car ferry terminals. Name of contractor, Peter G. Clark, Summerside, P.E.I. Date of contract, May 20, 1918. Amount of contract, $2,860.

DEPARTMENT OF PUBLIC WORKS. — Restoration to wood roofs and general repairs to drill hall, Halifax, N.S. Name of contractors, Falconer and McDonald, Halifax, N.S. Date of contract, April 22, 1918. Amount of contract, $19,971.

DEPARTMENT OF PUBLIC WORKS. — Alterations and additions to public building, Farnham, Que. Name of contractor, S. P. Saxe, Brigham, Que. Date of contract, May 4, 1918. Amount of contract, $3,950.

The usual fair wage clause was inserted in the above contracts.

DEPARTMENT OF PUBLIC WORKS. — Structural steel work for new Government office building, Ottawa. Name of contractors, Dominion Bridge Company, Limited, Montreal, Que. Date of contract, May 15, 1918. Amount of contract, $334,650.

Trade or class of labour	Rate of wages Not less than the following rate:
Carpenters	50c. per hour, 9 hours per day

Rock drillers	45c " 9 "
Tool smiths	60c " 9 "
Tool smiths' helpers	40c " 9 "
Masons' pointers	65c " 8 "
Driver with one horse and cart	$4.00 per day of 9 hours.
Driver with two horses and wagon	6.75 per day of 9 hours.

POST OFFICE DEPARTMENT.—The following is a statement of payments made in April for supplies ordered by the Post Office Department subject to the Regulations for the Suppression of the Sweating System, the securing of fair wages and the performance of work under sanitary conditions:

Nature of Orders.	Amount of Orders.
Supplying new mail bags	$ 531.25
Repairing mail bags	4,075.91
Supplying mail bag fittings	4,174.20
Repairing post office scales	35.25
Supplying stamping material	1,396.37
Making and repairing rubber stamps	57.38
Making metal dating stamps and type and making other hand stamps and brass crown seals	480.95
Making and supplying articles of official uniforms; also cloth supplied for official uniforms	242.50
Repairing mail clerk's tin boxes; also supplying black face locks	149.15
Repairing miscellaneous articles of postal stores	45.50

FAIR WAGES ON PROVINCIAL PUBLIC WORKS IN MANITOBA

THE Manitoba Gazette of April 27, 1918, publishes new fair wage schedules for employees on provincial public works in the Province of Manitoba. These new schedules, which have been approved by the Minister of Public Works for the province, supersedes those which were put into effect on August 14, 1918. (See November, 1917, issue, page 935-7.) Under the new schedules the minimum rates per hour are increased in the case of nearly every trade, while the maximum hours remain practically the same as before. The schedules, which are to be effective from May 1, 1918, to April 30, 1919, are as follows

Fair Wage Schedule for Winnipeg

The following schedule shall apply to the City of Winnipeg and a radius of 30 miles therefrom:

	Minimum rate per hour	Maximum hours per week
1. Common labourers	30.	60
2. Builders' labourers (being those directly engaged and assisting tradesmen, not otherwise classified)	40c	60
3. Teamsters (employed directly from or on the building)	35c	66
4. Bricklayers	80c	44
5. Stone masons	80c	44
6. Marble setters	75c	44
7. Mosaic and tile setters	62½c	48
8. Terrazo workers	45c	54
9. Stone cutters—		
(a) Carvers	87½c	44
(b) Journeymen	75c	44
(c) Planermen and lathemen	60c	55
10. Plasterers	70c	44
11. Wood, wire and metal lathers	60c	44
12. Plumbers	65c	44
13. Steamfitters	65c	44
14. Operating Engineers on Construction—		
(a) Engineers in charge of machines having three or more drums	75c	60
(b) Engineers in charge of double drum machines	70c	60
(c) Engineers in charge of single drum and other machines used on construction	60c	60
(d) Firemen	42½c	60
15. Sheet metal workers	50c	54
16. Painters, decorators, paper hangers, glaziers	55c	50
17. Blacksmiths	55c	54
18. Electrical workers (journeymen inside wiremen)	55c	50
19. Structural steel and iron-workers	66⅔c	54
20. Asbestos workers—		
(a) Journeymen	60c	44
(b) 1st class improvers	50c	44
(c) 2nd class improvers	40c	44
21 Asphalters (including mastic and patent flooring and roofs)-		
(a) Finishers	40c	54
(b) Men engaged preparing, mixing and heating materials	35c	60
22. Carpenters—		
(a) Journeymen	60c	50
(b) Form carpenter or carpenters' helper	40c	60
(Men considered by employers to be qualified for a higher rate per hour than 40c on account of the class of work being performed to be paid not less than 60c per hour.)		

	Minimum rate per hour	Maximum hours per week
1. Common labourers	25c	60
2. Builders' labourers (being those directly engaged in assisting tradesmen, not otherwise classified)	35c	60
3. Teamsters (employed directly from or on the building)	30c	66
4. Bricklayers	80c	44
5. Stone masons	80c	44
6. Marble setters	75c	44
7. Mosaic and tile setters	62½c	48
8. Terrazo workers	45c	54
9. Stone cutters—		
(a) Carvers	87½c	44
(b) Journeymen	75c	44
(c) Planermen and lathemen	60c	55
10. Plasterers	70c	44
11. Wood, wire and metal lathers	60c	44
12. Plumbers	65c	44
13. Steamfitters	65c	44
14. Operating Engineers on Construction—		
(a) Engineers in charge of machines having three or more drums	75c	60
(b) Engineers in charge of double drum machines	70c	60
(c) Engineers in charge of single drum and other machines used on construction	60c	60
(d) Firemen	42½c	60
15. Sheet metal workers	50c	54
16. Painters, decorators, paper hangers, glaziers	50c	54
17. Blacksmiths	55c	54
18. Electrical workers (journeymen inside wiremen)	55c	50
19. Structural steel and iron-workers	66⅔c	54
20. Asbestos workers—		
(a) Journeymen	60c	44
(b) 1st Class improvers	50c	44
(c) 2nd class improvers	40c	44
21 Asphalters (including mastic and patent flooring and roofs:-		
(a) Finishers	40c	54
(b) Men engaged preparing, mixing and heating materials	35c	60
22. Carpenters—		
(a) Journeymen	55c	50
(b) Form carpenter or carpenters' helper	40c	60
(Men considered by employers to be qualified for a higher rate per hour than 40c on account of the class of work being performed to be paid not less than 55c per hour.)		

Province of Manitoba (exclusive of Winnipeg

The following schedule shall apply to any portion of the Province of Manitoba other than the City of Winnipeg and a radius of 30 miles therefrom:

Dated at the office of the Provincial Secretary, this twenty-sixth day of April, A.D. 1918.

J. W. ARMSTRONG,
Provincial Secretary.

WORKMEN'S COMPENSATION IN ONTARIO IN 1917

THE Report of the Workmen's Compensation Board of Ontario for 1917 covers the third year's operation of the Act and as was the case in 1916, a great increase in the work of the Board is shown compared with the previous year. The total amount of compensation awarded during the year 1917 was $2,913,085.81, $2,289,529.44 being in industries included in Schedule 1, and $623,556.37 in Schedule 2. These figures are only provisional, the final figures not being available. Compared with this, the total compensation during 1916 amounted to $2,011,468.94, $1,559,-759.01 being in Schedule 1, and $451,-709.93 in Schedule 2. The increase in compensation, and also the increase in amount of assessments, is said to be due to the increased rate of wages perhaps more than to the increase in industrial activity. Accidents are also no doubt more fully reported now than before. During 1917, compensation was paid for 28,702 accidents, of which 25,277 were in Schedule 1, 3,406 in Schedule 2, and 19 were Crown cases. During 1916, the total was 18,208, of which 15,370 were in Schedule 1, 2,825 in Schedule 2, and 13 were Crown cases. The total number of accidents of all kinds reported in 1917 was 36,514 as compared with 26,092 during 1916.

An amendment to the Wormen's Compensation Act went into force on July 1, 1917, under which workmen, whether disabled more or less than seven days, are entitled during a period not exceeding one month from the commencement of disability to the necessary medical and surgical aid and hospital and skilled nursing services. In the industries of Schedule 1, the costs of these service are to be paid out of the Accident Fund, and in the industries of Schedule 2, they are to be met by the employer individually. Pursuant to the terms of this medical aid amendment Act, a regulation was passed by the Board requiring all employers having more htan fifteen workmen usually employed to provide and have in charge of some suitable person a first aid kit, and requiring every employer with 300 or more workmen to provide at his factory or plant an emergency first aid room with necessary equipment and supplies in charge of a clerk, nurse, or other person who has taken a recognized course of study in first aid to the injured.

Notwithstanding the increased benefits that workmen now receive, it has been possible with the large contribution made by the Province toward expenses, to reduce the employers' rates of assessment. The average rate per $100 of pay roll for 1915 under the schedule as finally adjusted was $1.27, in 1916 it was $1.09, and the estimated average preferred rate for 1917 was 98 cents.

The following table shows the compensation awarded and estimated in industries in Schedule 1 during 1917:

Compensation paid other than pensions	$ 914,638.19
Transferred for pensions awarded	614,711.32
Compensation awarded—payments deferred	33,515.00
Compensation estimated for continuing disabilities	380,882.92
Compensation estimated for outstanding accidents	490,462.23
Total compensation for the year	$2,434,209.66

FATAL INDUSTRIAL ACCIDENTS DURING MAY, 1918

DURING May the Department received reports of the occurrence of 52 fatal industrial accidents, as compared with 49 in April and 69 in May, 1917. The Department is unable to secure reports of all fatal industrial accidents, but reports are received monthly from all available sources.

FATAL INDUSTRIAL ACCIDENTS, MAY, 1918

Trade or industry	Locality	Date	Cause of fatality
AGRICULTURE—			
Farmhand	Clinton, Ont.	May 26	Trampled by a bull.
Cattle driver	Toronto, Ont.	" 13	Struck by a train.
FISHING AND HUNTING—			
Fisherman	Prince Rupert, B.C.	" 8	Drowned.
LUMBERING—			
Sawmill employee	Fassett, Que.	" 30	Caught in shafting.
Sawmill employee	Pembroke, Ont.	" 4	Struck by a train.
Logger	Olson, B.C.	" 14	Crushed by logs.
Logger	Port Alberni, B.C.	" 14	Crushed by logs.
Logger	Flanders, Ont.	" 13	Drowned.
Riverman	St. Justine, Que.	" 2	Crushed by logs.
Rivermen..(4)	Mistigouche River, Que.	" 10	Drowned.
Riverman	Smoky Falls, Ont.	" 14	Drowned.
MINES, SMELTERS AND QUARRIES—			
Miner	Reserve, N.S.	" 2	Fall of rock.
Miner	Haliburton, Ont.	" 16	Explosion.
Miner	Copper Cliff, Ont.	" 2	Fall down chute.
Miner	Cardiff, Alta.	" 24	Explosion.
BUILDING AND CONSTRUCTION—			
Construction foreman	St. John, N.B.	" 30	Fall
METALS, MACHINERY AND CONVEYANCES—			
Metal worker	Montreal, Que.	" 23	Falling metal.
Shipyard employee	Port Coquitlam, B.C.	" 11	Fall.
Shipyard employee	St. John, N.B.	" 11	Fall.
Employee of steel plant	Sydney, N.S.	" 3	Mangled by machinery.
Employee of steel plant	Quebec, Que.	" 20	Falling pulley.
Employee of steel plant	Montreal, Que.	" 28	Fying piece of a wheel.
Employee of steel plant	Sault Ste Marie, Ont.	" 23	Struck by a machine.
Employee of steel plant	Sault Ste. Marie, Ont.	" 18	Runover by cars.
PULP AND PAPER—			
Paper factory employee	Toronto, Ont.	" 30	Crushed by an elevator.
Pulp mill employee	Port Arthur, Ont.	" 27	Electrocuted.
Pulp mill employee	Espanola, Ont.	" 13	Fall.
TEXTILES—			
Knitting mill employee	Paris, Out.	" 30	Crushed by elevator.
Knitting mill employee	Listowel, Ont.	" 25	Electrocuted.
FOODS, TOBACCO AND LIQUOR—			
Cannery employee	Delhi, Ont.	" 2	Crushed by elevator.
Packing-house employee	Ingersoll, Ont.	" 16	Infection.
CHEMICALS AND EXPLOSIVES—			
Employee of explosive manufacturing plant	James Island, B.C.	" 20	Explosion.
Employee of explosive manufacturing plant	Nobel, Ont.	" 19	Explosion.
STEAM RAILWAY SERVICE—			
Fireman and brakeman (2)	Christie Lake, Ont.	" 4	Collision.
Fireman	Montreal, Que.	" 14	Struck by a train.
Sectionman	Alford, Ont.	" 17	Struck by a train.
Watchman	Revelstoke, B.C.	" 20	Struck by falling rock
Pumpman	Guelph, Ont.	" 7	Struck by a train.
ELECTRIC RAILWAY SERVICE—			
Brakeman	Preston, Ont.	" 17	Fall from cars.
PUBLIC UTILITIES—			
Electrician	Chatham, Ont.	" 21	Electrocuted.
Electrician	Capelton, Que.	" 8	Electrocuted.
Employee Power Commission	Healy Falls, Ont.	" 15	Fall.
MUNICIPAL EMPLOYMENT—

ANNUAL CONVENTION OF ONTARIO LABOUR EDUCATIONAL ASSOCIATION

THE sixteenth annual convention of the Labour Educational Association of Ontario was held in Niagara Falls on May 24-25. One hundred and sixteen delegates were present, a larger number than were expected in view of the 15 per cent advance on all railway fares and the fact that no special convention rates could be obtained. President Myland, of Peterborough, presided, and the delegates were welcomed by the Mayor of the city and officials of the local Trades and Labour Council.

The report of the Executive Committee referred to the instructions given to the Executive, by the last convention, to organize an active campaign in favour of independent political action on the part of labour in Ontario. These instructions had been fully carried out and had resulted in the formation of the Independent Party of Ontario, a healthy and growing organization, with a lecture bureau established and with branches in all sections of the province.

The Executive was warmly commended for its action in arranging interviews between the heads of departments of the Provincial Government and the representatives of various local unions who desired legislation in the interests of their trades, or for the correction of some abuse. These interviews had been held in the evening, when it was convenient for the representatives of the unions to attend without loss of time or the incurring of expense. Results had already been attained, and at the last regular interview held between the Government and the Ontario Executive of the Trades and Labour Congress of Canada, Premier Hearst had expressed himself as being strongly in favour of having these matters taken up with the heads of departments direct.

A recommendation of the Executive to the effect that the Association should form a bureau of labour statistics was not endorsed by the convention. It was thought such a project would result in much unnecessary labour and expense as the Federal Department of Labour spends thousands of dollars yearly in tabulating statistics similar to those outlined in the report.

The action of the Executive in its opposition to the importation into Canada of cheap Asiatic labour; and in co-operating with the municipalities in the interests of municipal ownership; and in protesting against the granting of charters and special privileges to railroad corporations was commended, and the incoming Executive was instructed to follow a similar line of policy.

One of the delegates referred to the opposition of the Hydro-Electric Commission to granting an eight-hour day and made the emphatic statement that public ownership may become as dangerous as private ownership if not wisely and equitably administered. Reference was also made to the fact that a publicly owned plant in Toronto had refused to accept the award of a board of investigation appointed by the Department of Labour; with the result that a strike had taken place. It was the opinion of the convention that labour should have direct representation on all Government bodies if public ownership was to be successful; and the motion that the incoming Executive be instructed to demand that direct labour representation shall be granted upon all public utility commissions was carried unanimously.

The recommendation of the Executive that the convention take steps towards the more thorough organization of the woman workers of the province

was strongly endorsed by the delegates and the incoming Executive was instructed to act with the least possible delay.

A resolution was passed asking the Dominion Government to offer financial assistance and protection to inventors desirous of giving the full benefit of their inventions to the public free from capitalistic control.

There was considerable discussion of a resolution to ask the Ontario Government to fix $7 a week as a minimum wage for girls under 17 years of age, and $10 a week for women over 17 years of age. The general opinion of the convention was that no girl nor woman in Toronto could live decently on such a wage, and the resolution was finally withdrawn.

During the proceedings the delegates were addressed by Mother Bloor, a noted organizer of women in the United States, and Mrs. Rose Henderson, of Montreal. Stratford was selected as the convention city for 1919, and the following officers were elected: President, James Marsh, Niagara Falls; Vice-Presidents, Dr. J. E. Hett, Kitchener; H. J. Everett, Cobalt; John Briggs, Hamilton; Chas. Lewis, Ottawa; Wm. Baxter, Kingston; Fred. Wanless, London; John Semple, Stratford; Secretary-Treasurer, Jos. T. Marks, Toronto.

RECENT LEGAL DECISIONS AFFECTING LABOUR

In suit for damages, plea that plaintiff elected to take award under Workmen's Compensation Act must be made before trial

A SWITCHMAN, in the employ of the Winnipeg Street Railway Company, was struck by an automobile when operating a switch and was seriously injured. He claimed compensation under The Workmen's Compensation Act, and was paid $301.45 for temporary total disability and $100.80 for medical and hospital fees. He then sued the owner of the automobile, who was driving it at the time of the accident. The defendant was aware of the claim having been made under the Workmen's Compensation Act, but neglected to raise the point until the trial, when he asked leave to amend by pleading that the plaintiff had elected to take compensation under the Workmen's Compensation Act, and had thereby lost his right of action at law. Leave to amend was refused by the Court on the ground that it was too late to raise this point during the progress of the trial. By the Motor Vehicle Act, the onus of proof that the damage suffered by the plaintiff did not arise through the defendent's negligence was cast upon him. In the opinion of the Court he failed to satisfied that onus, and the plaintiff was entitled to a verdict. In order to prevent any injustice to the defendant it was agreed that upon the street railway company filing an undertaking in writing not to make any claim upon the defendant for the moneys paid under the Workmen's Compensation Act to the plaintiff, the judgment would direct that the verdict and costs be paid into Court and thereafter to be paid out (1) In payment of costs; (2) To reimburse the company for the moneys advanced to the plaintiff as aforesaid; and (3) the balance remaining to the plaintiff. (*Manitoba.—Lechiw v. Sewry.*)

A switch light held not to be a "fixed signal" according to railway company's rules

A locomotive engineer, who was injured in a railway collision, sued the company under common-law, and was awarded damages by a jury, which found that the company was guilty of negligence, and that there was no contributory negligence on the part of the plaintiff. An appeal was taken by the Company to the Court of Appeal of Saskatchewan, but upon an

equal division of the Court, the appeal was dismissed with costs. The grounds of the appeal were that the rules of the Company forbid an engineer controlling a train from passing a fixed signal without knowing the colour of such signal, and having done so, he was therefore guilty of negligence. On the night of the accident the plaintiff took his train out of the Moose Jaw yards after receiving the signal that all switches were properly set. Owing to the stormy weather he failed to see the light on a switch stand a short distance from the yards, which indicated that the switch was set for a diverging track. Without the plaintiff's knowledge, the train was thus switched to the wrong track with the result that shortly afterwards a collision took place. The point at issue, therefore, was whether a switch-stand equipped with disc and lights was a "fixed signal," according to the rules of the company. Two of the judges supported the contention of the plaintiff that such switch stand is not according to the company's rules a "fixed signal," but merely a switch indicator. This view is supported by Rule 506, which recognizes a distinction between signals and switch indicators, and by the fact that a red light as a signal means "stop," but on a switch stand it merely means that the switch is set for a diverging track. In any event, whether the target of a switch is a target signal within the rules is a question of fact, which on being put to the jury by the trial judge was answered in the negative. On the other hand, it was held by the dissenting judges that the switch-stand in question complied with all the definitions of a target signal, and therefore came under the heading of a "fixed signal", and that this point involves the interpretation of the rules, which was for the judge to determine and should not have been left to the jury. (*Saskatchewan.—Walker v. Canadian Pacific Railway.*)

REVIEWS

UNITED KINGDOM.—Report of the Health of Munition Workers' Committee. Memorandum No. 21. An Investigation of the Factors Concerned in the Causation of Industrial Accidents. 1918. 46 pp.*

Causes of accidents in munition factories in the United Kingdom

A MEMORANDUM has been issued by the Health of Munition Workers' Committee of the British Ministry of Munitions, containing the results of an investigation of the factors concerned in the causation of industrial accidents conducted by H. M. Vernon, M.D. In the course of the inquiry about 50,000 accidents, which took place in four large munition factories, were analyzed. The various factors concerned in accident production are classified under two main headings, namely, factors of personal origin depending on the worker himself, and factors of external origin not directly under his control. These are further classified as follows:

Factors of personal origin: (1) Nervous and muscular co-ordination in relation to speed of production. (2) Fatigue. (3) Psychical influences. (4) Nutrition and alcohol consumption.

Factors of external origin: (5) Lighting. (6) Temperature, humidity and ventilation. (7) Defects of machinery, and absence of guards.

The relative importance of these factors in the causing of accidents are summarized as follows:

Speed of Production.—Output determinations at a fuse factory were made by measuring the excess electric power supplied to the various sections of the

*Reviews of previous reports and memoranda issued by the British Health of Munition Workers' Committee have appeared in the *Labour Gazette*, as follows: Report on Sunday Labour, January, 1916, p. 846. Report on Industrial Canteens, February, 1916, p. 950. Report on Juvenile Employment, November, 1916, p. 1791. Reprints of the Memoranda in Bulletin of United States Bureau of Labour Statistics, June, 1917, p. 502. Output in Relation to Hours of Work, August, 1917, p. 659. Industrial Efficiency and Fatigue, Reprints in Bulletin of United States Bureau of Labour Statistics, September, 1917, p. 763. Weekly Hours of Employment, January, 1918, p. 57. Health of the Munition Worker, a Handbook, February, 1918, p. 154.

works, and verifying the results by direct enumeration of the articles produced. The incidence of accidents showed a qualitative resemblance to the output variations, and it was concluded that varying speed of production is the factor largely responsible for the day shift variations of accidents in men, and not fatigue. The diurnal variations of accidents at the fuse factory generally corresponded with the output variations, as both rose to a maximum in the middle of the week and declined at the end of it. The monthly variations of accidents also corresponded with output variations, for the accidents increased gradually about 40 per cent, whilst the hourly output at the same time increased 30 per cent. At the other factories, where 6, 9.2 and 15 inch shells were made, there was very little hourly variation in the speed with which the operations on these shells were performed, and in correspondence therewith the hourly incidence of accidents incurred by the day shift was fairly steady.

Fatigue.—The influence of fatigue on accidents to women was strikingly shown at the fuse factory when the operatives were working a 12-hour day, or 75 hours a week. The women's accidents were two and a half times more numerous than in the subsequent 10-hour day period, but the men's accidents showed no difference. Also the women were treated for faintness nine times more frequently than the men and were given sal-volatile 23 times more frequently, whereas in the subsequent 10-hour day period they were treated for faintness and given sal-volatile only three times more frequently.

Psychical Influences.—At all the factories the night shift workers suffered fewer accidents than the day shift workers, the average defect being 16 per cent. This was not due to the output being smaller, as at the fuse factory it was distinctly bigger by night than by day. It was psychical in origin, and due to the night shift workers settling down to a calmer mental state than the day shift workers, and so becoming less careless and inattentive. The psychical factor is one of the most important in accident causation.

Alcohol Consumption.—Indirect evidence as to the effects of alcohol consumption on accidents was obtained.

Lighting.—Accidents due to foreign bodies in the eye were 7 to 27 per cent more numerous in the night shift than in the day shift, though all the other accidents were considerably less numerous. This was due to the artificial lighting, as the excess of eye accidents was most marked in the worst lit factory.

Temperature.—The temperature at the fuse factory was recorded continuously for six months by means of a thermograph. Accidents were at a minimum at 65-69 deg. F., and increased rapidly at higher temperatures and slowly at lower temperatures. Continuous records of the external temperature of the town in which the shell factories were situated showed that in all of them the accidents increased considerably as the weather grew colder, and diminished as it grew warmer. In one factory the women's accidents were nearly two and a half times more numerous when the temperature was at or below freezing point than when it was above 47 deg., whilst the men's accidents were twice as numerous.

With regard to the prevention of accidents, the view is expressed that they are very largely due to carelessness and inattention, and could be diminished by preventing the workers from talking to one another in the shops. It was found that women suffered twice as frequently as the men from sprains, and they were especially liable to wrist sprains at the fuse factory, as they had not sufficient strength to push home the clamping lever of the lathes. At the shell factories they suffered nearly four times more burns than the men, chiefly from hot metal turnings. The number of sprains could be reduced by alterations of machinery, and the burns by protecting the hands.

UNITED STATES.—Sickness Insurance or Sickness Prevention? Research Report Number 6. May, 1918. National Industrial Conference Board. Boston, Mass. 24 pp.

Need of sickness prevention by Government action

The National Industrial Conference Board, composed of representatives of 17 national industrial associations of the United States, has issued a strong appeal for a national policy aiming at the prevention of sickness, so far as possible, by action of the Federal Government, pointing out the advantages of preventive measures over insurance against sickness. Various statistics are quoted showing the nature of the problem and the need of some action being taken to improve the health of the community. Of 2,500,000 men examined for the National Army in 1917, 33 per cent were found physically unfit and were rejected. At least one per cent of the residents of the United States has tuberculosis in some form and a larger number have some organic affection of the heart. From 5 to 10 per cent of adult males are estimated to have syphilis, and the proportions of those affected by minor ailments and defects are higher still. At the National Conference on Industrial Diseases held in Chicago in 1910, it was estimated that a total of 284,750,000 days were lost through sickness in a year by the 33,500,000 men, women and children then engaged in gainful occupations in the United States, an average of eight and one-half days per worker. This is in agreement with the results of sickness surveys made by the Metropolitan Life Insurance Company among policyholders and others in various localities. If these surveys hold for the industrial population of the entire country, it is estimated that the present annual wage loss for 40,000,000 workers from sickness may be conservatively placed at from $500,000,000 to $750,000,000. A further industrial loss is due to the impairment of the efficiency of a large proportion of workers through various physical defects and ailments. Of 800 bakers examined in New York for the army and navy, 57 per cent had some disease or defect. Of a similar number of tailors the percentage was nearly 63. Of 203 printers and 1,600 food handlers, it was only a little below 70, and of a group of 2,086 male garment workers, practically all were affected by some disease or physical disability.

As to the efficacy of preventive measures in combatting sickness, the experience of recent years shows their value at least in the field of communicable diseases. Within a 40-year period the death rate from typhoid fever in many communities has dropped from 50, 75 or more per 100,000 population to 10 and in some communities to less than five. The death rate from tuberculosis, which in 1900 was over 200 per 100,000 population, has in recent years been cut to below 150. Many of the most prevalent diseases are attributable in part to over-indulgence in alcoholic liquors and to venereal infection. In these cases the opportunity for valuable preventive effort cannot be questioned. Enough has already been accomplished in the prevention of many industrial diseases to show the wisdom of more intensive prosecution of this work. With respect to physical disabilities, many can be entirely cured if taken in time, and a radical improvement is certainly possible in many other instances. To many diseases among workers of the larger industrial centres, overcrowding, poor ventilation and insufficient lighting are contributing factors, and such conditions are clearly preventable.

With regard to sickness insurance, it is stated that in the experience of foreign countries where it has been tried, it has failed as a preventive agency and has placed a premium on inefficiency and fraud. Official investigating commissions have been appointed in nine States of the Union to study sickness insurance, and there appears to be a disposition on the part of those investigating the problem to proceed cautiously.

As a practical step a recommendation is made that a thorough investigation

of the further possibilities of sickness prevention be conducted by some federal agency, possibly the United States Public Health Service, under the authority of Congress and with an appropriation sufficient to permit of thorough work and conclusive results. This Commission would take account of such problems as reduction in infant mortality; supervision of the health of school children, including treatment of various common defects; systematic instruction in personal hygiene, diet and living conditions; improvements in sanitation, housing and milk and water supply; extension of free hospital and free clinical agencies; treatment of feeble-mindedness and venereal diseases; and the effect of occupation on health of workers.

Volume 18 JULY, 1918 Number 7

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

The month in brief

The brisk demand for workers that prevailed during the month of May in practically all the industries was further accentuated during the month of June, more particularly in the mining and lumbering industries. There were some additions to the number of industries and occupations in which women were engaged.

There was a decrease, both in the number of disputes and in the time loss during June as compared with May. There were in existence during the month 26 strikes, affecting 11,105 workpeople and involving a time loss of 40,929 working days, as compared with 37 strikes, affecting 14,583 workpeople and 104,861 working days during May; in June, 1917, there were 27 strikes, affecting 12,420 workpeople and 240,260 working days. At the end of the month 10 strikes remained unsettled. There was a decrease of 24.2 per cent in the value of building permits issued as compared with May, and a decrease of 9.2 per cent as compared with June, 1917.

The average cost of the weekly budget of staple goods was $12.77 as compared with $12.66 for May, and $11.89 for June, 1917; in June, 1914, the average cost was $7.35.

The index number of wholesale prices was 280.6, as compared with 275.8 in May, and 135.3 in June, 1914..

Proceedings under the Industrial Disputes Investigation Act

During the month of June the Department received reports from five Boards of Conciliation and Investigation appointed to inquire into disputes affecting (1) the Pere Marquette Railway Company and its maintenance of way employees; (2) the Grand Trunk Railway and its stationmen; (3) the London Street Railway and its motormen, conductors and barnmen; (4) the Corporation of Winnipeg and its civic employees, and (5) A. Davis and Sons, Limited, of Kingston, and their leather workers; also a report from the Royal Commission appointed to inquire into the unrest existing in the coal mining, steel making and shipbuilding industries of Nova Scotia.

Ten applications for the establishment of Boards were dealt with during the month, and further appointments were made to Boards previously established.

* * *

Labour Organization in Canada, 1917

The seventh annual report on Labour Organization in Canada, containing statistics, etc., for the calendar year 1917, has recently been issued by the Department of Labour. The figures show that trade union membership in the Dominion has reached the highest point

recorded since the Department commenced the publication of these annual reports in 1911; the total numerical strength at the close of the year 1917 being 204,630, as compared with 133,132 in 1911. In all there are 1,974 local branch unions in Canada, of which 1,702 branches with a membership of 164,896 are affiliated with international organizations; 244 branches with a membership of 32,343 are connected with non-international bodies; and 28 unions with a membership of 7,391 are independent units. During the year the international local branches increased their membership by 35,773; the non-international bodies increased their membership by 9,459, but the independent units reported a loss of 1,009 members.

The majority of the international labour organizations operating in Canada have benefit features on a varying scale. The disbursements made on this account for 1917 in the United States, Canada and elsewhere amounted to $13,175,379, an increase of $675,251, as compared with the payments made in 1916. The amounts paid in benefits for the year 1917 by local branch unions in Canada to their own members amounted to $313,116, an increase of $64,936, as compared with the payments for 1916.

The report follows closely along the lines of former reports on Labour Organization in Canada, the various phases of the schemes of organization which have been developed being given due consideration.

A chapter deals with the proceedings incident to the indictment by the United States Government of the Industrial Workers of the World. The action of several labour bodies in regard to conscription and other matters of interest to organized labour are also discussed.

The report serves as a directory of trade unions for the Dominion for 1918, including as it does particulars not only of every known local trade union in Canada, but also a list of all international and non-international central organizing bodies, together with the names and addresses of the chief executive officers.

Canada Food Board Regulations

ON June 25th the Canada Food Board issued Order No. 50, requiring the partial use of substitutes for wheat flour in the production of bread and other bakery products whether for private consumption, or for sale, or to be served in a public eating-place.

The order provides that on and after July 1st every person in Canada who bakes for private consumption, bread, rolls, pastry or any other product in which white or standard flour is used shall use not less than one pound of substitutes to every nine pounds of white or standard flour. After July 15th persons baking for private consumption, east of, but not including, Port Arthur, are to increase the amount of substitutes used to one pound in four of flour. Bakers, confectioners, etc., are made subject to the same rule except in the case of the products specified in Food Board Orders No. 34 and 46, which made regulations as to quantities of substitutes to be used for wheat flour in baking and as to serving foods in public eating places. It is noted that the quantities of substitutes west of Port Arthur are too uncertain to set a date on which the use of substitutes to the same degree as in eastern Canada could be required. It is also provided that after July 15th dealers in food shall not sell to any person for private consumption east of Port Arthur any white or standard flour unless substitute in the proportion of one pound of substitutes to two pounds of flour are also purchased, except that west of and including Port Arthur the proportion of substitutes to be purchased is one in four. Dealers selling flour are required to have at all times a sufficient stock of substitutes to meet the demands of his customers at reasonable prices.

It is also provided that every baker shall place on each loaf of bread a label or sticker bearing his name and address and the words "Victory Bread", thus guaranteeing that the bread contains the prescribed amount of substitutes. No person is allowed to have in his posses-

sion or to sell bread, rolls, pastry, etc., which does not conform to this or any other order of the Canada Food Board.

The Order defines as substitutes for wheat flour, "pure and wholesome corn, oat, barley, rice, rye, buckwheat, tapioca, or potato flour, bran shorts, oatmeal, rolled oats, corn meal, cornstarch, hominy, corn grits, rye meal, rice, tapioca, or any mixture of same, and potatoes." Four pounds of potatoes will be considered equivalent to one pound of the other substitutes.

On July 13, the Board issued Order No. 55, postponing the putting into effect of certain clauses of Order No. 50. The use of a label is not to be required of bakers for the present, while the proportion of substitutes to be used by bakers and private persons in any bakery products containing wheat flour is to remain unchanged after July 15; that is, one pound of substitutes must be used for every nine pounds of flour, the increase in the proportion to one in four being deferred to a later date. Bakers are warned, however, that the use of a greater proportion of substitutes will be required at the earliest possible date. A change is also made in the proportion of substitutes required to be purchased for private consumption by persons residing east of Port Arthur, the proportion of one in four being continued instead of being increased to one in two on July 15th.

United States Child Labour Law Invalid

The Supreme Court of the United States has decided that the Federal Child Labour law is unconstitutional. (See issues of November, 1916, p. 1785; March, 1917, p. 182; and September, 1917, p. 664.) The law, enacted in 1916, forbade the shipment in interstate or foreign commerce of the products of all mines, factories, tanneries, workshops, mines and quarries employing children under conditions specified in the Act. It went into effect September last, and, when fully enforced, would have affected 250,000 children. This would still have left about 2,000,000 child workers in trades not subject to federal jurisdiction; but, by establishing a nation-wide minimum standard of protection and putting the authority of the federal government behind the principle of abolishing child labour, it was thought that the bill would eventually put an end to the exploitation of child workers.

The question to be decided by the Court was: whether Congress, in regulating commerce among the States, had the authority to prohibit transportation of goods produced in factories where children under 14 years had been employed; or children between the ages of 14 and 16 had been employed for more than eight hours in any day, or more than six days in any week. A majority of the judges decided that the necessary effect of the Act was to regulate the hours of labour of children in factories and mines within the States: a purely state authority. That the Act was contrary to the constitution, exerting, as it did, a power as to a purely local matter to which the federal authority does not extend. The Court admitted the general desirability of the end aimed at by the law, but stated that its own duty was to 'preserve inviolate' the constitutional limitations. It is now being suggested that the taxing power of Congress be used to stop child labour, by taxing heavily the products of concerns employing children. Another proposal is that a high license be required of all establishments where children are employed.

In reference to the decision of the Supreme Court, the Department of Labour in an official statement says:

Telegrams and letters have been pouring into the Children's Bureau from the mines, the mills, and the factories of the country asking whether in view of the Supreme Court's decision that the United States child labour law is unconstitutional, children can now be put on the long day. Some employers ask, "Can we now work children under 16 full time at night?" and others, "Are we allowed to work them in the mines?" In order that no time may be lost in getting the children back to work the re-

quest usually ends, "Wire reply collect."

* * *

Federal Aid for Education in the United States

The June, 1917, issue of the LABOUR GAZETTE (page 495) contained the text of the Vocational Education Act — known as the Smith-Hughes Act —passed by Congress last year; and the December, 1917, issue (page 955) contained a brief account of its administration up to that time. One of the results of this Act has been a stimulation of thought as to the possibility of establishing a system of federal aid to the States for the benefit of other phases of public instruction, and organized efforts to this end are continually being made. Last year a bill, known as the Hollis Bill, for the promotion of elementary education was introduced into Congress at the instance of the Committee on National Aid to Education. This bill provided for an initial appropriation of $50,000,000 to be increased annually until the maximum of $100,000,000 was reached, for the purposes of eliminating illiteracy, Americanizing immigrants and conducting rural schools. The bill, however, was not acted upon by Congress, and it is now proposed to submit a new bill drawn upon a broader plan. This new bill for the promotion of general education has been tentatively drafted by a committee of the National Education Association Commission on the National Emergency in Education, in co-operation with the National Child Labour Committee. It provides for an annual appropriation of $100,000,000, to be divided among the states as follows:

One-twentieth for the purpose of co-operating with the states in instructing illiterates in the common school branches, in citizenship and for definite vocations—to be allotted to the states in the ratio which the illiterate population 10 years of age and over of each state bears to the total illiterate population of the United States; and

One-twentieth for Americanizing immigrants through instruction in the English language, training in the duties of citizenship, and development of respect for law and order and an understanding of our civic and social institutions—to be allotted to the states in the ratio which the foreign-born population of each bears to the total foreign-born population of the United States; and

Five-tenths for equalizing opportunities for education by improving public elementary and high schools through the lengthening of the school term where it is now too brief; through standardizing, grading and supervising; through developing rural schools and providing thorough instruction—to be allotted to the states in the ratio which the number of teachers in the public schools in each state bears to the total number of public school teachers in the United States; and

Three-tenths for the promotion of physical education and recreation, medical examination of children of school age, employment of school nurses and instruction of the people in the principles of health and sanitation to be alloted to the states in the ratio which the total population of each bears to the total population of the United States; and

One-tenth for training teachers, particularly for the rural schools—to be allotted to the schools in the ratio which the number of teachers in the public schools in each state bears to the total number of teachers in the public schools in the United States.

Extension in the Employment of Women in Great Britain up to January, 1918

The June issue of the *Labour Gazette* of the British Ministry of Labour contains some information as to the extension in the employment of women between July, 1914, and January, 1918. The position as regards the employment of females in January, 1918, is summed up in the following table, which shows (a) the expansion in the employment of women

and girls since July, 1914, and (b) the extent to which women and girls are directly replacing men, according to the returns made by employers:

Occupation	Estimated number of females employed in			Direct Replacement of Men by Women	
	July, 1914	October, 1917	January, 1918	Numbers	Percentage of those employed in July, 1914
Industries	2,175,500	2,704,500	2,708,500	503,000	23.0
Government Establishments	2,000	213,000	209,500	197,000	8,470.0
Gas, Water and Electricity (Under local authorities)	600	4,600	5,100	4,000	722.5
Agriculture in Great Britain (Parmanent Labour)	80,000	87,000	74,000	31,000	39.3
Transport (excluding Tramways under local authorities)	17,000	94,000	93,000	78,000	460.3
Tramways (under local authorities)	1,200	18,200	18,200	16,000	1,370.0
Finance and Banking	9,500	68,500	70,500	57,000	603.8
Commerce	496,000	829,000	839,000	342,000	68.8
Professions	50,500	100,500	100,500	22,000	43.0
Hotels, Public-houses, Cinemas, Theatres, etc	181,000	209,000	207,000	45,000	24.6
Civil Service, Post Office	60,500	107,000	108,000	53,000	86.8
Other Civil Service	5,000	75,000	81,500	70,000	1,410.0
Other services under local authorities	196,200	226,700	226,200	24,000	12.3
Total	3,275,000	4,737,000	4,741,000	1,442,000	44.0

It has, however, to be remembered in reading the table that it does not show the numbers now engaged in domestic service, nor take into account the large movement there has been from small dressmaking workshops and workrooms. It is estimated that the displacement from these two spheres of employment taken together amounts to 400,000 women. It has to be remembered, too, that figures relating to the number of women employed in such services as the Women's Royal Naval Service, the Women's Army Auxiliary Corps, the Women Police, and timber cutting under the Board of Trade, are not included, nor are they available; but some indication of the large numbers of women in these services may be gathered from the statement made in the House of Commons in February, 1918, that over 20,000 women had enrolled in the Women's Army Auxiliary Corps.

During the quarter ending January, 1918, the slowing down in the rate of increase of female workers which was apparent in the previous quarter has become more striking, and in the occupations enumerated in the table there has been a total increase of female workers of only 4,000, as against 48,000 in the previous quarter and 140,000 in the quarter April to July, 1917.

The increase in the number of women employed under the heading of Industries, though very small, is just sufficient to account for the total increase. In Government establishments there is an actual decrease, as also in hotels, public houses and restaurants, and in all forms of transport by land. There is also a seasonal decrease in agriculture.

* * *

Labour Jottings

Realizing the continued increase in the cost of living, the Consolidated Mining and Smelting Company of Canada recently decided to pay a war bonus to their employees at the Trail plant. For the month of May, 1918, each employee was to receive

a war bonus of 15 cents a day; and for six months, starting on June 1, 1918, each employee is to receive a bonus of 25 cents a day.

* * *

The Imperial Oil Company have called for tenders for the immediate erection of thirty modern houses for their employees in the city of Regina. The houses, when completed, will be rented at practically a nominal cost rental, just sufficient to pay for the investment; the idea being not for profit, but simply to secure housing accommodation for their employees. The houses will have from four to six rooms and about seven different designs will be used.

* * *

Three workmen at Welland were recently fined $20 each under section 499 of the Criminal Code, which declares it to be unlawful for a workman to quit work without notice, when his action in so doing is likely to involve serious financial loss. The men were engaged in furnace work in a steel plant and, when coming on night duty, refused to proceed with their work without an immediate increase in their wages. Refusing to let the matter stand until next morning they quit the job, thereby jeopardizing a valuable heat.

* * *

The Hon. T. W. Crothers, Minister of Labour, in writing to the general manager of one of the largest concerns in Canada in reference to its frequent labour disturbances, said: "My own judgment is (you will pardon me for stating it so frankly) that it is the duty of the employer himself to adopt such means as may be found necessary for the maintenance of peace and contentment among his workmen. The fact that many succeed in doing so is strong evidence that it is neither necessary or expedient that others should appeal to the Government for drastic action whenever any labour disturbance is impending. . . . Speaking generally, I have found working men reasonable and responsive to considerate, frank and fair treatment, but naturally they do not appreciate being entirely ignored concerning conditions — financial and otherwise — in enterprises in which they are engaged and this especially under war conditions with high salaries and large profits."

* * *

The United States Secretary of Labour in a recent article expresses the opinion that an increasing number of employers are coming to believe that a general recognition of the right of labour to act collectively will result in a better war organization and greater industrial efficiency. The last convention of the United States Chamber of Commerce went on record with a resolution urging employers to deal with organized labour and even encourage the unions, as the best safeguard against such agitation as that of the I.W.W.

* * *

The British Labour Gazette for May, 1918, gives some particulars respecting trade union membership at the end of 1916. The total membership of the 1,115 trade unions known to the Department of Labour was 4,399,696, showing an increase of 6.2 per cent over the previous year, and being the highest figure yet recorded. The increase in male members was 127,555, or 3.4 per cent; and in female members, 130,352, or 32.2 per cent.

* * *

To assist in meeting present shortage in unskilled labour in the United States, the Secretary of Labour has issued an order temporarily removing restrictions on the importation of Mexican labour to be used in agricultural pursuits, in railroad section maintenance, and in lignite coal mining. Mexicans so employed will be exempt from the head tax, literacy test and contract labour provisions generally imposed.

* * *

Employment of women conductors on the street railways of New York City is emphatically condemned in a recent report to the Department of Labour by Benjamin Squires of the Bureau of

Labour Statistics. The report says: "From the facts brought out, it must be evident to any thinking person that it is practically impossible to make the conditions of street railway employment even tolerably endurable to women employees, and that the operation of street cars is one of the last occupations into which women should be lured or forced."

* * *

The Bureau of Industrial Housing and Transportation of the United States Department of Labour will administer the expenditure of the $60,000,000 housing appropriation recently made by Congress. Ten million dollars of this amount will be used for the housing of Government workers in Washington and the balance will be distributed among the industrial centres in the States. The War Industries Board will co-operate with the Labour Department in its housing work.

In answer to enquiries as to the attitude of the United States Government toward Christmas buying, the Council of National Defence has issued the following statement: "Manufacturers and merchants are desirous to be advised at this time in order intelligently to plan for their Christmas stocks. Therefore the Council and Advisory Commission now announce that it is their belief that Christmas giving which involves the purchase of gifts should be discouraged as relieving to that extent the present heavy burden placed upon labour, transportation and other resources of the nation, and also as being in harmony with the previous announcement of the Council and Advisory Commission urging thrift and economy upon the country."

INDUSTRIAL CONDITIONS DURING JUNE, 1918

I.—GENERAL REVIEW

The Labour Market

Workers were in demand throughout the month in nearly all the industries, more especially in those of the East. In Nova Scotia and New Brunswick there was a constant demand for both skilled and unskilled labour. In a slightly lesser degree the same was the case in Quebec and Ontario. In the Western Provinces, however, the supply and demand became more nearly equal. In British Columbia, while there was plenty of employment offering, the demand for labour was practically reduced to the mining and lumbering industries. Farm hands generally were in demand throughout the country. Women were being employed to a greater extent in the cities, particularly in the cigar factories and in running elevators, while some employment was also given to women in drafting offices and aeroplane factories.

Some labour unrest prevailed at the Sydney and Westville steel plants which considerably reduced their output. Generally, however, the steel plants, machine shops and factories were well employed and in need of labour, except that in a few instances operations had to be curtailed owing to the shortage of material. There was a steady demand for machinists, tool-makers and sheet metal workers.

The boat, and ship building, and repairing yards throughout the country, with the exception of the shipyards at New Westminster and Victoria, were all actively engaged and in need of both skilled and unskilled labour.

In the food group the sugar refineries at St. John's and Vancouver were running steadily, but the refinery at Kingston was closed down. The flour, feed and cereal mills in the Maritime Provinces were very quiet and in some cases

practically closed down, but in Ontario they were quite active and in some instances advertised for more help. In some of the Western cities, however, the mills were rather quiet owing to the small supply of wheat available. The abattoirs and packing houses throughout the country were steadily employed. Employment was good in the aerated water plants, but quiet in the tobacco industry, and dull in the breweries and distilleries.

In the textile group there was much activity throughout the country.

The clothing establishments and laundries generally were active and in need of help, mostly female.

The pulp, paper and fibre industry was very busy, particularly in British Columbia, and the shortage of labour in this group was pronounced. It is predicted there will be a shortage of pulp before next spring.

The printing and publishing houses were well employed in the East, also in parts of British Columbia, and there was some demand for printers and compositors.

The sash, door and planing mills in Nova Scotia were working to capacity and there was activity in this group at New Westminster and Victoria.

In the leather group there was some increase in activity over the preceding month. Some shoe and shoe-parts factories reported a shortage of skilled help. The rubber plant at Toronto and Kitchener were very busy and in need of more girls and men.

The clay, glass and stone group, generally, was dull.

The paint and varnish factories generally were busy. The chemical plants were very busy, though, owing to the American embargo, some difficulty was experienced in obtaining material.

On the railways employment was steady, though the passenger traffic was less than is usual in the summer season; the repair shops were busy. Employment in 'longshore work was good, except at St. John's and Brockville where it was dull. Navigation was very active at Quebec, though there was a shortage of vessels. Inland navigation varied; Hamilton was busy with both freight and passenger traffic, but Brockville was quiet.

Metal mining was not so active as in the preceding month. The shortage of labour caused a decrease in the output of the Cobalt mines and at Fernie the ore shipments were very small. Lack of ships caused inconvenience to some of the mining operations on the West Coast. Considerable labour unrest prevailed at the Sydney coal mines, which had the effect of reducing the output. Miners were very well employed in the Calgary district, but in British Columbia mining operations were very much handicapped by the scarcity of skilled miners and drivers.

The lumbering industry was very active. Most of the sawmills were in full operation and there was a general demand for workers. The logging camps were all handicapped by the scarcity of labour, especially those in British Columbia.

Employment in the building trades, as indicated by the value of building permits issued in 35 cities, decreased 24.2 per cent as compared with May and decreased 9.2 per cent as compared with June, 1917. Reports from 16 cities, showing the number of civic employees temporarily engaged and the wages paid these employees during the first pay-roll period of two weeks of June, indicated a very slight decrease in the number of workers and an increase of nearly 5 per cent in the wages paid.

Strikes

The loss of time on account of industrial disputes during June, was less than in May, and much less than in June, 1917. There were in existence at some time or other during the month 28 strikes, affecting 11,105 workpeople and involving a time loss of 40,929 work-

ing days; as compared with 37 strikes 14,583 workpeople and 104,861 working days in May; and 27 strikes, 12,420 workpeople and 240,260 working days in June, 1917. On June 1, there were on record ten strikes, affecting 6,012 workpeople. Eighteen strikes were reported as commencing during June, as compared with thirty-two strikes in May. Thirteen of the strikes commencing during June, and seven of those commencing prior to June, were reported terminated, leaving the following eight unterminated strikes, affecting approximately 352 workpeople, on record at the end of June; plumbers and steamfitters, St. John; metal polishers and buffers, Weston; machinists, Montreal; carpenters, Port Arthur and Fort William; painters and decorators, Calgary; machinists and toolmakers, Toronto; bakers, Vancouver, and knitting mill operatives at Toronto.

Prices

In prices the advance in meats continued, but there were declines in butter, milk, and potatoes. Eggs were slightly upward. The average cost of a family budget of staple foods in some sixty cities at the middle of June was $12.77 as compared with $12.66 for May, $11.89 for June, 1917, and $7.35 for June, 1914. In coal, wood and coal oil there were slight increases. In wholesale prices the Departmental index number was up to 280.6 as compared with 275.8 in May, 242.7 in June, 1917, and 135.3 in June, 1914. The chief increases for the month were in Fruits and Vegetables, Textiles, and in Fuel, the last due to a rise in the price of matches. There were slight increases in Metals and Implements, Building Materials, House Furnishings, Drugs and Chemicals, with decreases in Grains and Fodder, Animals and Meats, and Fish.

II.—THE INDUSTRIES AND TRADES

Metals, machinery, conveyances

Sydney reported the production of the Dominion Steel Company for June in tons as follows: pig iron 25,000; ingots, 29,000; billets and slabs, 24,000; rails, 13,000; merchant bars, 2,300; wire and wire products 170 tons. The decrease in the rail output was due to an accident to the machinery of the rail mill, and the reduction in wire was due to the making of rails. At the Sydney Mines plant the production of iron was 7,550 tons, and steel 11,000 tons; as compared with 8,800 tons of iron and 14,600 tons of steel last month. At Halifax the rolling mills, machine shops, electrical apparatus plants were all working to capacity, while the boat and shipbuilding yards were unable to handle all the repair work offered. At Westville the steel working plants operated only on a limited scale, owing to industrial disturbance. St. John reported that the rolling mills and iron works were steadily employed. The shipyard completed work on one schooner and laid the keel of another; the automobile works were well employed on repair work. Galvanized iron and sheet metal workers were reported to be scarce. Conditions at Moncton remained steady. Newcastle reported that the shipbuilding plants were giving a great deal of employment, while at Fredericton the machine shops and foundries were in need of more help. At Montreal the manufacturers were busy, despite some labour difficulties and the shortage of necessary material. Several new steel ships were completed and work on other steamers commenced. Some large orders for war material were received from the American Government. At Quebec several new ships were completed and the sheet metal trades were very busy. Sherbrooke reported architectural iron and steel, stationary and portable engines and boilers active. St. Hyacinthe reported the metals and machinery groups fairly busy, but with no demand for new hands. The Canada Iron Foundries

Limited, at Three Rivers, were very busy on a number of large castings and employed nearly 500 men. The shipyards at Three Rivers employed about 1,100 men on both steel and wooden shipbuilding. At Sorel and Richelieu the shipyards employed about 1,300 men and were paying wages of from $2 to $5 per day; the foundries were also very active. Toronto reported that the metal and machinery industries, generally, were working to capacity, except where operations were curtailed owing to shortage of material. Shipyards, steam engines and boiler plants, electrical, automobile and agricultural implement plants were all active and in need of skilled labour. Hamilton reported the machinery groups active with a shortage of labour in the stove and electrical apparatus plants. The metal working trades at Niagara Falls were very busy and in need of skilled help, while women were wanted in cutlery, plating and light metal ware factories. Brockville reported the machinery groups to be fairly well employed, while Kingston reported a slight decline in employment. At Belleville the Canada Steel Company was busy day and night manufacturing products of bar iron, for which there was a good demand. There was also a good business in automobile parts and electrical apparatus. At Peterborough the iron foundries were shut down for two weeks, but were very active after reopening: they have re-adjusted their wage scale. There was a steady demand for machinists and tool makers; the Canadian General Electric Company was working overtime. Galt, Brantford and Kitchener all reported the metals group active. Chatham reported a shortage of skilled help in the boiler and stationary engine plants, while the Gray-Dort Motor Company laid off about 70 hands temporarily owing to shortage of material. At Windsor the Canadian Steel Corporation worked to capacity and the automobile plants worked some overtime. The Canadian Roofing Company was very busy. At Owen Sound the machine shops were all short of skilled labour which affected their output. At Sault Ste. Marie the steel mills were working to full capacity day and night. At Winnipeg the automobile, cycle and motor engine firms reported business good, except that the Ford assembling plant had greatly reduced their staff. Regina and Moose Jaw reported activity in agriculture implements. Medicine Hat, Lethbridge and Calgary all reported the metal groups active. At Edmonton, the Western Foundry Company was in need of labour. Vancouver reported structural iron and steel work as quiet, but that the stationary and portable engines and boiler making plants were employing all men available. Boat and shipbuilding and repairing yards were very busy, with a shortage of labour. Steel metal work generally was inclined to be quiet, but employment remained steady. At New Westminster, shipbuilding was very quiet and more men were laid off during the month, but there was considerable activity in boat building. Machine shops were very busy and were unable to secure sufficient help. At Victoria work in the iron foundries was fairly brisk, but the wooden shipyards were quiet.

Foods, liquors and tobacco

Sydney reported the abattoirs, packing houses, baking and confectionery establishments active. At Halifax the bakers were very busy and in need of more help, while the aerated water and soft drink establishments continued to be very active. Westville reported that the feed and grinding mills were practically closed down during the month, owing largely to the high prices prevailing for cereals, etc. Soft drink manufacturers reported a great increases of business over last month. Truro reported the condensed milk factory worked full time. At St. John the Atlantic Sugar refinery ran setadily, while the bakers and confectioners reported business good under present conditions. The soft drink establishments and breweries both reported business increasing. At Moncton the flour and feed mill operated on a reduced scale, but the biscuit manufacturers

continued to employ their usual number of workers. Newcastle reported that practically no milling was done. Fredericton reported that the packing houses and flour mills were quiet. Quebec reported the abattoirs and bakeries quiet, and the breweries and distilleries very dull. At Sherbrooke the food groups including the breweries were active. St. Hyacinthe reported the biscuit factory worked overtime, but that the distilleries were very dull. At Toronto the flour mills, cereal factories, abattoirs and packing houses were in steady operation; fruit and vegetable canneries were increasingly busy and soft drink manufacturers reported trade improving. Breweries were quiet, but cigarmakers were fairly busy. Hamilton reported all the food groups as actively employed. Tobacco manufacturers were active and the breweries and distilleries were fairly well employed. At Brockville the food group was active and the Produce and Storage Company shipped large orders of condensed milk and cream to the Allies. The breweries and distilleries were practically idle. Kingston reported the flour and feed mills active; while at Belleville they were exceptionally busy, especially in the grinding of grain for feed. Fruit canning, with the exception of strawberries, had not yet developed fully. At Peterborough the flour, feed and cereal mills were all working overtime and the cheese factory was running to full capacity; cigarmakers were also busy. At Galt the flour mill worked day and night and were advertising for more help. At Brantford the flour mills were working day and night, and the soft drink manufacturers were very busy. Kitchener reported the flour mills running full time, but that the sugar factory was closed down. The rest of the food group, including the breweries, were busy. At Guelph and Stratford the flour and feed mills were very active, and in the latter town the abattoirs and meat packing houses were well employed. The Hunt Flour Mill Company at London ran their new mills at full capacity, and the biscuit factories were very busy and in need of more female help. The tobacco industry remained dull although thhe Tuckett Cigar Company re-opened their factory. At Chatham the flour mills reported business fair, but the sugar refineries were practically closed down. The abattoir and packing company closed down indefinitely at the middle of the month and laid off about 45 hands. Baking and confectionery trades were fully employed, but the tobacco industry was very quiet. Windsor reported the flour and feed mills very quiet, but the Postum Cereal Company had a very busy month. The butter factory was busy, the cigar industry fell off considerably; while the breweries and distilleries were practically idle. Winnipeg reported that the abattoirs and meat packing houses were active, and the creameries and dairies well employed. The confectioners reduced their staffs owing to the curtailment of the sugar supply. Vegetable canneries were active and in need of more help. Regina reported the flour mills running full time and the abattoirs well employed with an improved supply. The baking and confectionery business needed help. At Moose Jaw the flour mill only ran one shift owing to shortage of stock, but the abattoir was steadily employed. At Prince Albert the flour mills were rather dull owing to the irregularity of the wheat supply. The flour mills of Calgary slackened down owing to the small supply of wheat available, but the abattoir and meat packing houses were fully employed. The cigar factory was very dull. The Swift Canadian Packing Company at Edmonton reported that they had 500 employees engaged and that they were in need of further help. At Vancouver the flour, feed and cereal mills were all busy while the sugar refinery, abattoir and packing houses were steadily employed. The baking and confectionery trades were temporarily disturbed by industrial disputes. The opening of the fruit and vegetable canning season caused a demand for girl workers. The aerated waters and soft drink manufacturers reported the best season for years and breweries were turning to this

industry. At New Westminster the meat packing house was fully employed and some overtime was worked, while the vegetable evaporating plant was running double shifts. The cigar factories were very well employed and the breweries were running to full capacity. Victoria reported the fruit canneries busy, while the aerated and soft drink establishments were doing a record business; cigarmakers were dull.

Textiles, cordage and carpets

Halifax reported that the cordage company at Dartmouth was once more well employed in the manufacture of ropes, twine, etc. Stanfield's woollen mills at Truro shut down for two weeks, but later resumed work with a full staff. At Moncton the woollen mills and underwear factories were very busy. The new factory of the Maritime Linen Company had a number of looms in operation. Fredericton reported that the cotton mills were active. Montreal reported that the domestic manufacturers of cottons, hosiery and knitted goods all had large orders on hand, while the woollen mills had more orders than they could fill. Large orders for khaki cloth were received from the American Government. At Quebec the cotton factories were very busy, also the tent, awning and sail makers. At Sherbrooke the textile group was reported active. St. Hyacinthe reported the Penman's Manufacturing Company worked day and night and employed more than eight hundred hands. The Wabasso Cotton Company at Three Rivers ran full time with 1,200 hands. Difficulty experienced last month in getting additional help continued. Toronto reported that the textile industries were busy and that the knitted goods manufacturers had large orders on hand, also that the tent and carpet makers were well employed. Hamilton and St. Catharines reported the textile groups were active. At Brockville the tent, awning and sail makers were fairly well employed, while at Peterborough they were very active. The woollen mills at Peterborough worked overtime. Large orders had been received for khaki cloth for the United States; the carpet weavers were well employed. At Galt the woollen and cotton mills were very busy, but handicapped by the shortage of labour; the silk mills were also busy. All the textile group at Brantford was reported active. At Kitchener the hosiery and felt factories ran full time and the Dominion Twine factory was in need of additional labour. The woollen mills and hosiery and knitted goods factories at Guelph and Stratford were very busy and took on some additional female help; the carpet mills at Guelph were active. At London the Holeproof hosiery and the Peerless hosiery companies were very busy and offered bonuses to their employees for long service; the dyeing mills had all the work they could handle. At St. Thomas the Monarch Knitting Company was working to capacity. At Chatham the woollen mills were very active. Winnipeg reported that the bag manufacturers were rather slack and that the knitting factories were almost out of business owing to the embargo on wool. The tent and awning manufacturers, however, were busy. At Vancouver the tent, awning and sail making industries were fully employed, some difficulty being experienced in obtaining skilled help.

Clothing and laundering

Ready-made clothing manufacturers at Halifax worked to capacity with the hands available; there was a constant demand for experienced coat makers, both male and female. The steam laundries were working overtime. The ready-made clothing firms at St. John reported business good, while the steam laundries were busily engaged. Moncton reported that the hat and cap company worked steadily, while the tailoring, dressmaking and millinery establishments were all busy and were experiencing considerable difficulty in securing help; the laundries were all active. At Newcastle the tailoring establishments were not quite as well employed as during the preceding month. Montreal reported that the clothing manu-

facturers were well employed. Quebec reported that the women's whitewear factories and the laundries were active, but that the glove factories were quiet. Sherbrooke reported that the ready-made clothing establishments and the steam laundries, dyeing and cleaning establishments were all well employed. At St. Hyacinthe the clothing industry was very busy and advertising for more help, but at St. John's the Cluett-Peabody Company reported a quiet month. At Sorel and Richelieu the Popular Shirt Company and other similar concerns had several hundred men and women employed during the month. Toronto reported that the ready-made clothing workers, hat and cap workers and whitewear operators had plenty of employment, while female labour was greatly in demand. The steam laundries also reported a shortage of help. At Hamilton the clothing and laundering groups were all reported busy, with a steady demand for labour. Brockville and Kingston reported the clothing group active and the steam laundries very busy. Steam laundries, dyeing and cleaning establishments at Belleville reported an exceptionally busy month. Peterborough reported a general shortage of female help in this group. The ready-made clothing business at Galt was good, and at Brantford the overall, shirt and dress companies were very busy, as were also the steam laundries. At Kitchener there was a shortage of boys and girls in the button factories, of cutters and operators in the glove factories, and of female help in the dress factories. There was a shortage of female workers in the women's whitewear factory at Guelph; the hat factory was active. At London the Green Swift Company were busy on their fall clothing orders and the Helena Cloak Company needed more female help. The Peabody overall factory at Windsor ran full handed and required more female help; the button factory was quiet; steam laundries and dyeing and cleaning establishments were all busy. Owen Sound reported that the laundry business was entirely in the hands of the Chinese. At Winnipeg the laundries and dry cleaners were well employed with the usual staffs. The ready-made clothing manufacturers were rather quiet, while the shirt factories reported business as fair. Business at the cap factory was good and the staff was slightly increased. Glove manufacturers reported a shortage of raw material, though they are seeking operators and have taken on several inexperienced hands. The furriers were unusually busy, while in the whitewear concerns the business was normal. At Regina the steam laundries were running to full capacity, but at Prince Albert they were reported as quiet. Vancouver reported that garment workers in all lines were increasingly in demand and some difficulty was experienced by overall and shirt manufacturers in obtaining skilled operators. Steam laundries, dyeing and cleaning establishments reported business good. At Victoria the shirt and overall factories were very busy.

Pulp, paper and fibre

St. John reported that the pulp mill was steadily employed, and that quite a trade had developed in beaver board, large quantities of which are being used for finishing purposes. Newcastle reported that the pulp and paper mills continued to be well employed, with a scarcity of skilled labour. At the plant of the Bathurst Lumber Company it became necessary to employ female labour. Sherbrooke reported the pulp and paper mills active. At Three Rivers the Wayagamack Pulp and Paper Company made some reduction of staff during the month, but reported business as good. The E. B. Eddy Company at Hull reported that the paper making departments continued to be well employed. St. Catharines reported the pulp and paper mills and beaver board factories active. The pulp and wood pile of the Ontario Paper Company at St. Catharines was destroyed by fire, the estimated loss being $150,000. At Hamilton the felt and tarred paper concerns were well employed, but at Windsor they were rather

quiet. The pulp and paper mill at Port Arthur was in need of more men. Vancouver reported that the pulp and paper mills up the coast were running 24 hours a day and Victoria reported that they were working to full capacity.

Printing, publishing and paper

Halifax reported a shortage of compositors and operators in newspaper and job printing plants, and that girls were being tried out with varying success. The demand for paper boxes was good; Moirs' Limited were making additions to their factory, which when completed should double its capacity. Truro, St. John and Newcastle reported a shortage of skilled help. Montreal reported that the newspaper and job printing offices were employing all the available help in the city. At Quebec, newspaper and job printing offices and paper box factories were all busy. The binderies at Sherbrooke also were active. At St. Hyacinthe the paper box factory was fairly busy. Toronto reported the printing, bookbinding and lithographing establishments active, while employment in paper box factories was fair. At Hamilton this group was reported active in all its branches. At Niagara Falls the corrugated paper and box factory and printing offices were all busy. Brockville and Kingston reported the job printers active, and Belleville reported that the binding establishments were also well employed. Galt reported the printing business was not quite so busy, but that the paper box factory was advertising for help. The Hampel Box Company at Brantford reported a busy month. Kitchener reported that every printer and pressman in the district were steadily employed, and that the paper box factory was very busy. There was some demand for job hands at Woodstock. At London the lithographing and printing establishments were exceptionally busy, and in some departments were working overtime; printers were scarce. The bookbinderies at Chatham were exceptionally busy during the month. At Windsor the newspaper and job printing offices were busier than they have been for several months. At Winnipeg the publishing houses, binderies and paper box manufacturers all reported business about the same as usual. At Regina the printing houses and binderies were fully employed, but at Prince Albert, Medicine Hat and Lethbridge they were rather quiet. At Calgary the newspaper and job printing firms were fully employed, but at Fernie there was a slight falling off in business. Vancouver reported that the newspaper and job printers, also the binderies and engraving shops, were absorbing all the help available. At New Westminster the job printing offices were busier than usual at this time of the year. At Victoria they were reported as fairly busy.

Woodworking and furniture

At Halifax the woodworking factories continued working at full capacity, and at Sydney there was increased activity. At Amherst the sash, door and planing mills were exceptionally busy on outside orders. The sash, door and planing mills of St. John were working to capacity on out of town orders. The wooden box business was reported to be increasing, while the brush and broom factories were steadily employed, though short of labour. At Moncton the woodworking plants were not quite so busy as during last season owing to the slackness in building. The Moncton cooperage plant was also less busy than last year. At Newcastle the sash and door factories continued to work full time. Quebec reported the planing mill, sash and door factories active. Sherbrooke reported the sash, door and wooden box factories active, and the chair and organ factories fairly well employed. At Toronto the sash, door and planing mills were steadily employed; the wooden box makers were active; the furniture factories were fairly active, and the piano and gramaphone plants were busy, with a shortage of labour. Hamilton reported the sash, door and planing mills fairly well employed, and the rest of the woodworking

and furniture group active. At Niagara Falls and Brockville the sash, door and planing mills were fairly well employed. At Kingston the planing mills and broom factories were active, while the piano factory reported business as fair. The planing mills at Belleville were very busy, but the output of the furniture factories was affected by the scarcity of skilled workers. Peterborough reported the planing mills very active, and Galt reported the wooden box factories also active. At Brantford the piano case company was very busy. Kitchener reported sash, door and planing mills working full time and that the wooden box and furniture factories were in need of skilled and unskilled workers. Cooperage firms and wooden toy factories were very busy, but the broom factories reported business only fair. The piano and organ factories ran full time. Woodstock reported a shortage of bench hands and finishers in the furniture factories, also a shortage of skilled woodworkers and finishers in piano and organ factories. At London the wooden box company was exceptionally busy, and the barrel company worked at full capacity. The broom factory was burnt down, but is starting up again. At Chatham the wooden box factories were rather quiet owing to the closing down of the abattoir and packing houses. Windsor reported the sash, door and planing mills rather dull for the season of the year; the piano factory was also rather quiet. At Owen Sound the planing mills reported business better than last month, but still rather quiet. The sash, door and planing mills at Sault Ste. Marie were exceptionally busy owing to the increased activity in building. At Winnipeg the sash, door and planing mills reported business fair, while at Brandon and Regina they worked full time. Medicine Hat reported a slight scarcity of labour. The planing mill at Lethbridge was very active. Fernie reported that owing to flood conditions prevailing in the locality, there was a temporary cessation in work, but that towards the latter part of the month the sash and door factories and planing mills were well employed. At Vancouver the sash, door and planing mills and wooden box factories were running at capacity. There was a reduction in the number of brooms made, but the demand was steady. The manufacture of wooden toys, a recent industry in British Columbia, gave employment to a number of girls and women. New Westminster reported the sash and door factories working full time, with large orders ahead; also that the wooden box factories were working to capacity owing to the heavy demand for fruit and berry boxes. At Victoria the wooden box factories worked steadily on export orders.

Leather, boots, shoes and rubber

At St. John the boot and shoe factories gave employment to about 60 hands and the tannery business was reported good. Fredericton reported that the shoe factories and larrigan establishments were actively employed and that other workers were also busy. At Montreal the boot and shoe industry showed some improvement over the previous month, some orders having been received from the Government for army shoes; tanners had great difficulty in securing the necessary supplies. Quebec reported that the leather group was rather quiet, while at Sherbrooke it was reported as fair. St. Hyacinthe reported increasing activity in the leather groups, due to some large contracts for military boots having been secured. Three Rivers reported a slight improvement over previous months. At Toronto the boot and shoe and harness manufacturers had a busy month, while the rubber plants operated to capacity. At Hamilton the leather group was reported as active, and at St. Catharines the rubber footwear factories were well employed. The shoe-parts factory at Niagara Falls reported a shortage of female help. Kingston reported the boot and shoe factories fairly well employed, while the Davis Tannery Company was active. Belleville reported that while the Mackintosh Rubber Company had been dormant for some time

a resumption of work was expected in the near future. The shoe factories at Galt were slightly busier than in the previous month, and that owing to the shortage of help they were compelled to employ a few inexperienced hands. At Kitchener the boot and shoe factories were working full time; the trunk and bag factories reported trade very good, and both tanneries were running full time and in need of help. The Dominion Tire Company was very busy and short of help; this firm has again inaugurated the three eight-hour shifts instead of two twelve-hour shifts in the pressing rooms. The Kaufman rubber factories were very busy and in need of more girls and men. Guelph reported that the rubber tire and rubber goods factories were actively employed. At Stratford the tannery and harness makers were busy, while at Woodstock there was some demand for unskilled men in the tanneries. London reported the boot and shoe factories busy, and the tanneries, harness and other companies very busy. St. Thomas reported a scarcity of skilled shoe workers. At Windsor the trunk and harness manufacturers were quiet. At Winnipeg the trunk, bag, harness and horse goods factories had a fairly busy month. At Brandon the tanneries were fairly well employed, but the trunks and horse goods manufacturers were busy. Calgary reported the trunk, harness and horse goods workers fully employed. Vancouver reported the boot and shoe factories busy.

Clay, glass and stone

St. John reported the cut stone and granite business improved during the month owing to street paving being carried on. At Moncton the Humphrey's glass works closed down for two weeks for repairs and additions. At Fredericton the cut stone and granite workers were rather quiet, but the brick makers were well employed. At Quebec the cut stone and granite cutters were dull, while at Sherbrooke the brick makers were also quiet. St. Hyacinthe reported that the stone and granite cutters were quiet, but that the brick makers were active, and that the limekilns were in full operation. At St. Johns the Standard Clay Products Co. worked full time. Hamilton reported the stone, granite, brick, cement and glass groups as all being active, with a demand for labour in the pottery and porcelain business. Kingston reported the cut stone and granite business dull; but at Galt the stone cutting and allied trades were all reported as active. At Brantford the brick yards were running full time. At Kitchener the marble cutters and monument makers were fairly busy but the brick and tile makers were rather dull. At Stratford the brick, tile and sewer pipe workers were all busy. The brick yards at London were all dull; the Waide Brothers Company are making tile this year instead of brick. At Chatham the brick makers reported trade very quiet but the cement block and tile plants were very active. Windsor reported that cement block and granite faced block workers were dull. Sault Ste. Marie reported greater activity among the brick making concerns. The brick yards at Brandon remained closed down. Regina reported the cut stone and granite workers employed full time. At Medicine Hat the brick and tile plants reported business brisk, with difficulty in securing sufficient help; the stoneware industry continued normal. At Lethbridge, brick making was carried on to a limited extent in the common stock brick. At Vancouver the cut stone and granite workers were quiet. Victoria reported that the cement works at Todd Inlet resumed operations, a considerable number of men being employed; the pottery and tile business was reported quiet. At Nanaimo the brick yards were closed down.

Paints, oils chemicals, explosives

Newcastle reported that the Miller Extracts Limited, manufacturers of tanning extracts, were well employed. Quebec reported the cartridge and ammunition factories very busy. Sherbrooke reported gun powder, acids, extracts, drugs and medicines well

employed. Three Rivers reported the paint shops of Red Mills busy. At Toronto the paint and varnish factories were active; the chemical works had plenty of business, but owing to American embargos had much difficulty in obtaining material. Hamilton reported the chemical and explosive groups active. At Brantford the Scarfe Varnish Company reported a very busy month, while the Canada Glue Company was working day and night. At Windsor the Standard Paint and Varnish Company were busy the earlier part of the month, but became a little slack towards the end of the month; the soap and perfume companies were both busy and required additional female help. The formation of a company to manufacture aniline and other dyes has been completed by Hiram Walker and Sons, distillers, of Walkerville: they will also build a factory at Walkerville to manufacture tulol. Sault Ste. Marie reported that the two large chemical plants were running day and night. At Regina the oil works were running full time, but with a decreased staff; the soap works were running full time, after having received a supply of oils, of which they were very short. Vancouver reported the petroleum refinery normally and the paint manufacturers were busy. At Victoria the paint and soap factories were busy on local and out of town orders.

Railways, shipping and 'longshore work

Earnings of the Canadian Pacific Railway during May were $13,314,116, as compared with $14,355,149 for the same month in the previous year. At Halifax the street railway company were forced, owing to the shortage of motormen and conductors, to reduce the number of cars; women conductors were being employed to some extent. 'Longshoremen were as busy as is usual at this time of the year; transfers and garages had a very busy month. Truro reported a shortage of railway workers. St. John reported considerable traffic in the freight and passenger departments of the steam railways, and the railway repair shops were kept busy; but 'longshore work was dull. Newcastle reported all classes of rail transportation busy; but that, with the exception of tug boat men, marine workers were dull, due to the scarcity of tonnage. Montreal reported that the steam railroads did a capacity freight business, as well as a considerable amount of passenger traffic; the railroad repair shops were busy. The street railway employees had an increase in wages of approximately 22 per cent. 'Longshoremen were busy. At Quebec the stream railways were very busy handling freight, but the passenger traffic was less than is usual in the summer season; street railway employees reported a quiet month; navigation was very active, with a shortage of vessels to meet the demand. Sherbrooke reported steam and electric railways and railway repair shops active. Toronto reported that the steam and street railway employees were active, and that the railway repair shops had plenty of work; the street railway company were making preparations to employ women as conductors. 'Longshoremen were fairly well employed. Hamilton reported that the steam railways were doing a capacity business and that the inland navigation lines were all active, both with freight and passenger business. Brockville reported that navigation, including 'longshore work, was rather quiet, owing to the small quantities of coal arriving. At Kingston the railway repair shops were busy, while a considerable number of men were employed at 'longshore work. Belleville reported that the railways were busy and that considerable freight was shipped by water during the month. At Kitchener the steam railways reported a slight falling off in passenger and freight traffic, but the electric lines reported business better than in the previous month; garages were very busy. At London the street railway company were busy owing to summer traffic; an increase in pay was awarded to all their employees. The Grand Trunk car shops were busy and employed some female help. St. Thomas

reported a decided falling off in the business done by local railroads compared with the previous month, and in the early part of the month a considerable reduction was made in the number of crews, but towards the close some of these crews were re-instated. At Winnipeg the railroad shops were steadily employed; the demand for experienced men in railroad and contract shops was pronounced. The machinists went out on strike on the 21st of the month. The street railway company reported an increase in business due to the summer season, but that no difficulty had been experienced in getting a sufficient number of men. Brandon reported that the steam and street railway workers were fairly well employed, but that the railway repair shops were dull: the garages were busy. At Regina the street and electric railways reported an improvement in business, while the railway repair shops were busily employed. At Moose Jaw there was a walkout in the Canadian Pacific Railway repair shops in sympathy with the employees of the Winnipeg shops; the men returned to work, however, in a few days. At Medicine Hat, the Canadian Pacific Railway reported a continued scarcity of unskilled labour. Lethbridge reported the street railway as fairly busy. At Calgary the three local railroads were fully employed with transportation and shipments. New Westminster reported that business on the street and electric railways was exceptionally good; and the railway repair shops were very busy. Victoria reported that tourist traffic on the railways and steamships was not as brisk as in former years.

Mining

Sherbrooke reported chrome iron, copper, and asbestos mining active, with a shortage of labour in all three branches: the mills and concentrators were active. The granite quarries were quiet, due partly to a shortage of men, but the gravel pits were actively employed. The Cobalt mines continued to suffer from a scarcity of labour. During June a total of 42 cars, containing 3,280,017 pounds of ore were shipped; as compared with 53 cars, containing 4,084,150 pounds in May. Bullion shipments in June were 418,689 ounces of silver, as compared with 690,762 ounces in May. At Porcupine the Hollinger Consolidated and the McIntyre-Porcupine mines produced the usual amount of gold, but the Porcupine V.N.T., discontinued mining operations during the month preparatory to closing down its mill. At Kirkland Lake, the Lake Shore mine produced $43,000 in gold. The construction of a 150-ton mill is proceeding; this will make the fourth mill in the district. Sault Ste Marie reported the Michipicoten, Helen and Magpie iron mines were running day and night, and that miners were in demand. Fernie reported that in the East Kootenay district there was a decrease in ore shipments during the month. The shipments for the month were: Sullivan mine 963 tons; St. Eugene mine, No. 2, 33 tons. At Rossland the gold mines continued to be closed down. At Trail only one copper furnace was running, but the lead furnaces and refineries employed about 1,100 men as usual. At Nanaimo the quartz mines were very quiet.

Sydney reported the output of the Dominion Coal Company as 275,000 tons: against 293,000 tons in May. The output at Sydney Mines was 42,800 tons; compared with 45,000 tons last month. The coke output of the Sydney Mines was 8,950 tons with 185 ovens in operation; and of the Dominion Company 42,000 tons with 540 ovens in operation. Westville reported that the coal companies operating in that district all worked steadily and that the output from the Acadia Coal Company's Albion mine was being gradually increased. The Drummond Company worked full time, raising 700 tons per day. Fredericton reported that there was increased activity in the Minto coal mines during the month. Lethbridge reported coal mining very active with a constant demand for more miners. Calgary reported that the coal mines of the district were being gradually worked to a greater capacity,

and that additional men were employed during the month. Fernie reported a continued activity in coal mining and coke manufacturing, despite the shortage of labour. Nanaimo reported that the coal mines on the Island were working to their capacity, but were very short of labour, especially skilled miners and drivers.

Building and Construction

Sydney reported that building and construction continued to be dull. Halifax reported that apart from repairs to damaged buildings and erection of houses to replace those totally destroyed no new work was being undertaken, but help of all kinds was in demand. Westville reported that the building trades were dull. Truro reported that carpenters and painters were all busy and in need of skilled help. Moncton reported that with the exception of the work on the Brunswick hotel building, building operations were very quiet and attributed this to the high prices of material and the scarcity and increased cost of labour. At Fredericton the building trades were well employed and there was some demand for masons, carpenters, bricklayers and painters. Quebec reported that building was practically confined to repairs, but that it was difficult to secure sufficient labour to meet the small demand. Sherbrooke reported the building trades fairly well employed. At Ottawa there was a steady demand for labour, more particularly unskilled, in building operations. Toronto reported that many dwellings were in course of erection, but that there was comparatively little construction of large buildings. The building trades at Hamilton and Niagara Falls were well employed, mainly upon dwellings. Brockville and Kingston reported the building trades quiet, but Belleville reported a falling off in employment on dwelling houses. Peterborough reported a considerable increase in the amount of building going on; the Peterborough Canoe Company are re-erecting their plant, which was destroyed by fire last winter. Brantford reported that the building trades were well employed. Guelph and Woodstock both reported building and construction dull. At London conditions were very dull. St. Thomas reported a decided improvement, although the work done was principally on repairs, but Windsor and Owen Sound reported that practically no building had been done. Sault Ste. Marie reported conditions in the building trades had slightly improved. Winnipeg reported that there was sufficient work to accommodate the number of men available. At Brandon employment in the building trades was somewhat steadier and wages were slightly higher than in the previous months. Regina reported that the erection of dwelling houses and commercial buildings had increased considerably and that there was a demand for labour, expecially carpenters. Moose Jaw reported that there was some difficulty in securing the labour necessary for the small amount of building that was going on. At Prince Albert the building trades were well employed. Medicine Hat reported considerable activity both in dwelling houses and industrial buildings. Vancouver reported that the building trades, although quiet, absorbed all the labour available. At New Westminster building was practically at a standstill. Nanaimo reported that with the exception of the houses being erected by the Granby Mining Company, that practically no building was going on.

Lumbering

Westville reported that notwithstanding the high prices for stock (scantling and rough boards selling for from $32 to $38 per M.) the lumbering business continued to be active, and that large shipments were made in all grades. At St. John the saw and shingle mills were all running steadily. Newcastle reported that heavy rains, during the latter part of the month, brought into safe waters many drives that had been hung up, and that all the local mills that are going to cut this season, were in operation, and working short handed. At

Fredericton the lumber mills were running at full capacity. Quebec reported that in the outside lumbering industry drives were nearly finished; these were effected easily on some rivers and with difficulty on others. Outside sawmills began their season's cut, which will be very much inferior to those of preceding years. Sherbrooke reported the railway tie camps were quiet, but that saw and shingle mills were fairly well employed. Peterborough reported that the sawmills were working to full capacity, but that as logs were rather scarce, they did not expect to have a long season. Owen Sound reported that a supply of logs had arrived and that the sawmills were in operation. At Sault Ste. Marie the sawmills were all busy and in need of more men. At Port Arthur and Fort William there was a general demand for labour in the sawmills. At Prince Albert the Big River sawmills were operating full time and expected to cut a large amount. Calgary reported that there was still a fair demand for men in the lumber camps and sawmills. The lumbering industry at Vancouver was very busy in all its branches, and skilled men were very scarce. New Westminster reported that the saw and shingle mills were all running to full capacity. Nanaimo reported that the logging camps in the district were working steadily, but could not get sufficient men. The same applied to the sawmills, but the shingle mills were quieter. Logging operations in the vicinity of Victoria were active, particularly in the cutting of spruce, owing to the great demand for this wood in building aeroplanes; the general demand for lumber, largely of an export character, continued to be good.

Fishing

Sydney reported the catch of herring as fair and of lobsters as good; but that cod, haddock and halibut was scarce; while the catch of mackerel amounted to only ten per cent of that of June, 1917. The month was very stormy and the fishermen lost heavily in gear. St. John reported that the sardine factory of the Booth Fisheries Limited will be in operation by July 1. This factory will employ about 60 men and 120 girls. Three Rivers reported that with the exception of a few good catches of shad, there was very little fishing done in the district. Vancouver reported that fishermen were very busy and that better weather generally had resulted in heavier catches, though high winds at night had been more frequent than usual and had interfered periodically with the industry. The fish canning industry was also reported very busy. New Westminster reported that salmon fishing was temporarily at a standstill, and that indications were that only a small number of fishermen would be on the river when the season opens. One of the herring canneries was fully employed and several other canneries were preparing to start operations. Victoria reported that owing to better weather conditions the catch of whales had shown considerable improvement during the month.

PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT DURING JUNE, 1918

DURING the month of June the Department received reports from five Boards of Conciliation and Investigation appointed to inquire into disputes affecting (1) the Pere Marquette Railway Company and its maintenance of way employees; (2) the Grand Trunk Railway and its stationmen; (3) the London Street Railway and its motormen, conductors and barnmen; (4) the Corporation of Winnipeg and its civic employees, and (5) A. Davis and Sons, Limited, of Kingston, and their leather workers; also a report from the Royal Commission appointed to inquire into the unrest existing in the coal mining, steel making and shipbuilding industries of Nova Scotia.

Ten applications for the establishment of Boards were dealt with and further appointments were made to Boards previously established.

Applications Received
